Ms. Lisa Felice
Executive Secretary
Michigan Public Service Commission
7109 West Saginaw Highway
Post Office Box 30221
Lansing, MI 48909

RE: MPSC Case No. U-21985 – In the matter of the application of Consumers Energy Company for approval of the sale of its River Hydroelectric Generating Fleet, related Power Purchase Agreement, and other relief.

Dear Ms. Felice:

Enclosed for electronic filing in the above-captioned case, please find the **Redacted Versions of Consumers Energy Company's Application and Supporting Testimony and Exhibits of Company witnesses Richard T. Blumenstock, Jason R. Coker, Adam J. Monroe, and Angela Thompkins**.

Confidential versions of the Application Attachments and Testimony and Exhibits of Company witness Blumenstock will be filed under seal with the Executive Secretary of the MPSC.

This is a paperless filing and is therefore being filed only in PDF. I have included a Proof of Service showing electronic service upon the parties.

Sincerely,

Bret Totoraitis

STATE OF MICHIGAN

BEFORE THE MICHIGAN PUBLIC SERVICE COMMISSION

In the matter of the application of **CONSUMERS ENERGY COMPANY** for approval of the sale of its River Hydroelectric Generating Fleet, related Power Purchase Agreement, and other Relief	)))))))	Case No. U-21985

APPLICATION

Consumers Energy Company ("Consumers Energy" or the "Company") hereby applies for (i) approval, pursuant to MCL 460.6q, of the sale of its 13 river hydroelectric generating plants (the "Facilities") to Confluence Hydro, LLC ("Confluence"), (ii) approval, pursuant to MCL 460.6j, of the Power Purchase Agreement ("PPA") between Consumers Energy and Confluence, including a Financial Compensation Mechanism ("FCM") on PPA payments, and (iii) approval of deferred accounting treatment for the gain on the sale and certain offsetting expenses related to the sale.

As discussed in more detail in this Application and in the Company's testimony and exhibits, the transaction will yield significant benefits to Consumers Energy's customers because it allows Consumers Energy to transfer substantial future operational and environmental liabilities and risk to Confluence and because it is the lowest-cost option for the future of these plants. The transaction also benefits the state of Michigan and the numerous local communities where the Facilities are located by preserving the dams and related impoundments, which provide important economic and recreational benefits in those communities and to the state. The sale of these Facilities provides the only viable option concerning the future of these Facilities in which

customers, the communities, the employees, the buyer, the seller, and the state of Michigan all win. In support of this Application, Consumers Energy respectfully states the following:

I. BACKGROUND

1. Consumers Energy currently owns and operates the Facilities, which were built between 1905 and 1936, across five river systems. The facilities have been generating power for Consumers Energy's customers for over one hundred years, on average. The plants provide approximately 132 MW of nameplate capacity and have approximately 440,000 MWh of average annual energy production. They have operating licenses issued by the Federal Energy Regulatory Commission ("FERC"), which are set to expire between June 2034 and May 2041. As the relicensing process – which can take up to seven years to complete – approached, Consumers Energy began evaluating the future of the Facilities. The aging plants require significant capital investments in order to maintain their FERC operating licenses. In Consumers Energy's 2022 electric rate case, Case No. U-21224, numerous parties, including the MPSC Staff, questioned the economic justification for making those required investments to keep the Facilities operating. In a settlement agreement approved by the Commission in Case No. U-21224, Consumers Energy agreed to conduct a disposition analysis of the Facilities, including an analysis of the potential to sell the plants.

2. Consumers Energy engaged a third-party engineering firm to provide an independent assessment of the disposition options, which identified three principal options: (i) relicensing and continued operation, (ii) sale, and (iii) decommissioning. The assessment included development of business models supporting each option so that the financial impact was known. The Company also hosted numerous community engagement opportunities, including public meetings and establishing local prosperity groups to gather feedback, beginning in 2022 and continuing throughout the assessment process. The Company worked

closely with communities near the facilities through this entire process. The independent assessment ultimately supported sale of the Facilities as the best available option. Likewise, the Company's filing in this case, based on Consumers Energy's own business case analysis, demonstrates that selling the Facilities is the lowest cost option with the least cost risk. Community input was also significant in reaching the decision to sell the Facilities.

3. In August of 2023, the Company announced its intent to conduct a Request for Proposals ("RFP") to purchase the Facilities. In February of 2024, the Company issued a Stage 1 RFP with bids due in March of 2024. Stage 1 focused on bidder qualification and indicative transaction pricing. Forty-one counterparties expressed interest in participating in the RFP. In March of 2024, the Company received 15 bids. The Company reviewed the bids through a rigorous evaluation and accepted seven of those bids to continue to Stage 2 of the RFP, which began in April of 2024. The eight bids that Consumers Energy rejected did not meet critical criteria in the evaluation. Stage 2 of the RFP involved detailed due diligence and submission of final transaction pricing. In August of 2024, two of the seven accepted bidders submitted a final bid. The other five bidders electively decided to withdraw from the RFP. The Company commenced negotiations in October of 2024 and concluded negotiations in August of 2025 at which time, the Company signed a Purchase and Sales Agreement ("PSA"), a PPA, and other related agreements with Confluence.

II. PARTIES TO THE TRANSACTION

4. Consumers Energy is, among other things, engaged as a public utility in the business of generating, purchasing, distributing, and selling electric energy to approximately 1.9 million retail customers in the state of Michigan. The retail electric system of Consumers Energy is operated as a single utility system in which the same rates and tariffs are applicable.

5. Consumers Energy's retail electric business is subject to the jurisdiction of the Michigan Public Service Commission ("MPSC" or the "Commission") pursuant to certain provisions of 1939 Public Act ("PA") 3, as amended, MCL 460.1 *et seq*; 1909 PA 106, as amended, MCL 460.551 *et seq*; and 1909 PA 300, as amended, MCL 462.2 *et seq*; and the Commission's Rules of Practice and Procedure, as amended, 1992 AACS, R460.17701 *et seq*.

6. Confluence is a wholly owned subsidiary of Hull Street Energy ("Hull Street"). Hull Street is a private equity firm that has significant experience owning, operating, and investing capital in power generation assets across North America, including river hydroelectric generation. The Hull Street team has a long track record of owning and operating hydroelectric facilities across North America, including acquisition and improvement of 47 hydroelectric assets within the past decade. Hull Street currently owns one hydroelectric dam, Boott Hydro located in Lowell, Massachusetts. Hull Street is a member of the National Hydropower Association which keeps them informed of industry standards and best practices

III. THE TRANSACTION

7. Consumers Energy has agreed to sell the Facilities and transfer associated liabilities to Confluence by entering into four primary and interdependent agreements with Confluence. The four agreements include the PSA, the PPA, a Regulatory Disallowance Agreement ("RDA"), and the Environmental Indemnity Agreement ("EIA"), all of which work together to effectuate the transaction.

8. Under the PSA, Consumers Energy will receive $13 from Confluence as the purchase price for the assets ($1 per facility), however, the majority of the value to Consumers Energy and its customers results from the transfer of substantially all liabilities, including environmental liabilities, associated with the Facilities. The EIA is necessary to effectuate Confluence's assumption of the environmental liabilities associated with the Facilities.

Consumers Energy's agreement to enter into a PPA for the output of the Facilities after the sale closes is a material part of the overall transaction. Under the PPA, Consumers Energy will pay Confluence a base PPA price of $160 per MWh[1] with a 2.5% annual escalation adjustment for the energy, capacity, and renewable energy credits ("RECs") associated with the energy produced at the facilities over the next 30 years. The PPA price ensures that Confluence will have sufficient annual revenues to fund capital and maintenance, and Confluence will be incented to safely and reliably operate the Facilities so that it can receive revenue, through the PPA price, for the entire term of the PPA. Finally, the RDA provides Confluence with security in the event of any future disallowance of payments under the PPA. Commission approval of all parts of the transaction are required in order for Consumers Energy and Confluence to successfully proceed to close the transaction.

9. The PSA also provides for the transfer of the Company's employees that support the Facilities to Confluence (or an affiliate of Confluence). This ensures that the Facilities will continue to operate with a staff composed of the same experienced employees that have supported the safe and reliable operation of the plants for many years.

10. The PPA qualifies for a financial incentive (referred to in this filing as the Financial Compensation Mechanism) under the provisions of MCL 460.6t(15) and MCL 460.1028(8) because Confluence is not affiliated with Consumers Energy and because the Facilities are renewable energy resources within the meaning of those statutes.

[1] The PPA with Confluence does not set the avoided cost rate for Consumers Energy under the Public Utilities Regulatory Policy Act of 1978, 16 USC 824a-3. FERC generally delegates authority to state regulatory agencies to establish avoided cost rates, subject to certain guidance found in federal regulations. See 18 CFR 292.304(e). Federal regulations expressly authorize state regulatory agencies to set avoided cost based on the results of annual competitive solicitations. 18 CFR 292.304(e)(1); see also 18 CFR 292.304(b)(8). The Commission adopted a competitive solicitation approach for setting Consumers Energy's avoided cost in its June 23, 2022 Order in Case No. U-21090. This PPA was not the product of that competitive solicitation process and was not entered for the purposes of acquiring new electric generation capacity.

11. The PSA requires Consumers Energy to obtain all required regulatory approvals on terms acceptable to both Consumers Energy and Confluence in their respective discretion as a condition precedent to closing the transaction, including the approval required from the MPSC for the sale under MCL 460.6q and approval of the PPA under MCL 460.6j. MCL 460.6q establishes a 180-day deadline for a final Commission decision on an application seeking approval of a qualifying asset sale under that statute. FERC approval is anticipated to take up to 18 months.

IV. FILING REQUIREMENTS UNDER MCL 460.6Q AND R 460.303

12. Together with this Application, Consumers Energy is filing the direct testimony and exhibits of Richard T. Blumenstock, Jason R. Coker, Adam J. Monroe, and Angela Tompkins, which will demonstrate, among other items, that the proposed sale: (i) will not have an adverse impact on the rates of Michigan customers affected by the sale; (ii) will not have an adverse impact on the provision of safe, reliable, and adequate energy service by Consumers Energy; (iii) will not result in the subsidization of a non-regulated activity through rates paid by customers of Consumers Energy; (iv) will not significantly impair Consumers Energy's ability to raise necessary capital or maintain a reasonable capital structure; and (v) is not otherwise inconsistent with the public interest. In fact, the proposed transaction will have favorable customer rate impacts when compared with decommissioning and relicensing the River Hydro Fleet. The Direct Testimony and Exhibits of Mr. Blumenstock, Mr. Coker, Mr. Monroe, and Ms. Tompkins are incorporated as part of this Application by reference.

13. For the Commission's convenience, Consumers Energy has prepared a key that identifies each filing requirement set forth in MCL 460.6q and the Commission's associated regulations, Mich Admin Code, R 460.303, and indicates where in the Company's filing each filing requirement may be found. The key is attached to this Application as Attachment A.

14. In accordance with MCL 460.6q(3)(b), which requires copies of the material acquisition documents, if available, Consumers Energy is filing the PSA, together with the other related transaction documents, and the PPA as Exhibits A-1 (RTB-1) Confidential and A-2 (RTB-2) Confidential to the Direct Testimony of Mr. Blumenstock. Certain provisions of the PSA and PPA are considered and treated as confidential information by Consumers Energy and Confluence. As such, the PSA and PPA are being filed under seal on a confidential basis pursuant to MCL 460.6q(10). The PSA and PPA are, however, being electronically filed in redacted form. The Company requests that the Commission direct the Administrative Law Judge to issue a Protective Order at the prehearing conference in this case in order to protect this confidential information. The Company is attaching a copy of the Commission's standard Non-Modifiable Protective Order as its proposed Protective Order in this case as Attachment B to this Application.

15. In accordance with MCL 460.6q(3)(e), which requires copies of the parties' public filings with other state or federal regulatory agencies regarding the same transaction, including any regulatory orders issued by the agencies regarding the same transaction, the Company includes its filings with FERC seeking (i) transfer of the licenses for each of the hydro plants included in the Facilities, (ii) amendment of the FERC licenses, and (iii) approval of the transaction under Section 203 of the Federal Power Act as Attachments C, D, and E, respectively. As of the date of this Application, no regulatory order has been issued by any agency regarding this transaction. Consumers Energy anticipates additional filings related to this transaction at the Federal Communications Commission and the Federal Trade Commission/Department of Justice at a future time. The Company will share those filings with the Commission once they have been filed with the respective agencies.

16. Consumers Energy's sale of the facilities meets all of the requirements of MCL 460.6q and the Commission's related administrative rules, R 460.303.

WHEREFORE, Consumers Energy Company requests that the Michigan Public Service Commission:

A. Make and publish its notice of opportunity to file comments and notice of hearing;

B. Give confidential treatment to the redacted confidential portions of the Purchase and Sale Agreements and the Power Purchase Agreement in accordance with MCL 460.6q(10) and direct the Administrative Law Judge to issue a Protective Order to protect the confidential information at the prehearing conference;

C. After notice and opportunity to file comment and for a hearing, approve the transaction between Consumers Energy and Confluence as proposed in the transaction documents, including the Purchase and Sales Agreement, the Power Purchase Agreement, and all other related agreements and attachments thereto within 180 days of the application as provided under MCL 460.6q(5);

D. Approve the Company's requested accounting treatment for the gain on the sale with offsets for expenses related to the transaction;

E. Affirm that the Power Purchase Agreement is eligible for a Financial Compensation Mechanism under the provisions of MCL 460.6t(15) and MCL 460.1028(8); and

F. Grant such other and further authority and approvals as may be lawful and proper.

Respectfully submitted,

CONSUMERS ENERGY COMPANY

STATE OF MICHIGAN

BEFORE THE MICHIGAN PUBLIC SERVICE COMMISSION

In the matter of the application of **CONSUMERS ENERGY COMPANY** for approval of the sale of its River Hydroelectric Generating Fleet, related Power Purchase Agreement, and other Relief	)))))))	Case No. U-21985

PROTECTIVE ORDER

This Protective Order governs the use and disposition of Protected Material that any Party discloses to another Party during the course of this proceeding. This Protective Order protects non-public, confidential information and materials so designated by the Disclosing Party as Protected Material, as defined herein. Accordingly, it is ordered:

I. "Protected Material" and Other Definitions

A. "Protected Material" consists of trade secrets or confidential, proprietary, or commercially sensitive information provided in Disclosing Party's application, exhibits, discovery or audit responses, any witness' related exhibits and testimony, motions, objections, briefing, responses to an order issued by the presiding hearing officer or the Michigan Public Service Commission ("MPSC" or the "Commission), and any arguments of counsel describing or relying upon the Protected Material. Subject to challenge under Paragraph IV.A, Protected Material shall also consist of non-public confidential information and materials including, but not limited to, the following information disclosed during the course of this case if it is marked as required by this Protective Order:

1. To the extent permitted, information obtained under license from a third-party licensor, to which the Disclosing Party or witnesses engaged by the Disclosing Party is a licensee, that is subject to any confidentiality or non-

transferability clause. This information includes reports; analyses; models (including related inputs and outputs); trade secrets; and confidential, proprietary, or commercially sensitive information that the Disclosing Party or one of its witnesses receives as a licensee and is authorized by the third-party licensor to disclose consistent with the terms and conditions of this Protective Order.

2. Information that is protected as confidential in another jurisdiction that the Applicant provides utility service, and the source of the other jurisdiction's protective designation is made known to the Receiving Party.

B. The information subject to this Protective Order does not include:

1. Information that is or has become available to the public through no fault of the Receiving Party or Reviewing Representative and no breach of this Protective Order, or information that is otherwise lawfully known by the Receiving Party without any obligation to hold it in confidence;

2. Information received from a third party free to disclose the information without restriction;

3. Information that is approved for release by written authorization of the Disclosing Party, but only to the extent of the authorization;

4. Information that is required by law or regulation to be disclosed, but only to the extent of the required disclosure; or Information that is disclosed in response to a valid, non-appealable order of a court of competent jurisdiction or governmental body, but only to the extent the order requires.

C. "Applicant" refers to the filing party in this proceeding.

D. "Disclosing Party" means a Party producing Protected Material in this proceeding.

E. "Party" refers to the Applicant, MPSC Staff ("Staff"), Michigan Attorney General, or any other person, company, organization, or association that is granted intervention in this case under the Commission's Rules of Practice and Procedure, Mich Admin Code, R 792.10401 et al.

F. "Receiving Party" means any Party to this proceeding who requests or receives access to Protected Material. A Receiving Party is responsible for assuring that persons,

representatives, or agents under its control or supervision comply with this Protective Order.

G. "Reviewing Representative" means a representative of the Receiving Party who is:

1. An attorney who has entered an appearance in this proceeding for a Receiving Party;

2. An attorney, paralegal, or other employee associated, for the purpose of this case, with an attorney described in Paragraph I.G.1;

3. An expert or employee of an expert retained by a Receiving Party to advise, prepare for, or testify in this proceeding; or an employee or other representative of a Receiving Party with significant responsibility in this case.

H. "Nondisclosure Certificate" refers to Attachment 1 to this Protective Order.

Except as otherwise provided herein, the Reviewing Party and Reviewing Representatives will be required to sign Nondisclosure Certificates. However, Nondisclosure Certificates will not be required from administrative law judges, members of the Commission and its support staff, Staff (excluding consultants, third-party experts, agents or other similar persons), and Staff counsel, for whom by virtue of their employment are presumed to be bound by the terms of this Protective Order.

II. Access to and Use of Protected Material

A. This Protective Order governs the use of all provided Protected Material. This Protective Order protects: (i) the Protected Material; (ii) any copy or reproduction of the Protected Material made by any person; and (iii) any memorandum, handwritten notes, or any other form of information that copies, contains, or discloses Protected Material. All Protected Material in the possession of a Receiving Party and a Reviewing Representative shall be maintained in a secure place. Access to Protected Material shall be limited to the Receiving

Party and the Reviewing Representative, after each has executed the Nondisclosure Agreement and provided a copy of the Nondisclosure Agreement to the Disclosing Party, subject to the limited exception in Paragraph I.H.

B. Protected Material must be used and disclosed by the Receiving Party solely in accordance with the terms and conditions of this Protective Order. A Receiving Party and Reviewing Representative may analyze the Protected Material; make or respond to discovery; present evidence; prepare testimony, argument, briefs, or other filings; prepare for cross-examination; consider strategy; and evaluate settlement. A Reviewing Representative shall not release or disclose the content of Protected Material to any other person or use the information for any other purpose.

C. The Disclosing Party may request the Receiving Party withhold certain information from a Reviewing Representative and retains the right to object to any designated Reviewing Representative if the Disclosing Party has reason to believe that there is an unacceptable risk of misuse of confidential information. If a Disclosing Party objects to a Reviewing Representative, then the Disclosing Party shall submit the dispute to the presiding hearing officer simultaneously upon objection. If the Disclosing Party notifies a Receiving Party of an objection to a Reviewing Representative, then the Protected Material shall not be provided to that Reviewing Representative until the objection is resolved by agreement or by the presiding hearing officer.

D. If a Receiving Party seeks access to Critical Energy Infrastructure Information ("CEII") as defined in 16 U.S.C § 824o-1(a)(3) and FERC rules, specifically 18 CFR § 388.113(c), the Receiving Party and Reviewing Representative shall also sign the CEII Nondisclosure Certificate (Attachment 2 to this Protective Order) and provide a copy of the

executed CEII Nondisclosure Certificates to the Disclosing Party.

E. The obligations under this Protective Order do not expire by entry of a final order in this case and are enforceable by the MPSC or a court of competent jurisdiction. To the extent Protected Material is not returned to a Disclosing Party, it remains subject to this Protective Order. Members of the Commission, Commission staff assigned to assist the Commission with its deliberations, and the presiding hearing officer shall have access to all Protected Material that is submitted to the Commission under seal.

F. A Party retains the right to seek further restrictions on the dissemination of Protected Material to persons who have or may subsequently seek to intervene in this MPSC proceeding.

G. Nothing in this Protective Order precludes a Party from asserting a timely evidentiary objection to the proposed admission of Protected Material into the evidentiary record for this case.

III. Procedures

A. The Disclosing Party shall identify what portion(s) of any document designated confidential it considers confidential. This can be done through highlights or other clear identifier. The Disclosing Party must mark any information that it considers confidential as "CONFIDENTIAL: SUBJECT TO THE PROTECTIVE ORDER ISSUED IN CASE NO. U-21985." Software executable files containing Protected Material may not be capable of being marked with the foregoing required protective language. The inability to mark software executable files containing Protected Material with such protective language shall not diminish the requirements of this Protective Order. It shall be sufficient if the medium used to deliver software executable files containing Protected Material is marked with the required protective language. However, any output from the software executable files containing Protected Material that is generated only as a reproducible document, whether electronic or non-electronic, that is

capable of being marked with the required protective language, shall be marked by the party who generated the output with such protective language and subject to the requirements of this Protective Order. If the Receiving Party or a Reviewing Representative makes copies of any Protected Material, they shall conspicuously mark the copies as Protected Material. Notes of Protected Material shall also be conspicuously marked as Protected Material by the person making the notes.

B. If a Receiving Party wants to quote, refer to, or otherwise use Protected Material in pleadings, pre-filed testimony, exhibits, cross-examination, briefs, oral argument, comments, or in some other form in this proceeding (including administrative or judicial appeals), the Receiving Party shall do so consistent with procedures that will maintain the confidentiality of the Protected Material. For purposes of this Protective Order, the following procedures apply:

1. Written submissions using Protected Material shall be filed in a sealed record to be maintained by the MPSC's Docket Section, or by a court of competent jurisdiction, in envelopes clearly marked on the outside, "CONFIDENTIAL – SUBJECT TO THE PROTECTIVE ORDER ISSUED IN CASE NO. U-21985." Simultaneously, identical documents and materials, with the Protected Material redacted, shall be filed and disclosed the same way that evidence or briefs are usually filed;

2. Oral testimony, examination of witnesses, or argument about Protected Material shall be conducted on a separate record to be maintained by the MPSC's Docket Section or by a court of competent jurisdiction. These separate record proceedings shall be closed to all persons except those furnishing the Protected Material and persons otherwise subject to this Protective Order. The Receiving Party presenting the Protected Material during the course of the proceeding shall give the presiding officer or court sufficient notice to allow the presiding officer or court an opportunity to take measures to protect the confidentiality of the Protected Material; and

3. Copies of the documents filed with the MPSC which contain Protected Material, including the portions of the exhibits, transcripts, or briefs that refer

to Protected Material, shall be marked or identified as, "CONFIDENTIAL - SUBJECT TO PROTECTIVE ORDER IN CASE NO. U-21985" and shall be maintained in a separate portion of the record under seal, segregated in the files of the Commission, and withheld from inspection by any person not bound by the terms of this Order.

C. The Protected Material subject to this Order shall be shielded from disclosure to the extent permitted by law. If any person files a request under the Freedom of Information Act ("FOIA") with the MPSC or the Michigan Attorney General seeking access to documents subject to this Protective Order, the MPSC's Executive Secretary, Staff, or the Attorney General shall promptly notify the Disclosing Party, and the Disclosing Party may take whatever legal actions it deems appropriate to protect the Protected Material from disclosure. In light of Section 5 of the Freedom of Information Act, MCL 15.235, the notice must be given at least five (5) business days before the MPSC, Staff, and/or the Michigan Attorney General grant the request in full or in part.

IV. Termination of Protected Status

A. A Receiving Party reserves the right to challenge by motion whether a document or information is Protected Material and whether this information can be withheld under this Protective Order. The Receiving Party challenging the protected status of the document must explicitly state its reason for challenging the confidential designation. In response to a motion, the Commission or the presiding hearing officer in this case may revoke a document's protected status after notice and hearing. If the presiding hearing officer revokes a document's protected status, then the document loses its protected status after 14 days unless a Party files an application for leave to appeal the ruling and a request for a stay to the Commission pursuant to R 792.10433. If the application for leave is timely, the document's protected status will continue during the Commission appeal process. Any Party opposing the application for leave to appeal

and the stay shall file an answer with the Commission no more than 14 days after the filing and service of the appeal. Continued protected status post order, will be determined by the Commission in its order addressing the application for leave and the request for stay. Nothing in this paragraph shall prohibit the Disclosing Party from seeking a stay on appeal of the Commission's decision regarding the revocation of any document's protected status.

B. The Disclosing Party bears the burden of proving that the document should continue to be protected from disclosure.

V. Retention of Documents

Protected Material remains the property of the Disclosing Party and, except as required by applicable law and State retention schedules, only remains available to the Receiving Party until the time expires for petitions for rehearing of a final MPSC order, until the MPSC has ruled on all petitions for rehearing in this case (if any), or until judicial review is completed and the time to take further appeal has expired. If the Disclosing Party seeks to have the Receiving Party return all Protected Material in the Receiving Party's possession or in the possession of its Reviewing Representatives, or certify in writing that all Protected Material has been destroyed, it is the responsibility of the Disclosing Party to contact the Receiving Party and make its request no earlier than the expiration of time for filing petitions for rehearing of a final MPSC order, until the MPSC has ruled on all petitions for rehearing in this case (if any), or until judicial review is completed and the time to take further appeal has expired. Further, for a Receiving Party that is associated with the State, the request must be consistent with the expiration of the State retention requirement.

Notwithstanding the foregoing, counsel for the Receiving Party may maintain a single confidential file of Protected Material subject to all other provisions in this Order. Should

counsel seek to refer to the Protected Material in another Commission proceeding, the Disclosing Party must be the Applicant in said proceeding and counsel must ensure there is a protective order in said proceeding which protects the Protected Material from public disclosure.

VI. Limitations and Disclosures

This Protective Order does not apply to a particular document, or portion of a document, described in Paragraph II.A if a Receiving Party can demonstrate that it has been previously disclosed by the Disclosing Party on a non-confidential basis or meets the criteria set forth in Paragraphs I.B.1 through I.B.4. A Receiving Party intending to disclose information taken directly from materials identified as Protected Material must-before actually disclosing the information-do one of the following: (i) contact the Disclosing Party's counsel of record and obtain written permission to disclose the information, or (ii) challenge the confidential nature of the Protected Material and obtain a ruling under Paragraph IV that the information is not confidential and may be disclosed in or on the public record.

VII. Remedies

If a Receiving Party violates this Protective Order by improperly disclosing or using Protected Material, the Receiving Party shall take all necessary steps to remedy the improper disclosure or use. This includes promptly notifying all Parties and the presiding hearing officer in writing. The written notice must identify the person known or reasonably suspected to have obtained the Protected Material. A Party or person that violates this Protective Order remains subject to this paragraph regardless of whether the Disclosing Party could have discovered the violation earlier than it was discovered. This paragraph applies to both inadvertent and intentional violations. Nothing in this Protective Order limits the Disclosing Party's rights and remedies, at law or in equity, against a Party or person using Protected Material in a manner not authorized by this Protective Order, including the right to obtain injunctive relief in a court of competent jurisdiction to prevent violations of this Protective Order.

VIII. Modification

Formal Addendums to this agreement may be established by an ALJ upon motion by any party and after notice and hearing.

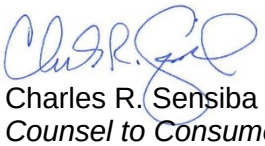
Re: Calkins Bridge Hydroelectric Project No. 785; Foote Project No. 2436; Alcona Project No. 2447; Mio Project No. 2448; Loud Project No. 2449; Cooke Project No. 2450; Rogers Project No. 2451; Hardy Project No. 2452; Five Channels Project No. 2453; Croton Project No. 2468; Webber Hydroelectric Project No. 2566; Tippy Project No. 2580; and Hodenpyl Project No. 2599
Joint Application for Approval of Transfer of Licenses and Request for Confidential Treatment of Certain Documents

Dear Secretary Reese:

Consumers Energy Company (Consumers Energy) and Confluence Hydro Calkins Bridge, LLC; Confluence Hydro Foote, LLC; Confluence Hydro Alcona, LLC; Confluence Hydro Mio, LLC; Confluence Hydro Loud, LLC; Confluence Hydro Cooke, LLC; Confluence Hydro Rogers, LLC; Confluence Hydro Hardy, LLC; Confluence Hydro Five Channels, LLC; Confluence Hydro Croton, LLC; Confluence Hydro Webber, LLC; Confluence Hydro Tippy, LLC; and Confluence Hydro Hodenpyl, LLC (collectively, Confluence Hydro Subsidiaries) (collectively, Applicants) are filing the attached Joint Application for Approval of Transfer of Licenses (Application), which seeks approval from the Federal Energy Regulatory Commission (FERC or Commission) to transfer 13 licenses from Consumers Energy to the Confluence Hydro Subsidiaries as follows:

Project	Transferee
Calkins Bridge Hydroelectric Project, FERC Project No. 785	Confluence Hydro Calkins Bridge, LLC
Foote Project, FERC Project No. 2436	Confluence Hydro Foote, LLC
Alcona Project, FERC Project No. 2447	Confluence Hydro Alcona, LLC
Mio Project, FERC Project No. 2448	Confluence Hydro Mio, LLC
Loud Project, FERC Project No. 2449	Confluence Hydro Loud, LLC
Cooke Project,	Confluence Hydro Cooke, LLC

Project	Transferee
FERC Project No. 2450	
Rogers Project, FERC Project No. 2451	Confluence Hydro Rogers, LLC
Hardy Project, FERC Project No. 2452	Confluence Hydro Hardy, LLC
Five Channels Project, FERC Project No. 2453	Confluence Hydro Five Channels, LLC
Croton Project, FERC Project No. 2468	Confluence Hydro Croton, LLC
Webber Hydroelectric Project, FERC Project No. 2566	Confluence Hydro Webber, LLC
Tippy Project, FERC Project No. 2580	Confluence Hydro Tippy, LLC
Hodenpyl Project, FERC Project No. 2599	Confluence Hydro Hodenpyl, LLC



On September 3, 2025, Consumers Energy signed a Purchase and Sale Agreement with Confluence Hydro, LLC (Confluence Hydro), a subsidiary of Hull Street Energy, LLC, to sell Consumers Energy's fleet of 13 small hydroelectric projects along five Michigan rivers (Projects). Transferring these assets to the Confluence Hydro Subsidiaries is expected to reduce long-term costs for Consumers Energy's customers, while allowing Confluence Hydro, through its Confluence Hydro Subsidiaries, to safely deliver reliable, clean energy, and support economic and recreational opportunities that Michigan communities have enjoyed for more than a century.

As explained in more detail in the Application, each Confluence Hydro Subsidiary has the requisite technical, legal, financial qualifications to hold the license for its respective Project. To demonstrate the Confluence Hydro Subsidiaries' qualifications, the Application includes supporting attachments, including the Limited Liability Company Agreement for each of the Confluence Hydro Subsidiaries (Attachment D), a summary of the specific financial terms of a Renewable Energy Purchase Agreement (Attachment E), and the resume of Jillian Lawrence, PE, MS Eng. (Attachment G). These documents contain sensitive commercial and financial information that is privileged, confidential, and exempt from the mandatory public disclosure requirements of the Freedom of Information Act. Accordingly, Applicants are filing Attachments D and E under the CUI//PRIV designation and request that the Commission place them in its non-public file.

Importantly, concurrent with the filing of this Application, Consumers Energy is filing an Application for Non-Capacity Amendments of Licenses and Request for Non-Project Use of Project Lands (License Amendment Application) in the above referenced dockets. As Commission approval of both these applications are necessary prerequisites to closing the transaction, Applicants respectfully request concurrent and prompt consideration of these applications.

Applicants appreciate the Commission's consideration of this request. Should you have any questions, please contact the counsel identified in the attached Application.

Respectfully submitted,

Charles R. Sensiba
Counsel to Consumers Energy Company

Enclosure: Joint Application for Approval of Transfer of Licenses

JOINT APPLICATION FOR APPROVAL OF TRANSFER OF LICENSES

Pursuant to section 8 of the Federal Power Act (FPA)[2] and Part 9 of the regulations of the Federal Energy Regulatory Commission (FERC or Commission),[3] Consumers Energy Company (Consumers Energy or Transferor) and Confluence Hydro Calkins Bridge, LLC, Confluence Hydro Foote, LLC, Confluence Hydro Alcona, LLC, Confluence Hydro Mio, LLC, Confluence Hydro Loud, LLC, Confluence Hydro Cooke, LLC, Confluence Hydro Rogers, LLC, Confluence Hydro Hardy, LLC, Confluence Hydro Five Channels, LLC, Confluence Hydro Croton, LLC, Confluence Hydro Webber,

[2] 16 U.S.C. § 801.

[3] 18 C.F.R. § 9.1 *et seq.*

LLC, Confluence Hydro Tippy, LLC, and Confluence Hydro Hodenpyl, LLC (collectively, Confluence Hydro Subsidiaries or Transferees) hereby file this Joint Application for Approval of Transfer of Licenses (Application), which seeks Commission approval to transfer certain hydropower project licenses from Consumers Energy to subsidiaries of Confluence Hydro, LLC (Confluence Hydro), as follows:

Project	**Transferee**
Calkins Bridge Hydroelectric Project, FERC Project No. 785	Confluence Hydro Calkins Bridge, LLC
Foote Project, FERC Project No. 2436	Confluence Hydro Foote, LLC
Alcona Project, FERC Project No. 2447	Confluence Hydro Alcona, LLC
Mio Project, FERC Project No. 2448	Confluence Hydro Mio, LLC
Loud Project, FERC Project No. 2449	Confluence Hydro Loud, LLC
Cooke Project, FERC Project No. 2450	Confluence Hydro Cooke, LLC
Rogers Project, FERC Project No. 2451	Confluence Hydro Rogers, LLC
Hardy Project, FERC Project No. 2452	Confluence Hydro Hardy, LLC
Five Channels Project, FERC Project No. 2453	Confluence Hydro Five Channels, LLC
Croton Project, FERC Project No. 2468	Confluence Hydro Croton, LLC
Webber Hydroelectric Project, FERC Project No. 2566	Confluence Hydro Webber, LLC
Tippy Project, FERC Project No. 2580	Confluence Hydro Tippy, LLC
Hodenpyl Project, FERC Project No. 2599	Confluence Hydro Hodenpyl, LLC

On September 3, 2025, Consumers Energy signed a purchase and sale agreement with Confluence Hydro, a subsidiary of Hull Street Energy, LLC (Hull Street Energy), to sell Consumers Energy's fleet of 13 hydroelectric projects along five Michigan rivers (Projects). Transferring these assets to the Confluence Hydro Subsidiaries as provided in

the purchase and sale agreement and proposed in this Application is expected to reduce long-term costs for Consumers Energy's customers, while allowing Confluence Hydro, through its Confluence Hydro Subsidiaries, to safely deliver reliable, clean energy, and support economic and recreational opportunities that Michigan communities have enjoyed for more than a century.

As demonstrated below, each Confluence Hydro Subsidiary is well qualified to hold the license for its respective Project. The Confluence Hydro Subsidiaries: (1) are legally authorized to engage in the business of hydropower generation in the State of Michigan; (2) have the requisite technical qualifications because the companies are part of a corporate family with considerable experience in the development, operation, and maintenance of FERC-licensed hydropower projects and will extend employment to the Consumers Energy hydro operations employees currently dedicated to the Projects to ensure a seamless transition in operation of the Projects; (3) have the financial resources to operate and maintain the Projects and comply with the Projects' licenses; and (4) are strongly qualified, experienced, and committed to ensuring dam safety at the Projects.

For these reasons, the license transfers sought in this Application are in the public interest and should be approved.

I. BACKGROUND

A. Description of Project Licenses Proposed for Transfer

1. Calkins Bridge Hydroelectric Project (FERC No. 785)

The Calkins Bridge Hydroelectric Project is located on the Kalamazoo River in Allegan County, Michigan, and has an authorized installed capacity of 2.55 megawatts (MW). The project generally consists of a gravity dam, powerhouse, spillway a reservoir known as Lake Allegan, transmission facilities, and appurtenant facilities. The

Commission issued a new license for the project on January 15, 2010, for a period of 30 years.[4]

2. Foote Project (FERC No. 2436)

The Foote Project is located on the Au Sable River in Iosco County, Michigan, and has an authorized installed capacity of 7.229 MW. The project occupies 484 acres of federal lands within the Huron National Forest, which is administered by the U.S. Forest Service. The project generally consists of a dam with two earth fill embankment sections, spillway, powerhouse, impoundment, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.[5]

3. Alcona Project (FERC No. 2447)

The Alcona Project is located on the Au Sable River in Alcona County, Michigan, and has an authorized installed capacity of 8 MW. The project occupies 364 acres of federal lands within the Huron National Forest. The project generally consists of a dam with two earth fill embankment sections, spillway, powerhouse, impoundment, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.[6]

4. Mio Project (FERC No. 2448)

The Mio Project is located on the Au Sable River in Oscoda County, Michigan, and has an authorized installed capacity of 3.885 MW. The project occupies 320 acres of federal lands within the Huron National Forest. The project generally consists of a dam

6 *Consumers Power Co.*, 68 FERC ¶ 61,081 (1994).

with two earth fill embankment sections, spillways, impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.[7]

5. Loud Project (FERC No. 2449)

The Loud Project is located on the Au Sable River in Iosco County, Michigan, and has an authorized installed capacity of 4 MW. A portion of the project occupies federal lands within the Huron National Forest. The project generally consists of a dam with two earth embankments, powerhouse, spillway, impoundment, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.[8]

6. Cooke Project (FERC No. 2450)

The Cooke Project is located on the Au Sable River, within the Huron National Forest in Iosco County, Michigan, and has an authorized installed capacity of 6.609 MW. The project generally consists of two earth embankment dam sections, spillway, impoundment, powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.[9]

7. Rogers Project (FERC No. 2451)

The Rogers Project is located in Mecosta County, Michigan, on the Muskegon River and has an authorized installed capacity of 5.418 MW. The project generally consists of three earth embankment dam sections, a spillway, an impoundment, a

powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.[10]

8. Hardy Project (FERC No. 2452)

The Hardy Project is located in Newaygo and Mecosta Counties, Michigan, on the Muskegon River and has an authorized installed capacity of 29.6 MW. The project generally consists of an earth embankment dam, spillway, impoundment, powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.[11]

9. Five Channels Project (FERC No. 2453)

The Five Channels Project is located on the Au Sable River, within the Huron National Forest in Iosco County, Michigan, and has an authorized installed capacity of 6 MW. The project generally consists of two earth embankment dam sections, a spillway, an impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.[12]

10. Croton Project (FERC No. 2468)

The Croton Project is located in Newaygo County, Michigan, on the Muskegon River and has an authorized installed capacity of 7.473 MW. The project generally consists of two earth embankments, a spillway, an impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license

for the project on July 15, 1994, for a period of 40 years.[13]

11. Webber Hydroelectric Project (FERC No. 2566)

The Webber Hydroelectric Project is located on the Grand River near the City of Portland, in Ionia County, Michigan, and has an authorized installed capacity of 3.25 MW. The project generally consists of a dam, reservoir, powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on June 20, 2001, for a period of 40 years.[14]

12. Tippy Project (FERC No. 2580)

The Tippy Project is located on the Manistee River, within the Manistee National Forest in Manistee County, Michigan, and has an authorized installed capacity of 14.255 MW. The project generally consists of two earth embankment dam sections, a spillway, an impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.[15]

13. Hodenpyl Project (FERC No. 2599)

The Hodenpyl Project is located on the Manistee River, within the Manistee National Forest in Manistee and Wexford Counties, Michigan, and has an authorized installed capacity of 13.884 MW. The project generally consists of two earth embankment dam sections, a spillway, an impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project

on July 15, 1994, for a period of 40 years.[16]

B. Description of the Confluence Hydro Subsidiaries

Hull Street Energy is a private equity firm headquartered in Bethesda, Maryland, that is primarily involved in the development and acquisition of, and investment in, energy infrastructure assets, and related ownership, operation, and management of these assets, including electric generation. Hull Street Energy formed Confluence Hydro to facilitate the acquisition of the Projects from Consumers Energy. Upon consummation of the transaction set forth in the purchase and sale agreement, Confluence Hydro will contribute the Projects to the Confluence Hydro Subsidiaries.

B. Description of the Confluence Hydro Subsidiaries

Hull Street Energy is a private equity firm headquartered in Bethesda, Maryland, that is primarily involved in the development and acquisition of, and investment in, energy infrastructure assets, and related ownership, operation, and management of these assets, including electric generation. Hull Street Energy formed Confluence Hydro to facilitate the acquisition of the Projects from Consumers Energy. Upon consummation of the transaction set forth in the purchase and sale agreement, Confluence Hydro will contribute the Projects to the Confluence Hydro Subsidiaries.

Each of the Confluence Hydro Subsidiaries is a special purpose entity established solely for the purpose of owning and operating its respective Project. Specifically, Confluence Hydro Alcona, LLC was formed to own and operate the Alcona Project; Confluence Hydro Calkins Bridge, LLC was formed to own and operate the Calkins Bridge Hydroelectric Project; Confluence Hydro Cooke, LLC was formed to own and

[16] *Consumers Power Co.*, 68 FERC ¶ 61,083 (1994).

operate the Cooke Project; Confluence Hydro Croton, LLC was formed to own and operate the Croton Project; Confluence Five Channels Hydro, LLC was formed to own and operate the Five Channels Project; Confluence Hydro Foote, LLC was formed to own and operate the Foote Project; Confluence Hydro Hardy, LLC was formed to own and operate the Hardy Project; Confluence Hydro Hodenpyl, LLC was formed to own and operate the Hodenpyl Project; Confluence Hydro Loud, LLC was formed to own and operate the Loud Project; Confluence Hydro Mio, LLC was formed to own and operate the Mio Project; Confluence Hydro Rogers, LLC was formed to own and operate the Rogers Project; Confluence Hydro Tippy, LLC was formed to own and operate the Tippy Project; and Confluence Hydro Webber, LLC was formed to own and operate the Webber Hydroelectric Project.

II. REQUEST FOR TRANSFER OF LICENSES

Consumers Energy and the Confluence Hydro Subsidiaries (collectively, Applicants) jointly and severally apply, pursuant to sections 4.32, 9.1 to 9.3, and 131.20 of the Commission's regulations,[17] for written approval by the Commission to transfer the above-captioned licenses. In accordance with the form set forth in section 131.20 of the Commission's regulations,[18] and in support of this Application, Applicants state, verify, and subscribe as follows:[19]

1. Consumers Energy (Transferor), licensee of the:

   Calkins Bridge Hydroelectric Project (FERC No. 785)
   Foote Project (FERC No. 2436)
   Alcona Project (FERC No. 2447)
   Mio Project (FERC No. 2448)

[17] 18 C.F.R. §§ 4.32, 9.1–9.3, 131.20.

[18] *Id.* § 131.20.

[19] Attachment A contains the Subscription and Verification for Transferor and Transferees.

Loud Project (FERC No. 2449)
Cooke Project (FERC No. 2450)
Rogers Project (FERC No. 2451)
Hardy Project (FERC No. 2452)
Five Channels Project (FERC No. 2453)
Croton Project (FERC No. 2468)
Webber Hydroelectric Project (FERC No. 2566)
Tippy Project (FERC No. 2580), and
Hodenpyl Project (FERC No. 2599), and

2. Confluence Hydro Calkins Bridge, LLC, Transferee of the Calkins Bridge Hydroelectric Project (FERC No. 785); Confluence Hydro Foote, LLC, Transferee of the Foote Project (FERC No. 2436); Confluence Hydro Alcona, LLC, Transferee of the Alcona Project (FERC No. 2447); Confluence Hydro Mio, LLC, Transferee for the Mio Project (FERC No. 2448); Confluence Hydro Loud, LLC, Transferee of the Loud Project (FERC No. 2449); Confluence Hydro Cooke, LLC, Transferee of the Cooke Project (FERC No. 2450); Confluence Hydro Rogers, LLC, Transferee of the Rogers Project (FERC No. 2451); Confluence Hydro Hardy, LLC, Transferee of the Hardy Project (FERC No. 2452); Confluence Hydro Five Channels, LLC, Transferee of the Five Channels Project (FERC No. 2453); Confluence Hydro Croton, LLC, Transferee of the Croton Project (FERC No. 2468); Confluence Hydro Webber, LLC, Transferee of the Webber Hydroelectric Project (FERC No. 2566); Confluence Hydro Tippy, LLC, Transferee of the Tippy Project (FERC No. 2580); and Confluence Hydro Hodenpyl, LLC, Transferee of the Hodenpyl Project (FERC No. 2599),

3. Hereby jointly and severally apply for the written approval by the Commission of the transfer of the aforesaid licenses from the Transferor to the respective Transferee and request that the instruments of such approval by the Commission be made effective as of the date of conveyance of each project's properties.

4. In support thereof, Transferor and each Transferee show the Commission as follows:

Confluence Hydro Calkins Bridge, LLC, Transferee for the Calkins Bridge Hydroelectric Project (FERC No. 785), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Calkins Bridge, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA,[20] certified copies of its State of Delaware Limited Liability

[20] 16 U.S.C. § 802(a)(2).

Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Foote, LLC, Transferee for the Foote Project (FERC No. 2436), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Foote, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Alcona, LLC, Transferee for the Alcona Project (FERC No. 2447), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Alcona, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Mio, LLC, Transferee for the Mio Project (FERC No. 2448), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Mio, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Loud, LLC, Transferee for the Loud Project (FERC No. 2449), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Loud, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Cooke, LLC, Transferee for the Cooke Project (FERC No. 2450), is a limited liability company organized under the laws of the

Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Cooke, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Rogers, LLC, Transferee for the Rogers Project (FERC No. 2451), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Rogers, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Hardy, LLC, Transferee for the Hardy Project (FERC No. 2452), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Hardy, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Five Channels, LLC, Transferee for the Five Channels Project (FERC No. 2453), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Five Channels, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Croton, LLC, Transferee for the Croton Project (FERC No. 2468), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Croton, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all

amendments of each to date.

Confluence Hydro Webber, LLC, Transferee for the Webber Hydroelectric Project (FERC No. 2566), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachment L, Confluence Hydro Webber, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Tippy, LLC, Transferee for the Tippy Project (FERC No. 2580), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Tippy, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

Confluence Hydro Hodenpyl, LLC, Transferee for the Hodenpyl Project (FERC No. 2599), is a limited liability company organized under the laws of the Delaware and is authorized to conduct business in Michigan. As presented in Attachments B-D, Confluence Hydro Hodenpyl, LLC submits as evidence of its compliance with all applicable State laws as required by section 9(a)(2) of the FPA, State of Delaware Limited Liability Company Certificate of Formation, Certificate of Authority to Conduct Business in Michigan, and Limited Liability Company Agreement, with all amendments of each to date.

5. Each respective Transferee will submit certified copies of all instruments of conveyance whereby title to its respective project properties is conveyed to it, upon the completion of such conveyance, if and when the Commission shall have given its approval to the proposed transfers.

6. If and when the Commission shall have given its approval to the proposed transfers, and upon completion of conveyance of the respective project property to the respective Transferee, the Transferor will deliver to the respective Transferee and the respective Transferee will accept and permanently retain all license instruments and all maps, plans, specifications, contracts, reports of engineers, accounts, books, records, and all other papers and documents relating to the respective project and to all additions thereto and betterments thereof.

Pursuant to 18 C.F.R. § 9.3(b), the Transferees will have sixty (60) days from the order approving license transfers to submit their acknowledgements of acceptance of the licenses and the appropriate conveyance documents to the Commission. In light of the number of regulatory authorizations required to effectuate the transactions, including approval by the Michigan Public Service Commission, Applicants may need additional time beyond the sixty (60) days provided in the Commission's order to close the transactions, transfer title of the Project properties, transfer all Project files, record all relevant conveyance documents and submit them to the Commission. Accordingly, Applicants request Commission approval for the Transferees to have 120 days, rather than sixty (60) days, to submit the required license conveyance documents.

7. Transferor certifies that it has fully complied with the terms and conditions of the licenses, and that it has fully satisfied and discharged all of its liabilities and obligations thereunder to the date hereof, and obliges itself to pay all annual charges accrued under the licenses to the date of transfer.

8. Contingent upon the final written approval by the Commission of the transfer of the licenses, each Transferee accepts, with respect to its respective license, all the terms and conditions of said license and agrees to be bound thereby to the same extent as though it were the original licensee thereunder.

9. The name, title, and post office address of the persons to whom correspondence in regard to this Application shall be addressed are as follows:

III. PUBLIC INTEREST CONSIDERATIONS

Section 8 of the FPA provides that "[n]o voluntary transfer of any license, or of the rights thereunder granted, shall be made without the written approval of the commission . . . ."[21] Although section 8 "does not articulate a standard for approving a transfer application,"[22] the Commission has held that a license transfer application "may be approved on a showing that the transferee is qualified to hold the license and operate the project, and that a transfer is in the public interest."[23] The Commission's regulations require transfer applications to "set forth in appropriate detail the qualifications of the

[21] 16 U.S.C. § 801.

[22] *PacifiCorp*, 172 FERC ¶ 61,062, at P 66 (2020) (citing *Potosi Generating Station, Inc.*, 100 FERC ¶ 61,115 (2002)).

[23] *Id.* (citing 18 C.F.R. § 9.3; *Kootenai Tribes Energy Keepers, Inc.*, 153 FERC ¶ 61,217 (2015); *Gallia Hydro Partners*, 110 FERC ¶ 61,237 (2005); *Wisconsin v. FERC*, 104 F.3d 462 (D.C. Cir. 1997)).

transferee to hold such license and to operate the property under the license,"[24] and establish that Commission approval of license transfer "is contingent upon . . . a showing that such transfer is in the public interest."[25]

In determining the public interest and a transferee's qualifications, the Commission evaluates "the transferee's legal, technical, and financial qualifications to hold the license and operate and maintain the project."[26] The Confluence Hydro Subsidiaries are legally, technically, and financially qualified to hold the licenses for the Projects, as detailed below.

A. Legal Qualifications

The Confluence Hydro Subsidiaries are legally qualified to hold the Project licenses to operate their respective Projects. Each Confluence Hydro Subsidiary was formed as a Delaware limited liability company, and each is authorized to engage in the business of developing, transmitting, and distributing power in the State of Michigan, and in any other business necessary to effect the purposes of the respective license. Certified copies of the State of Delaware Limited Liability Company Certificates of Formation are attached to this Application as Attachment B, Certificates of Authority to Conduct Business in Michigan are attached to this Application as Attachment C, and Limited Liability Company Agreement for each of the Confluence Hydro Subsidiaries are attached to this Application as confidential Attachment D.

---

[24] 18 C.F.R. § 9.2.

[25] *Id.* § 9.3(a).

[26] *Pac. Gas & Elec. Co.*, 177 FERC ¶ 61,111, at P 17 (2021); *see also PacifiCorp*, 162 FERC ¶ 61,236, at P 77 (2018) ("[W]e will defer our determinations on the [transferee's] legal and technical capacity to accept transfer of the license . . . to our review of the transfer application.").

B. Technical Qualifications

Confluence Hydro was formed by Hull Street Energy to purchase the Projects on behalf of the Confluence Hydro Subsidiaries, an experienced owner and operator of FERC-jurisdictional hydropower projects with significant technical expertise. Hull Street Energy previously acquired, owned, and operated a fleet of 45 hydroelectric projects through its Central Rivers Power portfolio, whose subsidiaries were licensees in good standing with the Commission. The Confluence Hydro Subsidiaries therefore are part of a corporate family with deep experience owning, operating, and maintaining hydropower projects, and complying with FERC license requirements.

In addition to the hydropower operational and management expertise that the Confluence Hydro team will bring to the Projects, Confluence Hydro will extend employment to approximately 60 Consumers Energy hydro operations employees, so the same persons currently dedicated to operation of the Projects, who are intimately familiar with the Projects, and who engage regularly with Commission staff on license implementation and compliance matters, will have the opportunity to operate them alongside the existing Confluence Hydro team. This approach will ensure a seamless transition in operation of the Projects once the sale closes and preserve in the Confluence Hydro team longstanding technical expertise associated with these Projects.

C. Financial Qualifications

The Confluence Hydro Subsidiaries are financially qualified to hold the licenses and operate the Projects. In prior transfer proceedings, the Commission has held that power purchase agreements are sufficient to demonstrate financial qualifications,[27] and as

[27] *E.g.*, *FFP Project 92, LLC*, 192 FERC ¶ 62,137 (2025); *Pelzer Hydro Co.*, 188 FERC ¶ 62,070 (2024); *Fraser Papers Inc.*, 89 FERC ¶ 61,286 (1999), *reh'g denied*, 91 FERC ¶ 61,032 (2000).

part of Confluence Hydro's acquisition of the Projects, Confluence Hydro and Consumers entered into a 30-year Renewable Energy Purchase Agreement (REPA). Upon consummation of the transfer of the Projects, on behalf of the Confluence Hydro Subsidiaries, Confluence Hydro will sell all of the energy, capacity, and renewable energy credits from the Projects to Consumers pursuant to the terms of the REPA.

The Confluence Hydro team conducted extensive diligence of the Projects' historic operations and future generation capability in developing its pricing model for the REPA. Confluence Hydro specifically structured the REPA to account for planned and unplanned operations, maintenance, and capital expenses—including for ongoing dam safety work at the Hardy, Rogers, Alcona, and Hodenpyl Projects. The Hull Street Energy team's extensive experience as an owner and operator of other hydropower facilities—which included projects that required significant monetary investment to maintain safe and reliable operation when Hull Street Energy indirectly acquired them[28]—informed its conservative approach to modeling scenarios of operations, maintenance, and capital expenditures including unplanned extraordinary items.

Confluence Hydro also structured the REPA to reduce default risk and provide certainty of revenues to the Projects. For example, prolonged outages do not trigger default or termination of the REPA; business interruption coverage will maintain REPA payments if a plant is out of service for an extended period. Moreover, Project improvements will be insured at replacement cost to cover extraordinary repairs that may be necessary in the event of unplanned outages.

[28] For example, the Dexter (FERC Project No. 2695) and Putts Bridge (FERC Project No. 10677) projects, part of Hull Street Energy's Central Rivers hydropower portfolio, each required significant concrete spillway repair work.

The REPA covers generation across all 13 Projects, providing diversification across the Projects' five river systems, dam structures, and individual generating units. This insulates the individual Projects from cash flow shortages that could compromise their expense coverage. A summary of the specific financial terms of the REPA is provided in confidential Attachment E, which demonstrates the Confluence Hydro Subsidiaries' financial capability to hold the Project licenses.

Finally, the Confluence Hydro Subsidiaries expressly consent to the amendment of the respective Project licenses, upon the Commission's approval of the transfers, to include a reservation of authority regarding financial assurance.[29]

D. Dam Safety Expertise and Commitment

The Confluence Hydro team has extensive experience with dam safety, public safety, emergency action procedures, and security. Through their work on the Central Rivers Power portfolio of hydropower projects, the Confluence Hydro team understands the responsibilities and liabilities associated with dam ownership, and the necessity of maintaining dam safety through proper design, construction, operation, maintenance, and compliance with Commission requirements. This is reflected in the robust Owners Dam Safety Program (ODSP) for the Central Rivers Power projects that Hull Street Energy developed during its ownership tenure of that portfolio. Consistent with that prior approach, Confluence Hydro has thoroughly reviewed the existing ODSP for the Projects and will update the ODSP to reflect the change in upstream ownership. This will include a refinement of the roles, responsibilities, and commitment to dam safety of the new owner, and communicates and reinforces the same core principles of the existing ODSP

[29] *See e.g.*, *FFP Project 92, LLC*, 192 FERC ¶ 62,137, at P 7 (2025); *Rivers Elec. Co.*, 178 FERC ¶ 61,027, at P 9 (2022); *AEP Generation Resources Inc.*, 177 FERC ¶ 61,185, at P 8 (2021).

that dam safety is a top priority and focus of the team.

Within the Confluence Hydro organizational structure, depicted in Attachment F, dam safety will be prioritized at every level. For example, the Chief Executive Officer will lead the organization with a safety mindset and set the philosophy and policy that demonstrates that production or other business objectives shall not compromise dam safety. The asset managers will manage Confluence Hydro to ensure that the ODSP reflects the safety culture and policies and that resources are available to effectuate the ODSP. The Executive Hydro Director, in Hydro Generation, will be responsible for ensuring that the Chief Dam Safety Coordinator (CDSC), in Dam Safety, is implementing, tracking, and updating the ODSP and that all Confluence Hydro employees are trained on the ODSP. The CDSC will be responsible for ensuring that the ODSP is fully implemented and that Confluence Hydro's high standards are maintained for dam safety. The dam safety engineers will manage the execution of the ODSP and will serve as the points of contact for non-emergency dam safety communications from the Confluence Hydro Subsidiaries to FERC.

While the former Central Rivers Power former Chief Dam Safety Engineer will provide leadership to Confluence Hydro as part of her role as Vice President, Asset Management Hydro at Hull Street Energy,[30] Confluence Hydro will extend employment to the same dedicated Consumers Energy staff that currently oversees dam safety at the Projects, including the Executive Hydro Director, Chief Dam Safety Engineer, and dam safety engineers. These members of the Consumers Energy dam safety team will have the

[30] The resume of Jillian Lawrence, PE, MS Eng., included as confidential Attachment G, reflects her extensive hydro management and dam safety experience.

option to remain in their respective roles at Confluence Hydro with similar authority, ensuring a seamless transition of dam safety matters at the Projects.

With respect to consultants, Confluence Hydro will communicate the requirements of the ODSP to all contractors and consultants by means of a formal review of the annual Dam Safety Philosophy Statement prior to the start of all site work. In addition, Confluence Hydro will require its engineering consultants and construction contractors to review its Quality Control Inspection Program prior to the start of work.

IV. REQUEST FOR PRIVILEGED TREATMENT

Attachment D contains the Limited Liability Company Agreement for each of the Confluence Hydro Subsidiaries. Attachment E contains a summary of the specific financial terms of the REPA. Attachment G contains the resume of Jillian Lawrence, PE, MS Eng. These documents contain sensitive commercial and financial information that is privileged or confidential and not publicly available. Such information is non-public and is exempt from the mandatory public disclosure requirements of the Freedom of Information Act (FOIA).[31] Accordingly, in accordance with section 388.112(b) of the Commission's regulations,[32] Applicants seek privileged treatment of Attachments D, E, and G and ask that the Commission place them in its non-public files.

V. CONCLUSION

WHEREFORE, for the reasons described above, Applicants submit that this Application is in the public interest and request the Commission to approve it, including:

---

[31] 5 U.S.C. § 552*; see also Food Mktg. Inst. v. Argus Leader Media*, 139 S.Ct. 2356, 2364-66 (2019) ("[W]here commercial or financial information is both customarily and actually treated as private by its owner and provided to the government under an assurance of privacy, the information is 'confidential'" and thus exempt from disclosure under FOIA).

[32] 18 C.F.R. § 388.112(b).

