Re: Case #U-21534

Dear Michigan Public Service Commissioners,

I Jacob Beauchamp am writing to express my strong support for DTE's electric rate case. DTE's 15-year commitment to prioritize spending with Michigan-based businesses is invaluable to our local economy, creating jobs and enabling companies like mine to thrive.

At Infrasource Construction, we are proud to hire local talent and collaborate with third-party contractors rooted in Michigan, particularly in Detroit. Our partnership with DTE has been instrumental in our growth, and we have experienced an incredible 533% increase since 2015. This growth has not only benefited our 190 direct employees but has also positively impacted the communities we serve.

DTE's investment in and mentoring of local businesses encourages us to give back. We proudly support initiatives like The Heat and Warmth Fund (THAW) and Michigan Construction Career Days. Our ongoing collaboration with DTE has enabled us to participate in Detroit's young talent program and employ veterans through skill bridge programs.

DTE's commitment to local partnerships creates a ripple effect that enhances prosperity across our communities. We are grateful for the trust DTE places in us to deliver quality products at competitive prices, which motivates us to continue investing in our partnership and our community.

Thank you for considering how DTE's investments in Michigan businesses contribute to our collective success.

Sincerely,

Jacob Beauchamp
Director, Infrasource Construction LLC
