RE: Case #U-21534

Dear Michigan Public Service Commissioners,

I am the President of Xtreme Powerline Construction, a business located in Port Huron Michigan. I am writing to express my support for DTE's electric rate case. DTE has a 15-year commitment to put Michigan first by prioritizing spending with in-state businesses. This commitment creates jobs and supports hard working companies like mine succeed and in turn invest in our communities.

Xtreme's partnership with DTE is the reason Xtreme has been able to grow exponentially in Michigan within recent years. Xtreme started with a small footprint chasing storms across the country and now employs hundreds of local people providing gainful, stable employment with competitive wages and benefits. It is Xtreme's commitment to continue to support our community and communities across Michigan.

DTE has extended their trust to us and our Michigan employees to consistently deliver a quality product, on time at a competitive price. We have extended that trust by making it our priority to partner with other Michigan businesses to execute on our commitment to DTE. We always procure locally when possible and engage small local businesses to support our work. All of our work across the country is supported by a Michigan based support staff out of our Port Huron office.

DTE encourages us to pay it forward by supporting our community, Xtreme is proud of the dollars and time we invest to do so. We support a number of local charities such as the St. Clair County Child Abuse and Neglect Council, Kids in Distress, and Tires and Treads. It is our partnership with DTE that allows us to continue to support local charities and causes, investing heavily back into Michigan communities.

Thank you for considering how DTE's investments and support of Michigan businesses create a ripple effect that translates into greater prosperity in local communities.

Sincerely,

Scott Sheldon
President,
Xtreme Powerline Construction, Inc.