(1) Applicants' request that the Confluence Hydro Subsidiaries be afforded 120 days, rather than sixty (60) days,[33] to submit the acceptance sheets and conveyance documents; and (2) Applicants' request for confidential treatment of Attachments D and E.

Certificates of Authority to Conduct Business in the State of Michigan of Confluence Hydro Subsidiaries

UNITED STATES OF AMERICA

The State of Michigan

Department of Licensing and Regulatory Affairs

Lansing, Michigan

This is to certify:

Entity Name: CONFLUENCE HYRDO ALCONA, LLC
Foreign True Name:
Identity ID#: 900113704
Initial Filing Date: 10/28/2025
Delayed Effective Date:
Entity Type: Foreign Limited Liability Company
Filing Type: Application for Certificate of Authority to Transact Business or Conduct Affairs in Michigan
Formation Jurisdiction: Delaware
Act Subject To: 023-1993 Michigan Limited Liability Company Act

The above referenced entity existing under the laws of the formation jurisdiction was validly authorized to conduct affairs in Michigan on the initial filing date, in conformity with the Act(s) it is formed under and subject to.

Said entity is authorized to transact in this state any business of the character set forth in its application which a domestic entity is formed under said statutes may lawfully transact. The authority shall continue as long as the above referenced entity retains its authority to transact such business in the jurisdiction of its formation and its authority to transact business in this state has not been surrendered, suspended, or revoked.

Pursuant the act subject to, the entity shall use the entity name, as it is set forth in this Certificate in all its dealings with this Department and in the transaction of business in this state.

This certificate is in due form, made by me as the proper officer, and is entitled to have full faith and credit given it in every court and office within the United States.

LICENSING AND REGULATORY AFFAIRS

Application for Non-Capacity Related Amendments of Licenses and Request for Non-Project Use of Project Lands

Dear Secretary Reese:

Consumers Energy Company (Consumers Energy) hereby files this Application for Non-Capacity Related Amendments of Licenses and Request for Non-Project Use of Project Lands (Application) with the Federal Energy Regulatory Commission (FERC or Commission) for the following 13 hydropower projects licensed to Consumers Energy and located in Michigan: Calkins Bridge Hydroelectric Project No. 785; Foote Project No. 2436; Alcona Project No. 2447; Mio Project No. 2448; Loud Project No. 2449; Cooke Project No. 2450; Rogers Project No. 2451; Hardy Project No. 2452; Five Channels Project No. 2453; Croton Project No. 2468; Webber Hydroelectric Project No. 2566; Tippy Project No. 2580; and Hodenpyl Project No. 2599 (collectively, Projects).

This Application is necessary to effectuate the purchase and sale of the Projects from Consumers Energy to Confluence Hydro, LLC (Confluence Hydro), as detailed in the Joint Application for Approval of Transfer of Licenses (License Transfer Application) filed with the Commission concurrent with this Application and consistent with the terms of the September 3, 2025, Purchase and Sale Agreement (PSA).

This Application seeks to ensure that, upon license transfer, only the project works necessary for project operations are included in each license, and that Consumers Energy's non-project distribution equipment is removed from each project license. Based on this, Consumers Energy proposes to amend, as needed for each project: (1) the project description as provided in the applicable ordering paragraph of the most recent relicensing or amendment order; (2) Exhibit A;

and/or (3) Exhibit F. With these requested amendments, existing distribution infrastructure and equipment that Consumers Energy will retain after transferring the Projects to Confluence Hydro for purposes of supporting its ongoing responsibilities as the local load-serving utility will be removed from the Projects' licenses.

This Application also seeks authorization for non-project use of project lands at the Projects for Consumers Energy to continue to access project lands post-transfer for purposes of maintaining and operating its existing, non-project distribution infrastructure consistent with historic practices.

Because approval of both this Application and the License Transfer Application are needed to consummate the PSA and otherwise close the transaction between Consumers Energy and Confluence Hydro, Consumers Energy respectfully requests the Commission to process this Application concurrently with the License Transfer Application, and to approve this Application on or before the date it approves the License Transfer Application.

In accordance with FERC's regulations governing Critical Energy Infrastructure Information (CEII),[1] information included in this Application contains CEII and is being filed in a separate attachment for inclusion in FERC's non-public file. The attached Exhibit F design drawings (Attachments 5, 8, 11, 14, 18, 22, 23, and 24), as well as the maps provided in Attachment 28, include sensitive and detailed engineering or locational information detailing the critical infrastructure at the Projects that, if used incorrectly, may compromise the safety of the Projects and those responsible for its proper operation. As such, Consumers Energy respectfully requests that FERC maintain this information in its non-public file as CEII.[2] Each page of these attachments has been marked as "CUI//CEII."

Consumers Energy appreciates the Commission's consideration of this Application. Should you have any questions, please contact the undersigned.

Respectfully submitted,

Charles R. Sensiba
Counsel to Consumers Energy Company

Enclosure: Application for Non-Capacity Related Amendments of Licenses and Request for Non-Project Use of Project Lands

1 18 C.F.R. § 388.113.

APPLICATION FOR NON-CAPACITY RELATED AMENDMENTS OF LICENSES AND REQUEST FOR NON-PROJECT USE OF PROJECT LANDS

Pursuant to section 6 of the Federal Power Act (FPA),[1] section 4.200 of the Federal Energy Regulatory Commission's (Commission or FERC) regulations,[2] and Standard Article 5,[3] Consumers Energy Company (Consumers Energy) submits this Application for Non-Capacity Related Amendments of Licenses and Request for Non-Project Use of Project Lands (Application) involving the following 13 hydropower projects licensed to Consumers Energy and located in Michigan: Calkins Bridge Hydroelectric Project (FERC Project No. 785); Foote Project (FERC Project No. 2436); Alcona Project (FERC Project No. 2447); Mio Project (FERC Project No. 2448); Loud Project (FERC Project No. 2449); Cooke Project (FERC Project No. 2450); Rogers Project (FERC Project No. 2451); Hardy Project (FERC Project No. 2452); Five Channels Project (FERC Project No. 2453); Croton Project (FERC Project No. 2468); Webber Hydroelectric Project (FERC Project No. 2566); Tippy Project (FERC Project

---

1 16 U.S.C. § 799.

2 18 C.F.R. § 4.200.

3 *E.g.*, Form L-5, Terms and Conditions of License for Constructed Major Project Affecting Navigable Waters and Lands of the United States, 54 F.P.C. 1832, 1826-27 (1975).

No. 2580); and Hodenpyl Project (FERC Project No. 2599) (collectively, Projects).

This Application is necessary to effectuate the purchase and sale of the Projects from Consumers Energy to subsidiaries of Confluence Hydro, LLC (Confluence Hydro), as set forth in the Joint Application for Approval of Transfer of Licenses (License Transfer Application) filed with the Commission concurrent with this Application and consistent with the terms of a September 3, 2025, Purchase and Sale Agreement (PSA). As detailed herein, the license amendments and request for approval of non-project use of project lands sought in this Application are needed to implement the PSA by precisely demarcating, for each Project:

1. the licensed project works that the respective Confluence Hydro subsidiary will own and be responsible for operating and maintaining as the new licensee;
2. existing distribution infrastructure that will remain in Consumers Energy's ownership (e.g., substations, distribution lines, and transmission facilities) that, while not needed for purposes of the FERC-licensed Projects, are currently identified in various license exhibits as licensed project works and require removal from the applicable license; and
3. lands within the project boundary of each Project that Consumers Energy will need continued access to, for purposes of continued operation and maintenance of non-project distribution infrastructure, consistent with current practices, therefore requiring Commission approval for non-project use and occupancy of Project lands.

The various approvals sought in this Application are summarized in Table 1

below and presented in a set of proposed Ordering Paragraphs set forth in Attachment 1.

Table 1 – Non-Capacity License Amendments and Non-Project Use of Project Lands Summary

Project Name	FERC Project No.	Amended Project Description	Amended Exhibit A	Amended Exhibit F	Non-Project Use
Calkins Bridge Project	P-785	None	None	None	Yes
Foote Project	P-2436	Yes	Yes	Yes	Yes
Alcona Project	P-2447	None	Yes	Yes	Yes
Mio Project	P-2448	None	Yes	Yes	Yes
Loud Project	P-2449	None	Yes	Yes	Yes
Cooke Project	P-2450	Yes	Yes	Yes	Yes
Rogers Project	P-2451	None	None	None	Yes
Hardy Project	P-2452	None	None	None	Yes
Five Channels Project	P-2453	Yes	Yes	Yes	Yes
Croton Project	P-2468	None	None	None	Yes
Webber Project	P-2566	None	None	Yes	Yes
Tippy Project	P-2580	None	None	None	Yes
Hodenpyl Project	P-2599	None	None	Yes	Yes

Because approval of both this Application and the License Transfer Application are needed to consummate the PSA and otherwise close the transaction between Consumers Energy and Confluence Hydro, Consumers Energy respectfully requests the Commission to process this Application concurrently with the License Transfer Application, and to approve this Application on or before the date it approves the License

Transfer Application.

I. INITIAL STATEMENT

Pursuant to section 4.201 of the Commission's regulations,[4] Consumers Energy (Applicant) states as follows:

1. Consumers Energy applies to the Commission for a non-capacity related license amendment and authorization for non-project use of project lands for the following Projects:

   Calkins Bridge Hydroelectric Project, FERC Project No. 785, which is located on the Kalamazoo River in Allegan County, Michigan;

   Foote Project, FERC Project No. 2436, which is located on the Au Sable River in Iosco County, Michigan;

   Alcona Project, FERC Project No. 2447, which is located on the Au Sable River in Alcona County, Michigan;

   Mio Project, FERC Project No. 2448, which is located on the Au Sable River in Alcona County, Michigan;

   Loud Project, FERC Project No. 2449, which is located on the Au Sable River in Oscoda County, Michigan;

   Cooke Project, FERC Project No. 2450, which is located on the Au Sable River, within the Huron National Forest in Iosco County, Michigan;

   Rogers Project, FERC Project No. 2451, which is located on the Muskegon River in Mecosta County, Michigan;

   Hardy Project, FERC Project No. 2452, which is located on the Muskegon River in Newaygo and Mecosta Counties, Michigan;

   Five Channels Project, FERC Project No. 2453, which is located on the Au Sable River, within the Huron National Forest in Iosco County, Michigan;

   Croton Project, FERC Project No. 2468, which is located on the Muskegon River in Newaygo County, Michigan;

[4] 18 C.F.R. § 4.201.

Webber Hydroelectric Project, FERC Project No. 2566, which is located on the Grand River near the City of Portland, in Ionia County, Michigan;

Tippy Project, FERC Project No. 2580, which is located on the Manistee River, within the Manistee National Forest in Manistee County, Michigan; and

Hodenpyl Project, FERC Project No. 2599, which is located on the Manistee River, within the Manistee National Forest in Manistee and Wexford Counties, Michigan.

2. Consumers Energy is a domestic corporation and is the licensee for the following waterpower projects, as designated in the records of the Commission:

Calkins Bridge Hydroelectric Project (FERC Project No. 785) – The current license for this project was issued on January 15, 2010.[5]

Foote Project (FERC Project No. 2436) – The current license for this project was issued on July 15, 1994.[6]

Alcona Project (FERC Project No. 2447) – The current license for this project was issued on July 15, 1994.[7]

Mio Project (FERC Project No. 2448) – The current license for this project was issued on July 15, 1994.[8]

Loud Project (FERC Project No. 2449) – The current license for this project was issued on July 15, 1994.[9]

Cooke Project (FERC Project No. 2450) – The current license for this

[6] *Consumers Power Co.*, 68 FERC ¶ 61,082 (1994).

[7] *Consumers Power Co.*, 68 FERC ¶ 61,082 (1994).

[8] *Consumers Power Co.*, 68 FERC ¶ 61,072 (1994).

[9] *Consumers Power Co.*, 68 FERC ¶ 61,075 (1994).

project was issued on July 15, 1994.[10]

Rogers Project (FERC Project No. 2451) – The current license for this project was issued on July 15, 1994.[11]

Hardy Project (FERC Project No. 2452) – The current license for this project was issued on July 15, 1994.[12]

Five Channels Project (FERC Project No. 2453) – The current license for this project was issued on July 15, 1994.[13]

Croton Project (FERC Project No. 2468) – The current license for this project was issued on July 15, 1994.[14]

Webber Hydroelectric Project (FERC Project No. 2566) – The current license for this project was issued on June 20, 2001.[15]

Tippy Project (FERC Project No. 2580) – The current license for this project was issued on July 15, 1994.[16]

Hodenpyl Project (FERC Project No. 2599) – The current license for this project was issued on July 15, 1994.[17]

4. *The amendment of license proposed and the reason(s) why the proposed change is necessary:*

The purposes of this Application are to: (1) amend the project description, Exhibit A, and Exhibit F of certain of the Projects' licenses to remove existing, non-jurisdictional distribution infrastructure that is not needed for purposes of the FERC-licensed Projects; and (2) authorize Consumers Energy (as the prospective non-licensee) to continue to access and occupy certain project lands following license transfer, to facilitate its continued operation and maintenance of existing distribution infrastructure located

with the Projects' boundaries, consistent with current practices.

This Application does not seek approval of any new or changed project operations, construction, or ground disturbing activities. It only seeks ministerial, administrative changes to and approvals under the Projects' licenses to effectuate the PSA between Consumers Energy and Confluence Hydro.

5. *(i) The statutory or regulatory requirements of the state(s) in which the Project would be located that affect the Project as proposed with respect to bed and banks and to the appropriation, diversion, and use of water for power purposes are:*

This Application only seeks administrative changes to the Projects' licenses, together with authorization for non-project use of project lands, associated with existing non-project distribution infrastructure located within the Projects' boundaries consistent with current practices. No new or changed project operations, construction, or ground disturbing activities are proposed in connection with this Application. Accordingly, this Application does not involve any state requirements related to the bed and banks or the appropriation, diversion, and use of water for power purposes.

(ii) The steps which the applicant has taken or plans to take to comply with each of the laws cited above are:

Not applicable.

6. In accordance with section 4.201(b) of the Commission's regulations[18] and Standard Article 5, the following proposed amendments to the Projects' licenses are contained in this Application:[19]

For the Calkins Bridge Hydroelectric Project No. 785:

- Non-Project Use of Project Land[20]

For the Foote Project No. 2436:

- Project Description – from the *Order Issuing New License*,[21]

---

[18] 18 C.F.R. § 4.201.

[19] All the approvals sought in this Application are presented in a set of proposed Ordering Paragraphs set forth in Attachment 1.

- Non-Project Use of Project Land[52]

7. In accordance with section 4.32(a)(4) of the Commission's regulations,[53] Consumers Energy's subscription and verification appears in Attachment 29.

II. BACKGROUND

This Application seeks non-capacity related amendments and non-project land use authorizations for Consumers Energy's 13 small hydropower projects in Michigan. These administrative approvals are crucial for the transfer of the Projects' licenses to Confluence Hydro's subsidiaries, as outlined in the License Transfer Application and PSA. This Application seeks to ensure that, upon license transfer, only project works necessary for project operations are included in each license, and that Consumers Energy's non-project distribution equipment is removed from each license. The Application also seeks authorization for Consumers Energy to continue to access project lands for purposes of maintaining and operating its existing, non-project distribution infrastructure consistent with historic practices.

49 Attachment 28 at p. 11.

50 Attachment 28 at p. 12.

51 Attachment 24.

52 Attachment 28 at p. 13.

53 18 C.F.R. § 4.32(a)(4).

The proposed non-capacity amendments and non-project use authorizations are administrative in nature and do not involve any construction or ground-disturbing activities.

A. Description of Consumers Energy's Projects

1. Calkins Bridge Hydroelectric Project (FERC No. 785)

The Calkins Bridge Hydroelectric Project is located on the Kalamazoo River in Allegan County, Michigan, and has an authorized installed capacity of 2.55 megawatts (MW). The project generally consists of a gravity dam, powerhouse, spillway a reservoir known as Lake Allegan, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on January 15, 2010, for a period of 30 years.

2. Foote Project (FERC No. 2436)

The Foote Project is located on the Au Sable River in Iosco County, Michigan, and has an authorized installed capacity of 7.229 MW. The project occupies 484 acres of federal lands within the Huron National Forest, which is administered by the U.S. Forest Service. The project generally consists of a dam with two earth fill embankment sections, spillway, powerhouse, impoundment, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.

3. Alcona Project (FERC No. 2447)

The Alcona Project is located on the Au Sable River in Alcona County, Michigan, and has an authorized installed capacity of 8 MW. The project occupies 364 acres of federal lands within the Huron National Forest. The project generally consists of a dam with two earth fill embankment sections, spillway, powerhouse, impoundment,

transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.

4. Mio Project (FERC No. 2448)

The Mio Project is located on the Au Sable River in Oscoda County, Michigan, and has an authorized installed capacity of 3.885 MW. The project occupies 320 acres of federal lands within the Huron National Forest. The project generally consists of a dam with two earth fill embankment sections, spillways, impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.

5. Loud Project (FERC No. 2449)

The Loud Project is located on the Au Sable River in Iosco County, Michigan, and has an authorized installed capacity of 4 MW. A portion of the project occupies federal lands within the Huron National Forest. The project generally consists of a dam with two earth embankments, powerhouse, spillway, impoundment, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.

6. Cooke Project (FERC No. 2450)

The Cooke Project is located on the Au Sable River, within the Huron National Forest in Iosco County, Michigan, and has an authorized installed capacity of 6.609 MW. The project generally consists of two earth embankment dam sections, spillway, impoundment, powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.

7. Rogers Project (FERC No. 2451)

The Rogers Project is located in Mecosta County, Michigan, on the Muskegon River and has an authorized installed capacity of 5.418 MW. The project generally consists of three earth embankment dam sections, a spillway, an impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.

8. Hardy Project (FERC No. 2452)

The Hardy Project is located on the Muskegon River in Newaygo and Mecosta Counties, Michigan, and has an authorized installed capacity of 29.6 MW. The project generally consists of an earth embankment dam, spillway, impoundment, powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.

9. Five Channels Project (FERC No. 2453)

The Five Channels Project is located on the Au Sable River, within the Huron National Forest in Iosco County, Michigan, and has an authorized installed capacity of 6 MW. The project generally consists of two earth embankment dam sections, a spillway, an impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.

10. Croton Project (FERC No. 2468)

The Croton Project is located in Newaygo County, Michigan, on the Muskegon River and has an authorized installed capacity of 7.473 MW. The project generally consists of two earth embankments, a spillway, an impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license

for the project on July 15, 1994, for a period of 40 years.

11. Webber Hydroelectric Project (FERC No. 2566)

The Webber Hydroelectric Project is located on the Grand River, in Ionia County, Michigan, and has an authorized installed capacity of 3.25 MW. The project generally consists of a dam, reservoir, powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on June 20, 2001, for a period of 40 years.

12. Tippy Project (FERC No. 2580)

The Tippy Project is located on the Manistee River, within the Manistee National Forest in Manistee County, Michigan, and has an authorized installed capacity of 14.255 MW. The project generally consists of two earth embankment dam sections, a spillway, an impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.

13. Hodenpyl Project (FERC No. 2599)

The Hodenpyl Project is located on the Manistee River, within the Manistee National Forest in Manistee and Wexford Counties, Michigan, and has an authorized installed capacity of 13.884 MW. The project generally consists of two earth embankment dam sections, a spillway, an impoundment, a powerhouse, transmission facilities, and appurtenant facilities. The Commission issued a new license for the project on July 15, 1994, for a period of 40 years.

B. Proposed Transfer of Projects to Confluence Hydro Subsidiaries

On September 3, 2025, Consumers Energy and Confluence Hydro entered into the PSA, which provides for the purchase and sale of the 13 small Projects, and for the

transfer of each Project's respective license to a Confluence Hydro subsidiary. After a years-long public process in which Consumers Energy identified and analyzed various options for the century-old dams that are associated with these Projects, Consumers Energy decided to convey the Projects to Confluence Hydro. This transaction is expected not only to reduce long-term costs for Consumers Energy's customers, but also to allow Confluence Hydro, through its Confluence Hydro subsidiaries, to safely deliver reliable, clean energy, and support economic and recreational opportunities that Michigan communities have enjoyed for more than a century. During the robust public outreach phase of this investigation, the communities that have hosted and depended upon these dams and reservoirs overwhelmingly supported and advocated for their preservation.

Because Consumers Energy is both the local electric utility and has owned and operated the facilities for more than a century, various distribution infrastructure and equipment that is not needed for purposes of the FERC-licensed Projects exists within the designated project boundaries of several of these developments. Moreover, the various license exhibits and descriptions have, in some instances, identified Consumers Energy's distribution infrastructure and equipment that is not needed for purposes of the FERC-licensed project.

To address this, and to avoid a regulatory requirement where both Consumers Energy and the various Confluence Hydro subsidiaries would be required to be co-licensees of any of the Projects, Consumers Energy and Confluence Hydro when negotiating the PSA carefully evaluated system and single-line drawings and license terms on a project-by-project basis to determine the point at which power generated at each project is integrated into Consumers Energy's distribution / integrated transmission

system. This evaluation took into consideration the Commission's standards for identifying project works and primary transmission lines. This evaluation identified infrastructure that is currently associated with the Projects (either as currently identified project works and/or physically located within a project boundary), but which is beyond the point where each Project's primary transmission line junctions with Consumers Energy's distribution system or the interconnected transmission system. In general terms, the infrastructure identified in these analyses consists of distribution substations and above- and under-ground distribution lines.

Based on these analyses, the PSA precisely defines the infrastructure, real property, and other assets and liabilities that will be conveyed from Consumers Energy to the Confluence Hydro subsidiaries. The PSA also precisely defines distribution infrastructure that Consumers Energy will continue to own, operate, and maintain as the local load-serving utility. Finally, the PSA establishes easements and other land rights that will allow Consumers Energy to access its distribution infrastructure located on project lands for the limited purpose of maintaining and operating the retained distribution infrastructure.

By precisely defining the infrastructure that will be sold to Confluence Hydro or retained by Consumers Energy, the PSA ensures that: (1) Confluence Hydro subsidiaries will assume ownership and operational control over all project works necessary to generate electricity at the Projects; (2) Consumers Energy will retain ownership, operational control, and access rights necessary to operate and maintain its integrated distribution grid and safely and reliably serve its retail customers consistent with historic practices; and (3) Consumers Energy and the Confluence Hydro subsidiaries will avoid a

circumstance in which they would need to be co-licensees for any of the Projects.

This Application has been prepared consistent with the transfer and retention of assets and property rights carefully negotiated in the PSA. This Application proposes to: (1) remove from each applicable Project license existing distribution infrastructure and equipment that Consumers Energy will retain after transferring the Projects to the Confluence Hydro subsidiaries, to support its ongoing responsibilities as the local load-serving utility; and (2) establish occupancy and access rights under each Project's license for Consumers Energy's non-project distribution infrastructure and equipment within each Project's boundary.

III. REQUEST FOR NON-CAPACITY AMENDMENTS OF LICENSES

Under section 4(e) the FPA, the Commission is authorized to issue licenses:

> for the purpose of constructing, operating, and maintaining dams, water conduits, reservoirs, power houses, transmission lines, or other *project works* necessary or convenient for the development and improvement of navigation and for the development, transmission, and utilization of power . . . .[54]

Section 3(12) of FPA defines "project works" as the "physical structures of a project,"[55] and further defines a "project" as consisting of, among other things, "the primary line or lines transmitting power [from the unit of development] to the point of junction with the distribution system or with the interconnected primary transmission system, [and] all miscellaneous structures used and useful in connection with said unit or any part thereof . . . ."[56] Exhibit A of Commission-issued licenses, in turn, is required to identify all infrastructure that is licensed under the FPA, including "[t]he number, length, voltage,

---

[54] 16 U.S.C. § 797(e) (emphasis added).

[55] *Id.* § 796(12).

[56] *Id.* § 796(11).

and interconnections of any primary transmission lines, whether existing or proposed, to be included as part of the project."[57] Exhibit F "consists of general design drawings of the principal project works" described in Exhibit A.[58]

For purposes of identifying a project's primary transmission line that must be included as licensed project works under Exhibits A and F, the Commission has explained that a primary transmission line is one that is:

> necessary to ensure the "viability" of the project in the event of Federal takeover. If a line "is used solely to transmit power from [Commission] licensed projects to load centers," and if without it "there would be no way to market the full capacity of the project," then that line is primary to the project . . . .[59]

Infrastructure not meeting these tests is not subject to the Commission's FPA jurisdiction and does not belong in a project license.[60] The Commission has recognized that the identification of a project's primary transmission line is, at bottom, a functional, case-specific, and factual inquiry.[61]

With respect to Consumers Energy's Projects that are the subject of this Application, the distribution substations, lines, and other infrastructure and equipment proposed for removal from the Projects' respective Exhibit A and/or Exhibit F constitute a part of Consumers Energy's retail distribution system and do not meet the

---

[57] *E.g.*, 18 C.F.R. § 4.51(b).

[58] *E.g.*, *id.* § 4.41(g).

[59] *Pac. Gas & Elec. Co.*, 85 FERC ¶ 61,411, at p. 62,559 (1998) (quoting *Niagara Mohawk Power Corp.*, 5 FERC ¶ 61,301, at p. 61,646 (1978)).

[60] *E.g.*, *City of Radford*, 168 FERC ¶ 62,105 (2019) (removing licensed transmission infrastructure from the project boundary because the infrastructure is part of the local distribution grid and does not meet the definition of FPA section 3(11)); *N.Y. Power Auth.*, 98 FERC ¶ 61,033 (2002).

[61] *E.g.*, *Androscoggin Reservoir Co.*, 189 FERC ¶ 62,063 (2024).

Commission's test, described above, for identifying a "primary transmission line." The substations over which Consumers Energy will continue to own and operate to step-up project output to the requisite distribution voltage, and the distribution lines proposed for removal, integrate the distribution voltage energy into Consumers Energy's consolidated transmission and distribution system. As such, these facilities do not need to be part of the Projects' licenses. Following license transfer, in fact, the Confluence Hydro subsidiaries will not have any operational control over Consumers Energy's distribution facilities.

As detailed in the following project-specific sections, in some cases, the description of a Project's primary transmission line will be amended to include only those circuits that deliver project output to Consumers Energy's distribution substations. Those substations constitute the functional point at which the Project's "project works" for FPA purposes end and Consumers Energy's non-project distribution system begins, both technically and operationally. Accordingly, the proposed amendments to the project descriptions from prior ordering paragraphs, together with amendments to Exhibits A and F, as presented below, are consistent with the FPA, the Commission's regulations, and Commission precedent described above.

A. Foote Project No. 2436 – Proposed Non-Capacity Amendment

For the Foote Project, Consumers Energy seeks a limited amendment to remove local distribution infrastructure from the license. First, Consumers Energy proposes to remove reference to the 4.8-46 kV distribution substation near the powerhouse from the project description as set forth in the Commission's orders, as well as Exhibit A and Exhibit F-2. This equipment removed from the license as a result of these changes is part of Consumers Energy's local distribution system and is thus not "used and useful" for

Confluence Hydro's project operations as required by FPA section 3(11).

Second, Consumers Energy proposes to amend the project description, Exhibit A, and Exhibit F-2 to redefine the primary transmission line. The primary transmission line is currently described as the 46 kV lines running from Consumers Energy's 4.8-46 kV distribution substation to an interconnection with other components of Consumers Energy's interconnected local distribution system. The 4.8-46 kV distribution substation is the point at which output from the Foote Project is delivered to the interconnected transmission/distribution system. Thus, these lines proposed for removal from the license do not qualify as "primary transmission lines" necessary to move project output to the interconnected grid.

Consumers Energy's proposed amendments to the Foote Project license are specified in the following Attachments:

Foote Project No. 2436 Attachments	
Attachment 2	Redline showing proposed amendments to the Project Description in the license issued on July 15, 1994, as amended July 29, 2025
Attachment 3	Redline showing proposed amendments to Exhibit A
Attachment 4	Clean version of amended Exhibit A
Attachment 5 (CUI/CEII)	Illustrative markup of Exhibit F-2 identifying drawing elements proposed for removal from that exhibit. Exhibit F-2 currently identifies the 4.8-46 kV distribution substation as excluded from the license. Consumers Energy proposes to remove the -46 kV distribution substation from Exhibit F-2 consistent with the proposed amendments to Exhibit A.

B. Alcona Project No. 2477 – Proposed Non-Capacity Amendment

For the Alcona Project, Consumers Energy proposes a limited amendment of Exhibit A and Exhibit F-1 to remove distribution-level infrastructure from the license. These exhibits currently identify a "distribution substation" and "138 kV substation" both located a short distance downstream from the powerhouse as a project work. The

distribution substations are the point at which output from the Alcona Project is delivered to Consumers Energy's local distribution system. Thus, the substations are not "used and useful" for Confluence Hydro's project operations and is therefore not required to be licensed.

Consumers Energy's proposed amendments to the Alcona Project license are specified in the following Attachments:

Alcona Project No. 2477 Attachments	
Attachment 6	Redline showing proposed amendments to Exhibit A
Attachment 7	Clean version of amended Exhibit A
Attachment 8 (CUI/CEII)	Illustrative markup of Exhibit F-1 identifying drawing elements proposed for removal from that exhibit. Exhibit F-1 currently identifies a "distribution substation" and "138 kV substation." Consumers Energy proposes to remove reference to these substations from Exhibit F-1.

C. Mio Project No. 2448 – Proposed Non-Capacity Amendment

For the Mio Project, Consumers Energy proposes a limited amendment to define the Mio Project's primary transmission line. The currently approved Exhibit A states that there "are no primary transmission lines included in the Mio Project license." Consumers Energy proposes to amend Exhibit A to define the primary transmission line as the 400-foot line that connects the 138 kV project substation to the non-project ITC/METC 138 kV substation.

Consumers Energy also proposes to amend Exhibit F-2 to remove the depiction of the non-project 138 kV ITC/METC substation.

Consumers Energy's proposed amendments to the Mio Project license are specified in the following Attachments:

Mio Project No. 2448 Attachments	
Attachment 9	Redline showing proposed amendments to Exhibit A
Attachment 10	Clean version of amended Exhibit A

Attachment 11 (CUI/CEII)	Illustrative markup of Exhibit F-2 identifying drawing elements proposed for removal from that exhibit. Exhibit F-2 currently depicts the non-project 138 kV ITC/METC substation. Consumers Energy proposes to remove this non-project substation from Exhibit F-2.

D. Loud Project No. 2449 – Proposed Non-Capacity Amendment

For the Loud Project, Consumers Energy proposes a limited amendment to remove local distribution infrastructure from the license. The license currently identifies a 2.5-46 kV distribution substation near the powerhouse as a project work. However, this equipment is part of Consumers Energy's integrated, local distribution system. Thus, the substation is not "used and useful" for Confluence Hydro's project operations.

To address this issue, Consumers Energy proposes to remove the 2.5-46 kV substation from Exhibit A and Exhibit F-2 of the Loud Project license. Additionally, Consumers Energy proposes to amend Exhibit A and Exhibit F-2 to clarify that the primary transmission line includes the circuits running from each generating unit to Consumers Energy's 46 kV substation. The revised Exhibit F-1 will also remove the depiction of the non-project lines exiting the 46 kV non-distribution and the 138 kV distribution substation, which is currently not identified as a project work in Exhibit A.

Consumers Energy's proposed amendments to the Loud Project license are specified in the following Attachments:

Loud Project No. 2449 Attachments	
Attachment 12	Redline showing proposed amendments to Exhibit A
Attachment 13	Clean version of amended Exhibit A
Attachment 14 (CUI/CEII)	Illustrative markup of Exhibit F-1 identifying drawing elements proposed for removal from that exhibit. Exhibit F-1 currently identifies the 2.4-4.6 kV distribution substation (denoted as "distribution substation") and the 138 kV substation (not identified as a project work in Exhibit A). Consumers Energy proposes to remove reference to the distribution substation and 138 kV substation from Exhibit F-1.

E. Cooke Project No. 2450 – Proposed Non-Capacity Amendment

For the Cooke Project, Consumers Energy proposes a limited amendment to remove distribution-level infrastructure from the license. Exhibit A currently identifies a 2.4-46 kV distribution substation and an adjacent 2.4-4.8 kV distribution substation as project works. These distribution substations are part of Consumers Energy's local distribution system, as they serve regional distribution and load serving functions. Accordingly, the substations are not "used and useful" for Confluence Hydro's project operations.

The 2.4-46 kV distribution substation and distribution circuits are identified in Exhibit F-2. The 2.4-48 kV distribution substation is denoted as "exclude from project license."

For these reasons, Consumers Energy proposes first to remove the 2.4-46 kV and 2.4-4.8 kV substations from Exhibit A and Exhibit F-2 of the Cooke Project license.

Second, Consumers Energy proposes to redefine the primary transmission line described in the project description as stated in the Commission's prior ordering paragraphs and Exhibit A. The primary transmission line is currently described as the "46 kV transmission line, approximately 150 feet in length, from the substation" to the interconnection with other components of Consumers Energy's interconnected transmission system. Because the 46 kV substation is part of Consumers Energy's distribution substation, that substation is the point at which project output is delivered to the interconnected transmission/distribution system. Thus, the lines proposed for removal from the license do not qualify as "primary transmission lines" necessary to move project output to the regional grid. Accordingly, Consumers Energy proposes to redefine the primary transmission line as the two circuits running from the powerhouse to the non-

project 46 kV distribution substation.

Consumers Energy's proposed amendments to the Cooke Project license are specified in the following Attachments:

Cooke Project No. 2453 Attachments	
Attachment 15	Redline showing proposed amendments to the Project Description in the license issued July 15, 1994, as amended on August 29, 2001.
Attachment 16	Redline showing proposed amendments to Exhibit A
Attachment 17	Clean version of amended Exhibit A
Attachment 18 (CUI/CEII)	Illustrative markup of Exhibit F-2 identifying drawing elements proposed for removal from that exhibit. Exhibit F-2 currently identifies the 46 kV and 4.8 kV (denoted as excluded from the license) substations. Consumers Energy proposes to remove both substations and associated circuits from Exhibit F-2 consistent with the proposed amendments to Exhibit A.

F. Five Channels Project No. 2453 – Proposed Non-Capacity Amendment

For the Five Channels Project, Consumers Energy first proposes a limited amendment to remove local distribution infrastructure from the license. The license currently identifies a 2.4-46 kV distribution substation adjacent to the powerhouse as a project work. However, this equipment is part of Consumers Energy's local distribution system that serves non-project distribution and load serving functions. Thus, the substation is not "used and useful" for Confluence Hydro's project operations.

Accordingly, Consumers Energy proposes to remove the 2.4-46 kV substation from the project description as stated in the Commission's prior ordering paragraphs, Exhibit A, and Exhibit F-2 of the Five Channels Project license.

Second, Consumers Energy proposes to amend the project description from ordering paragraphs of the Commission's prior relicensing order, Exhibit A, and Exhibit F-2 to redefine the primary transmission line. The primary transmission line is currently

described as the 46 kV lines running from Consumers Energy's 2.4-46 kV distribution substation to an interconnection with other components of Consumers Energy's interconnected local distribution system. Because the 2.4-46 kV substation is part of Consumers Energy's distribution system, that substation is the point at which project output is delivered to the interconnected transmission/distribution system. Thus, these lines proposed for removal from the license do not qualify as "primary transmission lines" necessary to move project output to the regional grid.

Accordingly, Consumers Energy proposes to define the licensed primary transmission line as the circuits and other infrastructure that deliver project output from the generators to Consumers Energy's 2.4-46 kV distribution substation. Consumers Energy also proposes to remove the depiction of the non-project lines leaving the 2.4-46 non-distribution substation and exiting circuits from Exhibit F-2.

Consumers Energy's proposed amendments to the Five Channels Project license are specified in the following Attachments:

Five Channels Project No. 2453 Attachments	
Attachment 19	Redline showing proposed amendments to the Project Description in the license issued on issued July 15, 1994.
Attachment 20	Redline showing proposed amendments to Exhibit A
Attachment 21	Clean version of amended Exhibit A
Attachment 22 (CUI/CEII)	Illustrative markup of Exhibit F-2 identifying drawing elements proposed for removal from that exhibit. Exhibit F-2 currently identifies the 2.4-46 kV distribution substation as excluded from the license. Consumers Energy proposes to remove the 2.4-46 kV distribution substation from Exhibit F-2 consistent with the proposed amendments to Exhibit A.

G. Webber Project No. 2559 – Proposed Non-Capacity Amendment

For the Webber Project, Consumers Energy proposes limited, non-substantive amendments to Exhibit F-1 to reconcile it with the description of project works in Exhibit

A. Exhibit A indicates that the 46 kV substation is excluded from the license. Exhibit F-1, however, depicts the excluded 46 kV substation, but does not include an annotation that the substation is excluded from the license.

Accordingly, to avoid confusion, Consumers Energy proposes a non-substantive amendment to Exhibit F-1 to clarify that the 46 kV non-project substation is not a licensed project work.

Consumers Energy's proposed amendments to the Webber Project license are specified in the following Attachment:

Webber Project No. 2559 Attachments	
Attachment 23 (CUI/CEII)	Illustrative markup of Exhibit F-1 identifying the non-project 46 kV distribution substation that requires clarification as non-licensed infrastructure.

H. Hodenpyl Project No. 2599 – Proposed Non-Capacity Amendment

For the Hodenpyl Project, Consumers Energy proposes limited, non-substantive amendments to Exhibit F-2 to reconcile it with description of project works in Exhibit A. Exhibit A does not identify or describe any distribution infrastructure that should not be included as licensed project works. Exhibit F-2, however, depicts Consumers Energy's non-project substation, lines, and related infrastructure, but the exhibit does not indicate those are non-project works.

Accordingly, Consumers Energy proposes non-substantive amendments to Exhibit F-2 to clarify that the distribution infrastructure is not a licensed project work.

Consumers Energy's proposed amendments to the Hodenpyl Project license are specified in the following Attachment:

Hodenpyl Project No. 2559 Attachments	
Attachment 24 (CUI/CEII)	Illustrative markup of Exhibit F-2 identifying Consumers Energy's non-project distribution infrastructure that requires clarification as non-licensed infrastructure.

IV. REQUEST FOR NON-PROJECT USE OF PROJECT LANDS

Pursuant to Standard Article 5 of the licenses for the Projects, Consumers Energy respectfully requests Commission approval for the non-project use of project lands concerning Consumers Energy's existing distribution infrastructure located within each Project's boundary. As described herein, following transfer of the Project's licenses and conveyance of the Projects to the Confluence Hydro subsidiaries, Consumers Energy will continue to own and exclusively operate certain distribution infrastructure. Thus, this request for authorization for non-project use of project lands seeks the Commission's approval for:

1. The continued occupancy of Consumers Energy's existing non-project distribution infrastructure (*e.g.*, distribution substations) within the Projects' boundaries, including the infrastructure proposed for removal from certain licenses via the amendments to the Projects' licenses described above; and
2. Consumers Energy's continued access to these lands for purposes of operation and maintenance of its existing distribution infrastructure within the Projects' boundaries, including the infrastructure proposed for removal from certain licenses via the amendments to the Projects' licenses described above.

The proposed non-project use of project lands will be consistent with Consumers Energy's status quo utility practices conducted on project lands for decades. Consumers Energy does not propose any new or changed project operations, the construction or alteration of project works, or other ground disturbing activities as part of this request for

non-project use of project lands. It simply requests Commission approval for the continued existence of these facilities and Consumers Energy's continued access for operation and maintenance purposes, once it is no longer the licensee.

By granting this request, the Commission will enable Consumers Energy to continue utilizing existing distribution infrastructure to support its service commitments without conflicting with the regulatory requirements of the licensed Projects post-license transfer. This approval will also ensure operational continuity and efficiency, aligning with both regulatory standards and Consumers Energy's dedication to providing safe and reliable electric service to its regional customers.

A. Existing Non-Project Infrastructure Within the Projects' Boundaries

The existing non-project infrastructure located within the Projects' boundaries consists of high-voltage distribution lines, primary overhead low-voltage distribution lines, primary underground distribution lines, secondary overhead distribution lines, secondary underground distribution lines, distribution substations, and associated facilities. Attachment 28 includes a map for each Project showing the location of Consumers Energy's non-project distribution facilities within each project boundary.

In all cases, Consumers Energy's existing distribution equipment has been in place for decades. Following transfer of the Projects' licenses and conveyance of the Projects to the Confluence Hydro subsidiaries, Consumers Energy will be exclusively responsible for maintaining and operating this non-project distribution infrastructure as part of its integrated regional grid.

B. Proposed Non-Project Access Rights and Activities

Pursuant to the terms of the PSA, Consumers Energy will retain access for continued operation and maintenance of its non-project distribution infrastructure located

within the Projects' boundaries consistent with historic and prudent utility practices via reserved easements conveyed through a quitclaim deed and temporary substation easements, as described in the PSA. The Form of Quitclaim Deed (Attachment 26) establishes broad rights for Consumers Energy to access its distribution equipment and includes the following *Linweave* clause[62] such that the licensee will retain sufficient rights for purposes of carrying out license requirements:

> Notwithstanding any other provision contained herein, in connection with the easements and rights reserved by Grantor herein, Grantee, its successors, and assigns, have the right to perform any and all acts required by the conditions of the license for Project No. _____, Federal Energy Regulatory Commission ("Commission") orders, Commission delegated staff orders or directives, or the Commission's regulations in effect from time to time, at any time, without the prior approval of Grantor.[63]

The Form of Temporary Substation Easement Agreement (Attachment 27), includes the following *Linweave* clause:

> Notwithstanding any other provision contained herein, Grantor, its successors, and assigns, have the right to perform any and all acts required by the conditions of the license for Project No. [_____], Commission orders, Commission delegated staff orders or directives, or the Commission's regulations in effect from time to time, at any time, without the prior approval of Grantee.[64]

1. Low Voltage Distribution Lines

As set forth in the Form of Quitclaim Deed granting Consumers Energy continued access to the project lands, Consumers Energy will continue to access the Projects' lands as necessary to maintain and operate its existing low voltage distribution (0-46kV) assets. Operation and maintenance of these assets will include continued access to maintain,

---

62 *Linweave, Inc.*, 23 FERC ¶ 61,391 (1983).

63 *See* Attachment 26.

64 *See* Attachment 27.

inspect (including aerial patrol), survey, replace, reconstruct, improve, remove, relocate, change the size of, enlarge, and protect a line or lines of electric facilities. As needed, Consumers Energy will also access project lands to trim, cut down, and otherwise remove or control any trees, brush, roots, and other vegetation that is or may impact Consumers Energy's distribution assets.

This may include access necessary to maintain, inspect, construct, or reconstruct any pole structures, poles, or any combination of same, wires, cables, conduits, crossarms, braces, guys, anchors, transformers, electric control circuits and devices, location markers and signs, communication systems, utility lines, protective apparatus and all other equipment, appurtenances, associated fixtures, and facilities, for existing or future needs, whether above or below grade.

Consumers Energy's access to its existing distribution facilities will include an easement over, under, across, and through a 40-foot-wide strip of land, with an additional 10-feet of either side of the 40-foot-wide strip for temporary workspace.[65]

2. High Voltage Distribution Lines

As set forth in the Form of Quitclaim Deed, Consumers Energy will continue to access the project lands as necessary to maintain and operate its high voltage distribution (46-138kV) assets. Operation and maintenance of these assets will include continued access to maintain, inspect (including aerial patrol), survey, replace, reconstruct, improve, remove, relocate, change the size of, enlarge, and protect a line or lines of electric facilities. This may include access necessary to maintain, inspect, construct, or reconstruct any pole structures, poles, or any combination of same, wires, cables,

[65] *See* Attachment 25.

conduits, crossarms, braces, guys, anchors, transformers, electric control circuits and devices, location markers and signs, communication systems, utility lines, protective apparatus and all other equipment, appurtenances, associated fixtures, and facilities, for existing or future needs, whether above or below grade. As needed, Consumers Energy will also access these project lands to trim, cut down, and otherwise remove or control any trees, brush, roots, and other vegetation that is or may impact Consumers Energy's distribution assets.

Consumers Energy's access to its distribution facilities will include an easement over, under, across, and through an 80-foot-wide strip of land, with an additional 10-feet of either side of the 80-foot-wide strip for temporary workspace.[66]

3. Substations

As set forth in the Form of Temporary Substation Easement Agreement and in the Form of Quitclaim Deed, Consumers Energy will continue to access the project lands as necessary to maintain and operate its electric transmission and distribution substations. Operation and maintenance of these assets will include continued access to maintain, inspect (including aerial patrol), survey, replace, reconstruct, improve, remove, relocate, change the size of, enlarge, and protect the substation and any connected switching stations, transformers, lines, poles or other structures supporting the substations. As needed, Consumers Energy will also access these project lands to trim, cut down, and otherwise remove or control any trees, brush, roots, and other vegetation located within 80 feet of the fenced area containing substation assets that is or may impact Consumers Energy's distribution assets.

---

[66] *See* Attachment 25.

Consumers Energy's access to the substation and related assets will include the fenced area surrounding the substation as well as a 20-foot area outside of the fence allowing for temporary works space, grounding pads, switch poles, etc. and screening which may include vegetation, and driveway (ingress/egress) 20-feet in width.

The maps identifying Consumers Energy's distribution infrastructure (Attachment 28) indicate the location of existing substations in a yellow polygon. For the Foote, Webber, Five Channels, and Hodenpyl Projects, the maps also identify a "reserved easement" in a blue polygon. The PSA contemplates that existing substations at those projects will need to be relocated post-transfer consistent with applicable standards, rules, and/or regulations. To facilitate that future, post-transfer relocation, the applicable quitclaim deeds include reserved easements where the substations will most likely be relocated to. At this time, the specific plans, timing, and ultimate locations for relocating substations at the Foote, Hodenpyl, Webber, and Five Channels are under development. This Application does not seek authorization for any ground disturbing activities, including the post-transfer relocation of the Foote, Webber, Five Channels, and Hodenpyl substations. The reserved easements simply identify the most likely locations where those substations will be relocated after transfer to Confluence Hydro. Separate authorizations for the post-transfer substation relocations will be sought from the Commission, as appropriate.

V. PRE-FILING CONSULTATION

This Application involves only ministerial, administrative amendments and authorizations under Consumers Energy's licenses for the Projects. This Application involves no changes to operation and maintenance of the Projects, nor does it seek approval of any ground disturbing activities. For these reasons, this Application does not

"affect the interests of" any resource agency or Indian tribe listed in section 4.38(a)(1) of the Commission's regulations.[67] Accordingly, the Commission's regulations require no prefiling consultation for this Application.[68]

VI. REQUEST FOR PRIVILEGED TREATMENT

In accordance with FERC's regulations governing Critical Energy Infrastructure Information (CEII),[69] information included in this Application contains CEII and is being filed in a separate attachment for inclusion in FERC's non-public file. The attached Exhibit F design drawings and project overview maps include sensitive and detailed engineering information detailing the critical distribution infrastructure at the Projects that, if used incorrectly, may compromise the safety of the Projects and those responsible for its proper operation. As such, Consumers Energy respectfully requests, in accordance with section 388.113(d) of the Commission's regulations,[70] that FERC maintain this information in its non-public file as CEII.[71] Each page of these attachments has been marked as "CUI//CEII."

70 *Id.* § 388.113(d)(1)(i).

71 *Id.* § 388.113(d)(1)(ii).

VII. CONCLUSION

WHEREFORE, for the reasons described above, Consumers Energy submits that this Application is in the public interest and requests the Commission to approve it as specified in Attachment 1.

Respectfully submitted,

Proposed Ordering Paragraphs

Proposed Ordering Paragraphs

The Director orders:

(A) Consumers Energy's Application for Non-Capacity Related Amendments of Licenses and Request for Non-Project Use of Project Lands, filed October 31, 2025, is approved, as provided in Ordering Paragraphs A through EE.

For the Calkins Bridge Hydroelectric Project No. 785:

(B) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Calkins Bridge Hydroelectric Project (FERC Project No. 785) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Foote Hydroelectric Project No. 2436:

(C) The Project Description in Ordering Paragraph (B)(2) of the Order Issuing New License, issued July 15, 1994, as amended on July 29, 2025, is revised to read as follows:

Project works consisting of: (a) An approximately 4,100-foot-long main dam that consists of a 700-foot-long by 50-foot-high left earth embankment and a 3,400-foot-long by 50-feet-high right earth embankment; (b) An approximately 93-foot-long by 60-foot-high concrete slab spillway constructed of reinforced concrete with a concrete spillway apron and a lined discharge channel that extends approximately 210 feet downstream from the spillway with a 12-foot-high concrete weir approximately 65 feet downstream from the spillway; (c) An existing impoundment with a normal maximum surface area of approximately 1,800 acres at a normal maximum surface elevation of 639.3 feet National Geodetic Vertical Datum of 1929, a gross capacity of 32,660 acre-feet, and a normal usable storage capacity of approximately 2,180 acre-feet; (d) A steel frame, reinforced concrete and masonry powerhouse with three generating units with a authorized installed capacity of 7,229 kilowatts; (e) transmission facilities; and (f) appurtenant facilities.

(D) Consumers Energy's application filed on October 31, 2025, for the Foote Hydroelectric Project (FERC Project No. 2436), requesting to amend the approved Exhibit A, is approved and made part of the license, superseding the previous Exhibit A.

(E) Consumers Energy's application filed on October 31, 2025, for the Foote Hydroelectric Project (FERC Project No. 2436), requesting to amend the approved Exhibit F-2 drawing, is approved. Within 90 days of this order, the licensee shall file for Commission approval a revised Exhibit F-2 drawing to implement the approved changes. A courtesy copy shall be filed with the Commission's Division of Dam Safety and Inspections (D2SI)—Chicago Regional Engineer; the Director, D2SI; and the Director, Division of Hydropower Administration and Compliance.

(F) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Foote Hydroelectric Project (FERC Project No. 2436) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Alcona Hydroelectric Project No. 2447:

(G) Consumers Energy's application filed on October 31, 2025, for the Alcona Hydroelectric Project (FERC Project No. 2447), requesting to amend the approved Exhibit A, is approved and made part of the license, superseding the previous Exhibit A.

(H) Consumers Energy's application filed on October 31, 2025, for the Alcona Hydroelectric Project (FERC Project No. 2447), requesting to amend the approved Exhibit F-2 drawing, is approved. Within 90 days of this order, the licensee shall file for Commission approval a revised Exhibit F-2 drawing to implement the approved changes. A courtesy copy shall be filed with the Commission's Division of Dam Safety and Inspections (D2SI)—Chicago Regional Engineer; the Director, D2SI; and the Director, Division of Hydropower Administration and Compliance.

(I) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Alcona Hydroelectric Project (FERC Project No. 2447) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Mio Hydroelectric Project No. 2448:

(J) Consumers Energy's application filed on October 31, 2025, for the Mio Hydroelectric Project (FERC Project No. 2448), requesting to amend the approved Exhibit A, is approved and made part of the license, superseding the previous Exhibit A.

(K) Consumers Energy's application filed on October 31, 2025, for the Mio Hydroelectric Project (FERC Project No. 2448), requesting to amend the approved Exhibit F-2 drawing, is approved. Within 90 days of this order, the licensee shall file for Commission approval a revised Exhibit F-2 drawing to implement the approved changes. A courtesy copy shall be filed with the Commission's Division of Dam Safety and Inspections (D2SI)—Chicago Regional Engineer; the Director, D2SI; and the Director, Division of Hydropower Administration and Compliance.

(L) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Mio Hydroelectric Project (FERC Project No. 2448) is approved: (1) the continued occupation of existing non-project

distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Loud Hydroelectric Project No. 2449:

(M) Consumers Energy's application filed on October 31, 2025, for the Loud Hydroelectric Project (FERC Project No. 2449), requesting to amend the approved Exhibit A, is approved and made part of the license, superseding the previous Exhibit A.

(N) Consumers Energy's application filed on October 31, 2025, for the Loud Hydroelectric Project (FERC Project No. 2449), requesting to amend the approved Exhibit F-2 drawing, is approved. Within 90 days of this order, the licensee shall file for Commission approval a revised Exhibit F-2 drawing to implement the approved changes. A courtesy copy shall be filed with the Commission's Division of Dam Safety and Inspections (D2SI)—Chicago Regional Engineer; the Director, D2SI; and the Director, Division of Hydropower Administration and Compliance.

(O) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Loud Hydroelectric Project (FERC Project No. 2449) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Cooke Hydroelectric Project No. 2450:

(P) The Project Description in Ordering Paragraph B(2) of the Order Issuing New License, issued July 15, 1994, as amended in August 29, 2001, is revised to read as follows:

Project works consisting of: (a) two existing earth embankment dam sections, one 60 feet high to the north, and one 60 feet high to the south; (b) a 60-foot-high concrete slab spillway with a concrete spillway apron and a 12-foot-high concrete weir located 70 feet downstream from the spillway gates; (c) an existing impoundment with a normal maximum surface area of 1,627 acres at a surface level of 679.0 feet U.S. Geological Survey datum with gross storage of 26,749 acre-feet and normal usable storage of 1,743 acre-feet; (d) a powerhouse containing three generators with a total rated capacity of 9,000 kW and three turbines with a total best gate capacity of 6,609 kW; (e) transmission facilities; and, (f) appurtenant facilities.

(Q) Consumers Energy's application filed on October 31, 2025, for the Cooke Hydroelectric Project (FERC Project No. 2450), requesting to amend the approved Exhibit A, is approved and made part of the license, superseding the previous Exhibit A.

(R) Consumers Energy's application filed on October 31, 2025, for the Cooke Hydroelectric Project (FERC Project No. 2450), requesting to amend the approved Exhibit F-2 drawing, is approved. Within 90 days of this order, the licensee shall file for Commission

approval a revised Exhibit F-2 drawing to implement the approved changes. A courtesy copy shall be filed with the Commission's Division of Dam Safety and Inspections (D2SI)—Chicago Regional Engineer; the Director, D2SI; and the Director, Division of Hydropower Administration and Compliance.

(S) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Cooke Hydroelectric Project (FERC Project No. 2450) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Rogers Hydroelectric Project No. 2451:

(T) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Rogers Hydroelectric Project (FERC Project No. 2451) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Hardy Hydroelectric Project No. 2452:

(U) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Hardy Hydroelectric Project (FERC Project No. 2452) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Five Channels Hydroelectric Project No. 2453:

(V) The Project Description in Ordering Paragraph B(2) of the Order Issuing New License, issued July 15, 1994 is revised to read as follows:

Project works consisting of: (a) two existing earth embankment dam sections, one 45 feet high to the north, and one 45 feet high to the south; (b) a 60-foot-high concrete slab spillway with a concrete spillway apron and an 8-foot-high concrete weir located 60 feet downstream from the spillway gates; (c) an existing impoundment with a normal maximum surface area of 212 acres at a surface level of 715.0 feet U.S. Geological Survey datum with gross storage of 3,419 acre-feet and normal usable storage of 124 acre-feet; (d) a powerhouse containing two generating units with a total rated capacity of 6,000 kW; (e) transmission facilities; and, (f) appurtenant facilities.

(W) Consumers Energy's application filed on October 31, 2025, for the Five Channels Hydroelectric Project (FERC Project No. 2453), requesting to amend the approved Exhibit A, is

approved and made part of the license, superseding the previous Exhibit A.

(X) Consumers Energy's application filed on October 31, 2025, for the Five Channels Hydroelectric Project (FERC Project No. 2453), requesting to amend the approved Exhibit F-2 drawing, is approved. Within 90 days of this order, the licensee shall file for Commission approval a revised Exhibit F-2 drawing to implement the approved changes. A courtesy copy shall be filed with the Commission's Division of Dam Safety and Inspections (D2SI)—Chicago Regional Engineer; the Director, D2SI; and the Director, Division of Hydropower Administration and Compliance.

Y) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Five Channels Hydroelectric Project (FERC Project No. 2453) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Croton Hydroelectric Project No. 2468:

(Z) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Croton Hydroelectric Project (FERC Project No. 2468) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Webber Hydroelectric Project No. 2566:

(AA) Consumers Energy's application filed on October 31, 2025, for the Webber Hydroelectric Project (FERC Project No. 2566), requesting to amend the approved Exhibit F-2 drawing, is approved. Within 90 days of this order, the licensee shall file for Commission approval a revised Exhibit F-2 drawing to implement the approved changes. A courtesy copy shall be filed with the Commission's Division of Dam Safety and Inspections (D2SI)—Chicago Regional Engineer; the Director, D2SI; and the Director, Division of Hydropower Administration and Compliance.

(BB) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Webber Hydroelectric Project (FERC Project No. 2566) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Tippy Hydroelectric Project 2580:

(CC) Consumers Energy's application filed on October 31, 2025, requesting

authorization of the following non-project use of project lands at the Tippy Hydroelectric Project (FERC Project No. 2580) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

For the Hodenpyl Hydroelectric Project No. 2599:

(DD) Consumers Energy's application filed on October 31, 2025, for the Hodenpyl Hydroelectric Project (FERC Project No. 2599), requesting to amend the approved Exhibit F-2 drawing, is approved. Within 90 days of this order, the licensee shall file for Commission approval a revised Exhibit F-2 drawing to implement the approved changes. A courtesy copy shall be filed with the Commission's Division of Dam Safety and Inspections (D2SI)—Chicago Regional Engineer; the Director, D2SI; and the Director, Division of Hydropower Administration and Compliance.

(EE) Consumers Energy's application filed on October 31, 2025, requesting authorization of the following non-project use of project lands at the Hodenpyl Hydroelectric Project (FERC Project No. 2599) is approved: (1) the continued occupation of existing non-project distribution infrastructure located within the project boundary; and (2) Consumers Energy's access to project lands for purposes of continued operation and maintenance of existing distribution infrastructure.

ATTACHMENT 2

Foote Hydroelectric Project No. 2436
License Ordering Paragraph (B)(2) (Redline)

(2) Project works consisting of: (a) An approximately 4,100-foot-long main dam that consists of a 700-foot-long by 50-foot-high left earth embankment and a 3,400-foot-long by 50-feet-high right earth embankment; (b) An approximately 93-foot-long by 60-foot-high concrete slab spillway constructed of reinforced concrete with a concrete spillway apron and a lined discharge channel that extends approximately 210 feet downstream from the spillway with a 12-foot-high concrete weir approximately 65 feet downstream from the spillway; (c) An existing impoundment with a normal maximum surface area of approximately 1,800 acres at a normal maximum surface elevation of 639.3 feet National Geodetic Vertical Datum of 1929, a gross capacity of 32,660 acre-feet, and a normal usable storage capacity of approximately 2,180 acre-feet; (d) A steel frame, reinforced concrete and masonry powerhouse with three generating units with a authorized installed capacity of 7,229 kilowatts; ~~(e) A substation adjoining the powerhouse~~; (e~~f~~) ~~A 600-foot-long, 46 kilovolt~~ transmission facilities ~~line running from the substation to the licensee's interconnected primary transmission system~~; and (f~~g~~) appurtenant facilities.

