xc: Parties to Case No. U-21534
Mark Templeton – University of Chicago

STATE OF MICHIGAN
BEFORE THE MICHIGAN PUBLIC SERVICE COMMISSION

In the matter of the application of **DTE ELECTRIC COMPANY** for authority to increase its rates, amend its rate schedules and rules governing the distribution and supply of electric energy, and for miscellaneous accounting authority

Case No. U-21534

ALJ Sally Wallace

PETITION TO INTERVENE BY WE WANT GREEN, TOO

1. We Want Green, Too, a Detroit, Michigan-based nonprofit organization whose members include customers of DTE Electric Company (“DTE”), seeks to intervene in this case to represent the interests of its members in receiving cost-effective electricity that is generated and delivered through prudent and environmentally sound practices.

2. We Want Green, Too is a grassroots, frontline, community-led organization focused on giving military veterans and members of Detroit’s East Side community opportunities to build environmental literacy, obtain green job readiness to become leaders in the emerging green economy, and return to communities as productive citizens. The organization started with an experimental energy efficient renovation for a home in Jackson, MI with four military veterans. After this, We Want Green, Too returned to Detroit’s East Side to rebuild a blighted 2200 square foot home with energy efficient retrofits to illustrate how to build homes that reduce the cost of utilities and increase health by creating healthy, clean indoor air spaces. We Want Green, Too also promotes energy education by equipping military veterans with solar installation and energy efficiency retrofitting skills, empowering them to address issues of air pollution, energy burden, and unemployment.

3. We Want Green, Too's members live, use electricity, and pay electricity bills in DTE's service territory. The rates, terms and conditions, and policies governing the provision of electricity by DTE directly affect We Want Green, Too's members.

4. We Want Green, Too's members have a strong interest in having their electricity needs met in an affordable, dependable, environmentally responsible, and safe manner and provided at costs that are relatively stable over the long term and allocated fairly among customer classes.

5. We Want Green, Too's members have the potential to be harmed if they incur higher, unreasonable, or unjust costs for electricity or if they continue to bear disproportionate environmental, safety, and public health burdens caused by imprudent or unreasonable utility practices.

6. The Michigan Public Service Commission ("MPSC") recognizes two types of intervention:

- a. The first type is intervention by right, which requires that the party will suffer an injury-in-fact as a result of the outcome of the case and that the party is within the zone of interests protected by the statute. *See, e.g., Association of Data Processing Service Organizations, Inc. v. Camp*, 397 U.S. 150; 90 S. Ct. 827; 25 L.Ed.2d 184 (1970).
- b. The second type of intervention is permissive; the Commission has the discretion to permit a party to intervene in the case where that party can provide useful information to the Commission or a unique perspective on the issues in the case.

7. We Want Green, Too qualifies for intervention under both standards and will provide useful information to the Commission and a unique perspective on the issues.

8. With respect to intervention by right, We Want Green, Too's members include electric customers of DTE who could suffer injury-in-fact as a result of the outcome of the case. We Want Green, Too's members are directly impacted by DTE's provision of electricity and billing practices and will suffer adverse financial consequences from an imprudent or unreasonable outcome of this rate case.

9. We Want Green, Too's members are within the zone of interest protected by MCL 460.1, *et seq.* These statutes generally protect ratepayers and provide opportunities for advocacy by ratepayer groups to protect their interests in Commission proceedings.

10. We Want Green, Too also meets the standard for permissive intervention in this proceeding. As a community-led organization representing a heavily energy burdened community, We Want Green, Too and its members will provide a unique perspective on and bring useful information to the issues in this case as described in paragraphs 2 through 5 and 8 and 9 above. We Want Green, Too staff have useful information and extensive knowledge and experience in the areas of renewable energy, energy efficiency, green building work, and energy affordability, and they will bring this expertise to bear in this proceeding.

11. We Want Green, Too has previously intervened in U-20836 and U-21297 (concerning DTE Electric's requested rate increases), U-21172 (concerning DTE Electric's Voluntary Green Pricing program and other approvals), U-21193 (concerning DTE Electric's proposed Integrated Resource Plan), and U-21291 (concerning DTE Gas's requested rate increases).

12. This petition to intervene is timely and before the close of the period for intervention set in the notice of prehearing.

13. No other party adequately represents the interests of We Want Green, Too and its members.

14. We Want Green, Too plans to evaluate DTE's application, testimony, and exhibits, and to conduct discovery, and then to raise those issues and take those positions that best serve the interests described above. We Want Green, Too reserves the right to advance other issues and request relief as the case develops.

15. If allowed to intervene, We Want Green, Too requests that all notices and pleadings be served on the following:

Amanda Urban (P80915)
Attorney
University of Chicago Law School – Abrams Environmental Law Clinic