FOOTE PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Foote Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit F1 and F2 which are part of this application for new license.

A.1.1 DAM

The main dam consists of earth embankments constructed of hydraulically placed fill with a concrete core wall on the upstream side along all but the far-left end of the left embankment and along about 82 feet of the right embankment.

The main dam is approximately 4,100 feet in length consisting of two sections of earth embankment (a 700 foot long left earth embankment and a 3,400 foot long right earth embankment)., a powerhouse block, and a spillway section. The earth embankment sections are founded on steel sheet piling cutoff. The powerhouse and spillway sections occupy approximately 196 feet of the dam.

A.1.2 SPILLWAY

The spillway is approximately 93 feet in length and is constructed of reinforced concrete. It contains three steel tainter gate (normally closed), 24 feet wide by 14.5 feet high. A concrete lined discharge channel extends approximately 210 feet downstream from the tainter gates with a 12 foot high concrete weir approximately 65 feet downstream of the tainter gates. Where the right

embankment terminates there is 1,300 foot long low area that serves as an emergency spillway. A stationary propane generator is available to provide emergency power to Spillgate No.1.

A.1.3 POWERHOUSE/PENSTOCKS

A steel frame, reinforced concrete and masonry powerhouse occupies approximately 103 feet of the dam, and houses three 3,000 KW generating units. Each unit is located in a penstock with a steel tainter gate.

A.1.4 TAILRACE

A tailrace extends approximately 165 feet downstream from the powerhouse with a concrete weir at the downstream end. The top of the weir is 6.5 feet above the bottom of the draft tube at the powerhouse. The sides of the tailrace are constructed of reinforced concrete over the entire length while the bottom is reinforced concrete for approximately the first 25 feet and granular soil and rock for the remainder of the tailrace.

A.1.5 SUBSTATION

None.

~~The substation adjoins the powerhouse on the south bank of the river and contains two 3-phase, 5,000 KVA, 4.8-46 KV transformers with necessary switching equipment and protective devices. The substation also contains one distribution circuit connection supplied by a transformer bank consisting of two, 250 kVA and one 333 kVA, 4.8 kV to 4.8/8.32 kV single-phase transformers. This distribution circuit is not included in the license.~~

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 1,703 acres at a normal maximum surface elevation of 639.3 feet (NGVD29). The gross capacity of the Foote reservoir is 32,660 acre-feet.

The normal usable storage capacity, that under normal operating conditions (1.35 foot impoundment fluctuations), is approximately 2,180 acre-feet.

FERC Order dated June 21, 2011 approving the results of the Three Year Manual Operations Test Plan results also approved an amendment to License Articles 403 providing for the Foote impoundment surface water elevation be maintained at 639.2 ft,- 1.25 feet and + 0.1 feet. The order also provided for the use of the automatic control system.

In 1988 a survey established plant elevations to the (then) modern USGS elevations (referenced to NGVD29) and plant elevations were revised to the new standard. The revised elevations were utilized in the 1992 Offer of Settlement, elevations included in the project license are referenced to USGS datum.

A.3 GENERATING EQUIPMENT

Each of the three generating units is composed of one Allis-Chalmers Type 15, 90 RPM, 4,250 horsepower at 35 foot head, 100 inch diameter Francis type hydraulic turbine direct-connected to an General Electric, vertical, 90 RPM, 5.0 kV, 3,333kVA, 0.90 PF, 3 phase generator, with a General Electric 58 KW direct connected exciter. The turbine gates on each unit are controlled by an Allis-Chalmers #3 oil pressure governor.

FERC Order dated January 26, 2001, amended ordering paragraph B(2) and License Article 201 to reflect the demonstrated actual capacities for each unit as shown in the table below.

	Turbine Capacity (T)) (kW)	Generator Capacity (G) (kW)
Foote Project		
Unit #1	2,587	3,000
Unit #2	2,328	3,000

Unit #3	2,314	3,000
Total	**7,229**	**9,000**

A.4 PRIMARY TRANSMISSION LINE

The primary transmission line is the approximately 25-foot long connector from the generator output to an interconnection with the local distribution system at a non-project 46 kV distribution substation.

~~The 46 KV line transmission line, approximately 600 feet in length, from the substation to the Licensee's interconnected primary transmission system is included in the Foote project license.~~

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A powerhouse crane of 25 ton capacity with electrically driven hoist with manal bridge travel manufactured by the Whiting Foundry Equipment Company

A.5.2 HOISTS

The penstock tainter gates are controlled by three fixed electrically driven hoists. Three electric motor driven hoists are used to control the three spillway tainter gates. During scheduled or unscheduled project shutdowns, the controls on one of these hoists will automatically open on of the gates enough to assure adequate tailwater flow (minimum flow) for the continued protection of downstream biological communities as further described in Exhibits B and E of the application for new license.

A.5.4 ADDITIONAL APPURTENANT EQUIPMENT

Each of the three generators is connected through oil circuit breakers to a 4,800 volt bus. Station power is supplied from this bus by one 25 KVA, 4,800-240/120 volt transformer~~s~~.

A.6 UNITED STATES LANDS

Lands of the United States enclosed within the project boundary, as shown in Exhibit G of this application are:

	Location/Description		Area (Acres)
	Oscoda Twp, Iosco County; T24N, R8E, SW1/4 of Sec 20; SE1/4 and SW1/4 of Sec 19; NW1/4 of Sec 29; NW1/4 of Sec 30.		108
	Oscoda Twp., Iosco County; T24N, R7E, SW1/4 of Sec. 13; S1/2 of SE1/4 of Sec 14; SW1/4 of Sec. 14; SE1/4 of Sec 15; NE1/4 of NE1/4 of Sec 22; N1/2 of NW1/4 of Sec. 23; NE1/4 of Sec. 23; Sec24; NE1/4 of NE1/4 of Sec. 25.		376
	Total Acreage		484

Commission order dated December 8, 1995 revised Article 201 of the Foote license eliminating the 484 acres of federal lands for the purpose of calculating the annual charges recompensing the United States for the use, occupancy and enjoyment of these lands.

FOOTE PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Foote Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit F1 and F2 which are part of this application for new license.

A.1.1 DAM

The main dam consists of earth embankments constructed of hydraulically placed fill with a concrete core wall on the upstream side along all but the far-left end of the left embankment and along about 82 feet of the right embankment.

The main dam is approximately 4,100 feet in length consisting of two sections of earth embankment (a 700 foot long left earth embankment and a 3,400 foot long right earth embankment)., a powerhouse block, and a spillway section. The earth embankment sections are founded on steel sheet piling cutoff. The powerhouse and spillway sections occupy approximately 196 feet of the dam.

A.1.2 SPILLWAY

The spillway is approximately 93 feet in length and is constructed of reinforced concrete. It contains three steel tainter gate (normally closed), 24 feet wide by 14.5 feet high. A concrete lined discharge channel extends approximately 210 feet downstream from the tainter gates with a 12 foot high concrete weir approximately 65 feet downstream of the tainter gates. Where the right

embankment terminates there is 1,300 foot long low area that serves as an emergency spillway. A stationary propane generator is available to provide emergency power to Spillgate No.1.

A.1.3 POWERHOUSE/PENSTOCKS

A steel frame, reinforced concrete and masonry powerhouse occupies approximately 103 feet of the dam, and houses three 3,000 KW generating units. Each unit is located in a penstock with a steel tainter gate.

A.1.4 TAILRACE

A tailrace extends approximately 165 feet downstream from the powerhouse with a concrete weir at the downstream end. The top of the weir is 6.5 feet above the bottom of the draft tube at the powerhouse. The sides of the tailrace are constructed of reinforced concrete over the entire length while the bottom is reinforced concrete for approximately the first 25 feet and granular soil and rock for the remainder of the tailrace.

A.1.5 SUBSTATION

None.

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 1,703 acres at a normal maximum surface elevation of 639.3 feet (NGVD29). The gross capacity of the Foote reservoir is 32,660 acre-feet. The normal usable storage capacity, that under normal operating conditions (1.35 foot impoundment fluctuations), is approximately 2,180 acre-feet.

FERC Order dated June 21, 2011 approving the results of the Three Year Manual Operations Test Plan results also approved an amendment to License Articles 403 providing for the Foote

impoundment surface water elevation be maintained at 639.2 ft,- 1.25 feet and + 0.1 feet. The order also provided for the use of the automatic control system.

In 1988 a survey established plant elevations to the (then) modern USGS elevations (referenced to NGVD29) and plant elevations were revised to the new standard. The revised elevations were utilized in the 1992 Offer of Settlement, elevations included in the project license are referenced to USGS datum.

A.3 GENERATING EQUIPMENT

Each of the three generating units is composed of one Allis-Chalmers Type 15, 90 RPM, 4,250 horsepower at 35 foot head, 100 inch diameter Francis type hydraulic turbine direct-connected to an General Electric, vertical, 90 RPM, 5.0 kV, 3,333kVA, 0.90 PF, 3 phase generator, with a General Electric 58 KW direct connected exciter. The turbine gates on each unit are controlled by an Allis-Chalmers #3 oil pressure governor.

FERC Order dated January 26, 2001, amended ordering paragraph B(2) and License Article 201 to reflect the demonstrated actual capacities for each unit as shown in the table below.

	Turbine Capacity (T)) (kW)	Generator Capacity (G) (kW)
Foote Project		
Unit #1	2,587	3,000
Unit #2	2,328	3,000
Unit #3	2,314	3,000
Total	**7,229**	**9,000**

A.4 PRIMARY TRANSMISSION LINE

The primary transmission line is the approximately 25-foot long connector from the generator output to an interconnection with the local distribution system at a non-project 46 kV distribution substation.

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A powerhouse crane of 25 ton capacity with electrically driven hoist with manal bridge travel manufactured by the Whiting Foundry Equipment Company

A.5.2 HOISTS

The penstock tainter gates are controlled by three fixed electrically driven hoists. Three electric motor driven hoists are used to control the three spillway tainter gates. During scheduled or unscheduled project shutdowns, the controls on one of these hoists will automatically open on of the gates enough to assure adequate tailwater flow (minimum flow) for the continued protection of downstream biological communities as further described in Exhibits B and E of the application for new license.

A.5.4 ADDITIONAL APPURTENANT EQUIPMENT

Each of the three generators is connected through oil circuit breakers to a 4,800 volt bus. Station power is supplied from this bus by one 25 KVA, 4,800-240/120 volt transformers.

A.6 UNITED STATES LANDS

Lands of the United States enclosed within the project boundary, as shown in Exhibit G of this application are:

	Location/Description		Area (Acres)
	Oscoda Twp, Iosco County; T24N, R8E, SW1/4 of Sec 20; SE1/4 and SW1/4 of Sec 19; NW1/4 of Sec 29; NW1/4 of Sec 30.		108

ALCONA PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Alcona Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit F1 and F2 which are part of the Alcona Project license.

A.1.1 DAM

The dam is approximately 4,700 feet in width consisting of, from left to right looking downstream: a 400 foot wide vegetative lined auxiliary spillway, 2,750 foot wide left earthen embankment, an 80 foot wide powerhouse, and a 1,470 foot wide right embankment. The left embankment includes a 300 foot concrete core wall and the right embankment includes a 1,500 foot concrete core wall. The right embankment concrete core wall is tied to a steel sheetpile cutoff wall adjacent to the powerhouse. The left embankment concrete core wall is tied to a 660 foot steel sheetpile cutoff wall adjacent to the powerhouse, 130 feet of wood pile cutoff wall and 1,710 feet of embankment without a core wall. In 2024, sheetpile was installed upstream of the entire core wall and backfilled with concrete.

A.1.2 SPILLWAY

The undersluice spillway system consists of six spill tubes (three for each unit). The spill tubes are conduits of varying dimensions from the penstock inlets to the draft tube and are an integral part of the concrete powerhouse substructure. Each spill tube contains a 78 inch diameter motor operated butterfly valve (normally closed) to control flow.

To augment the ordinary spilling capacity an auxiliary spillway of 400 feet in width is located at the east end of the embankment. This spillway is designed to provide additional spill capacity when the water surface in the reservoir is more than five feet above the normal surface elevation (829.0 ft (NGVD29)).

A.1.3 POWERHOUSE/PENSTOCK

The steel frame, reinforced concrete and masonry powerhouse occupies approximately 80 feet of the dam, and houses two 4,000 KW generating units and undersluice spillway system which discharge into the draft tubes. Each unit is located in a penstock with a steel Tainter gate controlling flow to both the turbine and the spill tubes.

A.1.4 TAILRACE

A fan shaped concrete lined tailrace extends approximately 135 feet downstream from the powerhouse. The bottom of the tailrace has a four-foot vertical step up at approximately 55 feet downstream from the powerhouse.

A.1.5 SUBSTATION

None. ~~There is one 10MVA, 4.8-138 KV transformer located in the substation located downstream of the powerhouse.~~

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 1,006 acres at a normal surface elevation of 829.0 feet (NGVD29). The gross capacity of the Alcona reservoir is approximately12,547 acre- feet at the 829.0 feet surface water elevation.

In 2000 an automatic control system was installed at the Alcona Project providing for impoundment level control by adjusting turbine flows. FERC Order dated July 26, 2012 approved the results of the Three Year Manual Operations Test Plan results. The order also approved amendments to License Articles 401 and 403 providing for the Alcona impoundment surface water elevation be maintained at 829.0 ft +/- 0.25 feet (NGVD29). The order also provided for the use of the automatic control system.

During 2010, the auto-control system was changed to be in-sync with the new PLC control system at the downstream Foote Dam (FERC Project No. 2436).

In 1988 a survey established plant elevations to the (then) modern USGS elevations (referenced to NGVD29) and plant elevations were revised to the new standard. The revised elevations were utilized in the 1992 Offer of Settlement, elevations included in the project license, are referenced to USGS datum.

A.3 GENERATING EQUIPMENT

Each of the two vertical generating units is composed of one Wellman-Seaver-Morgan, 90 RPM, 5,500 horsepower at 40 foot head, 100 inch diameter Francis type hydraulic turbine direct- connected to General Electric Company 90 RPM, 5.0 KV, 4,444 KVA, 0.9 PF, 3 phase generator, direct-connected to a 60 KW exciter. The turbine gates are controlled by Sorensen Model 2 APH gate operators.

A.4 PRIMARY TRANSMISSION LINE

A 4,8 KV circuit connection of 400 feet from the powerhouse to a 138 KV switching station is included in the license.

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A 30 ton capacity crane services the powerhouse.

A.5.2 HOISTS

The Tainter gate hoists are located on the upstream deck and are driven by electric motors.

A.5.3 SPILL TUBE VALVES

The valves are operated by 230 vac motors powered from the station power bus. In the event of a loss of ac power a 50 kw auxiliary propane generator (installed in 2021) can provide power to the valve motors.

During scheduled or unscheduled project shutdowns, an automatic control system will fully open one of the spill tube valves to assure tailwater flow (minimum flow) necessary for the continued protection of downstream biological communities as further described in Exhibits B and E of the application for new license.

A.5.4 ADDITIONAL APPURTENANT EQUIPMENT

Each of the two generators is connected through oil circuit breakers to a 4,800 volt bus. Station power is supplied from this bus by one 75 KVA, 4,800-120/240 volt transformer. Control voltage is supplied by a 60 cell 125 volt DC battery bank.

A.6 UNITED STATES LANDS

Lands of the United States enclosed within the project boundary, as shown in Exhibit G are:

	Location/Description		Area (Acres)
	Curtis Twp. Alcona County; T25N, R5E, SE1/4, SW1/4 and NW1/4 of Sec. 14: SW1/4 of Sec. 11; NE1/4 and NW1/4 of Sec. 15; SE1/4 of Sec. 10; NE1/4 of Sec. 16; SE1/4 of Sec. 9; NW1/4 of Sec. 3; NE1/4 of Sec 4.		324

ALCONA PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Alcona Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit F1 and F2 which are part of the Alcona Project license.

A.1.1 DAM

The dam is approximately 4,700 feet in width consisting of, from left to right looking downstream: a 400 foot wide vegetative lined auxiliary spillway, 2,750 foot wide left earthen embankment, an 80 foot wide powerhouse, and a 1,470 foot wide right embankment. The left embankment includes a 300 foot concrete core wall and the right embankment includes a 1,500 foot concrete core wall. The right embankment concrete core wall is tied to a steel sheetpile cutoff wall adjacent to the powerhouse. The left embankment concrete core wall is tied to a 660 foot steel sheetpile cutoff wall adjacent to the powerhouse, 130 feet of wood pile cutoff wall and 1,710 feet of embankment without a core wall. In 2024, sheetpile was installed upstream of the entire core wall and backfilled with concrete.

A.1.2 SPILLWAY

The undersluice spillway system consists of six spill tubes (three for each unit). The spill tubes are conduits of varying dimensions from the penstock inlets to the draft tube and are an integral part of the concrete powerhouse substructure. Each spill tube contains a 78 inch diameter motor operated butterfly valve (normally closed) to control flow.

To augment the ordinary spilling capacity an auxiliary spillway of 400 feet in width is located at the east end of the embankment. This spillway is designed to provide additional spill capacity when the water surface in the reservoir is more than five feet above the normal surface elevation (829.0 ft (NGVD29)).

A.1.3 POWERHOUSE/PENSTOCK

The steel frame, reinforced concrete and masonry powerhouse occupies approximately 80 feet of the dam, and houses two 4,000 KW generating units and undersluice spillway system which discharge into the draft tubes. Each unit is located in a penstock with a steel Tainter gate controlling flow to both the turbine and the spill tubes.

A.1.4 TAILRACE

A fan shaped concrete lined tailrace extends approximately 135 feet downstream from the powerhouse. The bottom of the tailrace has a four-foot vertical step up at approximately 55 feet downstream from the powerhouse.

A.1.5 SUBSTATION

None.

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 1,006 acres at a normal surface elevation of 829.0 feet (NGVD29). The gross capacity of the Alcona reservoir is approximately12,547 acre-feet at the 829.0 feet surface water elevation.

In 2000 an automatic control system was installed at the Alcona Project providing for impoundment level control by adjusting turbine flows. FERC Order dated July 26, 2012 approved the results of the Three Year Manual Operations Test Plan results. The order also approved amendments to License Articles 401 and 403 providing for the Alcona impoundment surface water elevation be maintained at 829.0 ft +/- 0.25 feet (NGVD29). The order also provided for the use of the automatic control system.

During 2010, the auto-control system was changed to be in-sync with the new PLC control system at the downstream Foote Dam (FERC Project No. 2436).

In 1988 a survey established plant elevations to the (then) modern USGS elevations (referenced to NGVD29) and plant elevations were revised to the new standard. The revised elevations were utilized in the 1992 Offer of Settlement, elevations included in the project license, are referenced to USGS datum.

A.3 GENERATING EQUIPMENT

Each of the two vertical generating units is composed of one Wellman-Seaver-Morgan, 90 RPM, 5,500 horsepower at 40 foot head, 100 inch diameter Francis type hydraulic turbine direct-connected to General Electric Company 90 RPM, 5.0 KV, 4,444 KVA, 0.9 PF, 3 phase generator, direct-connected to a 60 KW exciter. The turbine gates are controlled by Sorensen Model 2 APH gate operators.

A.4 PRIMARY TRANSMISSION LINE

The primary transmission line is an approximately 100-foot long, 4.8 kV line extending from the project powerhouse to an interconnection with the local distribution system at a non-project 138 kV distribution substation.

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A 30 ton capacity crane services the powerhouse.

A.5.2 HOISTS

The Tainter gate hoists are located on the upstream deck and are driven by electric motors.

A.5.3 SPILL TUBE VALVES

The valves are operated by 230 vac motors powered from the station power bus. In the event of a loss of ac power a 50 kw auxiliary propane generator (installed in 2021) can provide power to the valve motors.

During scheduled or unscheduled project shutdowns, an automatic control system will fully open one of the spill tube valves to assure tailwater flow (minimum flow) necessary for the continued protection of downstream biological communities as further described in Exhibits B and E of the application for new license.

A.5.4 ADDITIONAL APPURTENANT EQUIPMENT

Each of the two generators is connected through oil circuit breakers to a 4,800 volt bus. Station power is supplied from this bus by one 75 KVA, 4,800-120/240 volt transformer. Control voltage is supplied by a 60 cell 125 volt DC battery bank.

A.6 UNITED STATES LANDS

Lands of the United States enclosed within the project boundary, as shown in Exhibit G are:

	Location/Description		Area (Acres)
	Curtis Twp. Alcona County; T25N, R5E, SE1/4, SW1/4 and NW1/4 of Sec. 14: SW1/4 of Sec. 11; NE1/4 and NW1/4 of Sec. 15; SE1/4 of Sec. 10; NE1/4 of Sec. 16; SE1/4 of Sec. 9; NW1/4 of Sec. 3; NE1/4 of Sec 4.		324
	Mitchell Twp., Alcona County; T26N, R5E, NE1/4, SE1/4 and NW1/4 of Sec 33		40
	Total Acreage		364

Commission order dated December 8, 1995 revised Article 201 of the Alcona license eliminating these 364 acres of federal lands for the purpose of calculating the annual charges recompensing the United States for the use, occupancy and enjoyment of these lands.

MIO PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Mio Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit F1 and F2 which are part of the Mio project license.

A.1.1 DAM

The dam is approximately 2,020 feet in length consisting of, from left to right looking downstream: a 725 foot wide left embankment, the 100 foot wide powerhouse and spillway, a 195 foot right bank, a 476-foot-long middle embankment (immediately adjacent to the Tainter gate spillway), and a 529-foot-long auxiliary spillway (between the right and middle embankments), with a design head of 29 feet. The embankments are constructed of hydraulically placed sand with a concrete core wall with a mixture of wooden and steel sheet pile cutoff walls on the upstream side of the left embankment, middle embankment, and auxiliary spillway. At the right embankment, a steel sheet pile cutoff wall is present on the upstream side in lieu of a concrete core wall. A steel sheet pile repair overlay was placed on the upstream side of the core wall in 2009 and 2012 for the entire length of the embankments. The right embankment sheet pile was connected to sheet pile previously driven in 1988 (refer to section A.1.2). Concrete was placed between the sheet pile and the existing core wall.

A.1.2 SPILLWAY

The gated spillway is approximately 20 feet wide and is constructed of reinforced concrete. It contains one steel tainter gate (normally closed), 20 feet wide by 14.25 feet high.

In 1988 an emergency spillway approximately 529 feet in length was constructed in the south (or right) section of the earth embankment. It is constructed of reinforced concrete and has a crest elevation of 965.6 feet (NGVD29). During this construction project the concrete corewall was lowered over the length of the new emergency spillway, and raised 3 feet in all other locations. In addition, a concrete curb was constructed at the powerhouse and spillway structure to provide protection to elevation 969.67 feet (NGVD29), and approximately 240 feet of steel sheet piling was installed from the south end of the existing corewall to the existing south riverbank.

The undersluice spillway system consists of two spilltubes (one for each generator). The spilltubes are conduits of varying dimensions from the penstock inlets to the draft tube and are an integral part of the concrete powerhouse substructure. Each spill tube contains a 60 inch diameter motor operated gate valve (normally closed) to control flow.

Repairs in 2010 included new automatic controls such that either spill tube valve or the tainter gate could be programmed to open automatically to compensate for a loss of generation to maintain river flow downstream of the project until an Operator could respond to establish run-of-river project flows.

A stationary generator is available to provide emergency power to the spill gate. The spill tube valves are also provided with an auxiliary battery system for opening when ac power is not available.

A.1.3 POWERHOUSE/PENSTOCK

The steel frame, reinforced concrete and masonry powerhouse occupies approximately 65 feet of the dam, and houses two 2,480 KW generating units and undersluice spillways which discharge into the draft tubes. Each unit is located in a penstock with a steel tainter gate controlling flow to the turbine scroll case.

To improve Operator safety when clearing trash from the trash racks work platforms were installed across the inlet piers in 2000 and in 2018 a trash rack rake system was installed for trash removal.

A.1.4 TAILRACE

A fan shaped concrete lined tailrace extends approximately 185 feet downstream from the powerhouse. The bottom of the tailrace has a four-foot vertical step up at approximately 80 feet downstream from the powerhouse.

In 2012 a concrete and sheet pile fisherman's platform was constructed along the downstream right abutment.

A.1.5 SUBSTATION

The substation adjoins the powerhouse on the north side and contains one bank of two 5,000 KVA, 2.4-138 KV transformers.

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 661 acres at a normal surface elevation of 962.6 feet (NGVD29). The gross capacity of the Mio reservoir is 6,061 acre-feet.

In 2000 an automatic control system was installed at the Mio Project providing for impoundment level control by adjusting turbine flows. FERC Order dated July 26, 2012 approving the results of the Three Year Manual Operations Test Plan results also approved amendments to License Articles 401 and 403 providing for the Mio impoundment surface water elevation be maintained at 962.6 ft +/- 0.25 feet (NGVD29). The order also provided for the use of the automatic control system.

In 1988 a survey established plant elevations to the (then) modern USGS elevations (referenced to NGVD29) and plant elevations were revised to the new standard. The revised elevations were utilized in the 1992 Offer of Settlement and were included in the project license, where elevations are referred to USGS datum.

A.3 GENERATING EQUIPMENT

Each of the two vertical generating units is composed of one Allis-Chalmers AV, 80 RPM, 3,500 horsepower at 27 foot head, 100 inch diameter Francis type hydraulic turbine set in a concrete scroll case over a concrete, steel-lined draft tube. Each turbine is direct-connected to an Allis- Chalmers 55 KW direct-connected exciter The turbine gates on each unit have an American Governor PLC controlled electric-hydraulic low oil volume, high pressure actuator governor.

FERC Order dated February 5, 2004 amended ordering paragraph B(2) and License Article 201 to reflect the demonstrated actual capacities for each unit as shown in the table below.

	Turbine Capacity (T)) (kW)	Generator Capacity (G) (kW)
Mio Project		

Unit #1	2,009	2,457
Unit #2	1,876	2,457
Total	**3,885**	**4,914**

A.4 PRIMARY TRANSMISSION LINE

The primary transmission line, approximately 400 feet in length, connects the 138 kV plant substation to an interconnection at the non-project 138 kV ITC/METC substation.

~~There are no primary transmission lines included in the Mio Project license.~~

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A 25 ton capacity crane services the powerhouse.

A.5.2 HOISTS

There are three stationary hoists: one for the spill gate and one for each of the two penstock head gates.

A.5.3 SPILLWAY VALVES

The two spill tube valves are controlled by electric motor driven valve operators. During scheduled or unscheduled project shutdowns, the automatic control system can be programmed to open one of the spill tube gate valves to assure tailwater flow (minimum flow) necessary for the continued protection of downstream biological communities as further described in Exhibits B and E of the Mio application for new license.

A.5.4 ADDITIONAL APPURTENANT EQUIPMENT

Each of the two generators is connected through a circuit breaker to a 2,400 volt bus. Station power is supplied from this bus by one 75 KVA, 2,400-120/240 volt transformer. Control voltage is supplied by a 125 volt battery with rectifier type charger.

Article 404 of the Mio license issued July 15, 1994 required the licensee to study, plan, design, and construct water quality enhancements (including temperature and dissolved oxygen enhancements). In 2009, a cool water upwelling system was designed and installed at Mio as a temperature enhancement measure. The system includes two underwater upwellers and valve manifold. Air is provided by an oil free air compressor. The upwelling system was designed to provide limited relief for downstream temperature sensitive species by "lifting" the cooler bottom waters of the reservoir into the withdrawal zones of the turbines.

A.6 UNITED STATES LANDS

Lands of the United States enclosed within the project boundary, as shown in Exhibit G are:

	Location/Description		Area (Acres)

	Mentor Twp. Oscoda County; T26N, R3E, NE1/4 and NW1/4 of Sec 7		17
	Big Creek Twp., Oscoda County; T26N, R2E, S1/2 of SW1/4 of Sec 2; SW1/4 and NW1/4 of Sec 11		137
	Big Creek Twp., Oscoda County; T26N, R2E, SE1/4, SW1/4 and NW1/4 of Sec 3; SE1/4 and SW1/4 of Sec 4; SE1/4 of Sec 5; NE1/4 and NW1/4 of Sec 10.		166
	Total Acreage		320

Commission order dated December 8, 1995 revised Article 201 of the Mio license eliminating these 320 acres of federal lands for the purpose of calculating the annual charges for recompensing the United States for the use, occupancy and enjoyment of these lands.

MIO PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Mio Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit F1 and F2 which are part of the Mio project license.

A.1.1 DAM

The dam is approximately 2,020 feet in length consisting of, from left to right looking downstream: a 725 foot wide left embankment, the 100 foot wide powerhouse and spillway, a 195 foot right bank, a 476-foot-long middle embankment (immediately adjacent to the Tainter gate spillway), and a 529-foot-long auxiliary spillway (between the right and middle embankments), with a design head of 29 feet. The embankments are constructed of hydraulically placed sand with a concrete core wall with a mixture of wooden and steel sheet pile cutoff walls on the upstream side of the left embankment, middle embankment, and auxiliary spillway. At the right embankment, a steel sheet pile cutoff wall is present on the upstream side in lieu of a concrete core wall. A steel sheet pile repair overlay was placed on the upstream side of the core wall in 2009 and 2012 for the entire length of the embankments. The right embankment sheet pile was connected to sheet pile previously driven in 1988 (refer to section A.1.2). Concrete was placed between the sheet pile and the existing core wall.

A.1.2 SPILLWAY

The gated spillway is approximately 20 feet wide and is constructed of reinforced concrete. It contains one steel tainter gate (normally closed), 20 feet wide by 14.25 feet high.

In 1988 an emergency spillway approximately 529 feet in length was constructed in the south (or right) section of the earth embankment. It is constructed of reinforced concrete and has a crest elevation of 965.6 feet (NGVD29). During this construction project the concrete corewall was lowered over the length of the new emergency spillway, and raised 3 feet in all other locations. In addition, a concrete curb was constructed at the powerhouse and spillway structure to provide protection to elevation 969.67 feet (NGVD29), and approximately 240 feet of steel sheet piling was installed from the south end of the existing corewall to the existing south riverbank.

The undersluice spillway system consists of two spilltubes (one for each generator). The spilltubes are conduits of varying dimensions from the penstock inlets to the draft tube and are an integral part of the concrete powerhouse substructure. Each spill tube contains a 60 inch diameter motor operated gate valve (normally closed) to control flow.

Repairs in 2010 included new automatic controls such that either spill tube valve or the tainter gate could be programmed to open automatically to compensate for a loss of generation to maintain river flow downstream of the project until an Operator could respond to establish run-of-river project flows.

A stationary generator is available to provide emergency power to the spill gate. The spill tube valves are also provided with an auxiliary battery system for opening when ac power is not available.

A.1.3 POWERHOUSE/PENSTOCK

The steel frame, reinforced concrete and masonry powerhouse occupies approximately 65 feet of the dam, and houses two 2,480 KW generating units and undersluice spillways which discharge into the draft tubes. Each unit is located in a penstock with a steel tainter gate controlling flow to the turbine scroll case.

To improve Operator safety when clearing trash from the trash racks work platforms were installed across the inlet piers in 2000 and in 2018 a trash rack rake system was installed for trash removal.

A.1.4 TAILRACE

A fan shaped concrete lined tailrace extends approximately 185 feet downstream from the powerhouse. The bottom of the tailrace has a four-foot vertical step up at approximately 80 feet downstream from the powerhouse.

In 2012 a concrete and sheet pile fisherman's platform was constructed along the downstream right abutment.

A.1.5 SUBSTATION

The substation adjoins the powerhouse on the north side and contains one bank of two 5,000 KVA, 2.4-138 KV transformers.

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 661 acres at a normal surface elevation of 962.6 feet (NGVD29). The gross capacity of the Mio reservoir is 6,061 acre-feet.

In 2000 an automatic control system was installed at the Mio Project providing for impoundment level control by adjusting turbine flows. FERC Order dated July 26, 2012 approving the results of the Three Year Manual Operations Test Plan results also approved amendments to License Articles 401 and 403 providing for the Mio impoundment surface water elevation be maintained at 962.6 ft +/- 0.25 feet (NGVD29). The order also provided for the use of the automatic control system.

In 1988 a survey established plant elevations to the (then) modern USGS elevations (referenced to NGVD29) and plant elevations were revised to the new standard. The revised elevations were utilized in the 1992 Offer of Settlement and were included in the project license, where elevations are referred to USGS datum.

A.3 GENERATING EQUIPMENT

Each of the two vertical generating units is composed of one Allis-Chalmers AV, 80 RPM, 3,500 horsepower at 27 foot head, 100 inch diameter Francis type hydraulic turbine set in a concrete scroll case over a concrete, steel-lined draft tube. Each turbine is direct-connected to an Allis- Chalmers 55 KW direct-connected exciter The turbine gates on each unit have an American Governor PLC controlled electric-hydraulic low oil volume, high pressure actuator governor.

FERC Order dated February 5, 2004 amended ordering paragraph B(2) and License Article 201 to reflect the demonstrated actual capacities for each unit as shown in the table below.

	Turbine Capacity (T)) (kW)	Generator Capacity (G) (kW)
Mio Project		

Unit #1	2,009	2,457
Unit #2	1,876	2,457
Total	**3,885**	**4,914**

A.4 PRIMARY TRANSMISSION LINE

The primary transmission line, approximately 400 feet in length, connects the 138 kV plant substation to an interconnection at the non-project 138 kV ITC/METC substation.

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A 25 ton capacity crane services the powerhouse.

A.5.2 HOISTS

There are three stationary hoists: one for the spill gate and one for each of the two penstock head gates.

A.5.3 SPILLWAY VALVES

The two spill tube valves are controlled by electric motor driven valve operators. During scheduled or unscheduled project shutdowns, the automatic control system can be programmed to open one of the spill tube gate valves to assure tailwater flow (minimum flow) necessary for the continued protection of downstream biological communities as further described in Exhibits B and E of the Mio application for new license.

A.5.4 ADDITIONAL APPURTENANT EQUIPMENT

Each of the two generators is connected through a circuit breaker to a 2,400 volt bus. Station power is supplied from this bus by one 75 KVA, 2,400-120/240 volt transformer. Control voltage is supplied by a 125 volt battery with rectifier type charger.

Article 404 of the Mio license issued July 15, 1994 required the licensee to study, plan, design, and construct water quality enhancements (including temperature and dissolved oxygen enhancements). In 2009, a cool water upwelling system was designed and installed at Mio as a temperature enhancement measure. The system includes two underwater upwellers and valve manifold. Air is provided by an oil free air compressor. The upwelling system was designed to provide limited relief for downstream temperature sensitive species by "lifting" the cooler bottom waters of the reservoir into the withdrawal zones of the turbines.

A.6 UNITED STATES LANDS

Lands of the United States enclosed within the project boundary, as shown in Exhibit G are:

	Location/Description		Area (Acres)

	Mentor Twp. Oscoda County; T26N, R3E, NE1/4 and NW1/4 of Sec 7		17
	Big Creek Twp., Oscoda County; T26N, R2E, S1/2 of SW1/4 of Sec 2; SW1/4 and NW1/4 of Sec 11		137
	Big Creek Twp., Oscoda County; T26N, R2E, SE1/4, SW1/4 and NW1/4 of Sec 3; SE1/4 and SW1/4 of Sec 4; SE1/4 of Sec 5; NE1/4 and NW1/4 of Sec 10.		166
	Total Acreage		320

Commission order dated December 8, 1995 revised Article 201 of the Mio license eliminating these 320 acres of federal lands for the purpose of calculating the annual charges for recompensing the United States for the use, occupancy and enjoyment of these lands.

LOUD PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Loud Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit F1 and F2 which are part of the Loud Project license.

A.1.1 DAM

The dam is approximately 2,180 feet in length and contains two sections of earth embankment, a powerhouse structure and a spillway section. The earth embankment sections extend approximately 2,000 feet in length and contain approximately 1,490 feet of concrete corewall. The powerhouse and spillway sections occupy approximately 180 feet of the dam.

A.1.2 SPILLWAY

The spillway is approximately 90 feet in length and is constructed of reinforced concrete. It contains three steel tainter gates (normally closed), each 24 feet wide by 15.5 feet high. A concrete lined discharge channel extends approximately 210 feet downstream from the tainter gates and contains a 6.5 foot high weir at a distance of approximately 45 feet downstream of the tainter gates.

In 2010, as part of the Part 12D inspection report, survey work determined the control section of the emergency spillway to be 1,350 feet in length, rather than 100 feet as previously thought. The emergency spillway has an approximate elevation of 744.8 feet (NGVD29) and is located at the north end of the dam.

A.1.3 POWERHOUSE/PENSTOCK

The steel frame, reinforced concrete and masonry powerhouse occupies approximately 90 feet of the dam. It contains three open penstocks with a steel tainter gate at the entrance to each. Two of the penstocks each contain a 2,000 KW horizontal generating unit and the third penstock is vacant. The tainter gates leading to the penstocks with the generators are normally open while the tainter gate leading to the vacant penstock is closed.

A.1.4 TAILRACE

A fan shaped concrete lined tailrace extends approximately 125 feet downstream from the powerhouse. The sides are concrete while the bottom is concrete for approximately the first 35 feet.

A.1.5 SUBSTATION

None. ~~The substation contains three single phase, 2,000 KVA, 2.5-46 KV transformers with necessary switching equipment and protective devices.~~

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 743 acres at a normal maximum surface elevation of 742.6 feet (NGVD29). The gross capacity of the Loud reservoir is 6,987 acre-feet. The normal usable storage capacity, that used under normal operating conditions (1.6 foot impoundment fluctuations), is 1,056 acre-feet. License Article 401 requires the Loud impoundment surface water elevation be maintained at 741.8 feet +/- 0.8 feet (or between 741.0 and 742.6 feet NGVD29).

In 1988 a survey established plant elevations to the (then) modern USGS elevations (referenced to NGVD29) and plant elevations were revised to the new standard. The revised elevations were utilized in the 1992 Offer of Settlement, elevations included in the project license are referenced to USGS datum.

A.3 GENERATING EQUIPMENT

Each of the two horizontal generating units is composed of one Allis-Chalmers Type E, 120 RPM, 3,400 horsepower at 26 foot head, quadruple 57 $^{1}/_{2}$ inch hydraulic turbine, direct-connected to a General Electric ATB, horizontal shaft, 120 RPM, 2.5 KV, 2,222 KVA, 0.9 PF, 3 phase, 60 cycle generator with a General Electric 32 KW direct-connected exciter. The turbine gates on Unit No.1 are controlled with a Sorensen Model 2 APH operator. The turbine gates on Unit No. 2 are controlled by Allis Chalmers #3 oil pressure governors. The units are set in open penstocks, longitudinal with the stream.

A.4 PRIMARY TRANSMISSION LINE

The primary transmission line includes the generator lead line from each unit running to a 2.4 kV bus and then to the powerhouse building wall. The lines then run approximately 250 feet underground from the powerhouse building wall to the 46 kV transformer bank and ends at an interconnection with the local distribution system at a non-project 46 kV distribution substation.

~~There are no primary transmission lines included in the new license.~~

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A powerhouse crane of 20 ton capacity manufactured by the Shaw Electric Crane Company.

A.5.2 HOISTS

There are three fixed hoists for the penstock tainter gates and three fixed hoists for the spillway tainter gates. These hoists are driven by electric motors.

A.5.3 ADDITIONAL APPURTENANT EQUIPMENT

Each of the two generators is connected through oil circuit breakers to a 2,400 volt bus which feeds through an oil circuit breaker to a transformer bank. Station power is supplied from the 2,400 volt bus by a 112.5 KVA 2400/240/120 transformer, spill deck power is provided by a 50 KVA 2400/240/120 volt transformer. Control voltage is supplied by a 12 cell battery charged by a 240VAC, 130VDC battery charger from station power.

A.6 UNITED STATES LANDS

Lands of the United States enclosed within the project boundary, as shown in Exhibit G of this application are:

	Location/Description		Area (Acres)
	Oscoda Twp. Iosco County; T24N, R6E, SE1/4 and SW1/4 of Sec 17; SE1/4, SW1/4 and NW1/4 of Sec 19; Sec 20.		536
	Plainfield Twp., Iosco County; T24N, R5E, SE1/4 of Sec 11; SW1/4 and NW1/4 of Sec 12; Sec 13; NE1/4 of Sec. 14; NE1/4 and SE1/4 of Sec. 24.		155
	Total Acreage		691

Commission order dated December 8, 1995 revised Article 201 of the Loud license reducing the number of acres for calculating the annual payment for use of US Lands from the 691 acres identified above to 5.87 acres. Commission Order dated August 2, 2010 provided an additional revision to Article 201 that included a recalculation of the 5.87 acres (increased to 6.7 acres) and included an additional 19.3 acres for a total of 26 acres of US Lands for calculating the annual payment.

LOUD PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Loud Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit F1 and F2 which are part of the Loud Project license.

A.1.1 DAM

The dam is approximately 2,180 feet in length and contains two sections of earth embankment, a powerhouse structure and a spillway section. The earth embankment sections extend approximately 2,000 feet in length and contain approximately 1,490 feet of concrete corewall. The powerhouse and spillway sections occupy approximately 180 feet of the dam.

A.1.2 SPILLWAY

The spillway is approximately 90 feet in length and is constructed of reinforced concrete. It contains three steel tainter gates (normally closed), each 24 feet wide by 15.5 feet high. A concrete lined discharge channel extends approximately 210 feet downstream from the tainter gates and contains a 6.5 foot high weir at a distance of approximately 45 feet downstream of the tainter gates.

In 2010, as part of the Part 12D inspection report, survey work determined the control section of the emergency spillway to be 1,350 feet in length, rather than 100 feet as previously thought. The emergency spillway has an approximate elevation of 744.8 feet (NGVD29) and is located at the north end of the dam.

A.1.3 POWERHOUSE/PENSTOCK

The steel frame, reinforced concrete and masonry powerhouse occupies approximately 90 feet of the dam. It contains three open penstocks with a steel tainter gate at the entrance to each. Two of the penstocks each contain a 2,000 KW horizontal generating unit and the third penstock is vacant. The tainter gates leading to the penstocks with the generators are normally open while the tainter gate leading to the vacant penstock is closed.

A.1.4 TAILRACE

A fan shaped concrete lined tailrace extends approximately 125 feet downstream from the powerhouse. The sides are concrete while the bottom is concrete for approximately the first 35 feet.

A.1.5 SUBSTATION

None.

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 743 acres at a normal maximum surface elevation of 742.6 feet (NGVD29). The gross capacity of the Loud reservoir is 6,987 acre-feet. The normal usable storage capacity, that used under normal operating conditions (1.6 foot impoundment fluctuations), is 1,056 acre-feet. License Article 401 requires the Loud impoundment surface water elevation be maintained at 741.8 feet +/- 0.8 feet (or between 741.0 and 742.6 feet NGVD29).

In 1988 a survey established plant elevations to the (then) modern USGS elevations (referenced to NGVD29) and plant elevations were revised to the new standard. The revised elevations were utilized in the 1992 Offer of Settlement, elevations included in the project license are referenced to USGS datum.

A.3 GENERATING EQUIPMENT

Each of the two horizontal generating units is composed of one Allis-Chalmers Type E, 120 RPM, 3,400 horsepower at 26 foot head, quadruple 57 $^{1}/_{2}$ inch hydraulic turbine, direct-connected to a General Electric ATB, horizontal shaft, 120 RPM, 2.5 KV, 2,222 KVA, 0.9 PF, 3 phase, 60 cycle generator with a General Electric 32 KW direct-connected exciter. The turbine gates on Unit No.1 are controlled with a Sorensen Model 2 APH operator. The turbine gates on Unit No. 2 are controlled by Allis Chalmers #3 oil pressure governors. The units are set in open penstocks, longitudinal with the stream.

A.4 PRIMARY TRANSMISSION LINE

The primary transmission line includes the generator lead line from each unit running to a 2.4 kV bus and then to the powerhouse building wall. The lines then run approximately 250 feet underground from the powerhouse building wall to the 46 kV transformer bank and ends at an interconnection with the local distribution system at a non-project 46 kV distribution substation.

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A powerhouse crane of 20 ton capacity manufactured by the Shaw Electric Crane Company.

A.5.2 HOISTS

There are three fixed hoists for the penstock tainter gates and three fixed hoists for the spillway tainter gates. These hoists are driven by electric motors.

A.5.3 ADDITIONAL APPURTENANT EQUIPMENT

Each of the two generators is connected through oil circuit breakers to a 2,400 volt bus which feeds through an oil circuit breaker to a transformer bank. Station power is supplied from the 2,400 volt bus by a 112.5 KVA 2400/240/120 transformer, spill deck power is provided by a 50 KVA 2400/240/120 volt transformer. Control voltage is supplied by a 12 cell battery charged by a 240VAC, 130VDC battery charger from station power.

A.6 UNITED STATES LANDS

Lands of the United States enclosed within the project boundary, as shown in Exhibit G of this application are:

	Location/Description		Area (Acres)
	Oscoda Twp. Iosco County; T24N, R6E, SE1/4 and SW1/4 of Sec 17; SE1/4, SW1/4 and NW1/4 of Sec 19; Sec 20.		536
	Plainfield Twp., Iosco County; T24N, R5E, SE1/4 of Sec 11; SW1/4 and NW1/4 of Sec 12; Sec 13; NE1/4 of Sec. 14; NE1/4 and SE1/4 of Sec. 24.		155
	Total Acreage		691

Commission order dated December 8, 1995 revised Article 201 of the Loud license reducing the number of acres for calculating the annual payment for use of US Lands from the 691 acres identified above to 5.87 acres. Commission Order dated August 2, 2010 provided an additional revision to Article 201 that included a recalculation of the 5.87 acres (increased to 6.7 acres) and included an additional 19.3 acres for a total of 26 acres of US Lands for calculating the annual payment.

COOKE PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Cooke Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit F1 and F2 which are part of the Cooke Project license.

A.1.1 DAM

The dam is approximately 871 feet in length consisting of two sections of earth embankments, a powerhouse block and a spillway section. The left embankment is approximately 550 feet in length and the right embankment is approximately 140 feet in length and contain approximately 685 feet of concrete corewall. The powerhouse block and spillway section occupy approximately 181 feet.

A.1.2 SPILLWWAY

The spillway is approximately 92 feet in length and is constructed of reinforced concrete. It contains three steel tainter gates (normally closed), each 24 feet wide by 14.5 feet high. A concrete lined discharge channel extends approximately 220 feet downstream from the tainter gates with a 12 foot high concrete weir approximately 70 feet downstream of the tainter gates.

A.1.3 POWERHOUSE/PENSTOCK

The steel framed, reinforced concrete and masonry powerhouse occupies approximately 90 feet of the dam, and houses three 3,000 KW generating units. Each unit is in an open penstock with a steel tainter gate at the entrance.

To improve Operator safety when clearing trash from the trash racks, a trash rack rake system was installed for trash removal in 2018.

A.1.4 TAILRACE

A tailrace extends approximately 120 feet downstream from the powerhouse. The sides are constructed of reinforced concrete over the entire length while the bottom is reinforced concrete for approximately the first 35 feet and rip rap for the remainder of the tailrace.

A.1.5 SUBSTATION

None. ~~The substation adjoins the powerhouse on the south bank of the river and contains one 3 phase, 10,000 KV, 2.4-46 KV transformer with necessary switching equipment and protective devices. It also contains a 2,400-4,800 volt distribution substation and regulated distribution circuit which are not included in the license.~~

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 1,627 acres at a normal maximum surface elevation of 679.0 feet (NGVD29). The gross capacity of the Cooke reservoir is 26,749 acre-feet. The normal usable storage capacity, that under normal operating conditions (1.0 foot impoundment fluctuations), is approximately 1,596 acre-feet.

Article 401 of the Cooke license requires the Cooke impoundment be maintained at a surface water elevation of 678.5 feet +/- 0.5 feet (NGVD29) (or between 678.0 and 679.0 feet).

In 1988 a survey established plant elevations to the (then) modern USGS elevations (referenced to NGVD29) and plant elevations were revised to the new standard. The revised elevations were

utilized in the 1992 Offer of Settlement, elevations included in the project license are referenced to USGS datum or mean sea level.

A.3 GENERATING EQUIPMENT

Each of the three generating units is composed of one Allis-Chalmers, Type E, horizontal, 180 RPM, 4,500 horsepower, Quidriflow 57 ½ inch hydraulic turbine, directed-connected to a General Electric ATB, horizontal, 180 RPM, 2.5 KV, 3,333. 0.90 PF, 3 phase, 60 cycle, generator. Units 1 and 3 each have a General Electric direct-connected exciter rated at 32 kW, 256 amperes and 125 volts DC and are equipped with an Automatic Voltage Regulator. Unit No. 2 has a Basler Electric static excitation and voltage regulating system including a DECS-300 excitation control system. The turbine gates on each unit have an American Governor PLC controlled HPU Digital governor. The units are set in open penstocks, longitudinal with the river.

FERC Order dated August 29, 2001 amended ordering paragraph B(2) and License Article 201 to reflect the demonstrated actual capacities for each unit as shown in the table below.

	Turbine Capacity (T)) (kW)	Generator Capacity (G) (kW)
Cooke Project		
Unit #1	1,396	3,000
Unit #2	2,722	3,000
Unit #3	2,491	3,000
Total	**6,609**	**9,000**

The authorized installed capacity for the purpose of paying the United States an annual charge for the cost of administration is 6,609 kW.

A.4 PRIMARY TRANSMISSION LINE

The primary transmission line is two, approximately 25-foot long, 2.4 kV bus connections running from the powerhouse wall to the interconnections with the local distribution system at a non-project 46 kV distribution substation. ~~The 46 KV transmission line, approximately 150 feet in length, from the substation to the Licensee's interconnected primary transmission system is included in the license.~~

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A Shaw 20 ton capacity electric crane services the main generator room.

A.5.2 HOISTS

There is a fixed hoist for each penstock tainter gate and one fixed hoist for each of the three spillway gates. These hoists are driven by electric motors.

A.5.3 ADDITIONAL APPURTENANT EQUIPMENT

Each of the two generators is connected through an air circuit breaker to a 2,400 volt bus and thence through an air circuit breaker to the transformer. Station power is supplied from this bus by one, three phase 75 KVA, 2400/240volt transformer and one single phase 25 KVA, 2400-120/240 volt transformer. Control voltage is supplied by a 125 volt d-c cell battery charged by a rectifier type charger from station power.

A.6 UNITED STATES LANDS

Lands of the United States enclosed within the project boundary, as shown in Exhibit G are:

	Location/Description		Area (Acres)
	Ocsoda Twp., Iosco County; T24N, R7E. SE1/4 of SE1/4 of Sec. 9; SW1/2 of SW1/4 of Sec. 10; NW1/4 of Sec. 15; Sec. 16; NE1/4, SW1/4 and NW1/4 of Sec. 21; NE1/4, SE1/4 and SW1/4 of Sec. 20; NE1/4, SW1/4 and NW1/4 of Sec. 31; NW1/4 of NW1/4 of Sec. 31.		1,160
	Oscoda Twp., Iosco County; T24N, R6E. Sec. 25; NE1/4 and SE1/4 of Sec. 26; NE1/4 of SW1/4 of Sec. 26; N1/2 of NE1/4 of Sec. 36.		380
	Total Acreage		1,540

Commission order dated December 8, 1995 revised Article 201 of the Cooke license reducing the number of acres for calculating the annual payment for use of US Lands from the 1,540 acres identified above to 5.54 acres.

COOKE PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Cooke Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit F1 and F2 which are part of the Cooke Project license.

A.1.1 DAM

The dam is approximately 871 feet in length consisting of two sections of earth embankments, a powerhouse block and a spillway section. The left embankment is approximately 550 feet in length and the right embankment is approximately 140 feet in length and contain approximately 685 feet of concrete corewall. The powerhouse block and spillway section occupy approximately 181 feet.

A.1.2 SPILLWWAY

The spillway is approximately 92 feet in length and is constructed of reinforced concrete. It contains three steel tainter gates (normally closed), each 24 feet wide by 14.5 feet high. A concrete lined discharge channel extends approximately 220 feet downstream from the tainter gates with a 12 foot high concrete weir approximately 70 feet downstream of the tainter gates.

A.1.3 POWERHOUSE/PENSTOCK

The steel framed, reinforced concrete and masonry powerhouse occupies approximately 90 feet of the dam, and houses three 3,000 KW generating units. Each unit is in an open penstock with a steel tainter gate at the entrance.

To improve Operator safety when clearing trash from the trash racks, a trash rack rake system was installed for trash removal in 2018.

A.1.4 TAILRACE

A tailrace extends approximately 120 feet downstream from the powerhouse. The sides are constructed of reinforced concrete over the entire length while the bottom is reinforced concrete for approximately the first 35 feet and rip rap for the remainder of the tailrace.

A.1.5 SUBSTATION

None.

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 1,627 acres at a normal maximum surface elevation of 679.0 feet (NGVD29). The gross capacity of the Cooke reservoir is 26,749 acre-feet. The normal usable storage capacity, that under normal operating conditions (1.0 foot impoundment fluctuations), is approximately 1,596 acre-feet.

Article 401 of the Cooke license requires the Cooke impoundment be maintained at a surface water elevation of 678.5 feet +/- 0.5 feet (NGVD29) (or between 678.0 and 679.0 feet).

In 1988 a survey established plant elevations to the (then) modern USGS elevations (referenced to NGVD29) and plant elevations were revised to the new standard. The revised elevations were utilized in the 1992 Offer of Settlement, elevations included in the project license are referenced to USGS datum or mean sea level.

A.3 GENERATING EQUIPMENT

Each of the three generating units is composed of one Allis-Chalmers, Type E, horizontal, 180 RPM, 4,500 horsepower, Quidriflow 57 ½ inch hydraulic turbine, directed-connected to a General Electric ATB, horizontal, 180 RPM, 2.5 KV, 3,333. 0.90 PF, 3 phase, 60 cycle, generator. Units 1 and 3 each have a General Electric direct-connected exciter rated at 32 kW, 256 amperes and 125 volts DC and are equipped with an Automatic Voltage Regulator. Unit No. 2 has a Basler Electric static excitation and voltage regulating system including a DECS-300 excitation control system. The turbine gates on each unit have an American Governor PLC controlled HPU Digital governor. The units are set in open penstocks, longitudinal with the river.

FERC Order dated August 29, 2001 amended ordering paragraph B(2) and License Article 201 to reflect the demonstrated actual capacities for each unit as shown in the table below.

	Turbine Capacity (T)) (kW)	Generator Capacity (G) (kW)
Cooke Project		
Unit #1	1,396	3,000
Unit #2	2,722	3,000
Unit #3	2,491	3,000
Total	**6,609**	**9,000**

The authorized installed capacity for the purpose of paying the United States an annual charge for the cost of administration is 6,609 kW.

A.4 PRIMARY TRANSMISSION LINE

The primary transmission line is two, approximately 25-foot long, 2.4 kV bus connections running from the powerhouse wall to the interconnections with the local distribution system at a non-project 46 kV distribution substation.

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A Shaw 20 ton capacity electric crane services the main generator room.

A.5.2 HOISTS

There is a fixed hoist for each penstock tainter gate and one fixed hoist for each of the three spillway gates. These hoists are driven by electric motors.

A.5.3 ADDITIONAL APPURTENANT EQUIPMENT

Each of the two generators is connected through an air circuit breaker to a 2,400 volt bus and thence through an air circuit breaker to the transformer. Station power is supplied from this bus by one, three phase 75 KVA, 2400/240volt transformer and one single phase 25 KVA, 2400-120/240 volt transformer. Control voltage is supplied by a 125 volt d-c cell battery charged by a rectifier type charger from station power.

A.6 UNITED STATES LANDS

Lands of the United States enclosed within the project boundary, as shown in Exhibit G are:

	Location/Description		Area (Acres)
	Ocsoda Twp., Iosco County; T24N, R7E. SE1/4 of SE1/4 of Sec. 9; SW1/2 of SW1/4 of Sec. 10; NW1/4 of Sec. 15; Sec. 16; NE1/4, SW1/4 and NW1/4 of Sec. 21; NE1/4, SE1/4 and SW1/4 of Sec. 20; NE1/4, SW1/4 and NW1/4 of Sec. 31; NW1/4 of NW1/4 of Sec. 31.		1,160
	Oscoda Twp., Iosco County; T24N, R6E. Sec. 25; NE1/4 and SE1/4 of Sec. 26; NE1/4 of SW1/4 of Sec. 26; N1/2 of NE1/4 of Sec. 36.		380
	Total Acreage		1,540

Commission order dated December 8, 1995 revised Article 201 of the Cooke license reducing the number of acres for calculating the annual payment for use of US Lands from the 1,540 acres identified above to 5.54 acres.

FIVE CHANNELS PROJECT

EXHIBIT A

DESCRIPTION OF PROJECT

A description of the Five Channels Project, as stipulated in 18 CFR 4.51(b) follows:

A.1 PROJECT STRUCTURES

Structures included as part of this project are described below. The location and general configuration of the listed structures as well as appurtenant facilities are shown on Exhibit Fl and F2 which are part of this application for new license.

A.1.1 DAM

The dam is approximately 800 feet in length and contains two sections of earth embankment, a powerhouse structure and a spillway section. The earth embankment sections extend approximately 620 feet in length and contain approximately 615 feet of concrete corewall. The powerhouse block and spillway section occupy approximately 180 feet of the dam.

A.1.2 SPILLWAY

The spillway is approximately. 90 feet in length and is constructed of reinforced concrete. It contains three steel tainter gates (normally closed), each 24 feet wide by 14.5 feet high. A concrete lined discharge channel extends approximately 210 feet downstream from the tainter gates and contains an 8 foot high concrete weir at approximately 60 feet downstream of the tainter gates.

A.1.3 POWERHOUSE/PENSTOCKS

The steel frame, reinforced concrete and masonry powerhouse occupies approximately 90 feet of the dam. It contains three open penstocks with a steel tainter gate at the entrance to each. A 3000 KW horizontal generating unit is in each of two penstocks and the third penstock is vacant.

A.1.4 TAILRACE

A tailrace extends approximately 120 feet downstream from the powerhouse. The walls of this tailrace are concrete over the entire length while the bottom is concrete for approximately the first 35 feet only.

A.1.5 SUBSTATION

None. ~~The substation adjoins the powerhouse on the north bank of the river and contains three single phase, 2000 KVA, 2.4-46 KV transformers with necessary switching equipment and protective devices.~~

A.2 PROJECT IMPOUNDMENT

The reservoir has a normal maximum surface area of 212 acres at a normal maximum surface elevation of 715.0 feet (mean sea level). The gross storage capacity of the Five Channels reservoir is 3419 acre-feet. The normal usable storage capacity, that used under normal operating conditions (0.6 foot impoundment fluctuations), is 124 acre-feet.

A.3 GENERATING EQUIPMENT

Each of the two generating units is composed of one Allis-Chalmers, horizontal, 150 RPM, 4500 horsepower, quadruple 55 inch diameter, Francis type hydraulic turbine direct-connected to a General Electric, horizontal, 150 RPM, 2.5 KV, 3333 KVA, 0.9 PF, 3 phase, 60 cycle generator with a General Electric 32 KW direct-connected exciter. The turbine gates are controlled by Allis Chalmers #3 oil pressure governors.

A.4 PRIMARY TRANSMISSION LINE

The primary transmission line includes the generator lead line from each unit running to the 2.4 kV bus and then to the powerhouse building wall, and the approximately 100-foot long 2.4kV

lines running from the powerhouse wall to an interconnection with the local distribution system at a non-project 46 kV distribution substation.

~~Approximately 1430 feet of 46 KV transmission line from the substation to the Licensee's interconnected transmission system is included in this application for new license~~

A.5 ADDITIONAL APPURTENANT EQUIPMENT

Additional equipment appurtenant to the project are:

A.5.1 CRANES

A Shaw 20 ton capacity electric crane, with manual bridge and trolley travel, services the main generator room.

A.5.2 HOISTS

There is one electric motor driven hoist for each spillway and penstock tainter gate.

A.5.3 ADDITIONAL APPURTENANT EQUIPMENT

Each of the two generators is connected through oil circuit breakers to a 2400 volt bus which feeds through an oil circuit breaker to a transformer bank. Station power is supplied from the 2400 volt bus by three 25 KVA, 2400-120/240 volt transformers and one 25 KVA, 2400-120/240/480 volt transformer.

Reserved Easement

Form of Reserved Easements

Alcona Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas

The centerlines of an existing electric facilities easement areas located in Sections 14,15, and 16, Town 25 North, Range 05 East, Curtis W. Township, Alcona County, Michigan, said centerlines being described as follows:

LVD1

Commencing at the East one-quarter corner of said Section 15; thence North 89°18'13" West, 1330.69 feet, along the East and West one-quarter line of said Section 15, to a point on the East one-eighth line of said Section 15; thence North 00°44'57" West, 31.67 feet, along the East one-eighth line of said Section 15, to the POINT OF BEGINNING; thence South 89°30'25" East, 493.14 feet; thence North 75°40'59" East, 1,058.42 feet, to Reference Point "A"; thence North 06°27'35" East, 342.49 feet; thence South 87°55'01" East, 275.07 feet; thence North 54°34'27" East, 144.29 feet; thence South 66°37'06" East, 71.28 feet; thence South 68°37'01" East, 99.72 feet, to Reference Point "B"; thence North 13°14'11" East, 106.76 feet, to Reference Point "C"; thence South 75°35'17" East, 115.58 feet; thence South 75°51'18" East, 186.19 feet; thence North 68°12'52" East, 935.10 feet; thence North 81°39'32" East, 880.81 feet; thence North 74°18'53" East, 214.13 feet, to Reference Point "F"; thence continuing North 74°18'53" East, 223.54 feet; thence North 83°34'35" East, 455.17 feet, to Reference Point "E"; thence continuing North 83°34'35" East, 53.65 feet, more or less, to a point on the centerline of Bamfield Road, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "A"; thence North 75°40'59" East, 140.16 feet; thence South 29°26'10" East, 78.82 feet, to a point on the centerline of Bamfield Road, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "B"; thence South 68°55'26" East, 83.13 feet, to a point on the Westerly Alcona Substation fence line, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence South 46°53'10" East, 105.56 feet, to a point on the Westerly Alcona Substation fence line, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence North 75°27'33" West, 48.28 feet, to Reference Point "D"; thence South 87°20'25" West, 73.32 feet; thence South 87°58'51" West, 46.20 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "D"; thence South 12°44'44" East, 20.37 feet; thence North 86°33'11" West, 13.60 feet; thence North 84°49'53" West, 32.68 feet; to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "E"; thence South 01°39'24" East, 64.20 feet, more or less, to a point on the centerline of Bamfield Road, and to the POINT OF ENDING.

LVD2

Commencing at the East one-quarter corner of said Section 16; thence North 00°13'38" West, 66.32 feet, along the East line of said Section 16, to the POINT OF BEGINNING; thence South 89°35'22" West, 2,622.77 feet, to a point on the North and South one-quarter line of said Section 16, and to the POINT OF ENDING.

Legal Description: Centerlines for existing underground Electric Facilities Areas

The centerlines of existing underground electric facilities easement areas located in Sections 9,10,11, and 14, Town 25 North, Range 05 East, Curtis W. Township, Alcona County, Michigan, said centerlines being described as follows:

UG Elec.1
BEGINNING at previously stated Reference Point "F"; thence South 62°05'27" East, 18.17 feet; thence North 63°14'10" East, 51.35 feet; thence Northeasterly, 908.30 feet, along the arc of a 562.00 foot radius curve to the left, the central angle of which is 92°36'02", and the long chord of which bears North 16°56'09" East, 812.62 feet; thence North 29°21'52" West, 92.83 feet, more or less, to a point on the North line of the South one-half of the Northwest one-quarter of the Northeast one-quarter, and to the POINT OF ENDING.

UG Elec.2
Commencing at the South one-quarter corner of said Section 11; thence North 01°41'09" West, 1997.72 feet, along the North and South one-quarter line of said Section 11, to the POINT OF BEGINNING; thence Northwesterly, 376.77 feet, along the arc of a 764.28 feet radius curve to the right, the central angle of which is 28°14'44", and the long chord of which bears North 83°28'26" West, 372.97 feet; thence North 69°21'04" West, 110.78 feet; thence North 52°26'14" West, 40.96 feet; thence North 37°29'11" West, 20.29 feet; thence North 45°33'53" West, 69.87 feet; thence North 41°41'25" West, 208.02 feet; thence North 39°39'56" West, 376.67 feet, more or less, to a point on the East and West one-quarter line of said Section 11, and to Reference Point "I", and the POINT OF ENDING.

UG Elec.3
Commencing at previously stated Reference Point "I"; thence North 39°41'41" West, 609.23 feet, to a point on the West one-eighth line of said Section 11, to the POINT OF BEGINNING; thence North 39°57'17" West, 65.16 feet; thence North 32°54'21" West, 175.68 feet, to Reference Point "G"; thence North 39°39'22" West, 429.32 feet; thence North 39°32'33" West, 375.06 feet; thence North 38°42'00" West, 200.95 feet; thence North 09°19'51" West, 30.55 feet; thence North 42°41'32" East, 104.08 feet; thence North 52°27'09" West, 431.16 feet; thence North 49°22'42" West, 143.16 feet; thence North 41°22'33" West, 288.33 feet; thence North 39°13'26" West, 327.49 feet; thence North 39°33'47" West, 244.79 feet, more or less, to a point on the North line of said Section 10, and to Reference Point "H", and the POINT OF ENDING.

And also Commencing at previously stated Reference Point "G"; thence South 24°15'51" West, 203.61 feet; thence South 18°50'14" West, 70.46 feet; thence South 08°35'41" West, 78.74 feet; thence South 29°33'03" East, 60.27 feet; thence South 39°26'12" East, 55.61 feet; thence South 21°44'21" East, 80.41 feet; thence South 26°23'59" East, 76.78 feet; thence South 26°59'44" West, 80.66 feet; thence South 05°34'28" East,

77.57 feet; thence South 05°50'40" West, 93.14 feet; thence South 10°49'24" West, 86.09 feet; thence South 25°49'30" West, 87.86 feet; thence South 52°13'30" East, 85.79 feet, to the POINT OF ENDING.

And also Commencing at previously stated Reference Point "G"; thence South 58°57'40" West, 73.44 feet, to the POINT OF ENDING.

UG Elec.4
Commencing at previously stated Reference Point "H"; thence South 89°32'57" West, 256.60 feet, along the North line of said Section 10, to the POINT OF BEGINNING; thence South 36°14'39" West, 265.60 feet; thence South 30°39'29" West, 262.63 feet; thence South 08°40'47" West, 56.90 feet; thence South 30°08'20" West, 219.12 feet; thence South 62°15'00" West, 220.70 feet; thence South 48°55'52" West, 77.48 feet; thence South 30°03'19" West, 219.76 feet; thence South 37°37'40" West, 200.32 feet; thence South 36°00'44" East, 55.26 feet; thence South 83°48'25" West, 79.77 feet; thence South 36°27'03" West, 103.97 feet; thence South 30°13'14" West, 170.91 feet; thence South 33°08'43" West, 200.01 feet; thence South 59°36'26" West, 71.43 feet; thence South 84°11'38" West, 64.70 feet; thence North 75°56'53" West, 176.07 feet; thence North 80°20'44" West, 80.15 feet; thence North 89°49'37" West, 80.68 feet; thence North 89°53'59" West, 81.33 feet; thence North 79°36'02" West, 109.43 feet; thence North 20°34'48" West, 29.42 feet, to the POINT OF ENDING.

UG Elec.5
Commencing at the North one-quarter corner of said Section 9; thence South 01°12'57" East, 425.25 feet, along the North and South one-quarter line of said Section 9; thence North 88°47'03" East, 1276.49 feet, to a point on the East one-eighth line of said Section 9, and to the POINT OF BEGINNING; thence North 73°20'18" East, 194.85 feet; thence North 80°09'08" East, 13.68 feet; thence South 74°50'25" East, 13.42 feet; thence South 51°59'59" East, 56.14 feet, to the POINT OF ENDING.

Legal Description: Alcona Substation Easement
A substation easement located in Section 14, Town 25 North, Range 5 East, Curtis W. Township, Alcona County, Michigan, more fully described as follows:
Commencing at the West one-quarter corner of said Section 14; thence North 88°13'06" East, 995.64 feet, along the East and West one-quarter line of said Section 14; thence North 01°46'54" West, 475.17 feet; to the POINT OF BEGINNING; thence North 68°29'55" West, 180.00 feet; thence North 21°11'02" East, 180.00 feet; thence South 68°29'55" East, 180.00 feet; thence South 21°11'02" West, 180.00 feet, to the POINT OF BEGINNING.

Legal Description: Access Easement
A strip of land twenty (20) feet in width being ten (10) feet on each side of the following described centerline located in the
Northwest one-quarter of Section 14, Town 25 North, Range 5 East, Curtis W. Township, Alcona County, Michigan, said centerline described as:

Commencing at the West one-quarter corner of said Section 14; thence North 88°13'06" East, 1005.52 feet, along the East and West one-quarter line of said Section 14; thence North 01°46'54" West, 600.49 feet, to a point on the Easterly Alcona substation fenceline, and to the POINT OF BEGINNING; thence South

69°51'23" East, 47.37 feet; thence South 60°53'09" East, 31.95 feet; thence South 63°18'29" East, 70.97 feet; thence South 68°42'57" East, 166.07 feet; thence South 65°17'24" East, 69.30 feet; thence South 61°45'47" East, 171.20 feet; thence South 56°24'06" East, 27.14 feet, more or less, to a point on the centerline of Bamfield Road, and to the POINT OF ENDING.

The sidelines of said 20.00 foot wide easement centerline, are to be extended or shortened to meet at angle points beginning at points opposite of and perpendicular to the POINT OF BEGINNING, and ending on the centerline of Bamfield Road.

Calkins Project

Legal Description: Centerline for Existing LVD Line 1 Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the Northwest 1/4 of Section 15, Township 2 North, Range 14 West, Valley Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the Northwest Corner of said Section 15; thence South 88° 07' 00" East 533.36 feet along the North Line of said Section 15; thence South 01° 53' 13" West 212.07 feet; thence South 85° 41' 17" East 15.49 feet, more or less, to the FERC Project Boundary and the Point of Beginning; thence South 85° 41' 17" East 115.56 feet to Reference Point 'A'; thence South 02° 12' 45" East 163.09 feet; thence North 63° 21' 13" East 512.89 feet to Reference Point 'B'; thence South 65° 17' 56" East 478.15 feet; thence South 74° 11' 45" East 313.53 feet, more or less, to the Point of Ending.

AND

Beginning at Reference Point 'B'; thence North 87° 42' 31" West 163.02 feet to the Point of Ending.

AND

A Proposed LVD line Commencing at Reference Point 'A', thence South 24° 08' 03" West 146.15 feet to Reference Point 'C'; thence South 65° 51' 57" East 72.38 feet to the Point of Ending.

AND

A Proposed LVD line Commencing at Reference Point 'C'; thence North 65° 51' 57" West 76.83 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Legal Description: Centerline for Existing LVD Line 2 Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the Northeast 1/4 of Section 13, Township 2 North, Range 14 West, Valley Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the East 1/4 Corner of said Section 13; thence South 00° 32' 23" East 8.24 feet along the East Line of said Section 13; thence North 79° 50' 15" West 90.48 feet, more or less, to the FERC Project Boundary and the Point of Beginning; thence North 79° 50' 15" West 423.57 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Legal Description: Centerline for Existing 46 kV Facilities Easement Area Line 22W

The centerline of an existing electric facilities easement area located in the Northeast 1/4 of Section 19, and the Northwest 1/4 of Section 20, both Sections being in Township 2 North, Range 13 West, Allegan Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the Northeast Corner of said Section 19; thence South 00° 39' 19" East, along the East Line of Said Section 19, 1476.27 feet, more or less, to the FERC Project Boundary; thence South 62° 14' 27" West, along said FERC Project Boundary, 78.93 feet to the Point of Beginning; thence South 20° 29' 51" East 484.45 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Legal Description: Centerline for Existing LVD Line 3 Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the Northwest 1/4 of Section 28, Township 2 North, Range 13 West, Allegan Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the Northwest Corner of said Section 28; thence South 89° 50' 37" East 128.04 feet along the North Line of said Section 28; thence South 76° 41' 55" East 88.23 feet, more or less, to the FERC

Project Boundary and the Point of Beginning; thence South 76° 41’ 55” East 285.28 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Legal Description: Centerline for Existing LVD Line 4 Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the North 1/2 of Section 28, Township 2 North, Range 13 West, Allegan Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the West 1/4 Corner of said Section 28; thence North 00° 50’ 42” West 463.94 feet along the West Line of said Section 28; thence North 89° 09’ 18” East 2675.89 feet; thence North 06° 55’ 28” West 361.19 feet; thence North 54° 33’ 05” East 33.52 feet, more or less, to the FERC Project Boundary and the Point of Beginning; thence North 54° 33’ 05” East 127.14 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Legal Description: Centerline for Existing LVD Line 5 Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the North 1/2 of Section 28, Township 2 North, Range 13 West, Allegan Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the West 1/4 Corner of said Section 28; thence North 00° 50’ 42” West 463.94 feet along the West Line of said Section 28; thence North 89° 09’ 18” East 2675.89 feet; thence South 52° 13’ 12” East 95.92 feet, more or less, to the FERC Project Boundary and the Point of Beginning; thence South 52° 13’ 12” East 270.59 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Cooke Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas

The centerlines of existing electric facilities easement areas located in Sections 15, 21, and 29, Town 24 North, Range 07 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

LVD1

Commencing at the South one-quarter corner of said Section 15, thence South 89°43'53" East, 134.46 feet, along the South line of said Section 15; thence North 00°16'11" East, 1003.77 feet; thence South 89°43'49" East, 383.27 feet, to the POINT OF BEGINNING; thence North 01°14'58" West, 276.13 feet; thence North 50°33'57" West, 48.89 feet, to Reference Point "D"; thence North 51°12'46" West, 194.61 feet; thence North 68°08'42" West, 173.94 feet; thence South 62°40'53" West, 492.54 feet; thence South 26°59'48" East, 141.38 feet; thence South 62°01'37" West, 1260.23 feet, to Reference Point "G"; thence continuing South 62°01'37" West, 10.31 feet, more or less, to a point on the West one-eighth line of said Section 15, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "G"; thence South 00°27'56" East, 541.29 feet, more or less, to a point on the South line of said Section 15, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "D"; thence South 85°32'18" West, 7.60 feet; thence South 54°58'50" West, 213.43 feet, to the POINT OF ENDING.

LVD2

BEGINNING at previously stated Reference Point "D"; thence North 12°24'45" East, 390.56 feet, to Reference Point "E"; thence North 65°36'53" East, 172.21 feet; thence North 11°28'51" East, 851.61 feet, to Reference Point "K"; thence North 02°01'58" West, 637.79 feet, more or less, to the North line of the South one-half of the Southwest one-quarter of the Northeast one-quarter, an the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "E"; thence South 79°49'32" West, 30.80 feet, to a point on the Easterly Cooke Dam substation fence line, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "K"; thence North 79°20'58" East, 286.64 feet; thence North 54°57'12" East, 177.18 feet, more or less, to a point on the East one-eighth line of said Section 15, and the POINT OF ENDING.

LVD3

Commencing at the Northwest corner of said Section 21; thence South 00°30'48" West, 1231.39 feet, along the West line of said Section 21; thence South 89°29'12" East, 50.65 feet, to a point on the East line of the Plat of Cooke Basin Subdivision No. 1, and to the POINT OF BEGINNING; thence North 88°30'38" East, 36.00 feet, to Reference Point "H"; thence North 73°30'37" East, 118.55 feet, more or less, to a point on a line being described as lying parallel with and 200.00 feet East of the West line of said Section 21, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "H"; thence North 01°09'56" West, 353.17 feet; thence North 02°32'03" West, 121.57 feet; thence North 01°15'43" West, 170.13 feet: thence North 02°13'26" West, 173.28 feet, to Reference Point "I"; thence North 01°17'14" West, 172.13 feet, to Reference Point "J": thence North 01°36'59" West, 242.62 feet, more or less, to a point on the North line of said Section 21, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "I"; thence South 88°01'53" West, 35.23 feet, more or less, to a point on the easterly line of the Plat of Cooke Basin Subdivision No. 1, and the POINT OF ENDING.

And also Beginning at previously stated Reference Point "J"; thence South 11°43'09" East, 703.88 feet, more or less, to a point on a line being described as lying parallel with and 200.00 feet East of the West line of said Section 21, and to the POINT OF ENDING.

LVD4

Commencing at the Northwest corner of said Section 21; thence South 00°30'48" West, 5046.02 feet, along the West line of said Section 21; thence South 00°11'59" East, 1238.73 feet, along the East line of said Section 29; thence South 89°57'28" West, 1258.91 feet, to a point on the East one-eighth line of said Section 29, and to the POINT OF BEGINNING; thence South 44°13'10" West, 84.13 feet; thence South 35°37'28" West, 43.04 feet, more or less, to a point on the North one-eighth line of said Section 29, and to the POINT OF ENDING.

Legal Description: Monument Substation Easement at Cooke Dam

An easement in part of the Southeast one-quarter of Section 15, Township 24 North, Range 7 East, Oscoda Township, Iosco County, Michigan, more particularly described as follows:

Commencing at the Southeast corner of said Section 15; thence North 89° 43'53" West, 1900.11 feet, along the South line of said Section 15; thence North 00°16'07" East, 804.18 feet, to the POINT OF BEGINNING; thence North 89°59'58" West, 350.00 feet; thence North 00°00'02" East, 350.00 feet; thence South 89°59'58" East, 350.00 feet; thence South 00°00'02" West, 350.00 feet, to the POINT OF BEGINNING.

Legal Description: Access Easement

A strip of land twenty (20) feet in width being ten (10) feet on each side of the following described centerline located in Northwest one-quarter of the Southeast one quarter of said Section 15; Township 24 North, Range 7 East, Oscoda Township, Iosco County, Michigan, more particularly described as follows:

Commencing at the South one-quarter corner of said Section 15; thence South 89°43'53" East, 134.46 feet, along the South line of said Section 15; thence North 00°16'11" East, 1442.82 feet, to the POINT OF BEGINNING; thence along the centerline of the said 20 foot wide access easement centerline the following three (3) courses; North 64°06'29" East, 101.77 feet; thence South 46°09'11" East, 132.25 feet; thence South 26°42'20" East, 273.53 feet; to the POINT OF ENDING.

Legal Description: Centerline for existing underground Electric Facilities Area

The centerline of an existing underground electric facilities easement area located in the Southwest one-quarter of said Section 15, Township 24 North, Range 7 East, Oscoda Township, Iosco County, Michigan, more particularly described as follows:

BEGINNING at previously stated Reference Point "G"; thence North 08°08'14" West, 54.32 feet; thence North 05°01'13" East, 14.18 feet; thence North 28°45'42" East, 27.93 feet; thence North 28°02'40" West, 22.79 feet; thence North 40°26'21" West, 9.30 feet, more or less, to a point on the West one-eighth line of said Section 15, and to the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas

The centerlines of existing electric facilities easement areas located in Section 15, and 29, Town 24 North, Range 07 East, Oscoda Township, Iosco County, Michigan, more particularly described as follows:

46kV Line 29T (Segment 1)

Commencing at the South one-quarter corner of said Section 15; thence South 89°43'53" East, 490.92 feet, along the South line of said Section 15, to the POINT OF BEGINNING; thence North 01°23'51" West, 918.27 feet, to Reference Point "A"; thence North 01°28'47" East, 618.22 feet, to Reference Point "B"; thence North 01°44'26" East, 129.01 feet, to a point on the Southerly fence line of the Cooke Dam Substation, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "B"; thence South 76°00'12" West, 211.16 feet; thence South 61°58'19" West, 1823.91 feet, more or less, to a point on the West one-eighth line of said Section 15, and to the POINT OF ENDING.

46kV Line 29AI

BEGINNING at previously stated Reference Point "A"; thence North 88°45'18" East, 55.41 feet; thence North 02°00'24" West, 33.76 feet, to a point on the Monument Substation Southerly fence line, and to the POINT OF ENDING.

46kV Line 29T (Segment 2)

Commencing at the Northwest corner of said Section 21; thence South 00°30'48" West, 5046.02 feet, along the West line of said Section 21; thence South 00°11'59" East, 1147.55 feet, along the East line of said Section 29; thence South 89°57'28" West, 1259.09 feet, to a point on the East one-eighth line of said Section 29, and to the POINT OF BEGINNING; thence South 44°09'52" West, 266.12 feet, more or less, to a point on the North one-eighth line of said Section 29, and to the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas

The centerlines of existing electric facilities easement areas located in Section 26, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

46 kV line 29T (segment 3)

Commencing at the North one-quarter corner of said Section 26; thence South 00°39'07" East, 374.03 feet, along the North and South one-quarter line of said Section 26, to the POINT OF BEGINNING; thence South 67°55'34" East, 105.45 feet; thence South 08°28'14" West, 613.43 feet, more or less, to a point on the North and South one-quarter line of said Section 26, and the POINT OF ENDING.

Croton Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 7 and 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, said centerlines being described as follows:

LVD1
Commencing at the South one-quarter corner of said Section 7; thence North 00°51'24" East, 196.77 feet, along the North and South one-quarter line of said Section 07, to the POINT OF BEGINNING; thence North 89°32'23" East, 30.45 feet, to Reference Point "X"; thence continuing North 89°32'23" East, 6.35 feet; thence North 88°52'20" East, 1076.68 feet, to Reference point "A"; thence continuing North 88°52'20" East, 241.98 feet; thence South 32°30'42" East, 207.59 feet, to Reference point "B"; thence North 88°43'49" East, 131.24 feet; thence South 63°51'13" East, 172.77 feet; thence South 32°18'07" East, 393.19 feet; thence South 05°18'46" East, 166.08 feet, to Reference Point "D"; thence South 25°44'23" West, 47.18 feet; thence South 16°57'13" East, 47.47 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "X"; thence North 00°47'15" East, 1268.37 feet, to Reference Point "Y"; thence North 00°53'27" East, 1188.96 feet, more or less, to a point on the East and West one-quarter line of said Section 7, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "Y"; thence South 87°46'05" West, 28.96 feet, to a point on the North and South one-quarter line of said Section 7, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "A"; thence South 14°38'40" West, 150.42 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "B"; thence South 17°21'27" West, 319.07 feet; thence South 00°39'42" West, 48.18 feet, to Reference Point "E"; thence continuing South 00°39'42" West, 784.64 feet, to Reference point "C"; thence South 00°39'42" West, 390.33 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence South 59°09'27" West, 59.54 feet, more or less, to the Western line of Government Lot 1 of said Section 18, and the POINT OF ENDING.

Legal Description: Centerlines for existing underground Electric Facilities Areas
The centerlines of existing underground electric facilities easement areas located in Section 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, said centerlines being described as follows:

UG Elec1
Commencing at previously stated Reference Point "D"; thence South 74°54'18" West, 41.70 feet, to a point on the Easterly Croton Substation fence, and the POINT OF BEGINNING; thence South 82°53'39" East, 17.31 feet; thence South 04°59'07" East, 14.62 feet; thence South 00°34'07" West, 129.28 feet; thence South 76°56'21" East, 34.71 feet; thence South 79°41'48" East, 24.07 feet; thence South 63°49'49" East, 20.46

feet; thence South 36°31'29" East, 15.10 feet; thence South 74°31'59" East, 5.58 feet; thence South 78°47'35" East, 235.51 feet, to Reference Point "F", and the POINT OF ENDING.

UG Elec2
Commencing at previously stated Reference Point "F"; thence South 73°18'54" East, 167.44 feet, to the POINT OF BEGINNING; thence North 87°09'19" East, 32.07 feet; thence South 78°33'35" East, 24.18 feet; thence South 80°46'01" East, 24.26 feet; thence South 76°07'37" East, 27.04 feet, to Reference Point "G", and the POINT OF ENDING.

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 4, 8, 17, and 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, said centerlines being described as follows:

LVD2
Commencing at previously stated Reference Point "G"; thence North 61°51'45" West, 22.12 feet, to the POINT OF BEGINNING; thence South 61°51'45" East, 22.12 feet; thence South 71°55'08" East, 175.85 feet, to Reference Point "H"; thence South 06°56'20" West, 168.01 feet, to Reference Point "I", thence South 07°01'38" West, 435.07 feet; thence South 01°02'48" West, 932.92 feet, to Reference Point "J"; thence North 88°21'06" West, 187.10 feet, to Reference Point "M"; thence South 60°25'51" West, 49.87 feet, to a point on the Easterly fence of Conklin Park Substation and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "I"; thence North 84°31'23" East, 137.55 feet, more or less, to the Westerly right of way of S. Croton Hardy Dr, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "J"; thence South 56°08'57" West, 45.67 feet, to Reference Point "L"; thence South 82°46'30" West, 154.36 feet; thence North 80°17'07" West, 40.38 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "L"; thence South 35°07'57" West, 103.10 feet; thence South 25°40'29" West, 75.67 feet, more or less, to the East and West one-quarter line of said Section 18, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "M"; thence North 88°11'59" West, 189.62 feet; thence South 01°56'13" West, 26.28 feet; thence North 88°10'55" West, 333.46 feet; thence South 88°27'45" West, 592.76 feet, more or less, to a point on the East one-eighth line of said Section 18, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "H"; thence North 14°29'08" East, 109.62 feet; thence North 14°25'02" East, 101.58 feet; thence North 10°45'26" East, 148.65 feet; thence North 01°39'49" East, 413.36 feet; thence North 44°52'04" East, 194.53 feet, more or less, to a point on the Easterly line of Lot 1, Block 9 of the Original Plat of the Village of Croton, and the POINT OF ENDING.

LVD3
Commencing at the North one-quarter corner of said Section 07; thence South 88°23'49" East, 2616.90 feet, along the North line of said Section 07; thence South 89°28'21" East, 2679.45 feet, along the North line of said Section 08, to Reference Point "N"; thence South 00°36'09" West, 1570.82 feet, along the North and South one-quarter line of said Section 08; thence South 89°23'51" East, 1347.14 feet, to the East one-eighth line of said Section 8, and the POINT OF BEGINNING; thence North 69°52'05" East, 126.88 feet; thence North 53°45'00" East, 1514.56 feet, more or less, to the East line of said Section 8, and the POINT OF ENDING.

LVD4
Commencing at previously stated Reference Point "N"; thence South 89°28'21" East, 2679.45 feet, along the North line of said Section 8; thence North 00°44'25" East, 3152.55 feet, along the West line of said Section 4; thence South 89°15'35" East, 848.27 feet, to a point on the centerline of Croton Dam Pond, and the West line of parcel located in Liber 160, Page, 510, Newaygo County Records, and the POINT OF BEGINNING; thence South 85°44'27" East, 451.55 feet, more or less, to a point on the Easterly FERC Project Boundary, and the East line of parcel located in Liber 160, Page 510, Newaygo County Records, and the POINT OF ENDING.

Legal Description: Croton Substation Easement
A substation easement located in Section 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, more particularly described as follows:

BEGINNING at previously stated Reference Point "E"; thence South 89°21'12" East, 589.79 feet; thence South 00°38'48" West, 374.71 feet; thence North 89°21'12" West, 12.16 feet; thence South 00°38'48" West, 23.10 feet, to Reference Point "AA"; thence North 89°21'12" West, 606.81 feet; thence North 00°09'37" West, 397.86 feet; thence South 89°21'12" East, 34.79 feet, to the POINT OF BEGINNING.

Legal Description: Conklin Park Substation
A substation easement located in Section 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, more particularly described as follows:

Commencing at the East one-quarter corner of said Section 18; thence South 88°37'59" West, 131.24 feet, along the East and West one-quarter line of said Section 18; thence North 01°22'01" West, 45.53 feet, to a point on the centerline of East 68th Street, and the POINT OF BEGINNING; thence North 88°54'26" West, 300.00 feet, along said centerline; thence North 01°05'34" East, 261.37 feet; thence South 88°54'26" East, 300.00 feet; thence South 01°05'34"" West, 261.37 feet, to the POINT OF BEGINNING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 07, and 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, more particularly described as follows:

46kV Line 19D
Commencing at previously stated Reference Point "AA"; thence North 18°22'10" West, 23.90 feet, to a point on the Southerly Croton Substation fence; thence along said Southerly fenceline the following five

(5) courses; thence North 89°18'38" West, 47.11 feet, to Reference Point "W"; thence continuing North 89°18'38" West, 27.29 feet, to Reference Point "Q"; thence continuing North 89°18'38" West, 23.43 feet, to Reference Point "R"; thence continuing North 89°18'38" West, 22.82 feet, to Reference Point "S"; thence continuing North 89°18'38" West, 90.10 feet, to Reference Point "T", and the POINT OF BEGINNING; thence South 04°13'15" West, 229.15 feet; thence South 18°40'42" West, 398.09 feet; thence North 75°52'14" West, 161.75 feet; thence South 05°02'11" West, 431.42 feet; thence South 04°23'51" West, 876.17 feet; thence South 23°23'06" West, 6.81 feet, more or less, to a point on the East one-eighth line of said section 18, and the POINT OF ENDING.

46kV Line 95A
BEGINNING at previously stated Reference Point "S"; thence South 08°19'11" West, 235.23 feet; thence South 17°38'57" West, 307.61 feet; thence South 05°54'27" West, 103.56 feet; thence South 04°33'06" West, 893.32 feet; thence South 37°01'37" West, 442.61 feet; thence South 26°22'28" West, 52.87 feet, more or less, to a point on the East one-eighth line of said section 18, and the POINT OF ENDING.

46kV Line 20A
BEGINNING at previously stated Reference Point "R"; thence South 08°20'40" West, 639.03 feet; thence South 04°30'09" West, 830.27 feet; thence South 33°55'15" East, 370.08 feet; thence South 87°56'15" East, 551.08 feet; thence South 88°38'17" East, 182.43 feet, more or less, to a point on the East line of said Section 18, and the POINT OF ENDING.

46kV Line 112A
BEGINNING at previously stated Reference Point "Q"; thence South 07°27'41" West, 639.86 feet; thence South 04°54'48" West, 797.55 feet; thence South 34°00'27" East, 356.26 feet; thence South 87°45'34" East, 332.37 feet; thence South 88°14'25" East, 379.02 feet, more or less, to a point on the East line of said Section 18, and the POINT OF ENDING.

46kV Line 19C
BEGINNING at previously stated Reference Point "W"; thence South 00°29'23" West, 54.23 feet; thence North 77°21'38" East, 65.96 feet; thence North 00°55'11" East, 365.47 feet; thence North 49°39'14" West, 299.13 feet; thence North 34°17'32" West, 1885.46 feet; thence North 28°21'34" West, 1333.86 feet, to a point on the North and South one-quarter line of said Section 7, and the POINT OF ENDING.

Five Channels Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas

The centerlines of existing electric facilities easement areas located in Sections 22 and 23, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

LVD1

Commencing at the South one-quarter corner of said Section 23; thence South 87°54'00" West, 73.40 feet, along the South line of said Section 23 to the POINT OF BEGINNING and REFERENCE POINT "A"; thence North 60°59'16" East, 99.59 feet; thence North 33°36'50" West, 135.67 feet; thence North 36°54'18" East, 487.72 feet, to REFERENCE POINT "B"; thence South 44°58'00" East, 289.19 feet; thence North 48°12'01" East, 455.75 feet, to REFERENCE POINT "C"; thence North 51°06'30" West, 166.50 feet; thence North 15°41'29" East, 588.08 feet, more or less, to a point on the South one-eighth line of said Section 23, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "B"; thence North 40°15'39" West, 171.72 feet, to the REFERENCE POINT "E"; thence North 39°55'53" West, 92.61 feet; thence North 60°19'52" West, 23.11 feet, to a point on the Easterly Five Channels Dam Substation fence, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "E"; thence North 21°54'16" West, 117.70 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated REFERENCE POINT "C"; thence South 67°13'05" East, 227.66 feet; thence South 70°20'20" East, 342.62 feet, to REFERENCE POINT "D"; thence South 00°37'00" East, 245.44 feet; thence South 79°22'41" East, 4.67 feet, more or less, to a point on the East one-eighth line of said Section 23, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "D"; thence South 77°22'25" East, 4.28 feet, more or less, to a point on the East one-eighth line of said Section 23, and the POINT OF ENDING.

LVD1a

Commencing at previously stated REFERENCE POINT "A"; thence South 87°54'00" West, 641.22 feet, along the South line of said Section 23, to the POINT OF BEGINNING, and REFERENCE POINT "F"; thence North 74°30'06" West, 294.09 feet; thence North 76°26'22" West, 507.56 feet; thence South 17°41'35" West, 100.79 feet; thence North 73°07'16" West, 2155.47 feet; thence North 73°18'55" West, 1686.41 feet, to REFERENCE POINT "G"; thence North 00°44'36" West, 1044.33 feet; thence South 87°41'38" West, 73.22 feet, more or less, to a point the North and South one-quarter line of said Section 22, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE PONT "G"; thence South 78°52'15" West, 79.53 feet, more or less, to a point on the North and South one-quarter line of said Section 22, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "G"; thence South 00°52'31" East, 748.67 feet; thence North 63°08'48" West, 93.94 feet, more or less, to a point on the North and South one-quarter line of said Section 22, and the POINT OF ENDING.

Legal Description: Centerlines for Existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 21 and 22, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

LVD2
Commencing at the Southwest corner of said Section 22; thence North 00°32'23" West, 2631.40 feet, along the West line of said Section 22, to the West one-quarter corner of said Section 22; thence North 88°00'54" East, 28.49 feet, along the East and West one-quarter line of said Section 22, to the POINT OF BEGINNING and REFERENCE POINT "I"; thence North 04°38'58" East, 29.96 feet; thence North 66°13'50" West, 922.68 feet, to REFERENCE POINT "J"; thence North 41°24'07" West, 570.59 feet; thence North 10°44'13" West, 328.89 feet; thence North 16°04'07" West, 244.17 feet; thence North 72°28'30" West, 404.85 feet; thence South 87°43'04" West, 477.29 feet; thence South 71°02'36" West, 421.17 feet; thence South 50°53'53" West, 39.65 feet, more or less, to the Easterly property line, of non-Consumers Energy property, as recorded in Liber 1162, Page 679, Iosco County Records, and the POINT OF ENDING and REFERENCE POINT "K".

And also, BEGINNING at previously stated REFERENCE POINT "J"; thence South 26°25'47" West, 388.61 feet; thence South 57°51'22" East, 166.53 feet, more or less, to a point on the East and West one-quarter line of said Section 21, and the POINT OF ENDING.

LVD2a
Commencing at previously stated REFERENCE POINT "K"; thence South 50°53'53" West, 459.95 feet, to the POINT OF BEGINNING; thence South 50°53'53" West, 187.69 feet; thence South 76°02'36" West, 175.78 feet, to the Westerly FERC Project Boundary line, and the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 22 and 23, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

46 kV line 29U
Commencing at previously stated REFERENCE POINT "A"; thence South 87°54'00" West, 105.05 feet, along the South line of said Section 23, to the POINT OF BEGINNING; thence North 35°18'33" East, 202.36 feet; thence North 34°58'55" East, 510.44 feet; thence North 23°40'10" West, 112.00 feet, to REFERENCE POINT "L"; thence continuing North 23°40'10" West, 29.92 feet thence North 28°46'40" West, 164.29 feet; thence South 43°24'35" West, 68.85 feet, to a point on the Five Channels Substation fence, and the POINT OF ENDING.

46 kV line 29T (segment 1)
Commencing at previously stated REFERENCE POINT "F"; thence South 87°54'00" West, 168.73 feet, along the South line of said section 23, to the POINT OF BEGINNING; thence North 69°34'58" West,

27.48 feet; thence North 76°30'21" West, 566.42 feet; thence North 73°10'35" West, 2205.37 feet; thence North 73°13'19" West, 1784.08 feet, more or less, to a point on the North and South one-quarter line of said Section 22, and the POINT OF ENDING.

Legal Description: Centerline for Existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 22, and 23, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

46 kV line 29T (segment 2)
Commencing at previously stated REFERENCE POINT "I"; thence North 88°00'54" East, 71.80 feet, along the East and West one-quarter line of said Section 22, to the POINT OF BEGINNING; thence North 51°14'11" West, 113.74 feet; thence North 66°21'03" West, 882.00 feet; thence North 41°05'39" West, 401.09 feet; thence North 24°15'19" West, 464.11 feet; thence North 25°08'25" West, 243.79 feet; thence North 74°35'15" West, 372.03 feet; thence South 87°52'55" West, 461.51 feet; thence South 69°00'45" West, 464.52 feet; thence South 49°42'06" West, 457.60 feet; thence South 57°14'41 West, 390.10 feet; to a point on the Westerly FERC Project Boundary line, and the POINT OF ENDING.

Proposed 46 kV line
BEGINNING at previously stated REFERENCE POINT "L"; thence South 83°39'53" East, 30.00 feet, to a point on the West line of the Proposed Largo Substation Easement, and the POINT OF ENDING.

Legal Description: Access Easement
A strip of land twenty (20) feet in width being ten (10) feet each side of the following described centerline located in the Southeast one-quarter of Section 23, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerline described as:

Commencing at the South one-quarter corner of said Section 23; thence North 00°41'18" West, 696.21 feet, along the North and South one-quarter line of said Section 23; thence North 89°18'42" East, 709.27 feet, to a point on the centerline of Old M-65, and POINT OF BEGINNING; thence Northwesterly, 107.50 feet, along the arc of a 450.00 foot radius curve to the left, the central angle of which is 13°41'13", and the long chord of which bears North 76°54'15" West, 107.24 feet; thence North 83°44'51" West, 346.20 feet; thence Westerly, 56.27 feet, along the arc of a 500.00 foot radius curve to the right, the central angle of which is 06°26'52", and the long chord of which bears North 80°31'25" West, 56.24 feet; thence North 77°17'59" West, 22.55 feet; thence Northwesterly, 96.06 feet, along the arc of a 150.00 foot radius curve to the right, the central angle of which is 36°41'28", and the long chord of which bears North 58°57'15" West, 94.42 feet; thence along a line non-tangent to said curve, South 42°22'40" West, a distance of 32.36 feet, to the POINT OF ENDING and REFERENCE POINT "H". The sidelines of said strip are to be extended or shorted to meet at angle points and to begin at the centerline of Old M-65 and to terminate at the Five Channels Dam Substation easement.

Legal Description: Largo Substation Easement
Substation easement located in Section 23, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, being described as follows:

Commencing at the Southwest corner of said Section 23; thence North 87°54'00” East, 2621.56 feet, along the South line of said Section 23, to the South one-quarter corner of said Section 23; thence North 47°29'46” East, 541.36 feet, to a point on the Easterly right of way of Old M 65 Trail; and the POINT OF BEGINNING of said easement; thence North 44°45'49” West, 277.68 feet; thence North 06°20'07” East, 219.00 feet, to a point on the North edge of Five Channels Road; thence along the North edge of Five Channels Road the following three (3) courses: South 83°32'31” East, 373.25 feet; thence South 79°44'36” East, 73.84 feet; thence South 73°05'02” East, 80.63 feet, to a point on the Easterly right of way of Old M 65 Trail; thence along the Easterly right of way of Old M-65 Trail the following four (4) courses: South 41°00'01” West, 113.29 feet; thence South 44°35'54” West, 74.86 feet; thence South 47°22'04” West, 69.96 feet; thence South 48°43'38” West, 227.45 feet, to the POINT OF BEGINNING of said easement.

Foote Project

Legal Description: Centerlines for existing HVD Electric Facilities Easement Area

The centerlines of existing electric facilities easement areas located Sections 28, 29, 33, 34 and 35, Town 24 North, Range 08 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

46 kV line 29J (segment 1)

Commencing at the West one-quarter corner of said Section 29; thence North 89°22'25" East, 2331.67 feet, along the East and West one-quarter line of said Section 29; thence South 01°12'46" East, 479.97 feet, along the West line of the East 300 feet of the North one-half of the Southwest one-quarter of said Section 29, to the POINT OF BEGINNING, and REFERENCE POINT "A"; thence South 76°37'35" East, 1305.71 feet; thence South 76°43'03" East, 891.69 feet; thence South 76°43'12" East, 446.71 feet; thence South 76°50'49" East, 445.39 feet; thence South 47°19'59" East, 452.72 feet; thence South 47°31'49" East, 1353.08 feet; thence South 38°55'24" East, 487.88 feet; thence South 60°25'09" East, 482.14 feet; thence South 68°59'03" East, 453.26 feet; thence South 69°00'10" East, 3141.41 feet; thence South 59°37'54" East, 3371.74 feet; thence South 59°53'24" East, 414.17 feet; thence North 87°43'27" East, 459.30 feet; thence North 54°45'24" East, 1910.60 feet; thence North 32°58'34" East, 306.11 feet, to REFERENCE POINT "C"; thence North 32°01'59" East, 313.58 feet; thence North 10°41'19" West, 285.66 feet, to a point on the Southerly Foote Dam Substation fence, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "C"; thence South 59°22'17" East, 54.69 feet, to the POINT OF ENDING.

46 kV line 29J (segment 2)

Commencing at the East one-quarter corner of said Section 30; thence South 87°59'57" West, 2709.41 feet, along the East and West one-quarter line of said Section 30, to a point on the North and South one quarter line of said Section 30; thence North 00°07'06" West, 81.25 feet, along the North and South one-quarter line to REFERENCE POINT "S"; thence continuing North 00°07'06" West, 46.63 feet, along the North and South one-quarter line, to the POINT OF BEGINNING, and REFERENCE POINT "T"; thence South 87°38'47" West, 857.65 feet; thence South 87°24'22" West, 427.03 feet; thence South 86°22'51" West, 176.82 feet; thence South 00°19'37" East, 113.16 feet, more or less, to a point on the East and West one-quarter line of said Section 30, and the POINT OF ENDING.

46 kV line 29L (segment 1)

Commencing at previously stated REFERENCE POINT "A"; thence South 01°12'46" East, 49.79 feet, to the POINT OF BEGINNING; thence South 76°40'09" East, 3072.61 feet; thence South 47°41'01" East, 1778.53 feet; thence South 39°35'35" East, 543.60 feet; thence South 61°43'32" East, 531.95 feet; thence South 69°04'05" East, 3504.20 feet; thence South 59°41'21" East, 3452.82 feet, to REFERENCE POINT "D"; thence South 59°50'36" East, 343.48 feet; thence North 88°00'00" East, 489.51 feet; thence North 55°25'22" East, 1927.06 feet; thence North 31°18'38" East, 331.32 feet; thence North 31°41'17" East, 697.43 feet; thence North 44°50'46" East, 300.09 feet; thence North 40°55'35" East, 590.96 feet; thence North 24°06'50" East, 326.04 feet; thence North 40°10'12" East, 203.49 feet; thence North 40°18'11" East, 949.11 feet, more or less, to the North Line of said Section 35, and the POINT OF ENDING.

46 kV line 29L (segment 2)
BEGINNING at previously stated REFERENCE POINT "S"; thence South 87°35'28" West, 1167.14 feet; thence South 87°23'44" West, 107.58 feet; thence South 85°49'06" West, 155.55 feet; thence South 01°01'25" East, 65.85 feet, more or less, to a point on the East and West one-quarter line of said Section 30, and the POINT OF ENDING.

46 kV line 29M
BEGINNING at previously stated REFERENCE POINT "D"; thence South 30°55'14" East, 424.12 feet, more or less, to the South one-eighth of said Section 34, and the POINT OF ENDING.

46 kV line 29T
Commencing at the East one-quarter corner of said Section 30; thence South 87°59'57" West, 4588.16 feet, along the East and West one-quarter line of said Section 30, to the POINT OF BEGINNING; thence North 02°42'35" West, 114.22 feet; thence North 89°46'57" West, 98.68 feet; thence North 30°28'01" West, 207.00 feet, more or less, to a point on a line 300 feet North of and parallel to the East and West one-quarter line of said Section 30, and the POINT of ENDING.

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 28, 29, 33, 34 and 35, Town 24 North, Range 08 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

LVD1
BEGINNING at previously stated REFERENCE POINT "A"; thence South 76°37'35" East, 857.15 feet, to REFERENCE POINT "E"; thence continuing South 76°37'35" East, 448.56 feet, to REFERENCE POINT "F"; thence South 76°43'03" East, 891.69 feet, to REFERENCE POINT "G"; thence South 76°43'12" East, 446.71 feet; thence South 76°35'29" East, 445.16 feet, to REFERENCE POINT "H"; thence South 47°34'02" East, 451.95 feet, to REFERENCE POINT "I"; thence South 47°31'49" East, 1353.08 feet; thence South 38°55'24" East, 487.88 feet; thence South 60°25'09" East, 482.14 feet, to REFERENCE POINT "J"; thence South 68°59'03" East, 453.26 feet, to REFERENCE POINT "K"; thence South 69°00'10" East, 3141.41 feet, to REFERENCE POINT "L"; thence South 59°37'54" East, 3371.74 feet; thence South 59°27'50" East, 416.84 feet, to REFERENCE POINT "M"; thence South 63°46'20" East, 210.74 feet; thence South 88°08'59" East, 179.57 feet; thence South 66°17'20" East, 313.73 feet, more or less, to the South one-eighth line of said Section 34, and POINT OF ENDING, and REFERENCE POINT "N".

And also, BEGINNING at previously stated REFERENCE POINT "H"; thence North 47°14'38" West, 149.58 feet; thence North 25°33'06" East, 490.20 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "J"; thence South 00°02'51" West, 863.24 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "L"; thence North 41°20'46" East, 338.40 feet; thence North 43°12'24" East, 93.54 feet, to REFERENCE POINT "Q"; thence North 41°18'12" East, 299.67 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "Q"; thence North 60°07'38" West, 781.09 feet; thence North 26°22'32" West, 205.72 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "M"; thence North 37°16'27" West, 208.93 feet; thence North 53°13'55" West, 178.96 feet; thence North 49°41'57" West, 338.83 feet; thence North 45°21'14" West, 171.68 feet; thence North 48°14'01" West, 200.40 feet; thence North 46°35'55" West, 142.00 feet, to the POINT OF ENDING.

LVD2
Commencing at previously stated REFERENCE POINT "N"; thence North 89°31'09" East, 488.42 feet, along the South one-eighth line of said Section 34, to the POINT OF BEGINNING; thence North 29°36'48" West, 119.40 feet; thence North 20°11'58" East, 457.24 feet; thence North 51°39'12" East, 1031.23 feet; thence North 25°51'25" East, 305.41 feet; thence North 28°15'55" East, 234.69 feet; thence North 33°04'56" East, 299.44 feet; thence North 28°13'52" West, 155.37 feet; thence North 09°36'13" East, 232.50 feet, to REFERENCE POINT "O"; thence South 87°56'15" West, 103.97 feet, to a point on the Easterly Foote Dam Substation fence and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "O"; thence North 83°02'56" East, 207.55 feet; thence North 64°46'21" East, 198.26 feet; thence North 39°00'12" East, 49.26 feet; thence North 40°35'45" East, 539.76 feet; thence North 19°12'28" East, 237.71 feet; thence North 40°31'30" East, 246.11 feet; thence North 40°07'38" East, 369.70 feet, to REFERENCE POINT "P"; thence North 40°41'23" East, 240.88 feet; thence North 40°17'47" East, 391.28 feet, to a point on the North Line of said Section 35, and the POINT OF ENDING.

LVD3
Commencing at the Northwest corner of said Section 35; thence North 89°07'26" East, 141.40 feet, along the North line of said Section 35, to the POINT OF BEGINNING; thence South 01°22'45" East, 17.12 feet; thence South 89°10'51" West, 1247.05 feet, to the POINT OF ENDING.

LVD4
BEGINNING at Previously stated REFERENCE POINT "T"'; thence South 87°38'47" West, 857.65 feet; thence South 87°24'22" West, 427.03 feet; thence South 86°22'51" West, 176.82 feet; thence South 87°53'22" West, 197.37 feet, to REFERENCE POINT "U"; thence South 88°22'26" West, 225.61 feet; thence North 89°46'57" West, 98.68 feet, to the POINT OF ENDING and REFERENCE POINT "V".

And also, BEGINNING at previously stated REFERENCE POINT "U"; thence South 03°44'36" East, 112.79 feet, more or less to the East and West one-quarter line of said Section 30, and the POINT OF ENDING.

Legal Description: Centerlines for existing U/G Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 28, 29, 30, 33, 34 and 35, Town 24 North, Range 08 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

U/G Elec.1
BEGINNING at previously stated REFERENCE POINT "E"; thence South 18°55'10" West, 19.25 feet; thence South 39°11'20" West, 19.46 feet; thence South 48°50'21" West, 24.29 feet; thence South 41°15'07" West, 24.60 feet; thence South 20°16'48" West, 24.92 feet thence South 08°15'48" West, 22.80 feet; thence South 08°59'59" East, 30.76 feet; thence South 16°01'28" East, 74.53 feet; thence South 10°43'04" East, 50.60 feet, to the POINT OF ENDING.

U/G Elec.2
BEGINNING at previously stated REFERENCE POINT "F"; thence South 86°11'41" East, 15.79 feet; thence North 82°10'27" East, 15.75 feet; thence North 70°50'20" East, 27.13 feet; thence North 51°21'51" East, 24.85 feet; thence North 32°16'32" East, 60.43 feet, to REFERENCE POINT "R"; thence North 29°45'49" East, 23.92 feet; thence North 18°37'39" East, 103.03 feet; thence North 28°17'23" East, 110.90 feet; thence North 60°47'59" East, 16.03 feet; thence South 81°28'37" East, 20.89 feet; thence South 71°48'27" East, 17.14 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "R"; thence South 77°27'30" West, 5.16 feet; thence North 64°47'16" West, 65.00 feet; thence North 76°12'56" West, 99.30 feet; thence North 76°52'05" West, 70.01 feet; thence North 79°41'18" West, 74.61 feet; thence North 66°52'15" West, 33.80 feet; thence North 59°37'43" West, 33.24 feet; thence North 07°23'27" East, 42.98 feet; thence North 06°08'21" West, 28.50 feet, to the POINT OF ENDING.

U/G Elec.3
BEGINNING at previously stated REFERENCE POINT "G"; thence North 54°24'56" East, 12.83 feet; thence North 30°25'08" East, 50.43 feet; thence North 37°11'41" East, 43.40 feet; thence North 52°14'11" East, 36.29 feet; thence North 39°11'03" East, 40.91 feet; thence North 09°55'50" East, 94.45 feet; thence North 24°22'48" East, 77.58 feet; thence North 19°06'20" East, 90.52 feet; thence North 24°21'06" East, 29.72 feet; thence North 63°48'47" East, 12.57 feet; thence South 86°01'32" East, 27.98 feet; thence South 23°43'33" East, 2.15 feet, to the POINT OF ENDING.

U/G Elec.4
BEGINNING at previously stated REFERENCE POINT "I"; thence South 64°06'31" East, 38.99 feet; thence South 68°58'49" East, 22.77 feet; thence South 76°26'35" East, 26.44 feet; thence North 77°05'59" East, 49.30 feet; thence North 72°44'04" East, 23.34 feet; thence North 68°38'12" East, 82.28 feet; thence North 64°19'09" East, 76.04 feet, to the POINT OF ENDING.

U/G Elec.5
BEGINNING at previously stated REFERENCE POINT "K"; thence South 81°56'47" East, 29.28 feet; thence North 89°21'53" East, 38.94 feet; thence North 76°23'55" East, 40.26 feet; thence Northeasterly, 79.72 feet, along the arc of a 68.00 foot radius curve to the left, the central angle of which is 67°10'03", and the long chord of which bears North 28°27'03" East, 75.23 feet, to the POINT OF ENDING.

U/G Elec.6
BEGINNING at previously stated REFERENCE POINT "P"; thence North 78°15'09" East, 5.32 feet; thence South 71°16'46" East, 20.51 feet; thence South 39°01'53" East, 15.51 feet; thence South 14°07'56" East, 115.40 feet; thence South 09°45'28" East, 43.97 feet; thence South 02°09'47" East, 101.00 feet; thence South 06°53'30" East, 43.25 feet; thence South 14°04'40" East, 88.10 feet; thence South 19°25'12" East, 88.00 feet; thence South 20°44'08" East, 88.57 feet; thence South 25°05'43" East, 32.79 feet; thence South 30°52'57" East, 39.34 feet; thence South 21°32'37" East, 18.42 feet, to the POINT OF ENDING.

U/G Elec.7
Beginning at previously stated REFERENCE POINT "V"; thence South 06°03'37" East, 4.60 feet; thence South 52°07'25" West, 8.99 feet; thence South 69°46'33" West, 11.72 feet; thence South 53°48'37" West, 12.98 feet; thence South 60°16'16" West, 24.78 feet; thence South 72°33'37" West, 27.49 feet; thence South 79°24'40" West, 30.36 feet; thence South 82°14'27" West, 31.66 feet; thence South 84°12'46" West, 90.93 feet; thence North 76°46'04" West, 15.48 feet; thence North 71°17'07" West, 14.95 feet; thence North 58°53'58" West, 18.75 feet; thence North 44°57'32" West, 29.10 feet; thence North 41°31'45" West, 252.11 feet, more or less, to a point on a line 300 feet North of and parallel to the East and West one-quarter line of said Section 30, and the POINT of ENDING.

Legal Description: Rea Road Substation Easement
Substation easement located in the Northwest one-quarter of Section 35, Town 24 North, Range 08 East, Oscoda Township, Iosco County, Michigan, being described as follows:

Commencing at the Northwest corner of said Section 35; thence South 01°06'32" East, 2113.65 feet, along the West line of said Section 35; thence North 88°53'28" East, 286.17 feet, to the POINT OF BEGINNING; thence North 28°20'22" East, 214.00 feet; thence South 57°10'43" East, 242.00 feet to a point on the centerline of Rea Road; thence Southwesterly along the centerline of Rea Road, 218.68 feet, along the arc of a 832.00 foot radius curve to the left, the central angle of which is 15°03'33", and the long chord of which bears South 41°04'23" West, 218.05 feet; thence North 56°27'23" West, 194.00 feet to the POINT OF BEGINNING.

Hardy Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas

The centerlines of existing electric facilities easement areas located in Sections 13, 14, 15, 21, 22, 23, 27, 28, 29, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan, said centerlines being described as follows:

LVD1

Commencing at the Southeast corner of said Section 28; thence North 89°14'36" West, 1012.05 feet, along the South line of said Section 28; thence North 00°45'24" East, 45.52 feet, more or less, to a point on the centerline of South Croton Hardy Drive, and to the POINT OF BEGINNING; thence North 88°55'21" West, 89.34 feet, to Reference Point "F"; thence continuing North 88°55'21" West, 815.41 feet, to Reference Point "A"; thence North 43°46'28" West, 505.39 feet; thence North 46°38'28" West, 496.60 feet, more or less, to the North-South one-quarter line of said Section 28, to Reference Point "B", and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "A"; thence North 88°55'21" West, 715.20 feet, more or less, to a point on the North and South one-quarter line of said Section 28, and to the POINT OF ENDING.

LVD1a

Commencing at previously stated Reference Point "B"; thence North 48°43'38" West, 146.85 feet, to the POINT OF BEGINNING; thence continuing North 48°43'38" West, 772.80 feet; thence North 51°31'14" West, 308.82 feet; thence North 50°51'00" West, 114.63 feet, to Reference Point "C"; thence North 72°46'59" West, 92.78 feet; thence North 52°57'37" West, 621.02 feet; thence North 03°31'50" West, 246.80 feet; thence North 66°41'55" West, 96.02 feet, to Reference Point "D"; thence continuing North 66°41'55" West, 305.43 feet; thence North 78°05'28" West, 667.18 feet; thence North 02°59'04" East, 113.27 feet, to Reference Point "I"; thence North 00°08'25" East, 332.44 feet; thence North 00°00'58" West, 1002.45 feet, to Reference Point "P"; thence South 88°37'11" East, 1090.58 feet; to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence North 85°01'26" East, 369.89 feet; thence North 83°11'12" East, 711.99 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "I"; thence North 89°25'47" West, 33.98 feet, more or less, to a point on the West line of said Section 28, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "P"; thence North 00°15'00" East, 18.18 feet, more or less, to a point on the North one-eighth line of said Section 28, and to the POINT OF ENDING.

LVD2

Commencing at the Southwest corner of said Section 27; thence South 89°32'48" East, 1181.07 feet, along the South line of said Section 27; thence North 00°27'12" East, 1330.27 feet, to a point on the South one-eighth line of said Section 27; thence North 42°02'14" East, 47.15 feet, to the POINT OF BEGINNING; thence North 49°03'47" West, 1173.91 feet; to the POINT OF ENDING.

LVD3
Commencing at the center one-quarter corner of said Section 27; thence North 89°13'16" West, 28.38 feet, along the East and West one-quarter line of said Section 27, to the POINT OF BEGINNING; thence North 02°18'47" East, 349.05 feet; thence North 00°52'02" East, 834.38 feet, to the POINT OF ENDING.

LVD4
Commencing at the Southeast corner of said Section 22; thence North 88°45'02" West, 42.81 feet, along the South line of said Section 22, to the POINT OF BEGINNING; thence North 01°43'14" West, 879.00 feet; thence North 16°10'38" West, 1009.12 feet; thence North 33°32'27" West, 991.22 feet, to Reference Point "G"; thence North 86°44'03" West, 333.66 feet; thence South 35°56'08" West, 318.03 feet; thence South 78°38'18" West, 309.35 feet; thence South 58°57'38" West, 239.37 feet, to Reference Point "H", and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "G"; thence South 87°22'01" East, 714.97 feet; thence North 86°28'12" East, 214.54 feet, more or less, to a point on the East line of said Section 22, and to the POINT OF ENDING.

LVD5
Commencing at the West one-quarter corner of said Section 23; thence North 00°33'59" East, 391.09 feet, along the East line of said Section 22; thence South 89°26'01" East, 1324.71 feet, to the POINT OF BEGINNING; thence North 01°29'13" East, 249.17 feet; to the POINT OF ENDING.

LVD6
Commencing at the Southwest corner of said Section 21, thence South 89°29'14" East, 2691.80 feet along the South line of said Section 21, thence North 00°37'49" East, 1391.35 feet, along the North-South one quarter line of said Section 21, to the POINT OF BEGINNING; thence South 89°05'11" East, 163.60 feet; thence South 81°58'21" East, 283.15 feet; thence South 26°55'23" East, 343.98 feet, to Reference Point "K", and the POINT OF ENDING.

LVD7
Commencing at the East one-quarter corner of said Section 22; thence North 00°33'59" East, 994.02 feet, along the East line of said Section 22; thence North 59°16'08" West, 667.11 feet, to a point on the North one-eighth line of said Section 22, and to the POINT OF BEGINNING; thence continuing North 59°16'08" West, 1033.36 feet, to Reference Point "L"; thence North 59°28'12" West, 353.53 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated Reference Point "L"; thence North 11°56'12" East, 353.66 feet, to the POINT OF ENDING.

LVD8
Commencing at the East one-quarter corner of said Section 14; thence North 89°00'00" West, 29.23 feet, along the East and West one-quarter line of said Section 14, to the POINT OF BEGINNING; thence South 00°41'11" West, 1,324.51 feet, to a point on the South one-eighth line of said Section 14; thence continuing

South 00°41'11" West, 1,121.49 feet; thence North 74°06'02" East, 373.33 feet; thence North 67°17'31" East, 354.53 feet; thence North 08°33'44" East, 303.53 feet; to the POINT OF ENDING.

LVD9
Commencing at the East one-quarter corner of said Section 14; thence North 89°00'00" West, 29.23 feet, along the East and West one-quarter line of said Section 14, to the POINT OF BEGINNING; thence North 00°45'31" East, 1,444.22 feet; thence North 00°26'33" West, 284.68 feet; thence North 89°52'11" East, 97.83 feet, to the POINT OF ENDING.

LVD10
Commencing at the North one-quarter corner of said Section 14; thence South 00°29'00" West, 1342.45 feet, along the North and South one-quarter line of said Section 14; thence North 89°20'55" West, 2666.53 feet, along the North one-eighth line of said Section 14, to a point on the East line of said Section 15; thence North 00°33'49" East, 7.75 feet, along the East line of said Section 15, to the POINT OF BEGINNING; thence South 86°15'29" West, 1026.75 feet, to the POINT OF ENDING.

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 15, 22, 31, 32, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said centerlines being described as follows:

LVD11
Commencing at the East one-quarter corner of said Section 32; thence North 89°05'19" West, 21.73 feet, along the East and West one-quarter line of said Section 32, to the POINT OF BEGINNING; thence North 46°18'05" West, 231.69 feet; thence North 88°38'30" West, 281.15 feet; thence North 89°39'33" West, 1714.72 feet, to Reference Point "N"; thence North 89°39'23" West, 2747.11 feet; thence South 76°10'32" West, 284.31 feet; thence North 89°00'37" West, 727.25 feet; thence South 86°37'53" West, 377.74 feet; thence North 88°44'39" West, 351.75 feet, to Reference Point "O"; thence South 13°19'18" West, 690.47 feet; thence South 52°51'38" West, 521.89 feet; thence North 55°25'47" West, 227.87 feet; thence North 04°19'41" West, 460.39 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated Reference Point "N"; thence South 21°53'47" West, 154.02 feet, to a point on the East and West one-quarter line of said Section 32, and to the POINT OF ENDING.

And also, BEGINNING at previously stated Reference Point "O"; thence South 86°10'14" West, 264.49 feet, to the POINT OF ENDING.

LVD12
Commencing at the West one-quarter corner of said Section 22; thence North 00°41'29" East, 507.63 feet, along the West line of said Section 22; thence North 49°36'03" East, 759.41 feet, to a point on the Southeasterly property line of a Consumers Energy parcel described in Liber 143, Page 92, and to the POINT OF BEGINNING; thence North 49°38'48" East, 403.97 feet; thence North 34°57'01" East, 141.45 feet, to Reference Point "U", thence North 34°57'01" East, 47.31 feet, more or less, to a point on a line

being descried as the East line of the Northwest one-quarter of the Northwest one-quarter except the East 10 acres thereof of said Section 22, and to the POINT OF ENDING.

And also, BEGINNING at previously stated Reference Point "U", thence South 78°12'00" East, 27.14 feet, more or less, to a point on a line being descried as the East line of the Northwest one-quarter of the Northwest one-quarter except the East 10 acres thereof of said Section 22, and to the POINT OF ENDING.

LVD13
Commencing at the East one-quarter corner of said Section15; thence North 00°08'36" East, 18.78 feet, along the East line of said Section 15, and the Easterly FERC Project Boundary, to the POINT OF BEGINNING; thence North 88°51'51" West, 1112.33 feet, to REFERENCE POINT "X"; thence North 89°09'27" West, 388.71 feet; thence South 80°50'06" West, 199.26 feet, to the East and West one-quarter line of said Section 15, the POINT OF ENDING.

And also, BEGINNING at Reference Point "X"; thence South 00°27'22" West, 31.13 feet, to the East and West one-quarter line of said Section15, and the POINT OF ENDING.
Legal Description: Centerlines for existing underground Electric Facilities Areas
The centerlines of existing underground electric facilities easement areas located in Sections 13, 21, 22, 28, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan, said centerlines being described as follows:

UG Elec1
BEGINNING at previously stated Reference Point "F"; thence North 22°56'28" West, 15.75 feet; thence North 73°06'00" East, 113.63 feet; thence North 62°51'11" East, 81.97 feet; thence North 31°22'03" East, 57.23 feet; thence North 02°56'17" East, 51.81 feet; thence North 43°30'03" East 28.62 feet; thence North 31°26'53" East, 37.97 feet, to the POINT OF ENDING.

UG Elec2
BEGINNING at previously stated Reference Point "D"; thence North 37°38'45" East, 265.09 feet; thence North 35°40'36" East, 542.04 feet, to the POINT OF ENDING.

UG Elec 3
Commencing at the Northwest corner of said Section 28; thence South 89°29'14" East, 2691.80 feet, along the North line of said Section 28, to a point on the North and South one-quarter line of said Section 28; thence South 00°22'48" West, 158.87 feet, along the North and South one-quarter line of said Section 28; thence South 89°37'12" East, 245.40 feet, to the POINT OF BEGINNING; thence North 26°30'35" East, 43.60 feet; thence North 35°38'16" East, 216.23 feet; thence North 39°44'45" East, 229.73 feet; thence North 23°15'26" East, 147.72 feet, to Reference Point "J"; thence North 30°07'58" East, 141.95 feet; thence North 20°04'16" East, 83.73 feet; thence North 01°34'17" East, 58.43 feet; thence North 25°59'21" West, 83.11 feet; thence North 34°05'49" West, 113.94 feet; thence North 16°57'28" West, 49.88 feet; thence North 02°48'39" East, 74.50 feet; thence North 06°32'18" East, 55.37 feet; thence North 18°27'35" East, 73.58 feet, to Reference Point "K", and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "J"; thence South 65°16'57" West, 102.57 feet, to the POINT OF ENDING.

UG Elec4
BEGINNING at previously stated Reference Point "H"; thence North 17°30'09" East, 17.02 feet; thence North 75°48'09" East, 17.14 feet; thence North 00°28'08" East, 63.35 feet; thence North 14°27'52" West, 42.16 feet; thence North 09°19'09" West, 43.99 feet; thence North 03°11'29" East, 46.05 feet; thence North 56°12'37" East, 9.95 feet, to the POINT OF ENDING.

UG Elec 5
Commencing at the West one quarter corner of said Section 13; thence North 00°07'53" East, 6.57 feet, along the West line of Section 13, to the POINT OF BEGINNING; thence South 85°30'36" East, 126.13 feet; thence South 86°45'39" East, 133.19 feet; thence South 88°41'27" East, 124.13 feet; thence South 89°35'04" East, 200.95 feet; thence South 88°58'24" East, 81.80 feet; thence South 84°52'56" East, 61.14 feet; thence South 80°43'35" East, 186.09 feet; thence South 80°03'20" East, 77.25 feet; thence South 84°21'13" East, 125.49 feet; thence South 87°53'49" East, 74.01 feet; thence North 86°34'20" East, 101.77 feet; thence North 89°40'11" East, 92.20 feet; thence South 78°51'25" East, 22.02 feet; thence South 52°53'32" East, 35.30 feet, to the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 13, 23, 24, 27, 28, 29, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan, and in Section 18, Town 13 North, Range 10 West, Aetna Township, Mecosta County, Michigan, said centerlines being described as follows:

46kV Line 19C (Segment 1)
Commencing at the Southeast corner of said Section 28; thence North 89°14'36" West, 910.40 feet, along the South line of said Section 28; thence North 00°45'24" East, 95.91 feet, to a point on the centerline of South Croton Hardy Drive, and to the POINT OF BEGINNING; thence North 88°47'40" West, 996.06 feet; thence North 44°09'23" West, 851.82 feet; thence North 44°06'11" West, 1223.09 feet; thence South 83°55'04" West, 1429.25 feet; thence South 79°19'39" West, 603.41 feet; thence South 75°08'43" West, 1290.70 feet, more or less, to a point on the East one-eighth line of said Section 29, and to the POINT OF ENDING.

46kV Line 19C (Segment 2)
Commencing at the Southwest corner of said Section 27; thence South 89°32'48" East, 1,181.07 feet, along the South line of said Section 27; thence North 00°27'12" East, 1330.27 feet, to a point on the South one-eighth line of said Section 27, and to the POINT OF BEGINNING; thence North 42°02'14" East, 237.56 feet, more or less, to a point on the West one-eighth line of said Section 27, and to the POINT OF ENDING.

46kV Line 19C (Segment 3)
Commencing at the Center one-quarter corner of said Section 27; thence North 89°13'16" West, 326.68 feet, along the East and West one-quarter line of said Section 27, to the POINT OF BEGINNING; thence

North 42°10'52" East, 497.13 feet, more or less, to a point on the North and South one-quarter line of said Section 27, and to the POINT OF ENDING.

46kV Line 19C (Segment 4)
Commencing at the Center one-quarter corner of said Section 27; thence South 89°14'05" East, 1188.67 feet, along the East and West one-quarter line of said Section 27; thence North 00°45'55" East, 1,318.33 feet, to a point on the North one-eighth line of said Section 27, and to the POINT OF BEGINNING; thence North 66°44'20" East, 167.73 feet, more or less, to a point on the East one-eighth line of said Section 27, and to the POINT OF ENDING.

46kV Line 19C (Segment 5)
Commencing at the South one-quarter corner of said Section 23; thence North 88°56'27" West, 1238.21 feet, along the South line of said Section 23, to the POINT OF BEGINNING; thence North 64°48'28" East, 3240.33 feet; thence North 72°47'12" East, 6512.10 feet; thence North 02°06'07" East, 1023.18 feet; thence North 01°54'23" East, 772.49 feet; thence North 00°13'40" East, 1245.62 feet; thence North 33°50'14" East, 704.15 feet; thence North 17°37'49" East, 1942.90 feet; thence North 17°41'39" East, 246.37 feet, more or less, to a point on the North one-eighth line of said Section 18, and to the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 28, and 32, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said centerlines being described as follows:

46kV Line 19C (Segment 6)
Commencing at the East one-quarter corner of said Section 32; thence North 89°05'19" West, 323.71 feet, along the East and West one-quarter line of said Section 32, to the POINT OF BEGINNING; thence North 40°54'45" East, 492.12 feet, to a point on the East line of said Section 32, and to the POINT OF ENDING.

46kV Line 19C (Segment 7)
Commencing at the South one-quarter corner of said Section 28; thence North 89°41'32" West, 698.86 feet, along the South line of said Section 28, to the POINT OF BEGINNING; thence North 41°03'10" East, 1089.73 feet, to a point on the North and South one-quarter line of said Section 28, and to the POINT OF ENDING.

Hodenpyl Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas

The centerlines of existing electric facilities easement areas located in Sections 24 and 25, Town 23 North, Range 13 West, Marilla Township, Manistee County, Michigan, and in Sections 1, 2, 10, 11, 16, 17, 19, 20, 21and 30, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan, and in Sections 35 and 36, Town 24 North, Range 12 West, Wexford Township, Wexford County, Michigan, said centerlines being described as follows:

LVD1

BEGINNING at the East one-quarter corner of said Section 25; thence North 10°47'33" West, 236.94 feet, to Reference Point "M"; thence North 10°20'54" West, 589.89 feet; thence North 21°13'36" West, 235.90 feet, to Reference Point "A"; thence North 04°00'55" East, 112.18 feet; thence North 34°47'27" East, 594.18 feet, to Reference Point "B"; thence North 34°47'27" East, 155.90 feet; thence South 23°33'00" East, 123.17 feet; thence South 19°48'32" East, 105.76 feet; thence South 02°36'17" East, 165.43 feet; thence South 05°41'17" East, 17.16 feet; thence South 14°40'08" East, 18.18 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "M"; thence South 89°08'10" East, 37.95 feet, more or less, to a point on the Easterly right of way line of Hodenpyl Dam Road, and to the POINT OF ENDING.

LVD1A

And also BEGINNING at previously stated Reference Point "A"; thence South 30°30'00" West, 82.13 feet; thence South 61°15'13" West, 174.95 feet, to the POINT OF ENDING.

LVD2

BEGINNING at previously stated Reference Point "B"; thence North 25°15'20" West, 2762.04 feet; thence North 12°16'52" East, 490.81 feet; thence North 51°30'13" East, 357.80 feet, to Reference Point "Z"; thence North 52°57'21" East, 209.59 feet; thence North 63°11'53" East, 229.74 feet, to Reference Point "C"; thence North 52°19'31" East, 283.15 feet, more or less, to a point on the East and West one-quarter line of said Section 24, and the POINT OF ENDING.

And also commencing at previously stated Reference Point "Z"; thence North 51°49'21" West, 277.81 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence North 03°15'52" East, 182.30 feet, more or less, to a point on the East and West one-quarter line of said Section 24, and the POINT OF ENDING.

LVD3

Commencing at the West one-quarter corner of said Section 17; thence South 00°26'35" West, 2656.00 feet, along the West line of said Section 17; thence South 00°56'10" West, 1250.07 feet, along the East line of said Section 19; thence North 88°48'31" West, 2602.98 feet, along the North one-eighth line of said Section 19; thence North 88°37'04" West, 549.69 feet, along the North one-eighth line of said Section 19, to the POINT OF BEGINNING; thence South 69°30'14" West, 272.38 feet, to Reference Point "N"; thence

continuing South 69°30'14" West, 1487.56 feet; thence South 48°42'26" West, 313.74 feet; thence South 48°34'48" West, 297.02 feet; thence South 52°22'53" West, 129.33 feet, more or less, to a point on the East line of said Section 24, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "N"; thence North 14°57'45" West, 105.78 feet, more or less, to a point on the North one-eighth line of said Section 19, and to the POINT OF ENDING.

LVD4
Commencing at the West one quarter corner of said Section 17; thence South 89°06'47" East, 2625.45 feet, along the East and West one-quarter line of said Section 17; thence South 01°10'31" West, 2656.11 feet, along the North and South one-quarter line of said Section 17; thence North 89°06'34" West, 3.05 feet, along the North line of said Section 20, to the POINT OF BEGINNING; thence South 01°48'32" East, 588.96 feet, to the POINT OF ENDING.

LVD5
Commencing at the West one-quarter corner of said Section 17; thence South 89°06'47" East, 2625.45 feet, along the East and West one-quarter line of said Section 17; thence South 01°10'31" West, 1624.48 feet, along the North and South one-quarter line of said Section 17, to the POINT OF BEGINNING; thence North 69°24'27" East, 809.47 feet, more or less, to a point on the South one-eighth line of said Section 17, and to the POINT OF ENDING.

LVD6
Commencing at the East one-quarter corner of said Section 17; thence South 02°30'10" West, 1328.65 feet, along the East line of said Section 17; thence North 89°06'41" West, 148.74 feet, along the South one-eighth line of said Section 17, to the POINT OF BEGINNING; thence South 11°25'49" East, 90.14 feet, to Reference Point "Q'"; thence continuing South 11°25'49" East, 434.78 feet; thence South 10°56'59" West, 301.55 feet, to Reference Point "O", thence continuing South 10°56'59" West, 290.07 feet; to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "Q"; thence South 71°07'57" West, 758.03 feet; thence South 44°10'56" West, 652.40 feet; thence South 68°35'50" West, 374.46 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "O"; thence South 77°42'52" West, 185.24 feet; to the POINT OF BEGINNING; thence North 77°42'52" East, 185.24 feet; thence North 75°31'48" East, 793.63 feet, to Reference Point "P"; thence continuing North 75°31'48" East, 393.69 feet; thence North 49°22'52" East, 456.76 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "P"; thence South 23°52'36" West, 398.51 feet, to the POINT OF ENDING.

LVD7
Commencing at the East one-quarter corner of said Section 17; thence South 02°30'10" West, 595.52 feet, along the East Line of said Section 17, to the POINT OF BEGINNING; thence North 69°29'39" East,

2383.47 feet; thence North 48°09'57" East, 4602.89 feet, to Reference Point "R"; thence continuing North 48°09'57" East, 886.78 feet, more or less, to a point on the South one-eighth line of said Section 10, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "R", thence North 51°52'30" West, 262.90 feet; thence North 16°06'32" West, 455.64 feet, more or less to a point on the South one-eighth line of said Section 9, and to the POINT OF ENDING.

LVD8
Commencing at the Southeast corner of said Section 16; thence South 89°19'22" West, 500.77 feet; along the South line of said Section 16; thence South 00°40'38" East, 20.17 feet, to the POINT OF BEGINNING; thence South 89°52'06" West, 732.04 feet; thence North 34°50'29" West, 215.03 feet; thence North 25°35'50" West, 295.64 feet; thence North 63°30'24" East, 337.09 feet; thence North 13°35'54" West, 118.36 feet, to the POINT OF ENDING.

LVD9
Commencing at previously stated Reference Point "R"; thence North 48°09'57" East, 1419.84 feet, more or less, to a point on the West one-eighth line of said Section 10, and to the POINT OF BEGINNING; thence North 48°16'19" East, 416.13 feet, to Reference Point "T"; thence continuing North 48°16'19" East, 1016.60 feet, more or less, to a point on the East and West one-quarter line of said Section 10, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "T" thence North 46°40'56" West, 63.95 feet, more or less, to a point on the South Easterly right of way line of North Hodenpyl Dam Road, and the POINT OF ENDING.

LVD10
Commencing at the Northeast corner of said Section 10; thence North 89°51'46" West, 1359.13 feet, along the North line of said Section 10; thence South 02°22'02" West, 1442.28 feet, along the East one-eighth line of said Section 10, to the POINT OF BEGINNING; thence North 89°29'30" West, 392.65 feet; thence South 48°12'39" West, 1325.65 feet; to Reference Point "AB"; thence South 00°56'10" East, 380.00 feet, to POINT OF ENDING.

And also, BEGINNING at previously stated Reference Point "AB"; thence South 48°12'39" West, 9.27 feet, more or less, to a point on the North and South one-quarter line of said Section 10, and to the POINT OF ENDING.

LVD11
Commencing at the Northwest corner of said Section 11; thence South 02°33'38" West, 1447.61 feet, along the West line of said Section 11, to the POINT OF BEGINNING; thence South 89°38'24" East, 149.58 feet, to Reference PT "U"; thence continuing South 89°38'24" East, 355.81 feet, to Reference PT "FF"; thence continuing South 89°38'24" East, 1452.75 feet; thence South 84°24'15" East, 649.70 feet, more or less, to a point on the North and South one-quarter line of said Section 11, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference PT "U"; thence North 19°31'14" West, 71.83 feet, more or less, to a point on the Southerly right of way line of M-115, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference PT "FF"; thence North 00°52'28" West, 67.58 feet, more or less, to a point on the Southerly right of way line of M-115, and to the POINT OF ENDING.

LVD12
Commencing at the West one-quarter corner of said Section 2; thence North 89°06'45" East, 3931.38 feet, along the East and West one-quarter line of said Section 2, thence North 02°50'27" East, 2605.94 feet, along the East one-eighth line of said Section 2; thence South 89°46'01" East, 542.14 feet, along the North line of said Section 2, to the POINT OF BEGINNING; thence South 08°25'36" West, 69.89 feet, to Reference PT "V"; thence continuing South 08°25'36" West, 139.52 feet, to a point on a line being described as being 14 rods South of the North line of said Section 2, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference PT "V"; thence South 87°53'04" East, 138.83 feet, to the POINT OF ENDING.

LVD13
Commencing at the West one-quarter corner of said Section 2; thence North 89°06'45" East, 5240.81 feet, along the East and West one-quarter line of said Section 2; thence North 03°02'46" East, 2580.74 feet, along the East line of said Section 2; thence South 89°13'16" East, 1314.85 feet, along the North line of said Section 1; thence North 02°22'05" East, 83.38 feet, along the West one-eighth line of said Section 36, to the POINT OF BEGINNING to Reference Point "D"; thence South 84°02'15" East, 1316.61 feet, more or less, to a point on the North and South one-quarter line of said Section 1, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "D"; thence North 84°02'15" West, 302.19 feet; thence North 02°21'17" East, 1198.24 feet; thence South 89°11'02" East, 655.97 feet; thence South 88°58'26" East, 698.97 feet; thence North 15°22'59" East, 0.50 feet; to a point on the South one-eighth line of said Section 36, and the POINT OF ENDING.

LVD14
Commencing at the East one-quarter corner of said Section 11; thence North 89°03'47" West, 1901.27 feet, along the East-West one-quarter line of said Section 11; thence North 00°'56'13" East, 20.15 feet, to the POINT OF BEGINNING; thence South 83°56'29" West, 116.72 feet, to the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of an existing electric facilities easement areas located in Sections 24 and 25, Town 23 North, Range 13 West, Marilla Township, Manistee County, Michigan, and in Sections 10, 11, 19 and 30, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan, said centerlines being described as follows:

46kV Line 120E (Segment 1)
Commencing at the Northwest corner of said Section 11; thence South 02°33'38" West, 977.62 feet, along the West line of said Section 11; thence South 89°40'53" East, 494.47 feet, to a point on a line lying 30 rods

East of the West line of said Section11, and the POINT OF BEGINNING; thence continuing South 89°40'53" East, 2109.42 feet, more or less, to a point on the North and South one-quarter line of said Section 11, and to the POINT OF ENDING.

46kV Line 120E (Segment 2)
Commencing at the Northeast corner of said Section 10; thence North 89°51'46" West, 1,359.13 feet, along the North line of said Section 10; thence South 02°22'02" West, 970.60 feet, along the East one-eighth line of said Section 10, to the POINT OF BEGINNING; thence North 89°34'28" West, 1355.60 feet, more or less, to a point on the North and South one-quarter line of said Section 10, and to the POINT OF ENDING.

46kV Line 13J
BEGINNING at the East one-quarter corner of said Section 25; thence North 10°47'33" West, 236.94 feet; thence North 10°20'54" West, 589.89 feet; thence North 10°38'19" West, 212.99 feet; thence North 35°12'22" East, 587.89 feet, to a point on the Westerly fence line of Hodenpyl Substation, and the POINT OF ENDING.

And also, BEGINNING at the East one-quarter corner of said Section 25; thence South 39°27'53" East, 1695.78 feet, to a point on the South one-eighth line of said Section 30, and the POINT OF ENDING.

46kV Line 18C
Commencing at the East one-quarter corner of said Section 25; thence North 87°34'10" West, 662.47 feet, along the East and West one-quarter line of said Section 25; thence North 02°25'50" East, 740.69 feet, to the FERC boundary line, and the POINT OF BEGINNING; thence North 61°09'52" East, 227.90 feet; thence North 39°22'04" East, 334.59 feet; thence North 39°07'42" East, 554.30 feet, to Reference Point "X", thence continuing North 39°07'42" East, 96.03 feet; thence North 82°37'39" East, 57.80 feet, to the POINT OF ENDING.

46kV Line 120A
Commencing at the West one-quarter corner of said Section 17; thence South 00°26'35" West, 2656.00 feet, along the West line of said Section17; thence South 00°56'10" West, 1250.07 feet, along the East line of said Section 19; thence North 88°48'31" West, 2602.98 feet, along the North one-eighth line of said Section 19; thence North 88°37'04" West, 2580.80 feet, along the North one-eighth line of said Section 19, to the POINT OF BEGINNING; thence South 08°45'29" East, 911.97 feet; thence South 52°07'53" West, 272.77 feet; thence South 52°22'53" West, 129.33 feet, more or less, to a point on the West line of said Section 19, and to Reference Point "AA", and the POINT OF ENDING.

46kV Line 120A (Segment 2)
And also Commencing at previously stated Reference Point "AA" ; thence South 52°22'53" West, 232.40 feet, to a point on the East and West one-quarter line of said section 24, and to the POINT OF BEGINNING; thence South 52°19'31" West, 283.15 feet; thence South 53°00'19" West, 351.89 feet; thence South 14°42'30" East, 3311.84 feet; thence South 00°42'12" East, 67.24 feet, to a point on the Hodenpyl Dam Substation fence, and to the POINT OF ENDING.

46kV Line 18A
Commencing at the West one-quarter corner of said Section 17; thence South 00°26'35" West, 2656.00 feet, along the West line of said Section17; thence South 00°56'10" West, 1250.07 feet, along the East line of said Section 19; thence North 88°48'31" West, 2602.98 feet, along the North one-eighth line of said Section 19; thence North 88°37'04" West, 2,633.00 feet, along the North one-eighth line of said Section 19, to the POINT OF BEGINNING; thence South 09°10'57" East, 880.50 feet; thence South 52°32'22" West, 333.54 feet, to a point on the West line of said Section 19, and to Reference Point "CC", and to the POINT OF ENDING;

46kV Line 18A (Segment 2)
And also commencing at previously stated Reference Point "CC"; thence South 52°32'22" West, 157.93 feet; thence South 52°07'03" West, 193.56 feet, to a point on the East and West one-quarter line of said Section 24, and to the POINT OF BEGINNING; thence South 51°53'20" West, 215.22 feet; thence South 60°49'14" West, 608.17 feet; thence South 18°52'43" East, 2577.20 feet; thence South 15°34'51" East, 555.45 feet; thence South 83°02'50" East, 67.27 feet; thence South 06°10'12" East, 226.22 feet, to a point on the Hodenpyl Dam Substation fence, and the POINT OF ENDING.

Legal Description: Hodenpyl Dam Substation Easement
A substation easement in part of the Northeast one-quarter of Section 25, Township 23 North, Range 13 West, Marilla Township, Manistee County, Michigan, more fully described as follows:
Commencing at the Southeast corner of said Section 25; thence North 01°24'22” East, 2622.86 feet, along the East line of said Section 25 to the East 1/4 corner of said Section 25; thence North 02°43'29” West, 864.44 feet, to the POINT OF BEGINNING; thence South 48°20'41” West, 141.00 feet, to a point in the centerline of No. 1 Road; thence South 61°07'22” West, 227.00 feet, along the centerline of said No. 1 Road; thence South 62°52'07” West, 200.00 feet, along the centerline of said No. 1 Road; thence North 01°13'01” West, 330.00 feet; thence North 49°01'47” East, 355.00 feet; thence South 52°50'31” East, 167.00 feet; thence South 27°44'44” East, 189.00 feet, to the POINT OF BEGINNING.

Loud Project

Legal Description: Centerlines for Existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Section 21, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

LVD1
Commencing at the Southwest one-quarter of said Section 21; thence North 00°24'02" West, 2,575.33 feet, along the West line of said Section 21 to a point on the East and West one-quarter line of said Section 21; thence North 87°42'26" East, 531.22 feet, along the East and West one-quarter line of said Section 21, to the POINT OF BEGINNING, and REFERENCE POINT "A"; thence North 46°18'25" East, 713.13 feet; thence North 42°07'27" East, 309.95 feet; thence North 41°50'49" East, 412.83 feet, to REFERENCE POINT "B"; thence North 88°28'54" East, 311.59 feet; thence North 76°02'36" East, 120.58 feet, to a point on the Easterly FERC Project Boundary line, and the POINT OF ENDING, and REFERENCE POINT "C".

And also, BEGINNING at previously stated REFERENCE POINT "B"; thence North 40°04'15" East, 74.98 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated POINT "B"; thence South 89°35'29" West, 166.11 feet, to the POINT OF ENDING.

Legal Description: Centerline for Existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 19 and 21, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

46 kV line 29T
Commencing at Previously stated REFERENCE POINT "C"; thence South 00°02'55" East, 95.70 feet, along the Easterly FERC Project Boundary line to the POINT OF BEGINNING; thence South 57°14'41" West, 49.29 feet; thence South 78°34'52" West, 762.25 feet; thence North 01°11'14" West, 104.52 feet, to REFERENCE POINT "D"; thence North 01°11'14" West, 20.27 feet; to a point on the Southerly Loud Dam Substation fence, and the POINT OF ENDING.

46 kV line 66A (segment 1)
BEGINNING at previously stated REFERENCE POINT "A"; thence North 46°18'25" East, 713.13 feet; thence North 42°07'27" East, 309.95 feet; thence North 72°04'53" West, 180.51 feet; thence North 11°50'24" East, 113.84 feet; thence North 28°07'46" East, 40.27 feet, to a point on the Southerly Loud Dam Substation fence, and the POINT OF ENDING.

46 kV line 66A (segment 2)
Commencing at the Southwest corner of said Section 19; thence North 89°19'55" East, 17.38 feet, along the South line of said Section 19, to the POINT OF BEGINNING and REFERENCE POINT "E"; thence North 53°57'04" East, 229.63 feet; thence North 89°23'12" East, 3401.81 feet, more or less, to the East one-eighth line of said Section 19, and the POINT OF ENDING.

46 kV line 29A (segment 1)
Commencing at the Southwest one-quarter of said Section 21; thence North 00°24'02" West, 2,575.33 feet, along the West line of said Section 21 to a point on the East and West one-quarter line of said Section 21;thence North 87°42'26" East, 456.37 feet, along the East and West one-quarter line of said Section 21, to the POINT OF BEGINNING; thence North 46°18'37" East, 741.31 feet; thence North 13°28'54" East, 261.24 feet; thence North 13°53'40" East, 134.35 feet; thence North 26°36'35" East, 38.79 feet, to a point on the Southerly Loud Dam Substation fence, and the POINT OF ENDING.

46 kV line 29A (segment 2)
Commencing at REFERENCE POINT "E"; thence North 89°19'55" East, 79.88 feet, along the South line of said Section 19, to the POINT OF BEGINNING; thence North 53°45'35" East, 130.18 feet; thence North 88°28'52" East, 614.93 feet; thence North 89°26'25" East, 2787.39 feet, more or less, to a point on the East one-eighth line of said Section 19, and the POINT OF ENDING.

Legal Description: Access Easement
A strip of land twenty (20) feet in width being ten (feet) on each side of the following described centerline located in the Northwest one-quarter of Section 21, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerline described as:

Commencing at the Southeast corner of said Section 21; thence North 00°32'23" West, 2631.40 feet, along the East line of said Section 21, to the East one-quarter corner of said Section 21; thence North 00°20'39" West, 891.25 feet, along the East line of said Section 21; thence South 89°39'41" West, 3712.88 feet, to a point on the centerline of Loud Dam Road and the POINT OF BEGINNING; thence South 83°55'57" West, 62.17 feet; thence Southwesterly, 69.17 feet, along the arc of a 115.00 foot radius curve to the left, the central angle of which is 34°27'41", and the long chord of which bears South 66°42'06" West, 68.13 feet; thence South 49°28'16" West, 21.04 feet; thence Southwesterly, 92.68 feet, along the arc of a 300.00 foot radius curve to the left, the central angle of which is 17°42'02", and the long chord of which bears South 40°37'14" West, 92.31 feet; thence South 31°46'13" West, 38.52 feet; thence North 83°42'39" West, 20.43 feet, to the POINT OF ENDING. The sidelines of said easement are to be extended or shortened to begin perpendicular and adjacent to the POINT OF BEGINNING and ending on a line having a bearing of South 08° 14'17" West.

Legal Description: Loud Dam Substation Easement
Substation easement located in the Northwest one-quarter of Section 21, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, being described as follows:

BEGINNING at REFERENCE POINT "D"; thence North 81°45'43" West, 95.54 feet; thence North 13°12'33" East, 184.78 feet; thence South 81°45'43" East, 193.08 feet; thence South 08°14'17" West, 184.09 feet; thence North 81°45'43" West, 113.55 feet, to the POINT OF BEGINNING.

Mio Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas

The centerlines of existing electric facilities easement areas located in Section 7, Town 26 North, Range 03 East, Mentor Township, Oscoda County, Michigan, and in Sections 2, 3, 5, 10, 11, and 12, Town 26 North, Range 02 East, Big Creek Township, Oscoda County, Michigan, said centerlines being described as follows:

LVD1

Commencing at the East one-quarter corner of said Section 12; thence North 00°21'07" West, 758.90 feet, along the East line of said Section 12, to Reference Point "A", and to the POINT OF BEGINNING; thence South 78°41'13" West, 178.48 feet, to Reference Point "K"; thence South 29°33'26" West, 371.10 feet; thence South 15°07'43" West, 944.60 feet, to Reference Point "B"; thence continuing South 15°07'43" West, 81.41 feet, to Reference Point "C"; thence South 80°59'59" West, 1797.75 feet, to Reference Point "D"; thence continuing South 80°59'59" West, 361.81 feet, to Reference Point "E"; thence continuing South 80°59'59" West, 746.00 feet, to Reference Point "F"; thence South 52°14'31" West, 2519.97 feet, thence South 00°03'31" West, 59.14 feet, to Reference Point "M"; thence continuing South 00°03'31" West, 19.82 feet, more or less, to a point on the South line of said Section 11, and to the POINT OF ENDING.

And also commencing at previously stated Reference Point "A"; thence North 78°41'13" East, 328.83 feet; thence North 87°17'54" East, 81.66 feet, to a point on the Westerly right of way line of State Highway M-33/M-72/South Mount Tom Road, and to the POINT OF ENDING.

And also commencing at previously stated Reference Point "B"; thence South 16°42'03" East, 844.77 feet, to Reference Point "N", and to a point on the South one-eighth line of said Section 12; thence North 58°49'05" East, 32.03 feet, to a point on the West line of Lot 12, Block 14, of the Amended Plat of part of Blocks 5, 6, 14, vacated alley, vacated Deyarmond Street & 4th Street of the Map of the Village of Mio, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence North 81°41'01" East, 43.40 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "D"; thence North 39°30'20" West, 322.24 feet; thence North 32°40'42" West, 225.88 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "E"; thence North 23°29'19" West, 176.87 feet, to the POINT OF ENDING.

And Also BEGINNING at previously stated Reference Point "F"; thence North 60°18'38" West, 294.48 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "M"; thence North 71°31'10" East, 84.88 feet; thence South 87°43'52" East, 192.58 feet; North 90°00'00" East, 134.80 feet; thence South 89°54'44", 366.24 feet; thence North 88°56' 48" East, 64.86 feet, more or less, to a point on the East line of the West one-half of the Southwest one-quarter of the Southwest one-quarter, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "K"; thence North 00°55'30" West, 120.75 feet; thence North 16°51'52" East, 274.83 feet; thence North 41°25'12" East, 182.67 feet, to Reference Point "G"; thence North 05°52'12" West, 23.54 feet, to Reference Point "H"; thence South 88°55'19" West, 320.48 feet; thence North 89°18'34" West, 554.97 feet, to Reference Point "I"; thence continuing North 89°18'34" West, 351.27 feet; thence North 01°07'25" West, 37.43 feet, more or less to a point on the North one-eighth line of said Section 12, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "G"; thence North 59°01'22" East, 143.37 feet, more or less, to a point on the North one-eighth line of said Section 7, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "H"; thence North 00°19'21" West, 49.63 feet, to a point on the North one-eighth line of said Section 7, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "I"; thence North 00°00'53" West, 43.76 feet, to a point on the North one-eighth line of said Section 12, and to the POINT OF ENDING.

LVD2
Commencing at the East one-quarter corner of said Section 12; thence South 00°20'56" East, 592.74 feet, along the East line of said Section 12, to a point on a line being described as the South line of the North 100 feet of the South 2143.68 feet of the East 360' feet of the Southeast one-quarter of said Section 12; thence South 89°40'57" West, 31.33 feet, along said South line, to the POINT OF BEGINNING; thence South 50°55'10" West, 23.63 feet; thence South 08°07'33" West, 288.01 feet; thence South 23°13'15" East, 119.38 feet, to a point on the North Line of the Amended Plat of part of Blocks 5, 6, 14, Vacated Alley, Vacated Deyarmond Street & 4th Street of the Map of the Village of Mio, and to the POINT OF ENDING.

LVD3
Commencing at the West one-quarter corner of said Section 3; thence North 89°55'58" East, 714.13 feet, along the East and West one-quarter line of said Section 3, to the POINT OF BEGINNING; thence South 07°59'25" West, 62.05 feet, to Reference Point "O", and to the POINT OF ENDING.

LVD4
Commencing at the Southwest corner of said Section 3; thence South 89°54'48" East, 1331.39 feet, along the South line of said Section 3, to the POINT OF BEGINNING; thence North 03°23'28" East, 658.44 feet; thence North 58°07'08" West, 216.27 feet, to the POINT OF ENDING.

LVD5
Commencing at the North one-quarter corner of said Section 5; thence South 89°47'30" East, 517.46 feet, along the North line of said Section 5, to the POINT OF BEGINNING; thence South 77°29'23" West, 527.89 feet, more or less, to a point on the North and South one-quarter line of said Section 5, and to the POINT OF ENDING.

LVD6
Commencing at the North one-quarter corner of said Section 5; thence South 01°01'54" East, 1346.05 feet, along the North and South one-quarter line of said Section 5, to the POINT OF BEGINNING; thence North 48°10'47" East, 232.17 feet, to the POINT OF ENDING.

LVD7
Commencing at the North one-quarter corner of said Section 5; thence South 01°01'54" East, 2629.42 feet, along the North and South one-quarter line of said Section 5, to the POINT OF BEGINNING; thence North 89°05'34" East, 648.04 feet; thence South 64°42'35" East, 367.01 feet; thence South 53°07'06" East, 276.22 feet, to the POINT OF ENDING.

LVD8
Commencing at the East one-quarter corner of said Section 3; thence South 89°55'58" West, 2275.63 feet, along the East and West one-quarter line of said Section 3, to the POINT OF BEGINNING and Reference Point "S"; thence South 57°39'23" East, 122.61 feet; thence South 87°49'59" East, 698.33 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "S"; thence North 57°39'23" West, 124.39 feet; thence North 41°52'17" West, 252.41 feet; thence North 40°53'45" West, 161.61 feet, more or less, to a point on the North and South one-quarter line of said Section 3, and the POINT OF ENDING.

LVD9
Commencing at the West one-quarter corner of said Section 2; thence South 00°02'49" East, 1,325.63 feet, along the West line of said Section 2, to the Southwest corner of the Northwest one-quarter of the Southwest one-quarter of said Section 2; thence South 89°43'01" East, 316.23 feet, along the South one-eighth line of said Section 2; thence South 00°16'59" West, 16.11 feet, to the POINT OF BEGINNING; thence South 89°51'48" East, 212.40 feet; thence North 83°07'47" East, 125.04 feet, more or less, to a point on the South one-eighth line of said Section 2, to Reference Point "P", and to the POINT OF ENDING.

And also commencing at previously stated Reference Point "P"; thence South 89°43'01" East, 1258.33 feet, along the South one-eighth line of said Section 2, to the POINT OF BEGINNING; thence South 80°54'37" East, 294.00 feet; thence North 78°45'14" East, 312.42 feet, to Reference Point "Q"; thence South 84°32'12" East, 152.09 feet, to the North-South one-quarter line of said Section 2, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "Q"; thence South 00°20'49" East, 293.81 feet; thence South 30°28'28" East, 233.54 feet, to a point on the Westerly right of way of Maier Court, and to the POINT OF ENDING.

LVD10
Commencing at the Northwest corner of said Section 12; thence South 00°01'31" East, 8.22 feet, along the West line of said Section 12; thence South 89°50'12" West, 128.69 feet, to the POINT OF BEGINNING; thence North 89°50'12" East,556.89 feet; thence North 00°08'43" West, 5.00 feet, to a point on the North line of said Section 12, and to the POINT OF ENDING.

Legal Description: Centerlines for existing underground Electric Facility Area

The centerlines of existing underground electric facility easement areas located in Section 3 and12, Big Creek Township, Oscoda County, Michigan, said centerlines being described as follows;

U/G Elec.1

BEGINNING at previously stated Reference Point "N"; thence North 74°14'35" East, 15.07 feet; thence North 65°06'46" East, 14.27 feet, to a point on the West line of Lot 12, Block 14, of the Amended Plat of part of Blocks 5, 6, 14, vacated alley, vacated Deyarmond Street & 4th Street of the Map of the Village of Mio, and to the POINT OF ENDING.

U/G Elec.2

BEGINNING at previously stated Reference Point "O"; thence South 02°03'17" West, 109.22 feet; thence South 12°46'14" West, 103.71 feet; thence South 15°13'54" West, 29.97 feet; thence South 04°30'23" East, 24.28 feet; thence South 19°59'01" West, 32.46 feet; thence South 05°41'17" West, 133.32 feet; thence South 03°53'24" West, 118.94 feet; thence South 11°55'10" West, 77.74 feet; thence South 06°03'22" West, 154.91 feet; thence South 05°04'06" West, 158.71 feet; thence South 09°24'55" West, 194.85 feet; thence South 03°37'49" West, 39.19 feet; thence continuing South 03°37'49" West, 27.21 feet; thence South 30°53'54" East, 88.56 feet; thence South 20°27'43" East, 31.71 feet; thence South 34°07'32" East, 46.66 feet; thence South 32°31'07" East, 28.91 feet; thence South 12°03'33" East, 18.47 feet; thence South 34°52'32" East, 60.04 feet; thence South 42°39'12" East, 41.83 feet; thence South 49°25'57" East, 41.25 feet; thence South 50°43'36" East, 457.53 feet; thence South 54°54'17" East, 59.25 feet, to the POINT OF ENDING.

Proposed U/G Elec.1

Commencing at the Southwest corner of said Section 3; thence South 89°54'48" East, 524.88 feet, along the South line of said Section 3, to the POINT OF BEGINNING; thence Northeasterly, 54.84 feet, along the arc of a 753.24 foot radius curve to the left, the central angle of which is 04°10'16", and the long chord of which bears North 50°27'38" East, 54.82 feet, to REFERENCE POINT "R"; thence Northeasterly, 110.47 feet, along the arc of a 753.24 foot radius curve to the left, the central angle of which is 08°24'10", and the long chord of which bears North 44°10'25" East, 110.37 feet; thence North 39°58'12" East, 531.29 feet; thence Northeasterly, 216.39 feet, along the arc of a 679.24 foot radius curve to the right, the central angle of which is 18°15'12", and the long chord of which bears North 49°05'39" East, 215.48 feet; thence South 43°40'25" East, a distance of 198.59 feet; thence North 46°19'35" East, 6.00 feet; thence North 43°40'25" West, 1680.22 feet; thence North 00°40'09" East, 851.62 feet; thence North 01°01'44" West, 50.59 feet, to a point on the East-West one quarter line of said Section 3, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "R"; thence South 26°38'41" East, 39.15' to a point on the South line of said Section 3, and the POINT OF ENDING.

Rogers Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas.
The centerlines of existing electric facilities easement areas located in Sections 1,2,11, and 14 Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said centerlines being described as follows:

LVD1
Commencing at the West one-quarter corner of said Section 14; thence North 89°02'14" East, 33.77 feet, along the East and West one-quarter line of said Section 14, to the POINT OF BEGINNING; thence North 33°03'43" West, 24.73 feet; thence North 88°51'51" West, 20.24 feet, to a point on the West line of said Section 14, and the Westerly FERC Project Boundary line, and the POINT OF ENDING.

LVD2
Commencing at the Center one-quarter corner of said Section 14; thence North 00°53'28" East, 19.12 feet, along the North and South one-quarter line of said Section 14, to the POINT OF BEGINNING; thence South 88°16'11" West, 278.42 feet; thence South 89°53'46" West, 463.40 feet; thence North 65°49'51" West, 428.41 feet; thence North 78°12'22" West, 188.59 feet; thence North 85°06'28" West, 27.32 feet, more or less, to a point on the West one-eighth line of said Section 14, and the POINT OF ENDING, and REFERENCE POINT "A".

LVD3
Commencing at previously stated REFERENCE POINT "A"; thence North 00°29'51" East, 44.80 feet, along the West one-eighth line of said Section 14, to the POINT OF BEGINNING; thence North 49°42'38" East, 181.23 feet; thence North 40°22'57" East, 998.22 feet; thence North 05°59'49" West, 935.82 feet; thence North 29°10'22" West, 598.90 feet to REFERENCE POINT "B"; thence North 04°24'11" East, 62.41 feet, to REFERENCE POINT "C"; thence North 38°45'28" West, 129.12 feet; thence North 25°54'46" West, 113.73 feet; thence North 22°39'23" West, 128.72 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "B"; thence North 69°46'39" East, 41.78 feet, to a point on the Stanwood Substation fence and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "C"; thence South 69°15'10" East, 36.13 feet, to a point on the Stanwood Substation fence and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "C"; thence South 62°34'08" West, 91.58 feet; thence South 86° 02'30 West, 740.99 feet; thence South 70°51'35" West, 74.89 feet to REFERENCE POINT "K"; thence North 26°33'40" West, 106.97 feet; thence South 69°13'24" West, 207.61 feet; thence North 26°17'28" West, 19.45 feet, more or less, to the boundary line of Consumers Energy parcel recorded in Liber 143, Page 92 and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "K"; thence South 08°51'25" West, 87.51 feet; thence South 18°44'29" East, 203.82 feet; thence North 83°27'52" East, 8.08 feet, more or less, to a point on the Easterly right of way line of Northland Drive, and the POINT OF ENDING.

LVD4
Commencing at the Southeast corner of said Section 2; thence North 89°27'49" West, 1242.54 feet, along the South line of said Section 2; thence North 00°32'11" East, 206.50 feet, to the POINT OF BEGINNING; thence South 89°15'36" West, 338.52 feet, more or less, to a point on the West line of Consumers Energy parcel recorded in Liber 144, Page 243, Mecosta County Records, and the POINT OF ENDING.

LVD5
Commencing at the Southeast corner of said Section 2; thence North 00°09'10" West, 2595.85 feet, along the East line of said Section 2, to REFERENCE POINT "M", and the POINT OF BEGINNING; thence North 49°05'15" West, 117.24 feet, to REFERENCE POINT "N"; thence South 36°26'52" West, 76.16 feet, more or less, to a point on the East and West one-quarter line of said Section 2, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "M"; thence South 47°11'37" East, 48.89 feet, more or less, to a point on the East line of Consumer Energy parcel recorded in Liber 177, Page 524, Mecosta County Records, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "N"; thence North 13°43'47" East, 164.93 feet, more or less, to a point on the Northerly line of parcel recorded in Liber 177, Page 524, Mecosta County Records, and the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas.
The centerlines of existing electric facilities easement areas located in Sections 1,2,11 and 14, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said centerlines being described as follows:

46 kV line 19C
Commencing at previously stated REFERENCE POINT "A", thence North 00°29'51" East, 48.22 feet, along the West one-eighth line of said Section 14, to the POINT OF BEGINNING; thence North 48°59'26" East, 177.83 feet; thence North 40°28'46" East, 997.66 feet; thence North 05°59'52" West, 933.06 feet; thence North 29°31'47" West, 295.74 feet; thence North 28°54'20" West, 303.61 feet; thence North 43°24'54" West, 144.66 feet; thence North 43°25'15" West, 81.00 feet, to a point on the Rogers Dam Substation fence and the POINT OF ENDING.

46kV line 19W (segment 1)
Commencing at the North one-quarter corner of said Section 14; thence South 00°53'28" West, 35.96 feet, along the North and South one-quarter line of said Section 14, to the POINT OF BEGINNING, and REFERENCE POINT "L"; thence North 89°22'42" West, 661.96 feet to REFERENCE POINT "F"; thence South 89°04'33" West, 87.22 feet; thence North 61°50'23" West, 254.06 feet; thence North 63°04'39" West, 159.57 feet; thence South 34°36'58" West, 35.21 feet, to a point on the Rogers Dam Substation fence, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "L"; thence South 89°22'42" East, 1100.15 feet, to the southerly extension of the East line of the West 40 acres of Government Lot 3 of said Section 11, and the POINT OF ENDING.

46kV line 19W (segment 2)
Commencing at the Southeast corner of said Section 2; thence North 00°09'10" West, 948.54 feet; along the East line of said Section 2; thence North 89°54'05" East, 31.05 feet, to the POINT OF BEGINNING; thence North 00°05'55" West, 93.43 feet, more or less, to the Easterly extension of the Northerly line of Consumers Energy property described in Liber 144, Page 243, and the POINT OF ENDING.

46kV line 19W (segment 3)
Commencing at the Southeast corner of said Section 2; thence North 00°09'10" West, 2528.64 feet, along the East line of said Section 2; thence North 41°59'05" West, 7.91 feet to the POINT OF BEGINNING; thence North 41°59'05" West, 62.97 feet; thence North 00°04'26" East, 251.47 feet, to a point on the Northerly line of parcel recorded in Liber 177, Page 524, and the POINT OF ENDING.

46kV line 19AR
BEGINNING at previously stated REFERENCE POINT "F"; thence South 64°36'50" West, 86.22 feet; thence South 88°48'11" West, 100.70 feet, to a point on the Easterly Stanwood Substation fence, and the POINT OF ENDING.

Legal Description: Access Easement Rogers Dam Substation and Access Easement Stanwood Substation.
A strip of land 20 feet in width being 10 feet on each side of the following described centerline located in the Southwest one-quarter of Section 11, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said centerline described as:

Commencing at the South one-quarter corner of said Section 11; thence South 88°48'01" West, 626.70 feet along the South line of said Section 11 to a point on the centerline of 10 Mile Road, and the POINT OF BEGINNING; thence Northwesterly 117.92 feet, along the arc of a 374.70 foot radius curve to the right, the central angle of which is 18°01'51" and the long chord of which bears North 53°38'19" West, 117.43 feet, to REFERENCE POINT "H"; thence North 41°43'11" West, 57.61 feet; thence Northwesterly 94.56 feet along the arc of a 400.00 foot radius curve to the Left, the central angle of which is 13°32'42" and the long chord of which bears North 48°29'32" West, 94.34 feet; thence North 55°15'53" West, 166.00 feet; thence North 57°09'13" West, 134.27 feet; thence South 14°54'13" West, 26.70 feet; thence South 13°20'23" East, 80.27 feet; thence South 71°29'42" West, 57.76 feet; thence South 34°07'09" West, 46.91 feet, to the POINT OF ENDING, and REFERENCE POINT "I"

And also BEGINNING at previously established REFERENCE POINT "H"; thence South 55°00'43" West, 40.60, feet to the POINT OF ENDING, and REFERENCE POINT "J"

The sideline of said 20 foot side access easement are to be extended and shortened to meet at angle points beginning on the South line of said Section 11, and ending on the Stanwood Substation Easement and Rogers Dam Substation Easement.

Legal Description: Rogers Dam Substation Easement and Stanwood Substation Easement.
Substation easements located in the Southwest one-quarter of Section 11, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said easement described as**:**

Rogers Dam Substation Easement

BEGINNING at previously established REFERENCE POINT "I"; thence South 52°55'16" East, 84.94 feet; thence South 37°04'44" West, 125.65 feet; thence North 52°55'16" West, 95.30 feet; thence North 37°04'44" East, 125.65 feet; thence South 52°55'16" East, 10.36 feet, to the POINT OF BEGINNING.

Stanwood Substation Easement

BEGINNING at previously established REFERENCE POINT "J"; thence South 01°05'08" East, 149.11 feet; thence South 88°54'52" West, 219.16 feet; thence North 01°05'08" West, 149.11 feet; thence North 88°54'52" East, 219.16 feet, to the POINT OF BEGINNING.

Tippy Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located Section 31, Town 22 North, Range 13 West, Dickson Township, Manistee County, and Section 5 and 6, Town 21 North, Range 13 West, Norman Township, Manistee County, Michigan, said centerlines being described as follows:

LVD1
Commencing at the Southwest corner of said Section 31; thence South 87°12'16" East, 36.73 feet, along the South line of said Section 31; thence North 01°06'18" East, 184.00 feet, to a point on the line 184 feet North of the South line of said Section 31, and to the POINT OF BEGINNING; thence continuing, North 01°06'18" East, 790.80 feet; thence North 66°27'27" East, 286.20 feet, to Reference Point “A”; thence continuing North 66°27'27" East, 122.21 feet, to Reference Point “B”; thence continuing North 66°27'27" East, 222.11 feet; thence North 09°35'51" East, 199.73 feet; thence North 49°22'14" West, 121.64 feet; thence North 30°52'46" West, 235.44 feet, to Reference Point “C”; thence North 84°03'26" West, 219.48 feet; thence North 13°27'08" West, 209.12 feet; thence North 01°58'51" East, 724.74 feet; to Reference Point “D”; thence North 33°42'53" East, 205.88 feet; thence North 01°25'51" East, 202.17 feet, to Reference Point “F”, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point “A”; thence North 62°07'50” West, 311.34 feet, to a point on the West line of said Section 31, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point “B”; thence South 87°45'18” East, 199.27 feet, to a point on the Westerly Synder Substation fence line, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point “C”; thence North 14°56'43" East, 132.43 feet; thence North 42°19'26" East, 220.90 feet; thence North 07°05'02" East, 49.71 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point “D”; thence North 02°02'02” East, 75.15 feet, to Reference Point “E”, and to the POINT OF ENDING.

LVD2
Commencing at the Southwest corner of said Section 31; thence South 87°12'16" East, 1385.23 feet, along the South line of said Section 31; thence North 00°52'13" East, 28.80 feet, to the POINT OF BEGINNING; thence South 87°16'08" East, 69.32 feet; thence South 77°21'50" East, 169.05 feet, more or less, to a point on the South line of said Section 31, and to the POINT OF ENDING.

LVD3
Commencing at the West one-quarter corner of said Section 5; thence North 01°50'54" East, 2131.30 feet, along the West line of said Section 5, to the POINT OF BEGINNING and Reference Point "J"; thence North 87°27'04" East, 77.97 feet, to Reference Point “I”, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "J"; thence South 87°26'34" West, 225.06 feet, more or less, to a point on the South line of parcel described in parcel number 10-006-100-00, and POINT OF ENDING.

Legal Description: Centerlines for existing underground Electric Facilities Areas

The centerlines of existing underground electric facilities easement areas located in Section 31, Town 22 North, Range 13 West, Dickson Township, Manistee County, and Section 5, Town 21 North, Range 13 West, Norman Township, Manistee County, Michigan, said centerline being described as follows:

U/G Elec.1

BEGINNING at previously stated Reference Point “E”; thence South 21°18'28" East, 13.67 feet; thence South 41°51'16" West, 12.61 feet; thence South 58°38'18" West, 44.83 feet; thence South 71°39'15" West, 19.89 feet; thence South 78°12'01" West, 87.74 feet; thence North 17°01'17" West, 38.52 feet, to the POINT OF ENDING.

U/G Elec.2

BEGINNING at previously stated Reference Point “F”; thence North 37°48'56" West, 10.11 feet; thence North 00°25'19" West, 68.22 feet; thence North 03°44'03" West, 137.79 feet, to the POINT OF ENDING.

U/G Elec.3

BEGINNING at previously stated Reference Point “I”; thence North 05°07'53" West, 104.52 feet, to the POINT OF ENDING.

and also BEGINNING at previously stated Reference Point "I"; thence South 83°12'14" East, 19.62 feet, to the POINT OF ENDING.

Legal Description: Access Easement

A strip of land thirty (30) feet in width being fifteen (15) feet on each side of the following described centerline located in the West one-half of Section 31, Town 22 North, Range 13 West, Dickson Township, Manistee County, Michigan, said centerline described as:

Commencing at the Southwest corner of said Section 31; thence North 00°47'15" East, 1009.77 feet, along the West line of said Section 31, to the POINT OF BEGINNING; thence South 89°12'45" East, 33.00 feet; thence North 74°38'38" East, 10.06 feet; thence Northeasterly, 63.67 feet, along the arc of a 400.00 foot radius curve to the left, the central angle of which is 09°07'14", and the long chord of which bears North 70°05'01" East, 63.61 feet; thence North 65°31'24" East, 248.62 feet; thence Northeasterly, 142.12 feet, along the arc of a 351.41 foot radius curve to the right, the central angle of which is 23°10'19", and the long chord of which bears North 77°06'34" East, 141.15 feet; thence North 88°41'44" East, 125.65 feet, to Reference Point “G”, and to the POINT OF ENDING of said ingress and egress easement centerline.

The sidelines of said easement centerline are to be extended or shortened to meet at angle points beginning on the West line of said Section 31, and ending on a line having a bearing of North 00°00'00" East.

Legal Description: Snyder Substation Easement
A substation easement located in the West one-half of Section 31, Town 22 North, Range 13 West, Dickson Township, Manistee County, Michigan, more particularly described as follows:

BEGINNING at previously stated Reference Point “G; thence North 00°00'00" East, 48.45 feet; thence North 90°00'00" East, 162.49 feet, to Reference Point "H", thence continuing North 90°00'00" East, 13.40 feet; thence South 00°00'00" East, 149.67 feet; thence North 90°00'00" West, 175.89 feet; thence North 00°00'00" East, 101.22 feet, to the POINT OF BEGINNING.

Legal Description: Centerline of 138kV Facilities Easement Area Line No. 1O
The centerline of an existing electric facilities easement area located in the West one-half of Section 31, Town 22 North, Range 13 West, Dickson Township, Manistee County, Michigan, said centerline being described as follows:

BEGINNING at previously stated Reference Point "H"; thence North 05°07'24" West, 41.62 feet, to a point on an existing 138kV Line No. 1B, and the POINT OF BEGINNING; thence South 05°07'24" East, 139.41 feet; thence South 89°11'31" West, 21.08 feet, to a point on the Easterly Synder Substation fence line, and the POINT Of ENDING.

Webber Project

Legal Description: Centerline for Existing LVD Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the Northeast 1/4 of Section 33, Township 7 North, Range 5 West, Lyons Township, Ionia County, Michigan, said centerline described as follows:

Commencing at the North 1/4 Corner of said Section 33; thence South 00° 24' 47" West 1363.35 feet along the North-South 1/4 Line of said Section 33 to the Point of Beginning; thence South 79° 01' 47" East 374.63 feet to the Point of Ending.

Legal Description: Centerline for Existing 46 kV Facilities Easement Area Line 15B

The centerline of an existing electric facilities easement area located in the Northeast 1/4 of Section 33, Township 7 North, Range 5 West, Lyons Township, Ionia County, Michigan, said centerline described as follows:

Commencing at the North 1/4 Corner of said Section 33; thence South 89° 38' 54" East 243.09 feet along the North Line of Said Section 33; thence South 32° 06' 49" East 1108.60 feet, more or less, to the North property line of a Consumers Energy Parcel as described in a deed to Commonwealth Power Company dated April 7, 1906 and to the Point of Beginning; thence South 32° 06' 49" East 488.13 feet; thence South 24° 51' 19" East 866.38 feet to Reference Point 'A'; thence South 69° 14' 04" West 85.36 feet to the Easterly Line of Webber Dam Substation Easement and the Point of Ending.

AND

Beginning at Reference Point 'A'; thence South 45° 35' 40" East 39.61; thence South 81° 06' 40" West 100.05 feet to the Easterly Line of Webber Dam Substation Easement and the Point of Ending.

AND

Beginning at Reference Point 'A'; thence South 23° 56' 39" East 42.75 feet to the Point of Ending.

AND

Beginning at Reference Point 'A'; thence North 75° 50' 24" West 23.58 feet; thence South 22° 50' 40" East 57.01 feet to the Point of Ending.

AND

Beginning at Reference Point 'A'; thence North 75° 50' 24" West 23.58 feet; thence South 66° 36' 02" West 66.85 feet to the Easterly Line of Webber Dam Substation Easement and the Point of Ending.

Legal Description: Centerline for Existing 46 kV Facilities Easement Area Line 15R

The centerline of an existing electric facilities easement area located in the Northeast 1/4 of Section 33, Township 7 North, Range 5 West, Lyons Township, Ionia County, Michigan, said centerline described as follows:

Commencing at the East 1/4 Corner of said Section 33; thence North 00° 26' 50" East 45.56 feet along the East Line of said Section 33; thence North 89° 41' 48" West 360.44 feet; thence North 66° 40' 02" West 322.73 feet to the East Line of the West 1/2 of the East 1/2 of the Northeast Fractional 1/4 of said Section 33, as monumented, and to the Point of Beginning; thence North 66° 40' 02" West 528.88 feet; thence North 66° 37' 11" West 118.39 feet to the Southeasterly Line of Webber Dam Substation Easement and the Point of Ending.

Legal Description: Access Easement
A strip of land twenty (20) feet in width being ten (10) feet on each side of the following described centerline located in the Northeast 1/4 of Section 33, Township 7 North, Range 5 West, Lyons Township, Ionia County, Michigan, said centerline described as follows:

Commencing at the East 1/4 Corner of said Section 33; thence North 89° 56’ 04” West 1330.38 feet along the East-West 1/4 Line of said Section 33 to the Point of Beginning; thence 66.21 feet along a non-tangential curve to the right, said curve having a central angle of 66° 39' 58”, a radius of 56.91 feet, and a long chord distance of 62.54 feet bearing North 57° 23' 43” East; thence South 89° 16’ 18” East 171.29 feet; thence 109.45 feet along a curve to the left, said curve having a central angle of 70° 05’ 22”, a radius of 89.47 feet, and a long chord distance of 102.75 feet bearing North 55° 41’ 01” East; thence North 20° 38’ 20” East 16.30 feet to Reference Point ‘B’; thence North 20° 38’ 20” East 16.30 feet; thence 67.56 feet along a curve to the left, said curve having a central angle of 33° 15’ 56”, a radius of 116.36 feet, and a long chord distance of 66.61 feet bearing North 04° 00’ 22” East; thence North 12° 37’ 36” West 78.02 feet; thence 172.87 feet along a curve to the right, said curve having a central angle of 58° 47’ 26”, a radius of 168.47 feet, and a long chord distance of 165.38 feet bearing North 16° 46’ 08” East; thence North 23° 39’ 36” West 33.18 feet; thence 88.58 feet along a curve to the left, said curve having a radius of 82.06 feet; and a long chord distance of 84.34 feet bearing North 54° 34’ 56” West; thence North 85° 30’ 15” West 78.62 feet; thence South 78° 43’ 56” West 111.34 feet to the Easterly line of the Existing Webber Dam Substation Easement and the Point of Ending.

AND
Commencing at Reference Point ‘B’; thence South 70° 31’ 59” East 62.41 feet to the Point of Ending.

Legal Description: Webber Substation Easement Area
An easement in part of the Northeast one-quarter of Section 33, Township 7 North, Range 5 West, Lyons Township, Ionia County, Michigan, more particularly described as follows:

Commencing at the Center of said Section 33; thence East, along the East-West one-quarter line, 1980 feet (120 rods) more or less to the East line of the West half of the Southeast one-quarter of the Northeast one quarter of said section, as monumented, and to the Point of Beginning; thence North, along the East line of the West half of the Southeast one-quarter of the Northeast one-quarter of said Section, as monumented, 250 feet; thence West, parallel with the East-West one-quarter line of said Section, 300 feet; thence South, parallel with the East line of the West half of the Southeast one-quarter of the Northeast one-quarter of said Section, as monumented, 250 feet; thence East, along the East-West one-quarter line of said Section, 300 feet to the Point of Beginning.

ATTACHMENT 26

Form of Quitclaim Deed

Form of Quitclaim Deed

QUITCLAIM DEED

CONSUMERS ENERGY COMPANY (formerly Consumers Power Company), a Michigan corporation, One Energy Plaza, Jackson, Michigan 49201, Grantor,

for the sum of $_____, receipt of which Grantee hereby acknowledges,

quitclaims to

_____, Grantee,

the following described land located in the Township of _____, _____ County, State of Michigan:

See Exhibit A attached hereto.

(IF DECLARATION OF RESTRICTIVE COVENANT WAS RECORDED) subject to the terms conditions, regulations, restrictions, easements, covenants, and other matters of record including a Declaration of Restrictive Covenant recorded on _____ in Liber _____, Page _____, _____County Records, reserving to Grantor, its successors and assigns, forever, the following easements and rights:[1]

a) an easement for the purposes of constructing, operating, maintaining, inspecting (including aerial patrol), surveying, replacing, reconstructing, improving, removing, relocating, changing the size of, enlarging, and protecting a line or lines of electric facilities, said line or lines may vary in voltage from 0-46kV, together with any pole structures, poles, or any combination of same, wires, cables, conduits, crossarms, braces, guys, anchors, transformers, electric control circuits and devices, location markers and signs, communication systems, utility lines, protective apparatus and all other equipment, appurtenances, associated fixtures, and facilities, for existing or future needs, whether above or below grade, useful or incidental to or for the operation or protection thereof, and to conduct such other activities as may be convenient in connection therewith as determined by Grantor for the purpose of transmitting and distributing electricity in, on, over, under, across, and through a 40-foot wide strip of land, with an additional 10-feet of either side of the 40-foot wide strip for temporary workspace described as follows:

   (centerline description)

   together with the right to i) at any time and from time to time enter the land herein conveyed to trim, cut down, destroy, and otherwise remove or control any trees, brush, roots, and other vegetation within this 40-foot wide easement, and ii) at any time and from time to time enter the land herein conveyed to trim, cut down, destroy, and otherwise remove or control any trees, brush, roots, and other vegetation located outside of this 40- foot wide easement which are of such a height or are of such a species whose mature height that in falling directly to the ground could come into contact with the Grantor's, its successors' and assigns, electric facilities located within this 40-foot wide easement. By accepting this deed, Grantee agrees, for Grantee and Grantee's heirs, successors, and assigns, that Grantee, and Grantee's heirs, successors, and assigns, shall i) not build, create, construct, or permit to be built, created, or constructed, any obstruction, building, septic system, drain field, fuel tank, pond, swimming pool, lake, pit, well, foundation, engineering works, installation or any other type of structure over, under, or on within said 40-foot wide easement, whether temporary or permanent, natural or man-made; ii) not materially alter the ground elevation within said 40-foot wide easement; and iii) allow Grantor access over the entirety of the land herein conveyed to access said 40-foot wide easement.

b) an easement for the purposes of constructing, operating, maintaining, inspecting (including aerial patrol), surveying, replacing, reconstructing, improving, removing, relocating, changing the size of, enlarging, and protecting a line or lines of electric facilities, said line or lines may vary in voltage from 47-138kV, together with any pole structures, poles, or any combination of same, wires, cables, conduits, crossarms, braces, guys, anchors, transformers, electric control circuits and devices, location markers and signs, communication systems, utility lines, protective apparatus and all other equipment, appurtenances, associated fixtures, and facilities, for existing or future needs, whether above or below grade, useful or incidental to or for the operation or protection thereof, and to conduct such other activities as may be convenient in connection therewith as determined by Grantor for the purpose of transmitting and distributing electricity in, on, over,

[1] NTD: Quitclaim Deed to be finalized for each Project based on necessary Reserved Easements.

under, across, and through an 80-foot wide strip of land, with an additional 10-feet of either side of the 80-foot wide strip for temporary workspace described as follows:

(centerline description)

together with the right to i) at any time and from time to time enter the land herein conveyed to trim, cut down, destroy and otherwise remove or control any trees, brush, roots, and other vegetation within this 80-foot wide easement, and ii) at any time and from time to time enter the land herein conveyed to trim, cut down, destroy and otherwise remove or control any trees, brush, roots, and other vegetation located outside of this 80-foot wide easement which are of such a height or are of such a species whose mature height that in falling directly to the ground could come into contact with the Grantor's, its successors' and assigns, electric facilities located within this 80-foot wide easement. By accepting this deed, Grantee agrees, for Grantee and Grantee's heirs, successors, and assigns, that Grantee, and Grantee's heirs, successors, and assigns, shall i) not build, create, construct, or permit to be built, created, or constructed, any obstruction, building, septic system, drain field, fuel tank, pond, swimming pool, lake, pit, well, foundation, engineering works, installation or any other type of structure over, under, or on within said 80-foot wide easement, whether temporary or permanent, natural or man-made; ii) not materially alter the ground elevation within said 80-foot wide easement; and iii) allow Grantor access over the entirety of the land herein conveyed to access said 80-foot wide easement.

c) an easement for the purposes of constructing, operating, maintaining, inspecting (including aerial patrol), surveying, replacing, reconstructing, improving, removing, relocating, changing the size of, enlarging, and protecting a substation with all applicable appurtenances including but not limited to switching stations, transformers, line or lines of electric facilities together with any pole structures, poles, or any combination of same, wires, cables, conduits, crossarms, braces, guys, anchors, transformers, electric control circuits and devices, location markers and signs, communication systems, utility lines, protective apparatus and all other equipment, appurtenances, associated fixtures, and facilities, for existing or future needs, whether above or below grade, useful or incidental to or for the operation or protection thereof, and to conduct such other activities as may be convenient in connection therewith as determined by Grantor, said easement to include the fenced area as well as a 20-foot area outside of the fence allowing for temporary works space, appurtenances including but not limited to grounding pads, switch poles, etc. and screening which may include vegetation, and driveway (ingress/Egress) 20 feet in width.

    a. Also reserving an easement for mobile substation and or battery site, to be placed adjacent to the substation utilizing an area of not more than 100 feet by 100 feet.

(fenced area description)

together with the right to i) at any time and from time to time enter the land herein conveyed to trim, cut down, and otherwise remove or control any trees, brush, roots, and other vegetation within 80 feet of the fenced area, and ii) at any time and from time to time enter the land herein conveyed to trim, cut down, and otherwise remove or control any trees, brush, roots, and other vegetation located within 80 feet of the fenced area are of such a height or are of such a species whose mature height that in falling directly to the ground could come into contact with the Grantor's, its successors' and assigns, electric facilities located within this easement. By accepting this deed, Grantee agrees, for Grantee and Grantee's heirs, successors, and assigns, that Grantee, and Grantee's heirs, successors, and assigns, shall i) not build, create, construct, or permit to be built, created, or constructed, any obstruction, building, septic system, drain field, fuel tank, pond, swimming pool, lake, pit, well, foundation, engineering works, installation or any other type of structure over, under, or on within said easement, whether temporary or permanent, natural or man-made; ii) not materially alter the ground elevation within said easement; and iii) allow Grantor access over the entirety of the land herein conveyed to access said easement.

d) Excepting and reserving to the Grantor, its successor and assigns forever: a) all right, title, and interest in and to all coal, oil, gas, gas and other minerals not including sand, clay, or gravel in or under the surface of the land herein conveyed, and b) the exclusive right to store, restore, and/or protect oil, natural gas, carbon dioxide and other minerals in the subsurface strata underlying said land, but without entering upon the surface of the land herein conveyed.

Notwithstanding any other provision contained herein, in connection with the easements and rights reserved by Grantor herein, Grantee, its successors, and assigns, have the right to perform any and all acts required by the conditions of the license for Project No. _____, Federal Energy Regulatory Commission ("Commission") orders, Commission delegated staff orders or directives, or the Commission's regulations in effect from time to time, at any time, without the prior approval of Grantor.

Grantor may, at Grantor's sole cost and expense, deliver to Grantee one or more requested changes to the terms, legal descriptions and/or location details of the easement rights as reflected herein. Upon such request, the parties shall work in good

faith to reach mutual agreement on any such changes, such agreement not to be unreasonably withheld, conditioned or delayed by either party. The parties shall execute a mutually agreed upon instrument in recordable form as may be reasonably necessary to memorialize any such mutually agreed upon changes. If reasonably required by Grantee, Grantee shall in accordance with applicable law and as Grantee may otherwise reasonably deem necessary, give notice to or seek approval (in form and substance reasonably acceptable to Grantee) from the Commission for any such changes as a condition to executing any such instrument, in which case, the parties shall cooperate and work in good faith to give such notices or seek such approvals as soon as reasonably practicable. Upon the execution of any such instrument, Grantor shall cause the instrument to be recorded at Grantor's sole cost and expense.

a) This conveyance is made expressly subject to rights and interests granted by Grantor to Michigan Electric Transmission Company ("METC") in respect to the above-described land as set forth in and on the terms and conditions of a certain Amended and Restated Easement Agreement between Grantor and METC dated April 29, 2002 (the "Easement Agreement"); which Easement Agreement is recorded in various counties, including _____ County where it is recorded in Liber _____ at Page _____.

Grantor does not hereby convey or assign to Grantee any rights to receive any part of the Base Rent payable by METC, its successors or assigns, under the Easement Agreement; and (as provided in Section 10.2 of the Easement Agreement) Grantor reserves all rights to receive said Base Rent in respect to the herein conveyed land.

Grantor also does not convey or assign to Grantee, and Grantor reserves, all rights and interests under Article 5 of the Easement Agreement in respect to the herein conveyed land; such reserved rights and interests expressly including (without limiting any other rights or interests under said Article 5 of the Easement Agreement) all rights under said Article 5: (i) to receive notice of any "Additions/Alterations" (as defined in said Article 5 of the Easement Agreement) to be undertaken by METC on the herein conveyed land, and (ii) to specify and to enforce work and design restrictions and precautions that METC is to follow in connection with an Addition/Alteration.

Grantor also does not convey or assign to Grantee, and Grantor reserves, all rights under, and subject to the terms and conditions of, the Easement Agreement to use and occupy and to authorize any third parties to use and occupy METC's Transmission Facilities with facilities constituting "Compatible Uses" as defined in the Easement Agreement, and to receive all revenues for any such third party uses or occupations of METC's Transmission Facilities.

b) Also reserving to Grantor the easement and right to enter at all times upon the land herein conveyed and to: (a) construct, operate, maintain, repair, inspect (including aerial patrol,) survey, improve, change the size of, enlarge, remove, relocate, reconstruct, and replace any number of existing or future electric and/or communications lines and facilities, which may consist of towers, pole structures, poles, wires, cables, conduits, crossarms, transformers, braces, guys, anchors, antennas and/or other fixtures and appurtenances, on, over, under and across any part of the land herein conveyed, including all public highways upon or adjacent to said land; and (b) cut, trim, remove, destroy or otherwise control any or all trees and brush which may, in the opinion of Grantor, interfere or threaten to interfere with or be hazardous to the construction, operation or maintenance of any of said lines and facilities. Grantee covenants and agrees, as a covenant that will run with the land, that no buildings or other structures will at any time be placed under or over any of said lines or facilities or within such proximity thereto as to interfere with, or in the opinion of Grantor threaten to interfere with, the construction, operation or maintenance of any of said lines or facilities. It is understood that the lines and facilities referred to above in this paragraph may, in whole in or part, be physically located on Transmission Facilities of METC pursuant to applicable provisions of the Easement Agreement, and/or may, in whole or in part, be located on the herein conveyed land separate from and independent of any Transmission Facilities of METC.

Except for the rights and interests under the Easement Agreement that are reserved to Grantor herein, Grantor's rights and interests under the Easement Agreement are, with respect (and only with respect) to the herein conveyed land, hereby conveyed to Grantee. Except specifically in connection with the use or exercise of rights under the Easement Agreement reserved by Grantor herein, Grantor's covenants, agreements and obligations under the Easement Agreement shall, with respect (and only with respect) to the herein conveyed land pass to Grantee and, as expressly provided in Section 10.2 of the Easement Agreement, Grantor shall not hereafter be liable therefore.

It is further understood that as used in any of the foregoing provisions hereof, references to "Grantor," "Grantee" and "METC" shall include their respective successors and assigns.

STATEMENT UNDER MCL 560.109(3): Grantor grants to Grantee the right to make all allowable divisions of the land conveyed, under Section 108 of the Parcels Division Act, 1967 PA 288, as amended.

NOTICE UNDER MCL 560.109(4): The land conveyed may be located within the vicinity of farmland or a farm operation. Generally accepted agricultural and management practices which may generate noise, dust, odors, and other associated conditions may be used and are protected by the Michigan Right to Farm Act.

Form of Temporary Substation Easement

Form of Temporary Substation Easement

TEMPORARY SUBSTATION EASEMENT AGREEMENT

THIS TEMPORARY SUBSTATION EASEMENT AGREEMENT (this "**Agreement**") is made this _____ day of _____, 2___ (the "**Effective Date**"), by and between **CONFLUENCE HYDRO, LLC**, a Delaware limited liability company ("**Grantor**"), a grantor for indexing purposes; and **CONSUMERS ENERGY COMPANY**, a Michigan corporation ("**Grantee**"), a grantee for indexing purposes (the Grantor and Grantee are sometimes referred to individually as the "**Party**" or collectively as the "**Parties**").

W I T N E S S E T H:

1. That for and in consideration of the sum of Ten and 00/100 Dollars ($10.00), cash in hand paid, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Grantor hereby grants and conveys unto Grantee and its apportionees, licensees, permittees, invitees, successors, successors-in-title and assigns, and their respective agents, employees, servants, tenants, subtenants, licensees, permittees, customers, invitees, contractors and subcontractors (collectively, the "**Grantee Parties**"), the following exclusive (except as expressly provided herein) and rights, privileges and easements of right-of-way (collectively, the "**Easements**"):

(a) The rights to lay, construct, install, maintain, improve, alter, inspect, repair, replace, relocate and operate an electric transmission and distribution substation, together with all appurtenances, equipment and facilities necessary or desirable for the purposes of transmitting and distributing electric power and for ancillary telecommunications and other communications purposes (whether or not related to the transmission or distribution of electric power), including, but not limited to, transformers, regulators, capacitors, wires, lines, poles, towers, structures, cables, guy wires, conduits, pipes, mains, manholes, handholes, meters, attachments, ground connections, equipment, fences, telecommunications equipment and all accessories desirable in connection with the foregoing, any of which may be located above or below ground (collectively, the "**Substation Facilities**"), on, under, over, upon, through and across that certain real property of Grantor situated in the County of _____, Michigan (the "**Substation Property**"), which Substation Property is more particularly described on Exhibit B, attached hereto and by this reference made a part hereof (the "**Substation Easement**"). The Substation Easement is designated as [_____] on that certain [plat of survey] entitled [_____], prepared by [_____] and dated [_____] (the "**Plat**"), a copy of which is attached hereto as Exhibit A, and by this reference made a part hereof, and to which Plat reference is hereby made for a more particular description of the Substation Easement.

(b) The non-exclusive rights of vehicular and pedestrian ingress and egress to and from the Substation Property and/or Mobile Substation Property (as defined below) and **[INSERT PUBLIC ROW]** on, under, over, upon, through and across a portion of certain real property of Grantor situated in the County of _____ , Michigan (the

"**Access Easement Property**"), which Access Easement Property is more particularly described on Exhibit C, attached hereto and by this reference made a part hereof (the "**Access Easement**"). The Access Easement is designated as [_____] on the Plat, and to which Plat reference is hereby made for a more particular description of the Access Easement.

(c) The right to enter upon and trim, cut, remove, destroy, or otherwise control all trees and vegetation located on that certain real property of Grantor situated in the County of _____, Michigan (the "**Protection Easement Property**"), which Protection Easement Property is more particularly described on Exhibit D attached hereto and by this reference made a part hereof and the right to trim, cut, remove, destroy, or otherwise control all trees and vegetation 80 feet outside of the fence and remove all hazard trees in accordance with the above (the "**Protection Easement**").

(d) The right to from time to time install, operate, maintain, and remove a mobile electric substation (the "**Mobile Substation**"), with associated electric lines and equipment and perimeter fencing, on, under, over, upon, through and across that certain real property of Grantor situated in the County of _____, Michigan (the "**Mobile Substation Property**"), which Mobile Substation Property is more particularly described on Exhibit E, attached hereto and by this reference made a part hereof, together with any temporary pole structures, poles, or any combination of same, wires, cables, conduits, crossarms, braces, guys, anchors, transformers, electric control circuits and devices, location markers and signs, communication systems, utility lines, protective apparatus, and all other equipment, appurtenances, associated fixtures, and facilities or incidental to or for the operation or protection thereof (the "**Mobile Substation Easement**").

The Substation Property, Access Easement Property, the Protection Easement Property, and Mobile Substation Property are hereinafter collectively referred to as the "**Easement Areas**".

2. Grantor and Grantee agree that this Agreement shall be for a term commencing on the Effective Date and terminating on the date where the Substation Facilities are decommissioned, and Grantee has constructed a new substation on certain other real property owned by Grantor. Upon completion of the decommissioning of the Substation Facilities and construction of the new substation on such certain other real property owned by Grantor, as evidenced by written notice from Grantee to Grantor, Grantee shall execute and record a termination and release of this Agreement in form mutually agreeable to Grantor and Grantee.

3. Grantor hereby agrees that among the easement rights conveyed to Grantee and the Grantee Parties are the rights to: (a) clear, remove and dispose of, from time to time, all natural or manmade obstructions in the Substation Property, Mobile Substation Property or on the Access Easement Property and adjacent to and outside the Easement Areas, as Grantee may deem necessary or desirable for the construction, installation, operation, maintenance, repair, relocation, replacement, improvement or alteration of the Substation Facilities; (b) have unobstructed and unrestricted ingress and egress over the Access Easement in order to provide unobstructed and unrestricted access to the Substation Facilities at all times; and (c) keep the Easement Areas clear of all buildings or structures, trees, stumps, roots and undergrowth and to trim or fell any tree

outside the Easement Areas which, in the opinion of Grantee, may constitute a hazard or endanger the safe or proper use or operation of the Access Easement or the Substation Facilities, including, but not limited to, any tree that in falling or being felled could come within fifteen (15) feet of the Easement Areas.

4. No buildings or other structures may be constructed in the Easement Areas without the prior written consent of Grantee, which consent may be withheld in Grantee's sole and absolute discretion. With the prior written consent of Grantee, in its sole and absolute discretion, Grantor, its lessees, successors, successors-in-title and assigns, may use the unenclosed portions of the Easement Areas for any purpose not inconsistent with the rights hereby granted (the "Permitted **Encroachments**"), provided that such Permitted Encroachments do not interfere with or endanger any of the Easements or other rights hereby granted, including, but not limited to, the construction, operation or maintenance of the Substation Facilities or Mobile Substation or ingress to and egress from the Easement Areas and/or or any part thereof. In no event shall Grantor or its lessees, invitees, licensees, successors, successors-in-title or assigns have the right to access any portion of the Substation Easement or any of the Substation Facilities or any portion the Mobile Substation or Mobile Substation Easement when a Mobile Substation is present on the Mobile Substation Easement. Grantee shall at all times have the right to cross or cut through any Permitted Encroachments and upon prior notice to Grantor, when reasonably possible under the circumstances, (except in emergency situations where no notice shall be required), to interrupt, prevent or alter the use thereof, for the purposes of constructing, maintaining, operating, repairing, altering or replacing the Substation Facilities, Mobile Substation, or any part thereof.

5. No delay or interruption by Grantee or Grantee Parties in the use or enjoyment of any right or easement hereby granted shall result in the loss, limitation or abandonment of any of the rights, title, interests, Easements or estates granted hereby. No rights, privileges or Easements granted under this Agreement are intended for public use (other than the use of the Access Easement, the Substation Easement, Protection Easement, and the Mobile Substation Easement by public safety, emergency and fire personnel and vehicles).

6. The Easements and other rights set forth in this Agreement shall be for the use, benefit and enjoyment of Grantee and Grantee Parties. This Agreement, each and all of its terms, conditions and provisions, and the Easements, rights, and privileges created hereby shall be binding upon and shall inure to the benefit of Grantee and Grantor and their respective successors, successors-in-title, and assigns. Grantor agrees that all of the Easements, rights and privileges set forth herein shall touch, concern, burden and run with the title to the Substation Property, Mobile Substation Property, Protection Easement Property, and the Access Easement Property.

7. Grantor hereby represents and warrants that (i) Grantor owns fee simple title to the Easement Areas; (ii) Grantor has a good and lawful right to grant and convey the Easements, rights and privileges granted hereunder; (iii) the Easement Areas are free from all leases, liens, mortgages and encumbrances which may prohibit, hinder or restrict the Easements, rights and privileges conveyed under this Agreement (other than liens and mortgages that are expressly subordinate to this Agreement); (iv) Grantor and its successors, successors-in-title and assigns will forever warrant and defend the title to the Easement Areas, including, but not limited to, the Easement Areas against the claims of all persons whatsoever; (v) Grantee and Grantee Parties shall have

quiet and peaceable possession, use and enjoyment of the Easement Areas; and (vi) Grantee and Grantor and its successors, successors-in-title and assigns shall execute and deliver such further assurances thereof as may be required.

8. The Substation Facilities and Mobile Substation shall at all times be and remain the property of Grantee. Grantee shall have the right to inspect, rebuild, repair, improve, relocate within the Substation Property and make such changes, alterations, substitutions, additions to or extensions of the Substation Facilities and Mobile Substation as Grantee may from time to time deem advisable.

9. Grantor hereby establishes that, as a covenant running with the title to the Substation Property and Mobile Substation Property and for the benefit of Grantee and Grantee Parties neither Grantor nor any of its successors, successors-in-title or assignor their respective lessees, tenants, customers, invitees, permittees or licensees shall file, assert or maintain, be a party to or permit to be filed, maintained or asserted any suit, cause of action, claim or proceeding of any kind or nature against any one (1) or more of the Grantee or Grantee Parties for any damages (including, but not limited to, indirect, punitive or consequential damages), liabilities, expenses, losses, costs, injuries (including death) or claims based on or in any way arising out of or related to the intrusion, transmittal or occurrence of any noises, sounds, sound waves, light, vibrations or similar effects from the Easements and/or the Substation Facilities or Mobile Substation on, under, over, upon, through, across and around the Substation Property or Mobile Substation Property, nor shall Grantor or any such occupant, user, lessee, tenant, customer, invitee, permittee or licensee of the Substation Property or Mobile Substation Property permit, bring or support any action to modify or change the current zoning or use permitted for the Substation Property or Mobile Substation Property without the prior written consent of Grantee, which consent may be withheld in Grantee's sole and absolute discretion.

10. Each Party (the "**Indemnifying Party**") shall defend, indemnify and hold harmless the other Party (each, an "**Indemnified Party**") from and against any and all third party (excluding affiliates of Indemnified Party) claims, litigation, actions, proceedings, losses, damages, liabilities, obligations, costs and expenses, including reasonable attorneys' fees, court costs and litigation expenses, for personal or property damage (collectively, "**Claims**") suffered or incurred by such Indemnified Party, as a result of a breach of this Agreement by the Indemnifying Party or the Indemnifying Party's negligent or willful misconduct in using the Easement Area. In no event shall either Party be liable to the other Party to the extent any Claim is caused by, arising from or contributed by the negligence or intentional misconduct of such other Party.

11. After the Effective Date, Grantee may, at Grantee's sole cost and expense, deliver to Grantor one or more requested changes to the terms, legal descriptions and/or location details of the Easements and/or Easement Areas as reflected herein. Upon such request, the Parties shall work in good faith to reach mutual agreement on any such changes, such agreement not to be unreasonably withheld, conditioned or delayed by either Party. The Parties shall execute an amendment to this Agreement in recordable form as may be reasonably necessary to memorialize any such mutually agreed upon changes. If reasonably required by Grantor, Grantor shall in accordance with applicable law and as Grantor may otherwise reasonably deem necessary, give notice to or seek approval (in form and substance reasonably acceptable to Grantor) from the

Federal Energy Regulatory Commission ("**Commission**") for any such changes as a condition to executing any such amendment, in which case, the Parties shall cooperate and work in good faith to give such notices or seek such approvals as soon as reasonably practicable. Upon the execution of any such amendment, Grantee shall cause the amendment to be recorded at Grantee's sole cost and expense.

12. This Agreement contains the entire agreement between the parties hereto relating to the subject matter hereof and supersedes all prior and contemporaneous negotiations, understandings and agreements, written or oral, between the parties hereto. This Agreement shall not be amended, modified or terminated and no waiver of any provision hereof shall be effective unless set forth in a written instrument executed with the same formality as this Agreement.

13. If any provision of this Agreement shall be unenforceable in whole or in part, such provisions shall be limited to the extent necessary to render the same valid, or shall be excised from this Agreement, as circumstances require, and this Agreement shall be construed as if such provision had been incorporated herein as so limited or as if such provision had not been included herein, as the case may be.

14. This Assignment may be executed in any number of counterparts, and it shall be sufficient that the signature of each party appears on one or more such counterparts. All counterparts shall collectively constitute a single agreement.

15. All questions with respect to the construction of this Agreement and the rights and liabilities of the parties hereto shall be determined in accordance with the applicable provisions of the laws of the State of Michigan.

16. Notwithstanding any other provision contained herein, Grantor, its successors, and assigns, have the right to perform any and all acts required by the conditions of the license for Project No. [_____], Commission orders, Commission delegated staff orders or directives, or the Commission's regulations in effect from time to time, at any time, without the prior approval of Grantee.

[SIGNATURE PAGES FOLLOW]

IN WITNESS WHEREOF, Grantor and Grantee have caused this Agreement to be executed by their respective duly authorized representatives as of the day and year first above written.

JOINT APPLICATION FOR AUTHORIZATION
PURSUANT TO SECTION 203 OF THE FEDERAL POWER ACT AND
REQUEST FOR WAIVERS AND CONFIDENTIAL TREATMENT

Pursuant to section 203 of the Federal Power Act, as amended ("FPA"),[1] and Part 33 of the regulations of the Federal Energy Regulatory Commission ("FERC" or "Commission"),[2] Consumers Energy Company ("Seller"), Confluence Hydro, LLC ("Buyer"), Confluence Hydro Alcona, LLC ("Confluence Alcona"), Confluence Hydro Calkins Bridge, LLC ("Confluence Calkins Bridge"), Confluence Hydro Cooke, LLC ("Confluence Cooke"), Confluence Hydro Croton, LLC ("Confluence Croton"), Confluence Hydro Five Channels, LLC ("Confluence Five Channels"), Confluence Hydro Foote, LLC ("Confluence Foote"), Confluence Hydro Hardy, LLC ("Confluence Hardy"), Confluence Hydro Hodenpyl, LLC ("Confluence Hodenpyl"), Confluence Hydro Loud, LLC ("Confluence Loud"), Confluence Hydro Mio, LLC ("Confluence

[1] 16 U.S.C. § 824b (2018).

[2] 18 C.F.R. Part 33 (2025).

Mio"), Confluence Hydro Rogers, LLC ("Confluence Rogers"), Confluence Hydro Tippy, LLC ("Confluence Tippy"), and Confluence Hydro Webber, LLC ("Confluence Webber") (collectively, the "Confluence Project Companies" and, together with Seller and Buyer, "Applicants") hereby submit this application ("Application") for Commission authorization of the proposed transaction described below.

Seller is currently the sole owner and operator of the 13 hydropower generating assets described below (collectively, the "Project Assets"). Applicants submit this Application to request Commission authorization for a proposed transaction ("Transaction") involving (1) the sale by Seller of the Project Assets to Buyer, pursuant to a Purchase and Sale Agreement between Seller and Buyer dated September 3, 2025 ("Purchase Agreement"); and (2) the subsequent contribution of the Project Assets by Buyer to the Confluence Project Companies. As a result of the Transaction, Seller will no longer hold any ownership interests in the Project Assets.

As demonstrated herein, the Transaction will not have any adverse effect on competition, rates, or regulation and will not result in any cross-subsidization concerns.[3] Accordingly, the Transaction is consistent with the public interest and should be authorized by the Commission pursuant to FPA section 203.

I. COMMUNICATIONS

Communications regarding this Application should be addressed to the following individuals:[4]

[3] *See* 18 C.F.R. § 2.26.

[4] To the extent necessary, Applicants respectfully requests waiver of Rule 203(b)(3) of the Commission's regulations, 18 C.F.R. § 385.203(b)(3), so that a copy of any communications in this proceeding may be served on all persons listed above.

II. THE TRANSACTION

A. Parties to the Transaction

1. Seller and Its Relevant Affiliates and the Project Assets

Seller is a public utility that serves approximately 1.9 million electric customers and 1.8 million gas customers in Michigan's Lower Peninsula. Seller is wholly-owned by, and one of the two principal subsidiaries of, CMS Energy Corporation ("CMS Energy"), which is a publicly traded company.[5] Based on information contained in a quarterly report filed by The Vanguard Group Inc. ("Vanguard") for Q2 2025 pursuant to a blanket authorization under FPA section

[5] The other principal subsidiary of CMS Energy is NorthStar Clean Energy Company.

203(a)(2), Seller understands that investment funds held by Vanguard collectively held (in aggregate) 10 percent or greater of the publicly traded CMS Energy shares as of August 6, 2025.[6] Additionally, based on information contained in a quarterly report filed by BlackRock, Inc. ("BlackRock") for Q2 2025 pursuant to a blanket authorization under FPA section 203(a)(2), Seller also understands that investment funds held by BlackRock collectively held (in aggregate) 10 percent or greater of the publicly traded CMS Energy shares as of August 13, 2025.[7]

Seller owns and operates generating facilities and non-jurisdictional distribution facilities. The Commission granted Seller authority to sell electric energy and capacity at market-based rates in 1998.[8] Consumers Energy is a Category 2 Seller in the Central Region.

Seller is currently the sole owner and operator of the Projects Assets, which consist of the following 13 hydroelectric generating facilities licensed by the Commission under Part I of the FPA and located in the Midcontinent Independent System Operator, Inc. ("MISO") balancing authority area ("BAA"):

- **Alcona Project (FERC No. 2447)**. The Alcona Project is located on the Au Sable River in northeastern Michigan, approximately three miles west of Glennie, Michigan. The Alcona Project was completed in 1924. The two turbine-generator units have a combined capacity of approximately 8.0 MWs.

- **Calkins Bridge Project (FERC No. 785)**. The Calkins Bridge Project is located on the Kalamazoo River in Allegan County, approximately six miles northwest of the City of Allegan. The Calkins Bridge Project was completed in 1936. The three units of have a combined rated capacity of approximately 2.55 MWs.

[7] *See* Quarterly Filing for Q2 2025 of BlackRock, Inc., Docket Nos. 16-77-004 and ECF25-12-000 (filed Aug.13, 2025).

[8] *Consumers Energy Co.*, 85 FERC ¶ 61,121 (1998).

- **Cooke Project (FERC No. 2450)**. The Cooke Project is located on the Au Sable River in Iosco County, downstream from the Five Channels Project, and approximately twelve miles west of Oscoda, Michigan. The project was completed in 1911. The three generating units have a combined capacity of approximately 7.5 MWs.

- **Croton Project (FERC No. 2468)**. The Croton Project is located on the Muskegon River, near Croton Township. The Croton Project construction started in 1904, with the first two generating units coming online in 1907. The second two units were added in 1915. The four units have a total capacity of approximately 9.0 MWs.

- **Five Channels Project (FERC No. 2453)**. The Five Channels Project is located on the Au Sable River, approximately 17 miles west of Oscoda in Iosco County, Michigan, upstream of the Cooke Project impoundment. The Five Channels Project, completed in 1912, has two generating units with a combined capacity of approximately 6.0 MWs.

- **Foote Project (FERC No. 2436)**. The Foote Project is located on the Au Sable River in Iosco County, Michigan, approximately 6 miles west of Oscoda. The Foote Project was completed in 1918. The three turbine-generator units have a combined capacity of approximately 9.0 MWs.

- **Hardy Project (FERC No. 2452)**. The Hardy Project is located on the Muskegon River near Oxbow, Michigan. The Hardy Project was completed in 1931 and is downstream of the Rogers Project and upstream of the Croton Project. The Hardy Project's three generating units have a combined capacity of approximately 32.5 MWs.

- **Hodenpyl Project (FERC No. 2599)**. The Hodenpyl Project is on the Manistee River, approximately 23 miles northwest of Cadillac, Michigan. The Hodenpyl Project is approximately 12 river miles upstream of the Tippy Project. The dam was completed in 1925 and has a combined rated capacity of approximately 18.0 MWs.

- **Loud Project (FERC No. 2449)**. The Loud Project is located on the Au Sable River in Iosco County, Michigan, upstream of the Five Channels Project. The Loud Project was completed in 1913. The two turbine-generators have a combined capacity of approximately 4.0 MWs.

- **Mio Project (FERC No. 2448)**. The Mio Project is in Oscoda County, Michigan on the Au Sable River near the town of Mio. The Mio Project was completed in 1916. Its two generating units have a combined capacity of approximately 5.0 MWs.

- **Rogers Project (FERC No. 2451)**. The Rogers Project is located on the Muskegon River, approximately six miles south of Big Rapids, Michigan. Constructed in 1905, and rebuilt after a fire in 1922, the Rogers Project has four generating units that have a combined capacity of approximately 6.72 MWs.

- **Tippy Project (FERC No. 2580)**. The Tippy Project is located on the Manistee River, approximately 19 miles east of Manistee, Michigan, and approximately 12 river miles downstream of the Hodenpyl Project. The Tippy Project was completed in 1918 and has three generating units that have a combined capacity of approximately 20.0 MWs.

- **Webber Project (FERC No. 2566)**. The Webber Project is located on the Grand River near Ionia, Michigan. Constructed in 1907, the Webber Project. Its two generating units have a combined capacity of approximately 3.3 MWs.

2. Buyer, the Confluence Project Companies, and Their Relevant Affiliates

Buyer is a special purpose entity established for the purpose of acquiring the Project Assets. Prior to the consummation of the Transaction, Buyer will not directly or indirectly own, operate, or control any electric generation or transmission facilities or essential inputs to electricity products or electric power production, as defined in 18 C.F.R. §§ 33.4 and 35.36. Prior to the consummation of the Transaction, Buyer will submit an application requesting Commission authorization to make sales of energy, capacity, and ancillary services at market-based rates. Following the Transaction, Buyer will sell all of the energy and capacity from the Project Assets to Seller pursuant to the Renewable Energy Purchase Agreement by and between Buyer and Seller, dated as of September 3, 2025 ("REPA").

Each of the Confluence Project Companies is a special purpose entity established for the purpose of owning and operating its respective Project Asset. Specifically, Confluence Alcona was formed to own and operate the Alcona Project; Confluence Calkins Bridge was formed to own and operate the Calkins Bridge Project; Confluence Cooke was formed to own and operate the Cooke Project; Confluence Croton was formed to own and operate the Croton Project; Confluence Five Channels was formed to own and operate the Five Channels Project; Confluence Foote was formed to own and operate the Foote Project; Confluence Hardy was formed to own and operate the Hardy Project; Confluence Hodenpyl was formed to own and operate the Hodenpyl Project; Confluence Loud was formed to own and operate the Loud

Project; Confluence Mio was formed to own and operate the Mio Project; Confluence Rogers was formed to own and operate the Rogers Project; Confluence Tippy was formed to own and operate the Tippy Project; and Confluence Webber was formed to own and operate the Webber Project.

Prior to consummation of the Transaction, each Confluence Project Company intends to certify as a qualifying small power production facility ("QF") under the Public Utility Regulatory Policies Act of 1978, as amended ("PURPA"), for its respective Project Asset. Additionally, prior to the consummation of the Transaction, Confluence Hydro Hardy will submit an application requesting Commission authorization to make sales of energy, capacity, and ancillary services at market-based rates. Each Confluence Project Company will sell all of the energy and capacity from its respective Project Asset to Buyer, which in turn will sell the energy and capacity to Seller pursuant to the REPA.

Each Confluence Project Company is a wholly owned direct subsidiary of Buyer, which is a wholly owned direct subsidiary of Confluence Hydro HoldCo, LLC. Confluence Hydro HoldCo, LLC is owned by Confluence Hydro Parallel Holdings, LLC ("Confluence Hydro Parallel Holdings") and Hull Street Energy Partners III, L.P. ("HSEP III"). Confluence Hydro Parallel Holdings is a wholly owned direct subsidiary of Hull Street Energy Partners III (Parallel), L.P. ("HSEP III Parallel"). HSEP III and HSEP III Parallel are managed and controlled by their general partner, HSE Partners III GP, LP ("HSE Partners III GP"), which owns all of the general partner interests in HSEP III and HSEP III Parallel. HSE Partners III GP is managed and controlled by its general partner, Hull Street Energy, LLC ("HSE"). Through HSE Partners III GP, HSE has sole responsibility and authority for the management and control of HSEP III and HSEP III Parallel.

The limited partner interests in HSEP III and HSEP III Parallel are owned by passive limited partner investors ("HSEP III LP Investors"), who lack the ability to manage or control HSEP III or HSEP III Parallel. However, the HSEP III LP Investors have the right to participate in a super-majority vote to remove HSE Partners III GP as general partner without cause. The Commission has held that upstream limited partner investors of an affiliate of Buyer that had similar rights owned voting securities, and therefore limited partners that owned 10 percent or more of the limited partnership interests were considered upstream affiliates of the public utility.[9] The only HSEP III LP Investor that owns 10 percent or more of the limited partnership interests in HSEP III and HSEP III Parallel is the Comptroller of the State of New York, as Trustee of the New York State Common Retirement Fund. The New York State Common Retirement Fund is a governmental entity that does not have any owners or voting securities and therefore does not have any upstream affiliates. Other than with respect to Buyer and other public utilities owned by funds managed and controlled by HSE, which are already identified as affiliates of Buyer herein, the New York State Common Retirement Fund is not affiliated with, nor holds or controls, directly or indirectly with the power to vote, voting or equivalent securities in any electric generation facility, electric transmission facility, or any inputs to electric power production or electricity products, as defined in 18 C.F.R. §§ 33.4 and 35.36, in the United States. Furthermore, the New York State Common Retirement Fund has not appointed any person to the position of officer or director of any public utility or any company that owns, directly or indirectly, any electric generation facility, electric transmission facility, or any inputs to electric power production or electricity products, as defined in 18 C.F.R. §§ 33.4 and 35.36, in the United States.

[9] *EF Oxnard LLC*, 189 FERC ¶ 61,010 (2024), *order on reh'g*, 190 FERC ¶ 61,040 (2025).

HSE is a private equity firm headquartered in Bethesda, Maryland that is primarily involved in the development and acquisition of, and investment in, energy infrastructure assets, and related ownership, operation, and management of these assets, including electric generation. HSE's energy-related affiliates are described in *Exhibit B* to this Application. HSE is not currently affiliated with any generation facilities within the MISO BAA, the relevant market for the Transaction.

HSE is not affiliated with any entity that owns or controls any electric transmission facilities in the United States, except for limited and discrete equipment necessary to interconnect individual generating facilities to the transmission grid. Other than as described in this Application, HSE is not affiliated with any entity that owns or controls any inputs to electricity products or inputs to electric power production, as those terms are defined in 18 C.F.R. §§ 33.4 and 35.36.[10] HSE is not affiliated with any public utility with a franchised electric service territory.

HSE is currently controlled by Sarah Wright, an individual.[11] Except with respect to facilities described in this Application, Ms. Wright is not affiliated with, nor holds or controls, directly or indirectly with the power to vote, voting or equivalent securities in any electric generation facility, electric transmission facility, or any essential input to electricity products or electric power production, as defined in 18 C.F.R. §§ 33.4 and 35.36.

Ms. Wright is a passive investor with respect to four fully committed run-of-river hydroelectric generation facilities in Ware, Massachusetts (each of which is a qualifying facility under PURPA), having a combined capacity of 2.4 MW, and she has no control over the day-to-

[10] 18 C.F.R. § 35.36.

[11] Ms. Wright is the managing member of HSE and has sole control and decision-making authority with respect to HSE.

day management and business operations of these facilities. Ms. Wright's passive interests in these facilities do not constitute voting securities, consistent with the passive interests in *AES Creative Resources, L.P.*[12] Other than through HSE and its affiliates, Ms. Wright is not employed by, does not hold the position of officer or director of, and is not a non-independent member of the board of, a public utility or a holding company of a public utility in the United States.

B. The Transaction

Pursuant to the Transaction, (1) Buyer will directly acquire the Project Assets from Seller, and (2) subsequently, Buyer will contribute the Project Assets to the Confluence Project Companies. Upon consummation of the Transaction, Buyer will acquire from the Confluence Project Companies all of the energy and capacity from the Project Assets, which Buyer will then sell to Seller pursuant to the REPA.

As a result of the Transaction, Buyer will indirectly own the Project Assets, and each Confluence Project Company will be the sole direct owner of its respective Project Asset, as described in Part II(A)(2). Seller will not retain any ownership interests in, and will no longer be affiliated with, the Project Assets following the consummation of the Transaction.

The details of the Transaction are set forth in the Purchase Agreement, which is provided as confidential *Exhibit I*. Applicants request confidential treatment of the Purchase Agreement because it contains sensitive commercial and financial information that is not publicly available. As described below, the Transaction will have no adverse effect on competition, rates, or regulation, and does not raise any cross-subsidization issues. Accordingly, Applicants request that the Commission issue an order approving the Transaction as described herein.

[12] 129 FERC ¶ 61,239 at P 26 (2009).

C. Description of the Jurisdictional Facilities Affected by the Transaction

The jurisdictional facilities that will be affected by the Transaction consist of the limited and discrete interconnection facilities associated with the Project Assets, and any related agreements, books, and records.

III. REQUEST FOR PRIVILEGED AND CONFIDENTIAL TREATMENT

Pursuant to 18 C.F.R. §§ 33.8 and 388.112, Applicants request privileged and confidential treatment of *Exhibit I* and the proposed accounting entries submitted as *Attachment 2*, because each contains sensitive commercial and financial information that is privileged or confidential and not publicly available. Such information is non-public and is exempt from the mandatory public disclosure requirements of the Freedom of Information Act ("FOIA").[13] A proposed form of protective agreement that is consistent with the Commission's model protective agreement is attached to this Application as *Attachment 3*.

IV. REQUEST FOR FPA SECTION 203 APPROVAL

A. Applicability of FPA Section 203

Applicants seek Commission authorization for the Transaction under FPA sections 203(a)(1)(A), 203(a)(1)(B), and 203(a)(1)(D). Seller is a public utility and will dispose of facilities subject to the jurisdiction of the Commission. Buyer will be a public utility at the time the Transaction is consummated and will acquire "existing generation facilities." In addition, the contribution of the Project Assets from Buyer to the Confluence Project Companies will result in the disposition of jurisdictional facilities by Buyer and the acquisition of an "existing generation

[13] 5 U.S.C. § 552 (2018)*; see also Food Mktg. Inst. v. Argus Leader Media*, 139 S.Ct. 2356, 2364-66 (2019) (rejecting the "substantial competitive harm" requirement articulated in *National Parks & Conservation Ass'n v. Morton*, 498 F.2d 765 (D.C. Cir. 1974), and stating that, "where commercial or financial information is both customarily and actually treated as private by its owner and provided to the government under an assurance of privacy, the information is 'confidential'" and thus exempt from disclosure under FOIA).

facility" by Confluence Hydro Hardy, which will be a public utility at the time the Transaction is consummated.[14]

B. Satisfaction of FPA Section 203 Criteria

Section 203(a) of the FPA provides that the Commission will approve jurisdictional transactions that are "consistent with the public interest." As explained in the *Merger Policy Statement* and in Order Nos. 642 and 669,[15] the Commission examines three factors in analyzing whether a proposed transaction is consistent with the public interest: (1) the effect on competition; (2) the effect on rates; and (3) the effect on regulation. In addition, section 203 requires a showing that a proposed transaction will not result in cross-subsidization of a non-utility associate company or pledge or encumbrance of utility assets for the benefit of an associate company. As explained below, the Transaction is consistent with the public interest, does not result in cross-subsidization, and should be approved.

C. No Adverse Effect on Competition

1. The Transaction Does Not Raise Horizontal Market Power Concerns

The Transaction does not raise any horizontal market power concerns. Section 33.3(a)(2)(i) of the Commission's regulations provides that a horizontal competitive screen

---

[14] Buyer and the Confluence Project Companies are not currently public utilities under the FPA. However, as discussed herein, Buyer and the Confluence Project Companies will be public utilities by the time the Transaction is consummated. While the Confluence Project Companies will be QFs, Confluence Hydro Hardy has a generation capacity in excess of 30 MW and therefore is not exempt from section 203 of the FPA. *See* 18 C.F.R. § 292.601.

[15] *Inquiry Concerning the Commission's Merger Policy Under the Federal Power Act: Policy Statement*, Order No. 592, FERC Stats. & Regs. ¶ 31,044 (1996) ("Merger Policy Statement"), *order on reconsideration*, Order No. 592-A, 79 FERC ¶ 61,321 (1997); *Revised Filing Requirements Under Part 33 of the Commission's Regulations*, Order No. 642, 93 FERC ¶ 61,164 (2000), *order on reh'g*, Order No. 642-A, 94 FERC ¶ 61,289 (2001) (implementing the policies stated in the Merger Policy Statement); *Transactions Subject to FPA Section 203*, Order No. 669, 113 FERC ¶ 61,315 at P 194 (2005), *order on reh'g*, Order No. 669-A, 115 FERC ¶ 61,097 (2006), *order on reh'g and clarification*, Order No. 669-B, 116 FERC ¶ 61,076 (2006).

analysis is not required if the applicants affirmatively demonstrate "that the merging entities do not currently conduct business in the same geographic markets or that the extent of the business transactions in the same geographic markets is *de minimis*."[16] Neither Buyer nor any of its affiliates, including the Confluence Project Companies, owns any generation facilities in the MISO BAA, which is the relevant geographic market. Neither Seller and Buyer nor Seller and the Confluence Project Companies conduct business in the same relevant geographic market. Therefore, the Transaction will not result in any new affiliation or combination of electric generation assets that could have an impact on competition in the MISO BAA. Because Buyer and the Confluence Project Companies are new market entrants in the MISO BAA, the Transaction will not cause an increase in overall market concentration and is expected to result in either no change or a decrease in overall market concentration.[17] Additionally, following the Transaction's consummation, Seller will take the energy and capacity from the Project Assets pursuant to the REPA and, therefore, the Transaction will not result in a change in control over the Project Assets' output.

Following the Transaction, Buyer, the Confluence Project Companies, and their affiliates will have a *de minimis* presence in the relevant market. The Project Assets aggregate to approximately 131.57 MW. Compared to the approximately 124,170 MW of installed capacity in the MISO BAA,[18] the post-transaction market share of Buyer, the Confluence Project Companies, and their affiliates will be approximately 0.11 percent of the installed capacity in the

---

[16] 18 C.F.R. § 33.3(a)(2)(i).

[17] *See Pedricktown Cogeneration Ltd. P'ship*, 98 FERC ¶ 62,217 (2002) (approving transaction without requiring competitive screen analysis where acquiror did not conduct business in the relevant market and would be a new market entrant); *Griffith Energy LLC*, 171 FERC ¶ 62,023 (2020) (same).

[18] *See* MISO Annual Electric Balancing Authority Area and Planning Area Report for Year Ending December 31, 2024 (filed May 30, 2025).

MISO BAA following consummation of the Transaction. Such a post-transaction market share is consistent with, and well below, the levels the Commission has found to be *de minimis*.[19] Accordingly, the Transaction does not raise horizontal market power concerns.

2. The Transaction Does Not Raise Vertical Market Power Concerns

The Transaction also does not raise any vertical market power concerns. The Transaction does not involve any transmission facilities, except for the limited and discrete equipment necessary to interconnect individual generating facilities to the transmission grid, and does not involve upstream inputs to electricity products. With one exception addressed below, none of Buyer, the Confluence Project Companies, or their affiliates owns or controls electric transmission facilities (other than facilities used to interconnect generation facilities with the transmission grid) or upstream inputs to electricity products. The one exception is that Pittsfield Generating Company, L.P. ("Pittsfield Generating"), a subsidiary of HSE and its affiliates, owns BFALP-GP, LLC, which is the general partner of Berkshire Feedline Acquisition Limited Partnership, which in turn owns a 6.2-mile lateral pipeline in Massachusetts that serves Pittsfield Generating's generation facility. However, the Commission has found that the combination of intrastate natural gas storage or distribution facilities and electric generation does not raise market power concerns.[20] Moreover, the lateral is operated by an unaffiliated third party,

[19] *See, e.g.*, *ALLETE, Inc.*, 189 FERC ¶ 61,215 at P 33 (2024) (agreeing that the overlap was *de minimis* where the post-transaction market shares did not exceed 2.2 percent); *Algonquin Power Co.*, 189 FERC ¶ 61,214 at P 65 (2024) (agreeing that the overlap was *de minimis* where the post-transaction market share was 1.1 percent); *Allegheny Energy Supply Co., LLC*, 129 FERC ¶ 62,134 at 64,425 (2009) (determining that a post-transaction share of approximately 5.9 percent of the installed capacity in PJM was *de minimis*); *MACH Gen, LLC*, 127 FERC ¶ 62,166 at 64,464 & n.11 (2009) (determining that a post-transaction share of approximately 5.3 percent of the installed capacity in the ISO New England, Inc. market was *de minimis*).

[20] *See, e.g.*, *Exelon Corp.*, 138 FERC ¶ 61,167 at P 113 (2012) (finding that the proposed combination of generation and natural gas distribution assets would not harm competition because applicants will only control a relatively small amount of natural gas deliverable capacity and storage capacity); *Wis. Energy*

Berkshire Gas Company, which also has capacity on the lateral, and that will continue to be the case following the consummation of the Transaction. Further, the lateral is not proximate to MISO or the Project Assets. Additionally, Pittsfield Generating has affirmatively stated that neither it nor its affiliates have erected barriers to entry into the relevant market and will not erect barriers to entry into the relevant market.[21]

In conclusion, the Transaction raises no vertical competitive concerns, and no vertical competitive analysis screen is necessary.

D. No Adverse Effect on Rates

The Transaction will have no adverse effect on rates. The Commission has explained that its primary concern regarding the effects of a transaction on rates is the protection of transmission customers and wholesale ratepayers.[22] The Commission also has found that the sale of energy, capacity, and ancillary services at market-based rates does not raise concerns about adverse impacts on rates.[23] Seller currently makes sales of energy, capacity and ancillary services from the Project Assets at market-based rates. Buyer and Confluence Hardy will obtain

Corp., 151 FERC ¶ 61,015 at P 47 (2015) (finding that the merger would not give applicants the ability to withhold natural gas transportation to disadvantage rival generation in part because state regulation of applicants' gas distribution systems limits their ability to withhold natural gas from generators); *Nat'l Grid plc*, 117 FERC ¶ 61,080 at P 30 (2006) (explaining that for a merger to create or enhance vertical market power, both the upstream and downstream markets must be highly concentrated) (citing Order No. 642, FERC Stats. & Regs. ¶ 31,111 at 31,911); *Mkt.-Based Rates for Wholesale Sales of Elec. Energy, Capacity & Ancillary Servs. by Pub. Utils.*, Order No. 697, 119 FERC ¶ 61,295 at P 446 (2007) (adopting a "rebuttable presumption that sellers cannot erect barriers to entry with regard to ownership or control of, or affiliation with any entity that owns or controls . . . intrastate natural gas storage or distribution facilities"), (subsequent history omitted).

[21] *See Pittsfield Generating Co., L.P.*, Notice of Non-Material Change in Status, Docket No. ER18-213-001 (filed July 30, 2018).

[22] *See, e.g.*, *New England Power Co.*, 82 FERC ¶ 61,179 at 61,659, *order on clarification & reh'g*, 83 FERC ¶ 61,275 (1998), *aff'd sub nom. Town of Norwood v. FERC*, 202 F.3d 392 (2000); *Merger Policy Statement*, FERC Stats. & Regs. ¶ 31,044 at 30,123.

[23] *See, e.g.*, *Ameren Energy Generating Co.*, 145 FERC ¶ 61,034 at PP 83-88 (2013).

market-based rate authorization prior to consummation of the Transaction and will sell energy, capacity, and certain ancillary services at market-based rates.[24] Moreover, the REPA, pursuant to which Buyer will sell energy and capacity from the Project Assets, is subject to approval by the Michigan Public Service Commission. In addition, the Transaction does not involve transmission rates or transmission customers. Accordingly, the Transaction will have no adverse effect on wholesale ratepayers or transmission customers.

E. No Impairment of the Effectiveness of State or Federal Regulation

The Transaction will not have an adverse impact on regulation at the federal or state level. Seller will remain a public utility subject to both Commission and state jurisdiction. The Commission will have jurisdiction over Buyer and the Confluence Project Companies as public utilities, and the Commission's existing jurisdiction over the Project Assets under Part I of the FPA will not change.

F. No Potential for Cross-Subsidization

Section 203(a)(4) of the FPA requires the Commission to determine whether a transaction will "result in cross-subsidization of a non-utility associate company or the pledge or encumbrance of utility assets for the benefit of an associate company" and, if so, whether the cross-subsidy, pledge, or encumbrance will be consistent with the public interest.[25] The

[24] The sales energy and capacity from the Confluence Project Companies (other than Confluence Hardy) to Buyer will be exempt from sections 205 and 206 of the FPA because those Project Assets will be QFs with a generating capacity under 20 MW. *See* 18 C.F.R. § 292.601.

[25] An associate company is any company in the same utility holding company system. A non-utility associate company is any associate company in a holding company system other than a public utility that has wholesale or retail customers served under cost-based rate regulation. *See* 18 C.F.R. § 33.1(b)(2) and (4).

Commission has stated that the concern over cross-subsidization is principally a concern over the effect of a proposed transaction on captive ratepayers.[26]

The Commission has identified certain categories of "safe harbor" transactions that are unlikely to raise cross-subsidization concerns.[27] The Commission has stated that "[w]here a franchised public utility transacts only with nonaffiliated entities, the potential for inappropriate cross-subsidization of a non-utility associate company or the pledge or encumbrance of utility assets for the benefit of an associate company generally is not present. Therefore, compliance with Exhibit M could be satisfied with a showing that a public utility transacts only with nonaffiliated entities."[28]

Because the Transaction is between nonaffiliated entities and does not involve the transfer of assets between a franchised public utility and an affiliated public utility, the Transaction qualifies for the safe harbor.

In Order Nos. 669, 669-A, and 669-B, the Commission established a four-part test that applicants must satisfy in order to demonstrate that the proposed transaction will not result in improper cross-subsidization, or the pledge or encumbrance of utility assets of a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities. Under this test, the Commission examines whether, at the time of the transaction or in the future, the proposed transaction will result in: (i) any transfer of facilities between a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission

---

[26] Order No. 669 at P 167.

[27] *Supplemental Policy Statement*, 120 FERC ¶ 61,060 at P 16.

[28] *Id*. P 19.

facilities, and an associate company; (ii) any new issuance of securities by a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, for the benefit of an associate company; (iii) any new pledge or encumbrance of assets of a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, for the benefit of an associate company; or (iv) any new affiliate contract between a non-utility associate company and a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, other than non-power goods and services agreements subject to review under sections 205 and 206 of the FPA. None of these circumstances is present with respect to the Transaction.

Consistent with the requirements of Order Nos. 669, 669-A, and 669-B, Applicants include verifications regarding each of these factors in *Exhibit M* to this Application, which relates to the time of the Transaction as well as the future and is based on facts and circumstances known or reasonably foreseeable to Applicants.[29] Accordingly, the Transaction does not raise any cross-subsidization concerns.

V. INFORMATION AND EXHIBITS REQUIRED BY SECTION 33.2 OF THE COMMISSION'S REGULATIONS

In accordance with section 33.2 of the Commission's regulations, Applicants provide the following information:

(a) Names and principal business offices of Applicants

Consumers Energy Company
One Energy Plaza

(b) Names and addresses of the persons authorized to receive notices and communications

The names and addresses of persons authorized to receive notices and communications with respect to this Application are identified in Part I, above.

(c) Description of Applicants, including

(1) Exhibit A – Business activities of Applicants

The business activities of Applicants are described in Part II, above.

Accordingly, Applicants request a waiver of the requirement to file *Exhibit A*.

(2) Exhibit B – Energy subsidiaries and energy affiliates and their business activities

Exhibit B includes Buyer's asset appendix generated from the Commission's relational database for market-based rate sellers. Because Seller will no longer own any interest in the Project Assets following the Transaction, Applicants request a waiver of the requirement to include any energy affiliates of Seller in *Exhibit B*.

(3) Exhibit C – Organizational Charts

Simplified pre-Transaction and post-Transaction organizational charts are included in *Exhibit C.*

(4) Exhibit D – Business agreements

The Transaction involves no jurisdictional arrangements among the parties apart from those described in Part II above. There are no strategic alliances, joint ventures, tolling arrangements, or other proposed business arrangements to which Applicants are a party that are affected by the Transaction, other than as described herein. Therefore, Applicants request a waiver of the requirement to file *Exhibit D*.

(5) Exhibit E – Common officers or directors

There are no common officers or directors between Seller and its affiliates, on the one hand, and Buyer, the Confluence Projects Companies, and their affiliates, on the other hand. To the extent that any FPA-jurisdictional interlocking appointment is to be made following consummation of the Transaction, the appropriate filings under Part 45 of the Commission's regulations will be submitted. Accordingly, Applicants request a waiver of the requirement to file *Exhibit E*.

(6) Exhibit F – Description of customers

Buyer and the Confluence Project Companies will not have any wholesale customers prior to the consummation of the Transaction, and Seller sells power at wholesale pursuant to its market-based rate tariff on file with the Commission. These sales are reported in the Electric Quarterly Reports required to be filed with the Commission. Accordingly, Applicants request a waiver to provide this information in a separate *Exhibit F*. Also, Applicants request a limited waiver of the information requirements of 18

C.F.R. § 33.2(c)(6), to the extent waiver may be deemed necessary, to list customers of Buyer and the Confluence Project Companies' public utility affiliates, because that information is not necessary or relevant to evaluating the Transaction and would be unduly burdensome to provide.

(d) Exhibit G – Description of jurisdictional facilities

The jurisdictional facilities affected by the Transaction are described in Part II above and *Exhibit G*.

(e) Exhibit H – Narrative descriptions of the Transaction

A description of the Transaction is set forth in Part II above, which includes identification of the parties, description of the jurisdictional facilities associated with or affected by the Transaction, and the effect of the Transaction on such jurisdictional facilities. Accordingly, Applicants request a waiver of the requirement to file *Exhibit H*.

(f) Exhibit I – Contracts related to the proposed Transaction

The Transaction will be effectuated pursuant to the Purchase Agreement, which is attached as *Exhibit I*. Pursuant to 18 C.F.R. §§ 33.8 and 388.112, Applicants request confidential and privileged treatment of *Exhibit I*, as discussed in Part III above. To the extent necessary, Applicants also request a waiver of the requirements of 18 C.F.R. § 33.2(f) as to exhibits and schedules to the Purchase Agreement and other incidental contracts and written instruments that may be entered into by the parties, none of which will be inconsistent with the Purchase Agreement contained in *Exhibit I* or the description of the Transaction set forth in this Application.[30]

[30] *See EIF Berkshire Holdings, LLC*, 116 FERC ¶ 61,273 (2006).

(g) Exhibit J – Consistency of the Transaction with the public interest

As discussed above in Part II, the facts provided in this Application are sufficient to demonstrate that the Transaction will be in the public interest. Accordingly, Applicants request a waiver of the requirement to file *Exhibit J*.

(h) Exhibit K – Maps

A map of the Projects Assets is attached as *Exhibit K*. Applicants respectfully request a waiver of the requirement of Section 33.2(h) of the Commission's regulations[31] to provide a map of the physical property to the extent it would require the submission of additional information in *Exhibit K*.

(i) Exhibit L – Regulatory orders

Applicants identify in *Exhibit L* the other regulatory bodies required to issue licenses, orders, or other approvals in connection with the Transaction.

(j) Exhibit M – Cross-subsidization

The facts demonstrating that the Transaction will not result in cross-subsidization of a non-utility associate company or pledge or encumbrance of utility assets for the benefit of an associate company are provided in Part IV(F) of this Application. The Applicants additionally submit *Exhibit M* with this Application to confirm that the Transaction will not result in impermissible cross-subsidization.

VI. INFORMATION ON PROPOSED ACCOUNTING ENTRIES REQUIRED BY SECTION 33.5 OF THE COMMISSION'S REGULATIONS

Proposed accounting entries for Consumers Energy are attached hereto as confidential *Attachment 2*.

[31] 18 C.F.R. § 33.2(h).

Buyer and the Confluence Project Companies are not required to maintain their books of account in accordance with the Commission's Uniform System of Accounts.

VII. VERIFICATIONS

Signed verifications by persons having authority with respect thereto and having knowledge of the matters set forth in this Application are included as *Attachment 1*.

VIII. CONCLUSION

For the reasons set forth above, Applicants request that the Commission: (i) issue an order approving the Transaction; (ii) grant the waivers requested herein; and (iii) grant Applicants' request for confidential treatment of *Exhibit I* and *Attachment 2*.

Respectfully submitted,

Applicants have requested a waiver of the requirement to file

Exhibits A, D, E, F, H, J

Exhibit B

U.S. Energy Affiliates

The energy affiliates of Buyer and the Confluence Project Companies are provided in a separate Excel file in the format generated by the relational database for market-based rate sellers developed and administered by FERC pursuant to the requirements set forth in *Data Collection for Analytics and Surveillance and Market-Based Rate Purposes*, Order No. 860, 84 Fed. Reg. 36,390 (July 26, 2019), 168 FERC ¶ 61,039 (2019), *order on reh'g*, Order No. 860-A, 170 FERC ¶ 61,129 (2020). For this purpose, Applicants have utilized the definition of "subsidiary" set forth in FERC's regulations at 18 C.F.R. 366.1 and the definition of "affiliate" set forth in FERC's regulations at 18 C.F.R. 35.36(a)(9).

Licenses, Orders, and Other Approvals from Other Regulatory Bodies Required in Connection with the Transaction

In addition to the authorization sought herein from the Commission under section 203 of the FPA and approvals by the Commission to transfer and amend the hydroelectric licenses associated with the 13 Project Assets under Part I of the FPA, Applicants are seeking licenses, orders, or other approvals from the following other regulatory bodies in connection with the Transaction:

- Approval by the Michigan Public Service Commission of the transactions contemplated by the Purchase Agreement, including the REPA
- The expiration or earlier termination of all applicable waiting period under the Hart-Scott-Rodino Antitrust Improvement Act of 1976
- Approval by the Federal Communications Commission to transfer or assign any applicable Federal Communications Commission licenses

Exhibit M

Statements Regarding Cross-Subsidization

The Transaction does not present a cross-subsidization concern with respect to the Project Assets. Pursuant to section 33.2(j)(1) of the Commission's regulations, Applicants provide assurances and verify, based on facts and circumstances known to Applicants or that are reasonably foreseeable, that the Transaction will not result in, at the time of the Transaction or in the future, cross-subsidization of a non-utility associate company or pledge or encumbrance of utility assets for the benefit of an associate company, including:

(1) Any transfer of facilities between a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, and an associate company;

(2) Any new issuance of securities by a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, for the benefit of an associate company;

(3) Any new pledge or encumbrance of assets of a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, for the benefit of an associate company; or

(4) Any new affiliate contract between a non-utility associate company and a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, other than non-power goods and services agreements subject to review under sections 205 and 206 of the FPA.

PROTECTIVE AGREEMENT

This Protective Agreement ("Agreement") is entered into this ___ day of _____, by and between Consumers Energy Company, Confluence Hydro, LLC, Confluence Hydro Alcona, LLC, Confluence Hydro Calkins Bridge, LLC, Confluence Hydro Cooke, LLC, Confluence Hydro Croton, LLC, Confluence Hydro Five Channels, LLC, Confluence Hydro Foote, LLC, Confluence Hydro Hardy, LLC, Confluence Hydro Hodenpyl, LLC, Confluence Hydro Loud, LLC, Confluence Hydro Mio, LLC, Confluence Hydro Rogers, LLC, Confluence Hydro Tippy, LLC, Confluence Hydro Webber, LLC ("Applicants") and _____ ("Intervenor"), and shall govern the use of all Privileged Materials produced by Applicants to Intervenor, or vice versa, in connection with the proceeding before the Federal Energy Regulatory Commission (the "Commission") in Docket No._____. Applicants and Intervenor are sometimes referred to herein individually as a "Party" or jointly as the "Parties."

1. The Commission's regulations and its policy governing the labelling of controlled unclassified information ("CUI") establish and distinguish the respective designations of Privileged Material and/or Critical Energy/Electric Infrastructure Information ("CEII"). *See Notice of Document Labelling Guidance for Documents Submitted to or Filed with the Commission or Commission Staff*, 83 Fed. Reg. 21,290 (May 9, 2018) (issued by Commission May 3, 2018).

2. Applicants filed Privileged Materials in Commission Docket No. _____ (the "proceeding") and Intervenor is a Participant in such proceeding, as the term Participant is defined in 18 C.F.R. § 382.102(b), or has filed a motion to intervene or a notice of intervention in such proceeding. Applicants and Intervenor enter into this Agreement in accordance with

their respective rights and obligations set forth in 18 C.F.R. § 388.112(b)(2). Notwithstanding any order terminating such proceeding, this Agreement shall remain in effect until specifically modified or terminated by the Commission or court of competent jurisdiction.

3. This Agreement applies to the following two categories of Privileged Materials: (A) a Party may designate as protected those materials which customarily are treated by that Party as commercially sensitive or proprietary or material subject to a legal privilege, which are not available to the public, and which, if disclosed freely, would subject that Party or its customers to risk of competitive disadvantage or other business injury; and (B) a Party must designate as protected those materials which contain CEII, as defined in 18 C.F.R. §§ 388.113(a), and (c).

4. Definitions – For purposes of this Agreement:

(a) (1) Participant: as defined in 18 C.F.R. § 385.102(b); and (2) Party: as defined in 18 C.F.R. § 385.102(c).

(b) (1) The term "Privileged Materials" means (A) materials provided by a Party in association with the proceeding and designated by such Party as protected; (B) any information contained in or obtained from such designated materials; (C) any other materials that are made subject to this Protective Agreement by the Commission, by any court or other body having appropriate authority, or by agreement of the Participants; (D) material that is privileged under federal, state, or foreign law, such as work-product privilege, attorney-client privilege, or governmental privilege, and that is designated as Privileged Materials by such Participant; (E) notes of Privileged Materials; and (F) copies of Privileged Materials. The Party producing the Privileged Materials shall physically mark them on each page as "CUI//PRIV" to indicate that they are Privileged Materials. If the Privileged Materials contain CEII, the Party producing such information shall additionally mark on each page containing such information the words "Contains Critical Energy/Electric Infrastructure Information—Do Not Release."

(2) The term "Notes of Privileged Materials" means memoranda, handwritten notes, or any other form of information (including electronic form) which copies or discloses materials described in Paragraph 4(b)(1). Notes of Privileged Materials are subject to the same restrictions provided in this Agreement for Privileged Materials except as specifically provided in this Agreement.

(3) Privileged Materials shall not include (A) any information or document contained in the publicly available files of the Commission or of any other federal or state agency, or any federal or state court, unless the information or document has been determined to be privileged by such agency or court, or (B) information that is public knowledge, or which becomes public knowledge, other than through disclosure in violation of this Agreement. Privileged Materials do include any information or documents contained in the files of the Commission that have been designated as CEII.

(c) Critical Energy/Electric Infrastructure Information (CEII): as defined at 18 C.F.R. §§ 388.113(a), and (c).

(d) The term "Non-Disclosure Certificate" shall mean the certificate annexed hereto by which Reviewing Representatives have been granted access to Privileged Materials and/or CEII

must certify their understanding that such access to Privileged Materials is provided pursuant to the terms and restrictions of this Agreement, and that they have read the Agreement and agree to be bound by it. Each Party shall provide a copy of the Non-Disclosure Certificate(s) executed by its Reviewing Representative(s) to the other Party prior to such Reviewing Representative(s) receiving access to any Privileged Materials. All Non-Disclosure Certificates must be served on all Participants on the official service list maintained by the Secretary of the Commission for this proceeding.

(e) The term "Reviewing Representative" shall mean a person who has signed a Non-Disclosure Certificate and who is:

(1) Commission Trial staff designated as such in this proceeding;

(2) an attorney retained by a Party for purposes of the proceeding;

(3) attorneys, paralegals, and other employees associated for purposes of the proceeding with an attorney described in Paragraph (4)(e)(2);

(4) an expert or an employee of an expert retained by a Party for the purpose of advising, preparing for, submitting evidence or testifying in the proceeding;

(5) a person designated as a Reviewing Representative by order of the Commission; or

(6) employees or other representatives of a Party with significant responsibility for matters involving the proceeding.

5. Privileged Materials shall be made available under the terms of this Agreement only to Parties and only through their Reviewing Representative(s) as provided in Paragraphs 8-10.

6. Privileged Materials shall remain available to a Party until the later of the date that an order terminating the proceeding becomes no longer subject to judicial review, or the date that any other Commission proceeding relating to the Privileged Material is concluded and no longer subject to judicial review. If requested to do so in writing after that date, the Party shall, within 15 days of such request, return the Privileged Materials (excluding Notes of Privileged Materials) to the Party that produced them, or shall destroy the materials, except that copies of filings, official transcripts and exhibits in the proceeding that contain Privileged Materials, and Notes of Privileged Materials may be retained, if they are maintained in accordance with Paragraph 7, below. Within such time period the Party, if requested to do so, shall also submit to the producing Party an affidavit stating that, to the best of its knowledge, all Privileged Materials and all Notes of Privileged Materials have been returned or have been destroyed or will be maintained in accordance with Paragraph 7. To the extent Privileged Materials are not returned or destroyed, they shall remain subject to this Agreement.

7. All Privileged Materials shall be maintained by the Party in a secure place. Access to those materials shall be limited to those Reviewing Representatives specifically authorized pursuant to Paragraphs 9-10.

8. Privileged Materials shall be treated as confidential by the Party and its Reviewing Representative(s) in accordance with the certificate executed pursuant to Paragraph 10.

Privileged Materials shall not be used except as necessary for the conduct of the proceeding, nor shall they (or the substance of their contents) be disclosed in any manner to any person except a Reviewing Representative who is engaged in the conduct of the proceeding and who needs to know the information in order to carry out that person's responsibilities in the proceeding. Reviewing Representatives may make copies of Privileged Materials, but such copies become Privileged Materials. Reviewing Representatives may make notes of Privileged Materials, which shall be treated as Notes of Privileged Materials if they disclose the contents of Privileged Materials.

9. (a) If a Reviewing Representative's scope of employment includes the marketing of energy or the buying or selling of electric generation or transmission assets, the direct supervision of any employee or employees whose duties include the foregoing, the provision of consulting services to any person whose duties include the foregoing, or the direct supervision of any employee or employees whose duties include the foregoing, such Reviewing Representative may not use information contained in any Privileged Materials obtained through the proceeding to give any Party or any competitor of any Party a commercial advantage.

(b) If a Party wishes to designate as a Reviewing Representative a person not described in Paragraph 4(e) above, the Party shall seek agreement from the Party providing the Privileged Materials. If an agreement is reached that person shall be a Reviewing Representative pursuant to Paragraphs 4(e) above with respect to those materials. If no agreement is reached, the Party shall submit the disputed designation to the Commission for resolution.

10. (a) A Reviewing Representative shall not be permitted to inspect, participate in discussions regarding, or otherwise be permitted access to Privileged Materials pursuant to this Agreement unless that Reviewing Representative has first executed a Non-Disclosure Certificate; provided, that if an attorney qualified as a Reviewing Representative has executed such a certificate, the paralegals, secretarial and clerical personnel under the attorney's instruction, supervision or control need not do so. A copy of each Non-Disclosure Certificate shall be provided to counsel for the Party asserting confidentiality prior to disclosure of any Privileged Material to that Reviewing Representative. All executed Non-Disclosure Certificates must be served on all Participants on the official service list maintained by the Secretary of the Commission for this proceeding.

(b) Attorneys qualified as Reviewing Representatives are responsible for ensuring that persons under their supervision or control comply with this Agreement, and must take all reasonable precautions to ensure that Privileged Material and/or CEII are not disclosed to unauthorized persons.

11. Any Reviewing Representative may disclose Privileged Materials to any other Reviewing Representative as long as the disclosing Reviewing Representative and the receiving Reviewing Representative both have executed a Non-Disclosure Certificate. In the event that any Reviewing Representative to whom the Privileged Materials are disclosed ceases to be engaged in the proceeding, or is employed or retained for a position whose occupant is not qualified to be a Reviewing Representative under Paragraph 4(e), access to Privileged Materials by that person shall be terminated. Even if no longer engaged in the proceeding, every person

who has executed a Non-Disclosure Certificate shall continue to be bound by the provisions of this Agreement and the certification.

12. Subject to Paragraph 20, the Commission shall resolve any disputes arising under this Agreement. Prior to presenting any dispute under this Agreement to the Commission, the parties to the dispute shall use their best efforts to resolve it. If a Party contests the designation of materials as privileged, it shall notify the Party that provided the Privileged Materials by specifying in writing the materials whose designation is contested. This Agreement shall automatically cease to apply to such materials five (5) business days after the notification is made unless the Party, within said 5-day period, files a motion with the Commission, with supporting affidavits, demonstrating that the materials should continue to be privileged. In any challenge to the designation of materials as Privileged, the burden of proof shall be on the Party seeking protection. If the Commission finds that the materials at issue are not entitled to protection, the procedures of Paragraph 20 shall apply. The procedures described above shall not apply to Privileged Materials designated by a Party as CEII. Materials so designated shall remain privileged and subject to the provisions of this Agreement unless a Party requests and obtains a determination from the Commission's CEII Coordinator that such materials need not remain privileged.

13. All copies of all documents reflecting Privileged Materials, including the portion of any hearing testimony, exhibits, transcripts, briefs, and other documents which refer to Privileged Materials, shall be filed and served under privilege by appropriate means endorsed to the effect that they are privileged pursuant to this Agreement. Such documents shall be marked "CUI//PRIV" and shall be filed and served under privilege upon the Commission and all Reviewing Representatives who are on the service list. Such CEII documents shall be additionally marked "Contains Critical Energy/Electric Infrastructure Information—Do Not Release." For anything filed under privilege, redacted versions or, where an entire document is privileged, a letter indicating such, will also be filed with the Commission and served on all parties on the service list. Counsel for the producing Party shall, upon the request of a Party, provide a list of Reviewing Representatives who are entitled to receive such material. Counsel shall take all reasonable precautions necessary to assure that Privileged Materials are not distributed to unauthorized persons.

14. All Privileged Material and/or CEII in this proceeding filed with the Commission, submitted to the Presiding Judge, or submitted to any Commission personnel, must comply with the Commission's *Notice of Document Labelling Guidance for Documents Submitted to or Filed with the Commission or Commission Staff*.[1] Consistent with those requirements:

(a) Documents that contain Privileged Material must include a top center header on each page of the document with the following text: CUI//PRIV. Any corresponding electronic files must also include this text in the file name.

[1] 83 Fed. Reg. 21,290 (May 9, 2018) (issued by Commission May 3, 2018).

(b) Documents that contain CEII must include a top center header on each page of the document with the following text: CUI//CEII. Any corresponding electronic files must also include this text in the file name.

(c) Documents that contain both Privileged Material and CEII must include a top center header on each page of the document with the following text: CUI//CEII/PRIV. Any corresponding electronic files must also include this text in the file name.

(d) The specific content on each page of the document that constitutes Privileged Material and/or CEII must also be clearly identified. For example, lines or individual words or numbers that include both Privileged Material and CEII shall be prefaced and end with "BEGIN CUI//CEII/PRIV" and "END CUI//CEII/PRIV".

15. If any Party desires to include, utilize or refer to any Privileged Materials or information derived therefrom in pleadings, testimony or exhibits to the proceeding in such a manner that might require disclosure of such material to persons other than Reviewing Representatives, such Party shall first notify both counsel for the disclosing Party and the Commission of such desire, identifying with particularity each of the Privileged Materials. Thereafter, use of such Privileged Materials will be governed by procedures determined by the Commission.

16. Nothing in this Agreement shall be construed as precluding any Party from objecting to the use of Privileged Materials on any legal grounds.

17. Nothing in this Agreement shall preclude any Party from requesting the Commission or any other body having appropriate authority to find that this Agreement should not apply to all or any materials previously designated as Privileged Materials pursuant to this Agreement. The Commission may alter or amend this Agreement as circumstances warrant at any time during the course of the proceeding.

18. The Parties may amend this Agreement only by mutual consent and in writing; provided, however, that a Party has the right to seek changes to this Agreement as appropriate from the Commission.

19. All Privileged Materials filed with the Commission or any other judicial or administrative body, in support of, or as a part of, a motion, other pleading, brief, or other document, shall be filed and served under privilege by appropriate means bearing prominent markings indicating that the contents include Privileged Materials subject to this Agreement. Such documents containing CEII shall be additionally marked "Contains Critical Energy/Electric Infrastructure Information—Do Not Release."

20. If the Commission finds at any time in the course of the proceeding that all or part of the Privileged Materials need not be privileged, those materials shall, nevertheless, be subject to the protection afforded by this Agreement for three (3) business days from the date of issuance of the Commission's decision, and if the Party seeking protection files an interlocutory appeal or requests that the issue be certified to the Commission, for an additional seven (7) business days. No Party waives its rights to seek additional administrative or judicial remedies after the Commission's decision respecting Privileged Materials or Reviewing Representatives, or the Commission's denial of any appeal thereof. The provisions of 18 C.F.R. §§ 388.112 and

388.113 shall apply to any requests for Privileged Materials in the files of the Commission under the Freedom of Information Act (5 U.S.C. § 552).

21. Nothing in this Agreement shall be deemed to preclude any Party from independently seeking through discovery in any other administrative or judicial proceeding information or materials produced in the proceeding under this Agreement.

22. No Party waives the right to pursue any other legal or equitable remedies that may be available in the event of actual or anticipated disclosure of Privileged Materials.

23. The contents of Privileged Materials or any other form of information that copies or discloses Privileged Materials shall not be disclosed to anyone other than in accordance with this Agreement and shall be used only in connection with the proceeding. Any violation of this Agreement and of any Non-Disclosure Certificate executed hereunder shall constitute a violation of an order of the Commission.

IN WITNESS WHEREOF, the Parties each have caused this Protective Agreement to be signed by their respective duly authorized representatives as of the date first set forth above.

BEFORE THE MICHIGAN PUBLIC SERVICE COMMISSION

In the matter of the application of **CONSUMERS ENERGY COMPANY** for approval of the sale of its River Hydroelectric Generating Fleet, related Power Purchase Agreement, and other Relief	)))))))	Case No. U-21985

REDACTED

DIRECT TESTIMONY

OF

RICHARD T. BLUMENSTOCK

ON BEHALF OF

CONSUMERS ENERGY COMPANY

October 2025

Q. Please state your name and business address.

A. My name is Richard T. Blumenstock, and my business address is 1945 West Parnall Road, Jackson, Michigan 49201.

Q. By whom are you employed?

A. I am employed by Consumers Energy Company ("Consumers Energy" or the "Company").

Q. What is your position with Consumers Energy?

A. I am currently the Executive Director of Electric Supply Engineering. I began employment at the Company in May 1994 in the electric transmission planning area where I performed planning studies on the Company's distribution and transmission systems. In April 2002, I was assigned to the electric operations area where I oversaw engineering operations for the distribution and transmission systems. In August 2009, I was assigned to the fuel supply area where I oversaw the Company's purchasing and transport functions for fuel for electric generation. In June 2011, I assumed additional responsibilities including oversight of the Company's interaction in the Midcontinent Independent System Operator, Inc. ("MISO") markets; wholesale settlements and transactions functions; Power Supply Cost Recovery ("PSCR") activities; and planning for electric supply necessary to satisfy customers' energy and capacity needs. In September 2019, I assumed the role of Executive Director of Electric Planning, overseeing the Company-wide efforts for all electric planning. In September 2022, I assumed my current position as Executive Director of Electric Supply Engineering.

Q. What are your responsibilities as Executive Director of Electric Supply Engineering?

A. My responsibilities as Executive Director of Electric Supply Engineering include oversight of all activities associated with planning and design for the Company's existing electric generation portfolio.

Q. What is your formal educational experience?

A. I received a Bachelor of Science degree in 1992 and a Master of Science degree in 1994, both in Electrical Engineering from Michigan Technological University.

Q. Have you previously provided testimony before the Michigan Public Service Commission ("MPSC" or the "Commission")?

A. Yes, I provided testimony in the following MPSC cases:

- Case No. U-16045-R: Reconciliation of PSCR Costs and Revenues for the Calendar Year 2010;
- Case No. U-16432-R: Reconciliation of PSCR Costs and Revenues for the Calendar Year 2011;
- Case No. U-16890: Approval of a PSCR Plan and for Authorization of Monthly PSCR Factors for the Year 2012;
- Case No. U-16890-R: Reconciliation of PSCR Costs and Revenues for the Calendar Year 2012;
- Case No. U-17429: Approval of a Certificate of Necessity for the Thetford Generating Plant pursuant to MCL 460.6s and for related accounting and ratemaking authorizations;
- Case No. U-17317: Approval of a PSCR Plan and for Authorization of Monthly PSCR Factors for the Year 2014;
- Case No. U-17317-R: Reconciliation of PSCR Costs and Revenues for the Calendar Year 2014;
- Case No. U-17752: Authority to amend its renewable energy plan approved in Case Nos. U-15805, U-16543, U-16581, and U-17301;
- Case No. U-17678: Approval of a PSCR Plan and for Authorization of Monthly PSCR Factors for the Year 2015;

- Case No. U-17678-R: Reconciliation of PSCR Costs and Revenues for the Calendar Year 2015;
- Case No. U-18250: Application of Consumers Energy for a financing order approving the securitization of qualified costs and related approvals associated with the early termination of the Palisades Nuclear Energy Plant Power Purchase Agreement ("PPA");
- Case No. U-20134: Application of Consumers Energy for authority to increase its rates for the generation and distribution of electricity and for other relief;
- Case No. U-20165: Application of Consumers Energy for approval of its Integrated Resource Plan ("IRP") pursuant to MCL 460.6t and for other relief;
- Case No. U-20697: Application of Consumers Energy for authority to increase its rates for the generation and distribution of electricity and for other relief;
- Case No. U-20963: Application of Consumers Energy for authority to increase its rates for the generation and distribution of electricity and for other relief;
- Case No. U-21090: Application of Consumers Energy for Approval of an IRP under MCL 460.6t, certain accounting approvals, and for other relief;
- Case No. U-21224: Application of Consumers Energy for authority to increase its rates for the generation and distribution of electricity and for other relief;
- Case No. U-21389: Application of Consumers Energy for authority to increase its rates for the generation and distribution of electricity and for other relief;
- Case No. U-21585: Application of Consumers Energy for authority to increase its rates for the generation and distribution of electricity and for other relief; and
- Case No. U-21870: Application of Consumers Energy for authority to increase its rates for the generation and distribution of electricity and for other relief.

Q. What is the purpose of your direct testimony in this proceeding?

A. The purpose of my direct testimony is to support the Company's request to sell its 13 River Hydroelectric Generating Facilities (the "Facilities"; where my testimony refers to hydroelectric generating facilities individually or generally – rather than the Facilities specifically and collectively – I may use the term "hydro") to Confluence Hydro, LLC ("Confluence"), a subsidiary of Hull Street Energy.

Q. Who is Hull Street Energy?

A. Hull Street Energy is a private equity firm that has significant experience owning, operating, and investing capital in power generation assets across North America, including river hydro generation. The Hull Street Energy team has a long track record of owning and operating hydroelectric facilities across North America, including acquisition and improvement of 47 hydro assets within the past decade. The firm will leverage its experience and capital resources to ensure that the Facilities can continue to safely deliver reliable, clean energy to Michigan customers and are operated in accordance with the Federal Energy Regulatory Commission's ("FERC") license requirements.

Q. Please give a high-level description of the sale.

A. Consumers Energy will sell the Facilities and transfer associated liabilities to Confluence by entering into four primary and interdependent agreements with Confluence. The four agreements include a Purchase and Sale Agreement ("PSA"), PPA, Regulatory Disallowance Agreement ("RDA"), and Environmental Indemnity Agreement ("EIA"), all of which are essential components to the deal and work together to effectuate the transaction.

Consumers Energy will receive $13 from Confluence as the purchase price for the assets ($1 per facility), however, the majority of the value to Consumers Energy and its customers results from the transfer of liabilities (existing and future) associated with the Facilities. The Company and its customers will also continue to benefit from the clean energy and capacity provided by the Facilities.

Q. Does the sale require Consumers Energy to take on any new obligations?

A. Yes. Consumers Energy's agreement to enter into a PPA for production from the Facilities after the sale closes is a material part of the overall transaction. Consumers Energy will pay Confluence a base PPA price of $160 per MWh with a 2.5% annual escalation adjustment for the energy, capacity, and renewable energy credits ("RECs") associated with the energy actually produced at the facilities over the next 30 years, [CONFIDENTIAL] [redacted] [END CONFIDENTIAL]

Q. Please explain why the base PPA price of $160/MWh is reasonable.

A. The PPA price reflects the market value for products purchased as well as the value of the transfer of all liabilities to Confluence, which are primarily the avoidance of significant capital expenditures and decommissioning obligations. As I will explain in Section IV of my testimony, the Company's business case analysis shows that sale of the Facilities at this PPA price results in a lower cost for customers than decommissioning or relicensing (continuing to operate) the Facilities.

Q. What impact will a sale have on resource adequacy and production of renewable energy?

A. There will be a positive impact. Selling the Facilities versus decommissioning them ensures that the capacity remains available for the Company's customers and MISO Zone 7. It also ensures that the renewable energy produced by the Facilities remains available for customers. Moreover, selling the Facilities avoids having to source replacement capacity and renewable energy, potentially with execution and timing risk.

Q. How is your direct testimony related to the direct testimony of other Company witnesses?

A. Company witness Adam J. Monroe will testify to the employee transition plan and Confluence's safety performance. Company witness Angela Thompkins will testify to the community impacts of the sale transaction. Company witness Jason R. Coker will testify to accounting entries, tax impacts, rate impacts, regulatory requests associated with the transaction, and describe the capital structure and cost of capital impacts of the transaction.

Q. Are you sponsoring any exhibits with your direct testimony?

A. Yes, I am sponsoring the following exhibits:

Exhibit A-1 (RTB-1)	Confidential Purchase Sale Agreement;
Exhibit A-2 (RTB-2)	Confidential Power Purchase Agreement;
Exhibit A-3 (RTB-3)	Business Case - Assumption sheet for variables common to all options (discount rate, inflation, starting year, FCM, etc.);
Exhibit A-4 (RTB-4)	Business Case – Sale Annual Cash Flows;
Exhibit A-5 (RTB-5)	Business Case – Decommissioning Annual Cash Flows;
Exhibit A-6 (RTB-6)	Business Case – Relicensing Annual Cash Flows;
Exhibit A-7 (RTB-7)	Business Case – Summary of Net Present Value of Cash Flows for All Options, including Variances;
Exhibit A-8 (RTB-8)	WSP Hydro Roadmap June 2023; and
Exhibit A-9 (RTB-9)	WSP Decommissioning Cost Estimates October 2025.

Q. Were these exhibits prepared by you or under your direction and supervision?

A. Exhibits A-3 (RTB-3) through A-7 (RTB-7) were prepared by me or at my direction. Confidential Exhibits A-1 (RTB-1) and A-2 (RTB-2) are the transaction documents at issue in this case and were extracted from Company records maintained in the ordinary course

of business. Exhibits A-8 (RTB-8) and A-9 (RTB-9) were prepared for the Company by a third-party engineering consultant, WSP USA ("WSP"), and were extracted from Company records maintained in the ordinary course of business.

Q. How are the following sections of your direct testimony organized?

A. My direct testimony is divided into six sections. Section I explains the reason the Company is selling the Facilities. Section II describes the sale process. Section III details the transaction and support agreements. Section IV provides a business case supporting sale of the Facilities. Section V provides required information in response to certain MPSC Section 6q filing requirements. Finally, Section VI summarizes the next steps in finalizing the sale of the Facilities.

SECTION I

RATIONALE FOR SALE

Q. Please describe the assets being sold.

A. The Facilities consist of 13 river hydro generation facilities, operating across five river systems, built between 1905 and 1936, having ~132 MW of nameplate capacity. The Facilities have FERC licenses set to expire between June 2034 and May 2041 with significant investment required for continued operation. Included with the Facilities are over 32,000 acres of land within the FERC license boundaries (i.e. the area within each license required by FERC to operate each hydro generation facility) and transfer of up to 59 Consumers Energy employees having a primary work purpose of supporting river hydro operations.

Q. What is the rationale for selling Consumers Energy's River Hydro Fleet?

A. These facilities have been generating power for Consumers Energy's customers for over 100 years, on average, and have been a central part of the communities in which they are located. Consumers Energy values that history and the many people who have worked for the Company to keep these facilities operating safely for Michigan. However, the Company faced the need to evaluate the future of the Facilities for several reasons. First, the Facilities cost significantly more to operate than other energy and capacity sources available to the Company. Second, the Facilities' FERC licenses start to expire in less than a decade, which drove the Company's need to make a decision about the long-term future of the plants before beginning the complex and potentially expensive relicensing process. Finally, the MPSC Staff and several intervenors in the Company's 2022 Electric Rate Case, Case No. U-21224, raised questions about whether the Company had adequately considered the option to sell the plants in lieu of beginning the significant required investments in the Facilities, which would have been recovered through customer rates. In settlement of that case, the Company agreed to conduct a disposition analysis of its river hydro fleet.

The Company started a process in 2022 to conduct the disposition analysis and ultimately determine a path forward for the Facilities. Potential disposition options included selling the Facilities, decommissioning the Facilities, or continuing to operate the Facilities. This process included engaging a third-party engineering firm, WSP, to provide an independent assessment of the disposition options. WSP's report that resulted from this assessment is provided as Exhibit A-8 (RTB-8). It also included development of internal business models supporting each option so that the financial impact was known. Finally,

the Company has been working closely with communities near the facilities through this entire process, and their input was significant in reaching the decision to sell the Facilities.

Q. What was WSP's conclusion?

A. WSP concluded that the lowest risk path forward is one in which Consumers Energy does not own the Facilities and the easiest way to achieve this is to divest the Facilities[1]. Their primary recommendation was to divest 11 of the 13 Facilities[2].facilities.[3]. The two other Facilities that were not recommended for divestment as a primary option were locations requiring major spillway repairs and the primary recommendation was decommissioning based on remediating safety risks and that the Facilities would not be marketable due to the cost of spillway repairs[4].

Q. Did the Company adopt the recommendation to explore selling the Facilities?

A. Yes. Sale of the Facilities could balance two important needs - to potentially lower costs for Consumers Energy's customers while continuing to care for communities that depend on the waterways created by the Facilities. As will be explained in Section IV of my testimony, the Company spent significant time developing a 60-year business case outlook for sale, decommissioning, and relicensing. The Company's analysis shows that the sale transaction the Company has negotiated is lower-cost than decommissioning or relicensing and comes with significantly less cost risk. Selling the Facilities also preserves the impoundments and the considerable economic benefits they provide to local communities. See Company witness Thompkins for details of the economic benefits by Facility. It preserves a way of life for impacted communities, people of Michigan, and Consumers

[1] See Exhibit A-8 (RTB-8), Executive Summary, page iii.
[2] See Exhibit A-8 (RTB-8), Table ES-1 and Table 41.
[3] See Exhibit A-?? (RTB-8), Table ES-1 and Table 41.
[4] See Exhibit A-8 (RTB-8), Sections 9.1.1 and 9.1.2,

Energy's coworkers. Safety is a big part of community impact, and the Company expended significant effort in vetting a counterparty and negotiating a transaction to ensure that Consumers Energy is putting the Facilities into the hands of a safe, financially competent company. Moreover, the employees working at the Facilities, and their safety mindsets and habits, are transferring to Confluence with the Facilities, which is even further assurance of safety.

Q. Why did the Company decide to include Rogers and Hardy in the sale if WSP did not recommend selling them as a primary recommendation?

A. Hardy is the largest Facility in the river hydro fleet and accounts for 24% of the total fleet production, so it would be of value to a potential purchaser. Not selling Hardy or Rogers would have resulted in the Company decommissioning these Facilities, which our business cases indicate are higher cost and higher cost-risk for our customers. Additionally, not including Rogers and Hardy in the sale would have left Croton as the lone Facility on the Muskegon River, which introduces cost challenges due to having workforce dedicated to a river system, but only having one Facility to oversee.

Q. Did other factors influence the Company's decision to review the Facilities' futures?

A. Yes, Consumers Energy's federal operating licenses for the Facilities will begin to expire in 2034 through 2041. Relicensing the Facilities is an extensive process that is estimated to take up to seven years. To allow for sufficient time to pursue relicensing (if that was the chosen path), the Company targeted completion of its disposition analysis at least seven years prior to the first relicensing deadline (i.e. 2027).

Q. Was Consumers Energy determined to sell the Facilities from the start?

A. No. The Company was committed only to reaching the best decision for its customers. When Consumers Energy started this process, the Company did not know how it would play out or conclude.

Q. Do the terms of the transaction provide the new owner with sufficient incentive to invest in necessary upgrades as they arise?

A. Yes. As an initial matter, Confluence will assume the license requirements for the Facilities which are imposed by FERC. The PPA price is designed to ensure that Confluence will have sufficient annual revenues to fund capital and maintenance, and Confluence will be incented to safely and reliably operate the Facilities so that it can receive revenue, through the PPA price, for the entire term of the PPA. Additionally, Confluence has access to equity from its parent, Hull Street Energy, which would also fund capital and maintenance. [CONFIDENTIAL] [redacted] [END CONFIDENTIAL]

Q. There have been catastrophic failures at hydropower projects in Michigan that have resulted from failures to properly maintain those projects, as evidenced by the catastrophic failures of the Edenville and Sanford Facilities on the Tittabawassee River in 2020. How has Consumers Energy sought to avoid similar issues in the sale process for the Facilities?

A. Consumers Energy understands the public's concerns about the Facilities' safe operations and made that a priority throughout the sale process. The Company also recognizes that not all potential owners of hydroelectric generation facilities share the same vision, values,

and mission as Consumers Energy. However, Hull Street Energy has a demonstrated track record of operational success and safety improvements. As part of a Request for Proposal ("RFP") for the Facilities, the Company evaluated Hull Street Energy's successful record with other hydroelectric generation facilities and its financial resources. Company witness Monroe provides detailed information on Hull Street Energy's safety record. As license holders, Confluence will be required to work with FERC regulators to maintain the Facilities' record of safe operations and make enhancements when and where necessary, to meet current and future FERC safety and other license requirements. As set forth above, Confluence has committed capital resources available that will ensure the safe and compliant operation of the Facilities.

Confluence has built a multi-disciplinary team led by energy industry veterans who have successfully upgraded and operated more than 40 operating hydroelectric generation facilities. They have stated and demonstrated a commitment to safety and well-being of the employees, surrounding communities, and the local environment.

Q. As a private equity firm, Hull Street Energy has a track record of buying and reselling assets. Will it do the same with the Facilities?

A. While the Company ultimately does not control the Facilities after closing the sale, Confluence indicated an intention to hold the Facilities for a longer-term and they have made similar statements publicly following the sale announcement. Moreover, with the PPA, there is financial incentive for Confluence to continue ownership and operations. Additionally, any future sale of the Facilities would require FERC approval.

Q. How does the transaction affect the use of the 32,000 acres of land associated with the Facilities for the local communities?

A. All the property being sold as part of this transaction is contained, in part or in whole, within the FERC license boundary for the Facilities. Therefore, any change in use or ownership will need FERC approval. Additionally, the PSA provides for Confluence to take assignment of the assignable land leases and land access permits that the Company has granted to property owners around the Facilities. And, for the land access licenses and permits that the Company cannot assign to Confluence due to the terms of those licenses and permits, the Company and Confluence work together so that Confluence can replace those licenses and permits with new licenses and permits during the interim period prior to closing and after closing occurs These property rights have allowed local communities to use and enjoy the shorelines and impoundments of the Facilities. Consumers Energy anticipates that those uses will continue under Confluence's ownership.

SECTION II

SALE PROCESS

Q. Please provide an overview of the sale process.

A. In August of 2023, the Company announced its intent to conduct an RFP for selling the Facilities. In February of 2024, the Company issued a Stage 1 RFP with bids due in March of 2024. Stage 1 focused on bidder qualification and indicative transaction pricing. There were 41 counterparties that expressed interest in participating in the RFP. In March of 2024, the Company received 15 bids. The Company reviewed the bids through a rigorous evaluation and accepted seven of those bids to continue to Stage 2 of the RFP, which began in April of 2024. The eight bids that Consumers Energy rejected did not meet critical

criteria in the evaluation. Stage 2 of the RFP involved detailed due diligence and submission of final transaction pricing. In August of 2024, two of the seven accepted bidders submitted a final bid. The other five bidders electively decided to withdraw from the RFP. The Company commenced negotiations in October of 2024 and concluded negotiations in August of 2025.

Q. Why did Stage 1 have indicative pricing, not final pricing?

A. The purpose of Stage 1 was to determine transaction interest and allow the Company to thoroughly vet the financial, safety, and operation capabilities of each party. Final pricing would be dependent upon detailed due diligence, which did not occur until Stage 2 of the RFP.

Q. What were the bid criteria and evaluation?

A. The criteria included bid pricing, bid structure, corporate financial status, historical operating experience, safety program strength, FERC experience including license transfer, personnel plan, depth of community plans, and the evaluation team's overall assessment of the counterparty.

Q. What kind of due diligence occurred in Stage 2?

A. The Company created a data room for bidders to access critical information on the Facilities. The information included, but was not limited to, historical records, FERC correspondence, and capital and maintenance plans. The Company also hosted site visits for bidder inspections. The Company held management presentations at which the Company met face-to-face with the bidders to discuss the transaction at a high level. Finally, there was exchange and discussion on proposed transactional agreements.

Q. Why did the negotiations take approximately 12 months?

A. The transaction was extraordinarily complex, encompassing a significant amount of assets and land, coworker transition aspects, and commercial terms, as evidenced by the complexity and scope of the agreements that make up this transaction.

Q. Did the Company solicit bids for its Facilities on an individual site basis, fleet basis, or both?

A. The RFP solicited bids on both a site and fleet-wide basis.

Q. Did the Company consider both types of bids when considering sale arrangements?

A. No. The Company only considered bids to purchase the entirety of the Facilities, not selected sites. Since the Facilities located on the same river system operate in concert, it was not desirable to have different owners/operators on the same river system. Moreover, due to the complexity of this transaction and the desire to reach a sale agreement in a reasonable amount of time, the Company elected to engage a single counterparty for the transaction versus potentially up to 13 different counterparties.

SECTION III

TRANSACTION SUMMARY

Q. Please summarize the sale transaction agreements.

A. The transaction consists of four primary agreements: the PSA, the PPA, the EIA (which is Exhibit M-1 to the PSA), and the RDA (which is Exhibit T to the PSA). The agreements work together as a package to both effectuate the transaction and appropriately transfer the Facilities, including equipment and land, along with associated liabilities.

Q. Please describe the PSA.

A. The PSA sets forth the terms of the sale of the Facilities. Most importantly those terms set forth the complete transfer of the Facilities, including the real property, land rights, generating equipment and other tangible and intangible personal property (collectively referred to as the "Project Assets"), to Confluence as well as the transfer of substantially all associated liabilities, including environmental liabilities. The PSA is structured as an "as-is" sale, with the qualifications to that standard in the Company's representations and warranties. The PSA also provides for the transfer of the Company's employees that support the Facilities to Confluence (or an affiliate of Confluence).

The aggregate price of the acquisition of the Projects is $13.00, subject to limited adjustments for pre- and post-closing proration credits for certain costs of operating the Facilities (including property taxes, utility expenses, and lease payments).

The PSA includes customary conditions for closing, including obtaining approvals from the MPSC, FERC, the Federal Communications Commission, and the Federal Trade Commission/Department of Justice. All the closing conditions must be satisfied by the "Outside Closing Date," which is one year from the date the Company submits its filing for FERC and MPSC approval (the "Required Regulatory Approvals"). However, the Outside Closing Date will extend on a day-to-day basis for the Required Regulatory Approvals, up to two years after the initial filing date.

The PSA requires Consumers Energy to conduct its business with respect to the Facilities in the ordinary course and consistent with prudent utility practices up to closing. [CONFIDENTIAL] [redacted]

[redacted] [END CONFIDENTIAL]

Q. Please describe the PPA.

A. Under the 30-year PPA, Confluence will sell energy, capacity, and environmental attributes (RECs) to the Company on an as-generated basis, from each of the 13 hydro plants. [CONFIDENTIAL] [redacted] [END CONFIDENTIAL]

The PPA price for the first contract year is $160.00/MWh, with an annual 2.5% increase thereafter. However, the PPA price is subject to adjustment for (a) the Rogers spillway project; (b) the Engineering, Procurement, and Construction ("EPC") Agreement for the Hardy auxiliary spillway project; (c) material casualty under the PSA; (d) material condemnation under the PSA; (e) the Company's indemnification obligations under the PSA; (f) Confluence's title objections under the PSA; or (g) the Army Corp of Engineers Loan. These adjustments are explained in Exhibit E of the PPA.

Q. Please explain the PPA price adjustment for the Rogers spillway project.

A. The original capital and operating and maintenance ("O&M") plans provided to the bidders included costs for replacement of the Rogers spillway. Since providing those plans, the Company has determined that it can avoid the Spillway project by purchasing several downstream properties and completing a reduced scope of work. That reduced scope of work has an estimated cost of $16,841,000. The PPA sets forth the list of reduced scope projects. Should Confluence spend more than $16,841,000 for these specific projects, the

PPA price will be increased by $0.133/MWh per million dollars of cost overrun, if indeed there is any cost overrun. As stated above, the base PPA price is $160.00/MWh escalating at 2.5% every 12 months. The total of all price adjustments identified in Tables 3 and 4 of the PPA are capped at $165.00/MWh in the first year of the PPA and increases by 2.5% every 12 months.

Q. Please explain the PPA price adjustment for the EPC Agreement for the Hardy auxiliary spillway project.

A. The Company's EPC contract for the Hardy auxiliary project is contractually capped at $216,500,000. The Company put the Hardy auxiliary project on hold in May of 2025 since FERC had not yet approved the project. The Company intends to keep the project on hold until the sale is approved, and the transaction closes, for purposes of making a clean transition in project oversight. The EPC contract allows for a price increase if the project is delayed to account for cost increases in such things as materials and workforce. The Company agreed to increase the PPA rate by $0.133/MWh per million dollars of cost increase in the EPC contract, if indeed there is any cost increase.

As stated above, the base PPA price is $160.00/MWh escalating at 2.5% every 12 months. The total of all price adjustments identified in Tables 3 and 4 of the PPA are capped at $165.00/MWh in the first year of the PPA and increases by 2.5% every 12 months.

[CONFIDENTIAL] [redacted]

[redacted] [END CONFIDENTIAL]

Q. Please describe the RDA.

A. The RDA provides for payment from the Company to Confluence, in the unlikely event of a future regulatory disallowance order from the MPSC for all or a portion of the PPA payments and Confluence's subsequent termination of the PPA (which covers all 13 Facilities). Under the PPA, if the MPSC issues an order or orders which deny the Company full recovery for the charges paid to Confluence under the PPA, then the Company may adjust the future charges paid to the recoverable amount determined by the MPSC and also recover the previously paid charges that are subsequently disallowed. After the adjustment goes into effect, or previously paid amounts are recovered, Confluence has the right to, and must, terminate the PPA for the remainder of the term, in order to trigger the RDA. The PPA termination following a disallowance of PPA payments triggers Confluence's right to seek recovery under the RDA.

Following an RDA demand from Confluence, the Company would be required to pay an amount equal to the lesser of the "Economic Loss Payment" and $250,000,000, plus

any outstanding amounts due under the PPA. Once the payment is made, the parties generally waive any further claims under the PPA. However, Confluence will retain the right to sue the Company under the PPA [CONFIDENTIAL] [redacted] [END CONFIDENTIAL] and the Company reserves the right to a counterclaim. If Confluence is successful in such a claim, any recovered damages would be netted against other payments under the RDA, such that Confluence is not permitted double recovery.

Q. Please describe the EIA.

A. As set forth above, one of the most important aspects of the sale of the Facilities is the complete transfer of those Facilities, including equipment and associated land, to a new owner, along with any liabilities related to those Facilities, including any past, present, or future environmental liabilities. The EIA is the mechanism that ensures the continued transfer of environmental liabilities into the future. Under the EIA, Confluence will indemnify the Company from losses and claims relating to the "Assumed Environmental Liabilities" regardless of whether such liability arose before, on, or after Closing under the PSA.[5] The EIA also outlines the steps and actions that Confluence must take if the Company is threatened with a claim or named in a claim, to confirm that Confluence will indemnify the Company. The EIA does not have a defined term and therefore continues indefinitely.

[5] Under the PSA, "Assumed Environmental Liabilities" include all liabilities that are not "Excluded Environmental Liabilities." This narrow carveout of "Excluded Environmental Liabilities" includes liabilities caused by the acts or omissions of Consumers Energy on the easements that will be retained by Consumers Energy on the land associated with the Facilities to operate its electric distribution equipment after the closing of the sale of the Facilities.

Confluence's EIA obligations include providing the Company with $2,500,000 in the form of cash to be held in escrow by the Company or by providing a letter of credit. Such security shall remain in place for the duration of the EIA and is subject to unlimited replenishment if the Company ever draws on the security. The Company is entitled to draw on the security for the costs actually incurred for which a remedy is provided under the EIA. After exhausting the security, including any timely replenishment of such security, the Company has the right to setoff costs actually incurred for which a remedy is provided under the EIA against any and all amounts or other compensation due and owing by the Company under the PPA.

Confluence will obtain and maintain pollution legal liability insurance ("PLLI") throughout the term of the EIA. PLLI provides insurance coverage to the Company to the extent that Confluence fails to meet its indemnification obligations. The EIA provides for the Confluence subsidiaries, which will ultimately own each Project, to be jointly and severally liable with Confluence for all of Confluence's indemnity and payment obligations, as set forth in the EIA.

SECTION IV

BUSINESS CASE

Q. Please explain the business case effort undertaken to evaluate future options for the river hydro generation fleet.

A. The Company developed business case outlooks for the three different options for the future of the Facilities (also called disposition options): (i) sale to Confluence, (ii) decommissioning, and (iii) continued ownership (also called relicensing). The business cases compared the annual total costs for each option based on a set of assumptions that

will be explained later. The Company then converted the annual total costs to a net present value ("NPV") to compare the relative financial outcome of each option. The Company included some variance analysis to ensure that the financial outcomes reflect a reasonable expectation of variance for key assumptions.

Q. What are the common assumptions used in the business cases?

A. Exhibit A-3 (RTB-3) presents the common assumptions, consistent across all cases, which the Company used in the development of the business case evaluations. These assumptions form the foundation for comparing alternative scenarios.

Q. What is the basis for the assumption for Discount Rate and Cost of Capital in Exhibit A-3 (RTB-3)?

A. The Discount Rate and Cost of Capital are both assumed to be 7.38%, which is the prevailing value used internally for the Company's economic analysis. The rate of 7.38% is based upon the pre-tax weighted average cost of capital established in the March 21, 2025 Order in the Company's 2024 Electric Rate Case No. U-21585.

Q. What is the basis for the starting Replacement Power Cost value being $79/MWh and the inflation rate for Replacement Power being 0%?

A. This assumption is based on the view that the Company could enter a long-term contract at a flat rate of $79/MWh. The Company solicited bids for a clean energy PPA in 2025. One of the bids was sourced from river hydro generation. That bid was $79/MWh which includes energy, capacity, and RECs associated with the resource. This value was selected as a representative market-based cost for replacement power. The Company applied an inflation rate to Replacement Power costs in its variance analysis.

Q. What is the assumption for the Financial Compensation Mechanism ("FCM") in Exhibit A-3 (RTB-3)?

A. Exhibit A-3 (RTB-3) includes an FCM value of 8.75%, which represents the annual cost recovery rate approved for the Company to apply to PPAs. The FCM rate of 8.75% is based upon the pre-tax weighted average cost of permanent capital established in the March 21, 2025 Order in the Company's 2024 Electric Rate Case No. U-21585.

Q. What is the basis for recovery of a FCM on the proposed PPA?

A. Michigan Compiled Laws (MCL) 460.1028(8) states the following:

> If an electric provider whose rates are regulated by the commission enters into a purchase power agreement for renewable energy resources or a third-party contract for an energy storage system or clean energy system with an entity that is not an affiliate, the commission shall authorize an annual financial incentive for the electric provider. The financial incentive shall be calculated as the product of contract payments in that year multiplied by the electric provider's pre-tax weighted average cost of permanent capital comprised of long-term debt obligations and equity of the electric provider's total capital structure as determined by the commission's final order in the electric provider's most recent general rate case. The pre-tax weighted average cost of permanent capital used to calculate the financial incentive shall not be fixed throughout the entire term of the contract at the pre-tax weighted average cost of capital applicable in the first year but shall be updated based on the commission's final order in each succeeding general rate case for the electric provider. The financial incentive shall apply to each contract described in this subsection from the date the contract is executed for the entire term of the contract. This subsection applies to any contract entered into after June 30, 2024.

As such, the recovery of an FCM is required for these contracts.

Q. What is the basis for the Yearly Production number?

A. The Yearly Production figure is derived from a 10-year average (2013-2023) of actual generation across the 13 sites included in the evaluation. Use of a historical average ensures a representative and stable estimate of expected output.

Q. Why is the Evaluation Ending Year 2086?

A. The Evaluation End Year of 2086 reflects the full lifecycle of the assets, including decommissioning. The assumption is that the Company, if it were to continue operating the river hydro fleet, will receive a 50-year license renewal beginning in 2034, extending operations through 2084. Decommissioning activities are expected to occur over the subsequent two years, concluding in 2086. This timeline ensures that all relevant costs and impacts are captured in each of the business case scenarios.

Q. What is the assumption for the PPA period?

A. The PPA is assumed to commence on January 1, 2027, and extend for a 30-year term.

Q. Do the business cases consider the value of energy, capacity, and RECs?

A. No. Annual production in each year across each business case is equivalent at 439,462 MWh, so the value of energy, capacity, and RECs are excluded because it would be consistent across all three scenarios. Including the value would identically impact each business case; therefore, for simplicity and clarity reasons, it was not included in the business case evaluations. Note that Company witness Coker's rate impact analysis does include the value of energy, capacity, and RECs since that value will be realized by Consumers Energy's customers.

Q. What are the assumptions used in the sale business case?

A. Exhibit A-4 (RTB-4) calculates the main inputs into the annual total costs for the sale business case. It includes projected transaction costs, PPA costs, and replacement power costs over the evaluation period.

Q. What does column (b) represent in Exhibit A-4 (RTB-4)?

A. Column (b) represents the Company's estimated closing costs to execute the sale. These include an estimate of both transaction costs estimated at $12.538 million (e.g. legal fees, consultant fees, hiring and training employees that will be needed by Confluence, and internal company labor to facilitate the transaction) and employee separation costs estimated at $14.5 million.

Q. Why does the Replacement Power Cost in column (h) remain constant?

A. The Replacement Power Cost is calculated by multiplying the replacement MWh (column g) by the assumed Replacement Power Cost contained in Exhibit A-3 (RTB-3). For the base case, the Company assumes Replacement Power Cost is flat over time, without escalation. There was additional variance analysis done to understand the impact of varying the Replacement Power Cost on the total cost of sale.

Q. What are the assumptions used in the decommissioning business case?

A. Exhibit A-5 (RTB-5) projects the annual total costs associated with decommissioning the Facilities. This scenario assumes the Company will operate the Facilities through the end of their current license period and then retire them sequentially. The order of retirements is based on the Company's assessment of site-specific risk, beginning with the highest risk locations. The Facilities are assumed to remain operational until physical decommissioning

begins. It is further assumed that FERC will grant annual license extensions, contingent on the Company's submission of a reviewed and approved decommissioning plan.

Q. How was column (b) developed in Exhibit A-5 (RTB-5)?

A. Column (b) represents the Company's estimated capital costs under the decommissioning scenario. These costs reflect expenditures necessary to maintain safe and compliant operations until each Facility is retired. The capital items are a subset of the 2024–2028 Long-Term Financial Plan, limited to those required for FERC compliance and safety. No investments related to performance improvement or life extension are included.

Q. How was column (c) developed in Exhibit A-5 (RTB-5)?

A. Column (c) reflects the Company's estimated O&M costs during the decommissioning scenario. These costs support continued safe and compliant operations until retirement. The estimates exclude potential incremental costs from FERC-mandated Comprehensive Assessments. The Company assumes a strategic approach to repairs, prioritizing cost minimization given the limited remaining life of the units.

Q. How was column (d) developed in Exhibit A-5 (RTB-5)?

A. Column (d) identifies the total decommissioning cost for the Facilities. The cost estimate is based on an estimate made by WSP in support of the Company's 2025 Depreciation filing. WSP's decommissioning costs are provided in Exhibit A-9 (RTB-9). To reflect the full scope of project execution, the base estimates provided by WSP were increased by 40% to account for Company overheads, engineering services, required studies, permitting, internal project management, legal fees, etc. Each Facility was internally evaluated for potential environmental uncertainties, and additional costs were added to the decommissioning cost estimate based on the findings of that evaluation.

Q. How does Exhibit A-5 (RTB-5) account for inflation and discounting in the decommissioning scenario?

A. The cost estimates in Exhibit A-5 (RTB-5) incorporate a discount rate of 7.38% and the capital, O&M, and decommissioning costs escalate at an inflation rate of 2.00%. These assumptions are consistent with the Company's long-term financial planning standards and ensure that future costs are appropriately valued in present-day terms.

Q. How does the decommissioning scenario impact energy production and replacement power needs?

A. As each Facility is retired, Exhibit A-5 (RTB-5) models a gradual decline in production. Correspondingly, Replacement Power requirements and costs increase. These are reflected in columns (f) and (g), which show the replacement MWh and associated power costs. The Company assumes a fixed Replacement Power cost of $79/MWh, consistent with Exhibit A-3 (RTB-3).

Q. What are the assumptions used in the relicensing business case?

A. Exhibit A-6 (RTB-6) shows the projected revenue requirements for relicensing Facilities. This scenario assumes the Company will apply for and be granted a 50-year extension from FERC to continue operation. The extension will start in series with the current license expiry. This scenario assumes decommissioning will occur upon the completion of the license extension. Importantly, the cost estimates in this scenario do not include highly likely cost increases associated with future relicensing requirements or evolving FERC regulatory requirements. As such, the cost estimates should be viewed as conservatively low.

Q. How was column (c) developed in Exhibit A-6 (RTB-6)?

Column (c) represents the Company's estimated capital costs under the relicensing scenario. These costs reflect expenditures necessary to maintain safe and compliant operations until each Facility is retired. The 2027-2034 capital items are a subset of the 2024–2028 Long-Term Financial Plan and the 10-year strategy plan. For 2035 and beyond, these estimates are based on WSP's Hydro Roadmap study of known regulatory and life extension projects along with the average capital maintenance spend based on a three-year average.

Q. How was column (d) developed in Exhibit A-6 (RTB-6)?

A. Column (d) reflects the Company's estimated O&M costs during the relicense scenario. These costs support continued safe and compliant operations until retirement. The 2027-2028 capital items are a subset of the 2024–2028 Long-Term Financial Plan. For 2029 and beyond, the estimate considers known life extension projects added to the projected regulatory and maintenance spend.

Q. How does Exhibit A-6 (RTB-6) account for inflation and discounting in the relicensing scenario?

A. The cost estimates in Exhibit A-6 (RTB-6) incorporate a discount rate of 7.38% and the capital, O&M, and decommissioning costs escalate at an inflation rate of 2.00%. These assumptions are consistent with the Company's long-term financial planning standards and ensure that future costs are appropriately valued in present-day terms.

Q. What variance analysis did the Company perform on these business cases?

A. Exhibit A-7 (RTB-7) presents the results of variance analyses conducted to evaluate the potential range of outcomes for each disposition scenario. It includes adjustments to key

variables to illustrate both lower- and higher-end impacts on the NPV of the costs identified in Exhibits A-4 (RTB-4), A-5 (RTB-5), and A-6 (RTB-6).

Q. What is the purpose of the graphical variance summary in Exhibit A-7 (RTB-7)?

A. The graphical variance summary provides a visual comparison of NPV outcomes across the three disposition scenarios—Sale, Decommission, and Relicense—under low, base, and high sensitivity assumptions. It illustrates the range of potential financial outcomes and supports decision making by highlighting which scenario is lowest cost and has lowest cost risk under varying conditions.

Q. What do the "Low," "Base," and "High" columns represent in Exhibit A-7 (RTB-7)?

A. These columns represent the range of NPV outcomes for each scenario based on sensitivity adjustments. Low reflects lower cost assumptions (e.g. lower replacement power costs, reduced production, and lower remediation risk adjustments). Base reflects the most likely assumptions. High reflects higher cost assumptions (e.g. higher replacement power costs, increased production on PPAs, and full risk adjustments).

Q. Describe what was adjusted in the Low-End Sale sensitivity.

A. The starting replacement power cost was reduced from $79/MWh (base) to $60/MWh, with no escalation applied. This reflects a scenario where low-cost renewable energy is available after the PPA term ends. Additionally, annual production was reduced to 90% of the average, which lowers the sale cost during the contract period and results in a lower overall NPV of annual cash flows.

Q. Describe what was adjusted in the High-End Sale sensitivity.

A. The starting replacement power cost was increased to $80/MWh and escalated at 2% annually, representing a higher-cost renewable energy scenario post-PPA. Annual

production was increased to 110% of the average, which raises the sale cost during the contract period and results in a higher overall NPV of annual cash flows.

Q. Why weren't any other variables adjusted?

A. Variables such as discount rate, cost of capital, inflation, and FCM were held constant across all scenarios. Adjusting these would shift all NPVs in the same direction, without materially affecting the relative comparison between scenarios. These values are aligned with Company standards and consistent with other financial analyses.

Q. Describe what was adjusted in the Low-End Decommission sensitivity.

A. The starting replacement power cost was reduced to $60/MWh, with no escalation, representing a low-cost renewable energy scenario after unit retirement, and the additional costs associated with the Company's internal evaluation for potential environmental uncertainties was removed from the decommissioning cost estimate.

Q. Describe what was adjusted in the High-End Decommission sensitivity.

A. The Starting Replacement Power cost was increased to $80/MWh and escalated 2% annually. This is intended to represent a high cost for replacement renewable energy after the units are removed from service.

Q. Describe what was adjusted in the Low-End Relicense sensitivity.

A. The additional costs associated with the Company's internal evaluation for potential environmental uncertainties was removed from the decommissioning cost estimate to reflect a lower-cost scenario. Additionally, a cost multiplier of 85% was applied to represent downside cost potential.

Q. Describe what was adjusted in the High-End Relicense sensitivity.

A. A cost multiplier of 115% was applied to represent upside cost potential.

Q. Please summarize the key takeaway from the graphical variance summary in Exhibit A-7 (RTB-7)?

A. It is clear from the graphical variance summary that selling the Facilities is the lowest cost option. It also has the least cost-risk based on the relatively narrow range of costs that result after applying variation analysis.

SECTION V

Responses to Certain Filing Requirements from MCL 460.6q and R 460.303

Q. Please provide a description of Consumers Energy, the electrical and gas service territory it serves, and the significant real and personal property owned, operated, and controlled by Consumers Energy.

A. Consumers Energy is Michigan's second largest electric and gas utility, providing service to more than 6 million residents and businesses in all 68 counties of the Lower Peninsula of Michigan. Consumers Energy is the primary subsidiary of Jackson, Michigan-based CMS Energy Corporation. Consumers Energy's electric business currently operates three coal-fired, seven natural gas-fired, and two oil- and gas-fired generating units, 13 hydroelectric plants, a pumped storage generating plant, wind turbines, solar generation, battery storage, and several combustion-turbine plants. Consumers Energy's distribution system consists of: 270 miles of high-voltage distribution overhead lines operating at 138 kV, four miles of high-voltage distribution underground lines operating at 138 kV, 4,646 miles of high-voltage distribution overhead lines operating at 46 kV and 69 kV, 18 miles of high-voltage distribution underground lines operating at 46 kV, 81,924 miles of electric distribution overhead lines, 9,775 miles of underground distribution lines, and 1,098 substations with an aggregate transformer capacity of 28 million kVA. The

Company's gas business includes a Gas Transmission and Storage system, which is an integration of approximately 2,342 miles of transmission pipeline, eight compressor stations with 48 active units with approximately 153,000 installed and available horsepower, 15 gas storage fields[6] with a maximum working storage capacity of 154 billion cubic feet ("Bcf"), seven primary interconnect locations with five interstate pipelines, and about 100 city gate stations which are the connections to the Company's gas distribution system. The Company's gas distribution system includes more than 28,000 miles of distribution mains.

Q. What effect will the transaction have on competition and rates?

A. At this time, Consumers Energy does not believe the transaction will have any effect on electric competition because it will not result in any new generation resources being added to the market and Consumers Energy will continue to purchase all of the energy and capacity from these plants. As discussed further below, the Company is required to make certain filings with the Federal Trade Commission and FERC which will also review the effect of the transaction on commerce and competition. To the extent that those filings conclude that there is any impact on competition resulting from the transaction, the Company will update its information in this case accordingly. Company witness Coker addresses the effect of the transaction on rates in his direct testimony.

[6] Consumers Energy will be closing on the sale of its Riverside Storage field later this year.

Q. What effect will the transaction have on the degree of risk assumed by utility customers for liabilities associated with activities that are not regulated by the commission?

A. As explained throughout my testimony the transaction significantly reduces the risk assumed by the Company's customers for long-term liabilities associated with FERC licensing requirements to operate the plants and environmental liabilities associated with eventual decommissioning.

Q. Will this transaction affect Consumers Energy's commitment to maintain existing corporate offices located in Michigan?

A. No. Consumers Energy is not changing the location of its corporate offices as a result of this transaction. Furthermore, Confluence will have a corporate office in Michigan.

Q. Will the proposed transaction have any effect on market power?

A. The PSA provides that Consumers Energy and Confluence will make a Hart-Scott-Rodino filing with the Federal Trade Commission and Department of Justice, which will review whether the proposed sale of the Facilities impacts commerce in the United States under antitrust laws. The PSA also provides for a FERC Section 203 filing. In such a filing, FERC will consider whether the proposed sale of the Facilities is in the public interest and will examine the sale's effect on competition, rates and regulation, and the potential for cross-subsidization. The Company currently anticipates that those filings will support the conclusion that the transaction does not have any effect on market power.

Q. Please describe any new entities created to facilitate the transaction.

A. Consumers Energy is not creating a new entity for this transaction. Hull Street Energy is creating a wholly owned subsidiary called Confluence Hydro.

Q. Will the proposed transaction have an adverse impact on the provision of safe, reliable, and adequate energy service in this state?

A. No. This transaction will have no adverse impact on safety, reliability, and adequacy of energy service in Michigan. The Facilities will remain operational and Consumers Energy will continue to purchase all of the energy and capacity produced by the Facilities. The buyer is experienced and financially sound with a track record of safe and responsible operation of hydro facilities.

Q. Is the proposed transaction consistent with public policy and interest?

A. Yes. This sale transaction is consistent with public policy and is in the public interest, as demonstrated in Sections I, III, and IV of my testimony. The proposed transaction provides the lowest cost option for the future of these Facilities and will result in lower customer rates compared to relicensing or decommissioning. The transaction transfers liabilities associated with the Facilities that otherwise present future rate risks for customers while still preserving the Facilities and their related impoundments for the communities that rely on them for recreation and tourism. Finally, the transaction transfers the Facilities to an experienced and financially sound buyer with a track record of safe and responsible operation of hydro facilities.

SECTION VI

Next Steps

Q. What are the next steps in this transaction?

A. Timely regulatory approval is critical as it brings certainty to impacted communities and employees. In October of 2025, Consumers Energy will request FERC to approve the license transfer and, at the same time, request approval from the MPSC for sale of the

Facilities. If approved by FERC and the MPSC, a closing date will be set for shortly afterward.

Q. How will the Facilities be operated differently during the period of time it takes to get approval?

A. The Company will be the license holder of the Facilities until FERC approves the license transfer and the MPSC approves the sale transaction. As license holder, the Company will continue to invest, maintain, and operate the facilities in a safe and regulatory compliant manner.

Q. Does this conclude your direct testimony?

A. Yes, it does.

PURCHASE AND SALE AGREEMENT

This **PURCHASE AND SALE AGREEMENT** is made and entered into effective as of September 3, 2025 (the "Effective Date") by and between **CONSUMERS ENERGY COMPANY**, a Michigan corporation ("Seller"), and **CONFLUENCE HYDRO, LLC**, a Delaware limited liability company ("Purchaser"). Seller and Purchaser are sometimes referred to herein as a "Party" and collectively as the "Parties".

RECITALS

1. Seller owns (a) the hydroelectric project known as the Alcona Hydroelectric Project, located on the Au Sable River near Glennie, Michigan (as further described in **Exhibit A-2**, the "Alcona Project"), (b) the hydroelectric project known as the Calkins Bridge Hydroelectric Project, located on the Kalamazoo River in Allegan County, Michigan (as further described in **Exhibit A-2**, the "Calkins Bridge Project"), (c) the hydroelectric project known as the Cooke Dam Hydroelectric Project, located on the Au Sable River in Iosco County, Michigan (as further described in **Exhibit A-2**, the "Cooke Project"), (d) the hydroelectric project known as the Croton Hydroelectric Project, located on the Muskegon River near Croton Township, Michigan (as further described in **Exhibit A-2**, the "Croton Project"), (e) the hydroelectric project known as the Five Channels Hydroelectric Project, located on the Au Sable River in Iosco County, Michigan (as further described in **Exhibit A-2**, the "Five Channels Project"), (f) the hydroelectric project known as the Foote Hydroelectric Project, located on the Au Sable River in Iosco County, Michigan (as further described in **Exhibit A-2**, the "Foote Project"), (g) the hydroelectric project known as the Hardy Hydroelectric Project, located on the Muskegon River near Oxbow, Michigan (as further described in **Exhibit A-2**, the "Hardy Project"), (h) the Hodenpyl Hydroelectric Project, located on the Manistee River near Cadillac, Michigan (as further described in **Exhibit A-2**, the "Hodenpyl Project"), (i) the hydroelectric project known as a the Loud Hydroelectric Project, located on the Au Sable River in Iosco County, Michigan (as further described in **Exhibit A-2**, the "Loud Project"), (j) the hydroelectric project known as the Mio Hydroelectric Project, located on the Au Sable River in Oscoda County, Michigan (as further described in **Exhibit A-2**, the "Mio Project"), (k) the hydroelectric project known as the Rogers Hydroelectric Project, located on the Muskegon River near Big Rapids, Michigan (as further described in **Exhibit A-2**, the "Rogers Project"), (l) the hydroelectric project known as the Tippy Hydroelectric Project, located on the Manistee River near Manistee, Michigan (as further described in **Exhibit A-2**, the "Tippy Project") and (m) the hydroelectric project known as the Webber Hydroelectric Project, located on the Grand River near Ionia, Michigan (as further described in **Exhibit A-2**, the "Webber Project") (the projects described in clauses (a) through (m) of this recital, each individually, a "Project" and, collectively, the "Projects").

2. Purchaser desires to purchase and assume from Seller, and Seller desires to sell and assign to Purchaser, subject to the terms and conditions contained in this Agreement, the Project Assets and the Assumed Liabilities (as such terms are defined below).

NOW, THEREFORE, in consideration of the mutual promises hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

ARTICLE 1

DEFINITIONS

Section 1.1. Definitions. For purposes of this Agreement, capitalized terms not otherwise defined herein have the meanings set forth below:

"Accounting Firm" shall mean a nationally recognized independent accounting firm mutually acceptable to Purchaser and Seller.

"Accrued Vacation Time Liabilities" shall have the meaning set forth in **Section 7.6(f)**.

"Acquisition Proposal" shall mean any inquiry, proposal or offer from any Person (other than Purchaser or any of its Affiliates) concerning (a) a merger, consolidation, liquidation, recapitalization, share exchange or other business combination transaction that is limited solely to the Projects and/or the Project Assets; or (b) the sale, lease, exchange or other disposition of any material portion of the properties or assets of the Projects and/or the Project Assets.

"Action" shall mean any action, claim, complaint, charge, suit, investigation, petition, arbitral proceeding or other legal proceeding, whether civil, criminal or administrative, in Law or in equity.

"Active Employees" shall have the meaning set forth in **Section 7.6(a)**.

"Affiliates" shall mean when used with respect to any specified Person, any other Person who or that, directly or indirectly through one or more intermediaries, Controls, is Controlled by, or is under common Control with such specified Person.

"Agreed Allocation" shall have the meaning set forth in **Section 2.3(c)**.

"Agreed Amount" shall have the meaning set forth in **Section 9.5**.

"Agreement" shall mean this Purchase and Sale Agreement, including all Exhibits and Schedules attached hereto, as the same may be amended, modified, or supplemented from time to time in writing by Seller and Purchaser or otherwise in accordance with this Agreement.

"Alcona Project" shall have the meaning set forth in the Recitals.

"Allocation Methodology" shall have the meaning set forth in **Section 2.3(b)**.

"Allocation Review Period" shall have the meaning set forth in **Section 2.3(b)**.

"Allocation Schedule" shall have the meaning set forth in **Section 2.3(b)**.

"Ancillary Agreements" shall mean the Power Purchase Agreement, the Environmental Indemnity Agreement, the Memorandum of Environmental Indemnity Agreement, the Regulatory Disallowance Agreement, the Interconnection Agreements, the Transition Services Agreement, the Equity Commitment Letter and any other agreement executed and delivered by the Parties or their Affiliates pursuant to this Agreement.

"Anti-Money Laundering and Anti-Terrorism Laws" shall mean the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Action of 2001, Public Law 107-56, Executive Order No. 13224, any Laws relating to terrorism or money laundering.

"Assignment and Assumption Agreement for Real Property Agreements" shall mean the assignment and assumption agreement in the form attached hereto as **Exhibit H** incorporated by reference herein.

"Assumed Environmental Liabilities" shall mean all Environmental Liabilities (other than Excluded Environmental Liabilities) of every kind, nature, character and description relating to, arising

from or associated with the Projects, the Project Assets or the Calkins Bridge Project Easement Reservation Real Property, regardless of whether any such Liability arose or was incurred prior to, on or after the Closing.

"Assumed Liabilities" shall have the meaning set forth in **Section 2.1(c)**.

"Automatic Objections" shall have the meaning set forth in **Section 3.1(e)**.

"Bill of Sale and General Assignment" shall mean a bill of sale and general assignment in the form attached hereto as **Exhibit F** incorporated by reference herein.

"Books and Records" shall mean original and electronic copies of material documents, papers, books, records, certificates, spreadsheets, files and records, in each case, in the possession or control of Seller and related specifically to the ownership, use and operation of the Projects, the Project Assets or the Transferred Employees during the Lookback Period, including any and all documentation and communications related to any completed, in-process or planned construction projects in respect of the Projects or the Project Assets, all of which Seller has used good faith efforts to identify for the benefit of the Parties.

"Business Day" shall mean any Day of the week other than (a) Saturday and Sunday, (b) a Day on which banking institutions in the State of Michigan are obligated or authorized by law or executive action to be closed for the transaction of normal banking business, or (c) a Day on which governmental functions in Jackson, Michigan are interrupted because of extraordinary events such as natural disasters, power outages or acts of terrorism.

"Business Employee" shall mean each of the Active Employees and Inactive Employees.

"Calkins Bridge Project" shall have the meaning set forth in the Recitals.

"Calkins Bridge Project Easement Reservation" shall mean the easements and other rights reserved in that certain Quitclaim Deed, dated February 12, 1982, by and between Consumers Power Company (now known as Consumers Energy Company) and the State of Michigan, Department of Natural Resources.

"Calkins Bridge Project Easement Reservation Real Property" shall mean the real property subject to the Calkins Bridge Project Easement Reservation.

"Casualty" shall mean any damage or destruction that, pursuant to Prudent Utility Practice or consistent with past practice, requires repair or replacement to any material part of the Project Assets for a single Project after the Effective Date and prior to the Closing Date.

"Casualty Loss" shall have the meaning set forth in **Section 4.3(a)**.

"Casualty Notice" shall have the meaning set forth in **Section 4.3(a)**.

"Casualty/Condemnation Cap" shall have the meaning set forth in **Section 4.5(b)**.

"Casualty/Condemnation Threshold" shall have the meaning set forth in **Section 4.5(a)**.

"Claim" shall have the meaning set forth in **Section 9.4**.

"Claim Notice" shall have the meaning set forth in **Section 9.4**.

"Claimed Amount" shall have the meaning set forth in **Section 9.4**.

"Closing" shall mean the consummation of the purchase and sale of the Project Assets pursuant to the terms of this Agreement.

"Closing Date" shall mean the date that is ten (10) Business Days after the date that the conditions to the Closing set forth in **Section 4.1** and **Section 4.2** have been satisfied or waived by the applicable Party (other than those conditions that by their nature will be satisfied at the Closing), or at such other time or date as Purchaser and Seller mutually agree in writing, but in no event later than one (1) year after the date on which Seller has submitted all initial application(s) for the Required Regulatory Approvals (the "Outside Closing Date"); *provided*, that beginning on the one (1) year anniversary of such date, the Outside Closing Date shall extend day-for-day for each Day thereafter that any of the Required Regulatory Approvals have not been obtained; *provided further*, such extension shall be no longer than the two (2) year anniversary of such date.

"Closing Payment" shall have the meaning set forth in **Section 2.2(c)**.

"COBRA" shall mean the Consolidated Omnibus Budget Reconciliation Act of 1985, 29 U.S.C. § 1161-1168 and 42 U.S.C. §§ 300bb-1-300bb-8, as amended.

"Code" shall mean the Internal Revenue Code of 1986, and all amendments thereto.

"Collective Bargaining Agreement" shall mean, collectively, (a) that certain Working Agreement effective as of October 1, 2020, by and between Seller and Union, (b) that certain Memorandum of Agreement effective as of April 1, 2025, and (c) all addenda and letters of understanding thereto.

"Communications Act" shall mean the Communications Act of 1934, as amended.

"Communications Laws" shall mean the Communications Act and the rules, regulations and published orders of the FCC, as amended and including any court rulings issued upon review of such rules, regulations and orders, and any Laws of any other Governmental Authority regulating or overseeing communications facilities or communications services.

"Condemnation" shall mean any taking by eminent domain of any material part of the FERC Licensed Property after the Effective Date and prior to the Closing Date.

"Condemnation Award Credit" shall have the meaning set forth in **Section 4.6(a)**.

"Condemnation Loss" shall have the meaning set forth **Section 4.4(a).**

"Condemnation Notice" shall have the meaning set forth in **Section 4.4(a)**.

"Confidential Information" shall mean all documents, studies, reports, test results, brochures, offering materials, photographs, leases, lease guarantees, rent rolls, lease schedules, surveys, title reports and commitments, legal documents, financial information, computer output and other materials and information relating to the Project Assets, and all analyses, compilations, forecasts, projections and other documents prepared based upon such materials and information, any and all proposals made in connection with a potential sale of the Project Assets (including all information contained within the Data Room), and any proposals made to Seller involving a price for the Project Assets, whether the same are in electronic, pictorial, written or other form. The term "Confidential Information" shall also include this Agreement and the Ancillary Agreements, the terms hereof and thereof and any information contained herein or therein.

The term Confidential Information shall not include information that is generally available to the public, other than any portion of the Confidential Information that becomes available to the public as a result of previous disclosure by Purchaser, its employees, officers, directors, attorneys, Affiliates, accountant, lender, investors, client and agents in violation of this Agreement.

"Confidentiality Agreement" shall mean that certain Agreement of Mutual Confidentiality, dated as of February 7, 2024, by and between Seller and Hull Street Energy, LLC.

"Consumers Interconnection Agreement" shall mean, with respect to the Alcona Project, the Calkins Bridge Project, the Cooke Project, the Croton Project, the Five Channels Project, the Foote Project, the Hodenpyl Project, the Loud Project, the Rogers Project and the Webber Project, the interconnection agreement substantially in the form attached hereto as **Exhibit S** incorporated by reference herein between Purchaser (or the applicable Subsidiary) and Consumers Energy Company, in its capacity as distribution provider, regarding the terms and conditions by which such Project may be interconnected to Consumers Energy Company's distribution system.

"Consumers Umbrella GIA" shall mean that certain Amended and Restated Generator Interconnection Agreement, effective as of February 1, 2024, by and among Seller, METC, and MISO.

"Contested Amount" shall have the meaning set forth in **Section 9.5**.

"Contract" shall mean any legally binding contract, assignment, obligation, understanding, commitment, lease, license, purchase order, bid or other agreement, together with all amendments and other modifications thereto.

"Control" shall mean, as to any Person, the power to direct or cause the direction of the management and policies of such Person, whether through the ownership of voting securities, by contract or otherwise. The term "Controlled" shall have a correlative meaning.

"Cooke Project" shall have the meaning set forth in the Recitals.

"CPNode" shall have the meaning set forth in the MISO Rules.

"Croton Project" shall have the meaning set forth in the Recitals.

"Data Room" shall mean that data room established by or on behalf of Seller access to which was provided to Purchaser and/or Purchaser's Affiliates, located at https://consumersenergy.sharepoint.com.mcas.ms/sites/ConsumersEnergyHydroDataRoom.

"Day" shall mean calendar days unless otherwise specified in this Agreement.

"Deeds" shall mean, with respect to each Project, (a) the quitclaim deed conveying the applicable Fee Simple Real Property to Purchaser substantially in the form attached hereto as **Exhibit E-1** incorporated by reference herein, which will contain the legal description contained in Seller's vesting deeds by which it acquired title, and (b) if Purchaser acquires the applicable Survey, the quitclaim deed conveying the applicable Fee Simple Real Property to Purchaser substantially in the form attached hereto as **Exhibit E-1** incorporated by reference herein, which will contain the legal description shown on the applicable Survey for the applicable Fee Simple Real Property described in the aforementioned quitclaim deed, and in each case (i) shall reserve the Reserved Easements, exclude the METC Easements, and be subject to the Permitted Exceptions and (ii) may be updated by mutual agreement of the Parties following the Effective Date pursuant to **Section 3.1(f)** and **Section 3.1(g)**.

"Designated Purchaser Representatives" shall mean Sarah Wright, Scott Hofmeister, and Jack McGrath.

"Designated Seller Representatives" shall mean Sri Maddipati, George McKenzie, Ben Rainwater, and Richard Blumenstock.

"Disclosure Loss" shall have the meaning set forth in **Section 7.16(e)**.

"Disclosure Schedule" shall mean the disclosure schedules attached to this Agreement.

"Disclosure Schedule Update" shall have the meaning set forth in **Section 7.16(a)**.

"Dispute" shall have the meaning set forth in **Section 12.1**.

"Dollars" and the sign "$" shall mean the lawful currency of the United States of America.

"Effective Date" shall have the meaning set forth in the Preamble.

"EGLE Joint Funding Agreement" and "EGLE Joint Funding Agreements" shall have the meanings set forth in **Section 7.12(o)**.

"EGLE Funding Obligations" shall have the meaning set forth in **Section 8.4(h)**.

"EGLE Funding Period" shall have the meaning set forth in **Section 8.4(h)(A)**.

"Employee Benefit Plan" shall have the meaning set forth in **Section 5.17(a)**.

"Employment Laws" shall mean any and all federal and state laws; local statues and ordinances that are related to or pertain to employment or employment practices, wrongful discharge, or breach of express or implied Contract; and further including the following statutes: Title VII of the Civil Rights Act, 42 U.S.C. §§ 2000e-2000e17 (as amended); the Family and Medical Leave Act, 29 U.S.C. § 2601 *et seq.*; the Age Discrimination in Employment Act, 29 U.S.C., § 621 *et seq.*; the Older Workers Benefit Protection Act, 104 Stat. § 978 *et seq*.; the Americans with Disabilities Act, 42 U.S.C. §§ 12101 *et seq*.; the National Labor Relations Act, 29 U.S.C. § 151-169; WARN Act; the Rehabilitation Act, 29 U.S.C. § 701 *et seq*.; the Michigan Earned Sick Time Act; MCL § 408.963 *et seq*.; the Bullard-Plawecki Employee Right to Know Act, MCL § 423.501 *et seq*.; the Worker's Disability Compensation Act, MCL § 418.30S1 *et seq*.; the Fair Labor Standards Act, 29 U.S.C. § 201; the Health Insurance Portability and Accountability Act, 42 U.S.C. § 1320d *et seq.*; and the Michigan Personal Data Privacy Act, MCL § 445.63 *et seq*.; ERISA; and COBRA.

"Endorsements" shall have the meaning set forth in **Section 3.1(d)**.

"Environment" or "Environmental" shall mean ambient air, soil, surface waters and wetlands (including navigable and non-navigable waters), groundwater, drinking water supply, stream sediments, land surface or subsurface strata, plant and animal life, and any other environmental medium or natural resource.

"Environmental Indemnity Agreement" shall mean the Environmental Indemnity Agreement among the Parties and the Subsidiaries in the form attached hereto as **Exhibit M-1** incorporated by reference herein, to be dated as of the Closing Date and delivered by the Parties at the Closing.

"Environmental Laws" shall mean any local, state and federal Law, regulation, rule, ordinance, code, or binding order or decree relating to the Environment and Environmental conditions, including the

Resource Conservation and Recovery Act of 1976, 42 U.S.C. §§ 6901 *et seq*., the Comprehensive Environmental Response Compensation and Liability Act of 1980, 42 U.S.C. §§ 9601-9657, as amended by the Superfund Amendments and Reauthorization Act of 1986, the Hazardous Materials Transportation Act, 49 U.S.C. §§ 6901 *et seq*., the Federal Water Pollution Control Act, 33 U.S.C. §§ 1251 *et seq*., the Clean Air Act, 42 U.S.C. §§ 741 *et seq*., the Clean Water Act, 33 U.S.C. §§ 7401 *et seq*., the Toxic Substances Control Act, 15 U.S.C. §§ 2601-2629, the Safe Drinking Water Act, 42 U.S.C. §§ 300f-300j, the Endangered Species Act, 16 U.S.C. §§ 1531-1544, the Federal Insecticide, Fungicide and Rodenticide Act, 7 U.S.C. §136, *et seq*., the provisions of the Occupational Safety and Health Act of 1970, 29 U.S.C. §651, *et seq*., relating to the handling of and exposure to Hazardous Materials and similar substances, each as amended, and any regulations promulgated thereunder, guidance and directives issued with respect thereto, or policies adopted by the applicable authorities thereunder, and the Michigan Natural Resources and Environmental Protection Act ("NREPA"), Act 451 of 1994, MCL 324.101, *et seq*., as amended, including but not limited to, Part 31 Water Resources Protection, Part 55 Air Pollution Control, Part 111 Hazardous Waste Management, Part 115 Solid Waste Management, and Part 201 Environmental Remediation, and any State of Michigan regulations promulgated thereunder, guidance and directives issued with respect thereto or policies adopted by the State of Michigan thereunder. For the avoidance of doubt, the Federal Power Act, 16 U.S.C. § 791a, shall not be considered an Environmental Law.

"Environmental Liabilities" shall mean any Liabilities that are (a) related to any Environmental, health or safety issues, (b) based upon or related to any provision of applicable Environmental Law or the presence or alleged presence of Hazardous Materials, or (c) any third-party claim for damages arising from pollution or contamination or under or in respect of Environmental Laws.

"Environmental Permit" shall mean any Permit required or issued under any Environmental Law.

"Equity Commitment Letter" shall mean that certain executed commitment letter from Hull Street Energy Partners III, L.P. and its Affiliates, dated as of the Effective Date and attached hereto as **Exhibit X**.

"ERISA" shall mean the Employee Retirement Income Security Act, 29 U.S.C. § 1001 *et seq*.

"ERISA Affiliate" shall mean any employer (whether or not incorporated) that would be treated together with Seller as a "single employer" within the meaning of Section 414 of the Code or Section 4001 of ERISA.

"Escrow Agent" shall mean Stewart Title Company.

"Escrow Agreement" shall have the meaning set forth in **Section 8.1**.

"Excluded Assets" shall mean the items listed in **Section 2.1(b)**.

"Excluded Contracts" shall mean those Contracts listed on **Schedule 2.1(b)**.

"Excluded Environmental Liabilities" shall have the meaning set forth in **Section 2.1(d)(vi)**.

"Excluded Liabilities" shall have the meaning set forth in **Section 2.1(d)**.

"Excluded Permits" shall mean (a) all Permits necessary under or otherwise required by applicable Law for the operation, maintenance, repair, ownership and use of the Projects and Project Assets that cannot be transferred to Purchaser or its Subsidiary, as applicable, in accordance with applicable Law and (b) Project Permits that have expired in accordance with their terms and are no longer necessary under or otherwise required by applicable Law for the operation, maintenance, repair, ownership and use of the Projects and Project Assets.

"Excluded Shoreline Licenses" shall mean those agreements regarding usage and access to shorelines listed in **Exhibit D** which are marked with an asterisk.

"Executive Order No. 13224" shall mean Executive Order No. 13224 (Blocking Property and Prohibiting Transactions with Persons Who Commit, Threaten to Commit, or Support Terrorism).

"Existing Support Obligations" shall have the meaning set forth in **Section 7.18**.

"FCC" shall mean the Federal Communications Commission or any successor.

"FCC Approval" shall mean one or more final, non-appealable Orders issued by the FCC under the Communications Laws, that consents to or otherwise approves the transfer of each of the FCC Licenses in their entirety from Seller to Purchaser and otherwise in form and substance reasonably satisfactory to each of the Parties.

"FCC Licenses" shall mean, collectively, the licenses issued by the FCC that are used or useful in the operation of the Projects, listed on **Schedule 1.1(c)**.

"Federal Power Act" shall mean the Federal Power Act, as amended, and the rules and regulations promulgated thereunder.

"Fee Simple Real Property" shall mean all of Seller's right, title, and interest in the land generally described and/or depicted on **Exhibit A-1** attached hereto.

"FERC" shall mean the Federal Energy Regulatory Commission or any successor.

"FERC 203 Approval" shall mean final Order or Orders, issued by FERC under Section 203 of the Federal Power Act, approving the transactions contemplated by this Agreement that (a) does not contain any conditions or restrictions imposed on, or modifications required of, Seller that Seller reasonably determines adversely affects its decision to sell the Project Assets pursuant to this Agreement and (b) does not contain any conditions or restrictions imposed on, or modifications required of, Purchaser that Purchaser reasonably determines adversely affects (i) its decision to purchase the Project Assets pursuant to this Agreement or (ii) its ownership of the Project Assets following the Closing.

"FERC Approvals" shall mean the FERC License Transfer Approvals, the FERC License Amendment Approvals and the FERC 203 Approval.

"FERC License Amendment Approvals" shall mean one or more final, non-appealable Orders issued by the FERC under Section 6 of the Federal Power Act and the applicable regulations thereunder, that approves an amendment of any FERC License (a) to remove any Excluded Assets from the FERC Licensed Property associated with such FERC License and (b) to recognize Seller's right to use any Reserved Easements and Temporary Substation Easements located within the FERC Licensed Property associated with such FERC License, and otherwise in form and substance satisfactory to each of the Parties in its reasonable discretion.

"FERC License Transfer Approvals" shall mean one or more final, non-appealable Orders issued by the FERC under Section 8 of the Federal Power Act and the applicable regulations thereunder, that approves the transfer of each of the FERC Licenses in their entirety from Seller to Purchaser and otherwise in form and substance satisfactory to each of the Parties in its reasonable discretion.

"FERC Licensed Property" shall mean, with respect to each FERC License, the Land, including the Flowage Easements, within the FERC-approved project boundary for such FERC License, but excluding any Excluded Assets from the applicable FERC Licensed Property pursuant to the FERC License Amendment Approvals.

"FERC Licenses" shall mean, collectively, the licenses issued by FERC with respect to the Projects, listed on **Schedule 1.1(a)**.

"Five Channels Project" shall have the meaning set forth in the Recitals.

"Flowage Easements" shall mean, solely with respect to the Projects, all flowage easements, including those described in attached **Exhibit U** incorporated herein by reference, which may be updated by mutual agreement of the Parties following the Effective Date, as necessary, which generally permit Seller to flood properties in connection with Seller's operation of the Projects, including easements in gross and appurtenant to the Land.

"Foote Project" shall have the meaning set forth in the Recitals.

"Fraud" shall mean, with respect to a Party, actual and intentional fraud committed by such Party in respect of any representation or warranty contained in this Agreement which shall require: (a) a false representation of fact by such Party in this Agreement (including any "bringdown" or other confirmation with respect to any such representation or warranty); (b) such Party had actual knowledge that such representation or warranty was false when made and acted with scienter; (c) the false representation or warranty caused the other Party to whom it was made, in justifiable reliance upon such false representation or warranty and with ignorance as to the falsity of such representation or warranty, to take or refrain from taking action; and (d) the other Party to whom the false representation was made suffered Loss by reason of such reliance. "Fraud" expressly excludes legal theories such as constructive fraud, equitable fraud, promissory fraud, unfair dealings fraud, negligent or reckless misrepresentation, and other fraud-based claims based on similar legal theories.

"GAAP" shall mean generally accepted accounting principles in the United States of America, as amended from time to time, applied consistently.

"Government List" shall mean any of (a) the lists maintained by the United States Department of Commerce (Denied Persons and Entities), (b) the list maintained by the United States Department of Treasury (Specially Designated Nationals and Blocked Persons), (c) the lists maintained by the United States Department of State (Terrorist Organizations and Debarred Parties), and (d) the lists of designated persons maintained by the United Nations Security Council, the European Union or any European Union Member State.

"Governmental Approvals" shall mean the FERC Approvals, the MPSC Approval, the FCC Approval, requests for new Property Tax identification numbers for the Reserved Easements and the approvals of all other Governmental Authorities having regulatory authority over the Parties, the Projects, the Project Assets, or the transactions contemplated by this Agreement or the Ancillary Agreements.

"Governmental Authority" shall mean any federal, state, or local authority, agency, court, tribunal, department, board, council, commission or other body or political subdivision thereof, including any municipality, township and county, and any entity exercising executive, legislative, judicial, regulatory or administrative functions of or pertaining to government, including any corporation or other entity owned or controlled by any of the foregoing.

"Hardy EPC Agreement" shall mean that certain Contract for Hardy Dam Rehabilitation, dated as of January 3, 2025, by and between Seller and Kokosing Industrial, Inc.

"Hardy Interconnection Agreement" shall mean, with respect to the Hardy Project, that certain Large Generator Interconnection Agreement, effective as of July 25, 2008, by and among Seller, METC, and MISO.

"Hardy Project" shall have the meaning set forth in the Recitals.

"Hazardous Materials" shall mean any substance which is or contains: (a) any "hazardous substance" as now or hereafter defined in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (42 U.S.C. § 9601 *et seq*.), Part 201 of NREPA, or any regulations promulgated thereunder; (b) any "hazardous waste" as now or hereafter defined in the Resource Conservation and Recovery Act (42 U.S.C. § 6901 *et seq*.), Part 111 of NREPA, or regulations promulgated thereunder; (c) any substance regulated by the Toxic Substances Control Act (15 U.S.C. § 2601 *et seq*.); (d) gasoline, diesel fuel or other petroleum hydrocarbons; (e) asbestos and asbestos containing materials, in any form, whether friable or nonfriable; (f) polychlorinated biphenyls; (g) radon gas; (h) mold, mildew, fungus or other potentially dangerous organisms; (i) putrescible or non-putrescible solid, semisolid, liquid or gaseous waste of any type; (j) any perfluoroalkyl, polyfluoroalkyl or other similar substances; and (k) any additional substances or materials, including coal or coal ash residuals or coal combustion residues, which are now or hereafter classified or considered to be hazardous or toxic or which are regulated or limited under any applicable Laws now or hereafter enacted, promulgated, or amended, of the United States, the states, the counties, the cities or any other political subdivisions in which the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property is located and any other political subdivision, agency or instrumentality exercising jurisdiction over the owner of the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property or the use of the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property relating to pollution, the protection or regulation of human health, natural resources or the Environment, or the emission, discharge, Release or threatened Release of pollutants, contaminants, chemicals or industrial, toxic or hazardous substances or waste into the Environment (including ambient air, surface water, ground water, land, soil, or sediment), including all applicable rules and regulations of all Governmental Authorities.

"Hodenpyl Project" shall have the meaning set forth in the Recitals.

"HSR Act" shall mean the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended.

"HSR Approval" shall mean the filings of the Parties pursuant to the HSR Act shall have been made and the applicable waiting period and any extensions thereof shall have expired or been terminated.

"Inactive Employees" shall have the meaning set forth in **Section 7.6(a)**.

"Income Tax" shall mean any federal, state, local or foreign Tax measured or imposed on income or earnings, capital or net worth (and any franchise Tax or other Tax in connection with doing business imposed in lieu thereof), including any interest, penalty or addition thereto, whether disputed or not; *provided*, *however*, the term "Income Tax" shall not include any sales or use Tax.

"Indemnified Party" shall have the meaning set forth in **Section 9.4**.

"Indemnifying Party" shall have the meaning set forth in **Section 9.4**.

"Inspection Period" shall mean the period commencing on the Effective Date and ending one hundred twenty (120) Days later.

"Inspections" shall have the meaning set forth in **Section 7.5(a)**.

"Insurance Policies" shall have the meaning set forth in **Section 5.15**.

"Intended Tax Treatment" shall have the meaning set forth in **Section 2.3(a)**.

"Interconnection Agreements" shall mean, with respect to each Project, a Consumers Interconnection Agreement, a METC Interconnection Agreement or the Hardy Interconnection Agreement, as applicable.

"Interim Period" shall mean the period of time from the Effective Date until the earlier of (a) the Closing Date or (b) the date that any valid termination of this Agreement becomes effective.

"Internal Mapping" shall mean the documents attached as **Exhibit V** (as may be updated by mutual agreement of the Parties following the Effective Date, as necessary).

"Land" shall mean the Fee Simple Real Property, together with (a) all improvements, buildings, structures, and fixtures, located thereon which are Project Assets, (b) all privileges, rights, riparian rights and obligations, and bottom lands, easements, the Real Property Agreements, and appurtenances belonging to such land which are Project Assets and (c) all right, title and interest (if any) of Seller in and to any streets, alleys, passages or other rights-of-way or appurtenances included in, adjacent to or used in connection with such land. Upon receipt of a Title Commitment which includes a metes and bounds vesting deed legal description of the Fee Simple Real Property or if Purchaser obtains a metes and bounds legal description (including in connection with an applicable Survey) of the Fee Simple Real Property, then **Exhibit A-1** may be updated by mutual agreement of the Parties following the Effective Date, as necessary, to reflect such metes and bounds legal description in addition to the applicable description and/or depiction set forth in **Exhibit A-1**.

"Law" or "Laws" shall mean any federal, state, local or other law, common law, constitution, treaty, code, rule, ordinance, binding directive, regulation, Order, certificate, authorization, or approval of a Governmental Authority that is binding on a Party or any of its property.

"Lease Year" shall have the meaning set forth in **Section 8.4(g)**.

"Leases" shall mean (a) those leases related solely to the Projects and Project Assets described on the attached **Exhibit G** incorporated herein by reference, (b) the Flowage Easements, (c) the Calkins Bridge Project Easement Reservation, and (d) the Shoreline Licenses (other than Excluded Shoreline Licenses).

"Liability" shall mean any liability or obligation, whether known or unknown, whether asserted or unasserted, whether absolute or contingent, whether accrued or unaccrued, whether liquidated or unliquidated, and whether due or to become due.

"Liability Cap" shall have the meaning set forth in **Section 10.1**.

"Lien" shall mean any mortgage, deed of trust, lien, pledge, charge, security interest, assessment, or hypothecation, or any unrecorded encumbrance, reservation, encroachments, restrictive covenant, easement or encumbrance of any kind, whether arising by Contract or under any applicable Law.

"Lien Date" shall have the meaning set forth in **Section 8.4(b)(i)(A)**.

"Lookback Period" shall mean a five (5) year period commencing five (5) years prior to the Effective Date and ending on the Effective Date.

"Losses" shall mean any and all claims, damages, penalties, awards, settlement payments, losses, liabilities, costs, deficiencies and expenses (including reasonable investigative costs, court costs and any reasonable outside legal, accounting or expert expenses).

"Loud Project" shall have the meaning set forth in the Recitals.

"Made Available" shall mean, collectively, (i) the materials that were delivered or made available to Purchaser or its representatives in the Data Room at least five (5) Business Days prior to the Effective Date and (ii) the materials listed on **Schedule 1.1(d)** that were delivered or made available to Purchaser or its representatives in the Data Room prior to the Effective Date.

"Material Adverse Effect" shall mean any change or event that, individually or in the aggregate, (a) with respect to Seller or Purchaser, as the case may be, has or would reasonably be expected to have a material adverse effect on the ability of Seller or Purchaser, as the case may be, to consummate the transactions contemplated by this Agreement, and (b) with respect to the Projects or the Project Assets, has or would reasonably be expected to have a material adverse effect on the assets, liabilities, condition (financial or otherwise) of or ability to own, use, operate, maintain or generate electricity from, in each case, the Projects, taken as a whole. Notwithstanding the foregoing, none of the following changes or events shall be taken into account or form the basis of determining whether there has been or would reasonably be expected to have been a Material Adverse Effect: (i) any change or event generally affecting the international, national or regional electric generating, transmission or distribution industry, including any change in international, national or regional wholesale or retail markets for electric power or energy or for transmission or distribution; (ii) any change or event generally affecting international, national or regional political, market, economic or business conditions; (iii) any change or event generally affecting the hydroelectric power generation industry; (iv) any change in financial, banking, securities or currency markets, including the inability to finance the transactions contemplated by this Agreement or any increased costs for financing or suspension of trading in, or limitation on process for, securities on any domestic or international securities exchange; (v) any failure of the Projects or Project Assets to meet projections or forecasts or revenue or earnings predictions for any period; (vi) the execution, delivery and performance by the Parties of this Agreement and the Ancillary Agreements or the pendency or public disclosure of this Agreement or the Ancillary Agreements or the transactions contemplated hereby or thereby; (vii) any change in general regulatory or political conditions, including any engagements of hostilities, acts of war or terrorist activities or changes imposed by a Governmental Authority associated with additional security; (viii) any change in markets for commodities, equipment or supplies used or to be used in connection with the Projects; (ix) any effect of weather, climate or atmospheric condition or other acts of God; (x) any change in Laws (including Environmental Laws), GAAP (or the enforcement or interpretation thereof), regulatory accounting principles or industry standards; (xi) any change in market design, pricing or rules applicable to the Projects, including any change in regional transmission authority rules, procedures, guidelines or requirements (including MISO); (xii) any change or event that is cured or corrected by Seller prior to the Closing; (xiii) any change in the financial condition or results of operation of Purchaser or its Affiliates, including its ability to access capital and equity markets and changes due to a change in the credit rating of Purchaser or its Affiliates; and (xiv) global health conditions (including any epidemic, pandemic, or disease outbreak (including the Covid-19 virus), but only to the extent of any material worsening of such conditions threatened or existing as of the Effective Date); *provided*, that the exceptions contained in **clauses (i)** through **(xiv)** will not apply to the extent that such change or event is disproportionately adverse

with respect to a Project or the Project Assets (taken as a whole), as compared to other hydroelectric power generation projects in the United States.

"Material Contracts" shall mean the following Contracts to which Seller is a party which are solely related to the Projects and any Project Asset and which are in effect: (a) each Contract for the purchase, sale or delivery of energy, capacity or ancillary services from any Project; (b) each Contract for the transmission of electricity to or from any Project; (c) each Contract establishing any joint venture, strategic alliance or other similar collaboration that is material to the Projects, taken as a whole; (d) each Contract that involves expenditures, receipts or payments of more than One Million Dollars ($1,000,000); (e) the Leases; and (f) each Contract with any Governmental Authority, other than, for the avoidance of doubt, Permits; *provided*, Material Contracts shall not include any Excluded Contract.

"Material Environmental Permits" shall have the meaning set forth in **Section 5.13(c)**.

"Material Permits" shall have the meaning set forth in **Section 5.14(a)**.

"Memorandum of Environmental Indemnity Agreement" shall mean the Memorandum of Environmental Indemnity Agreement among the Parties and the Subsidiaries, substantially in the form attached hereto as **Exhibit M-2** incorporated by reference herein, to be dated as of the Closing Date and delivered by the Parties at Closing.

"Memorandum of Understanding" shall mean a memorandum of understanding regarding the assumption and adoption of the Collective Bargaining Agreement, substantially in the form attached hereto as **Exhibit W-1** incorporated by reference herein.

"METC" shall mean Michigan Electric Transmission Company.

"METC Easements" shall mean those easements described on the attached **Exhibit Q** incorporated herein by reference.

"METC Interconnection Agreements" shall mean, with respect to the Mio Project and the Tippy Project, an interconnection agreement among MISO, METC and Purchaser (or the applicable Subsidiary) which describes the terms and conditions regarding the electric connection of such Project to the METC transmission system.

"Mio Project" shall have the meaning set forth in the Recitals.

"MISO" shall mean Midcontinent Independent System Operator, Inc. or any successor.

"MISO Rules" shall mean the Open Access Transmission, Energy and Operating Reserve Markets Tariff, including all schedules or attachments thereto, of MISO, as amended from time to time, including any successor tariff or rate schedule approved by the FERC, together with any applicable MISO Business Practice Manual as amended from time to time.

"MPSC" shall mean the Michigan Public Service Commission or any successor.

"MPSC Approval" shall mean the final Order, no longer subject to appeal, issued by the MPSC: (a) approving the transactions contemplated by this Agreement, including the Power Purchase Agreement, on terms and conditions mutually acceptable to each of the Parties, in each Party's respective reasonable discretion, including terms and conditions related to cost recovery and (b) which does not contain terms,

conditions or modifications unacceptable to each of the Parties in each Party's respective reasonable discretion.

"Multiemployer Plan" shall mean any employer (whether or not incorporated) that would be treated together with Seller as a "single employer" within the meaning of Section 414 of the Code or Section 4001 of ERISA.

"NLRA" shall mean the National Labor Relations Act, 29 U.S.C. §§ 151-169.

"Non-Union Employees" shall mean the non-union employees of Seller listed on **Part I** of **Schedule 5.16(a)**.

"Notice to Terminate" shall have the meaning set forth in **Section 7.5(a)**.

"Order" shall mean any binding order, writ, judgment, injunction, decree (including any consent decree), settlement, stipulation, determination, award or similar direction or agreement of or with any Governmental Authority.

"Outside Closing Date" shall have the meaning set forth in the definition of Closing Date.

"Outstanding Support Obligations" shall have the meaning set forth in **Section 7.18**.

"Party" and "Parties" shall have the meanings set forth in the Preamble.

"Permits" shall mean all permits, licenses, approvals, directives, consents, orders, registrations, privileges, franchises, memberships, certificates, entitlements and other authorizations issued by Governmental Authorities, including any environmental, health and safety permits, use permits, zoning approvals, site plan approval, building permits, certificates of occupancy, and all amendments, modifications, supplements, general conditions and addenda thereto, but excluding the FERC Licenses and the FCC Licenses.

"Permitted Disclosure Schedule Update" shall have the meaning set forth in **Section 7.16(e)**.

"Permitted Exceptions" shall mean: (a) applicable zoning, subdivision, building and other land use Laws; (b) all matters, whether or not of record, that arise out of the actions of Purchaser or its Affiliates, agents, representatives or contractors, unless such matters arise out of actions of Purchaser or its Affiliates, agents, representatives or contractors which are expressly contemplated by this Agreement or consented to by Seller; (c) any Lien of real estate Taxes and assessments not yet due and payable, subject to adjustment as provided herein; (d) all matters that the Title Company commits to insuring over; (e) any installation, service, connection, usage or maintenance charge for sewer, water, electricity, telephone, cable or internet service, and any charges due under any reciprocal easement agreement, declarations of covenants, conditions, restrictions, common area agreement, shared maintenance agreement, or similar agreements which burden or benefit any Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property, in each case subject to adjustment as provided herein; (f) all matters shown on or referenced in the Title Commitment or the Survey, for each Project, as applicable, and in each case to which Purchaser has not objected as of the Title Objection Date; (g) all matters deemed Permitted Exceptions pursuant to **Section 3.1(c)(ii)** or **Section 3.1(c)(iv)**; (h) solely in the case that Purchaser elects not to order a Survey, or fails to order a Survey by the Survey Order Date, for a Project, all matters as would be disclosed by a survey that meets the requirements of **Section 3.1(b)** of the applicable Fee Simple Real Property or, if applicable, the Calkins Bridge Project Easement Reservation Real Property and/or a physical inspection of the applicable Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property

and to which Purchaser has not objected as of the applicable Title Objection Date; (i) the Leases; (j) the Reserved Easements identified on the Internal Mapping as of the Effective Date and the Temporary Substation Easements (each, as may be updated by mutual agreement of the Parties following the Effective Date, as necessary); (k) the METC Easements; (l) any Lien for or in respect of Taxes or other governmental charges that are not yet delinquent (or which may be paid without interest or penalties) or that are being contested in good faith by appropriate proceedings and for which adequate reserves have been established in accordance with GAAP; (m) the terms and conditions of the Material Contracts, the Material Permits, the Material Environmental Permits and the other Project Permits Made Available to Purchaser as of the Effective Date; (n) any Lien that is released at or prior to the Closing; (o) Liens for mechanics', materialmen's, workmen's, repairmen's, warehousemen's, carriers' and similar Liens arising or incurred in the ordinary course of business that are not yet due and payable; and (p) unrecorded licenses for landowner improvements such as docks and sea walls Made Available to Purchaser.

"Person" shall mean any individual, estate, trust, partnership, limited liability company, limited liability partnership, corporation, Governmental Authority or other legal entity and any unincorporated association.

"PLLI" shall have the meaning set forth in **Section 7.11**.

"Post-Closing Tax Period" shall mean (a) any Tax period beginning after the Closing Date and (b) with respect to any Straddle Period, the portion of such Straddle Period beginning on the Day after the Closing Date and ending on the last Day of such Straddle Period.

"Power Purchase Agreement" shall mean the Power Purchase Agreement, dated as of the Effective Date, by and between Seller and Purchaser.

"PPA Price" shall have the meaning set forth in the Power Purchase Agreement for "Energy Purchase Price".

"Pre-Closing Tax Period" shall mean (a) any Tax period ending on or before the Closing Date and (b) with respect to any Straddle Period, the portion of such Straddle Period beginning on the first Day of such Straddle Period and ending on (and including) the Closing Date.

"Project" or "Projects" shall have the meaning set forth in the Recitals.

"Project Assets" shall mean, all assets, properties, rights and interests of every kind, nature, character and description (whether real, personal or mixed), whether tangible or intangible, and at the Project site, owned or leased by, or licensed to, Seller as of the Closing Date, in each case, which solely relate to, are solely used by, or solely held for use in connection with operation, maintenance, repair, ownership or use of the Projects (in each case, excluding the Excluded Assets), including:

(a) the Books and Records;

(b) the Project Contracts;

(c) the Project Equipment;

(d) the Tangible Personal Property;

(e) the Project Permits;

(f) the Leases;

(g) the Fee Simple Real Property; and

(h) the supplies, inventory and repair or replacement parts relating to a Project.

"Project Contracts" shall mean all Contracts to which Seller is a party related solely to the Projects and Project Assets, including the Material Contracts and the Contracts described in **clause (b)** of the definition Real Property Agreements but excluding the Excluded Contracts.

"Project Equipment" shall mean all equipment and other Tangible Personal Property related solely to the Projects, including but not limited to the equipment and Tangible Personal Property described on **Schedule 1.1(b)**.

"Project Permits" shall mean all Permits obtained and issued in the name of Seller, an Affiliate of Seller or a Project, in each case, necessary under or otherwise required by applicable Law for the operation, maintenance, repair, ownership and use of the Projects and Project Assets, including the Material Permits and the Material Environmental Permits, but excluding the Excluded Permits and ministerial Permits of a type that are routinely granted on application.

"Property Taxes" shall have the meaning set forth in **Section 8.4(b)(i)**.

"Prorated Costs" shall have the meaning set forth in **Section 8.4(a)**.

"Prudent Utility Practice" shall mean the practices, methods and acts generally followed by the electric utility industry during the relevant period with respect to generation facilities similar to the Projects as changed from time to time, which generally include, but are not limited to, engineering, operating, safety, reliability, equipment, and adherence to applicable industry codes, standards, regulations and laws. Prudent Utility Practices are not intended to be limited to the optimum practices, methods or acts to the exclusion of others, but rather are intended to include acceptable practices, methods and acts generally accepted in the energy generation industry in the United States.

"PTO" shall have the meaning set forth in **Section 5.17(a)**.

"Purchase Price" shall have the meaning set forth in **Section 2.2(a)**.

"Purchaser" shall have the meaning set forth in the Preamble.

"Purchaser 401(k) Plan" shall have the meaning set forth in **Section 7.6(g)**.

"Purchaser Indemnified Party" shall have the meaning set forth in **Section 9.2**.

"Purchaser Post-Closing Credits" shall have the meaning set forth in **Section 8.4(a)**.

"Purchaser Proration Credits" shall have the meaning set forth in **Section 8.4(a)**.

"Purchaser Regulatory Approvals" shall mean, other than the Required Regulatory Approvals, the HSR Approval and the FCC Approvals, the approvals, registrations or filings that the Purchaser needs to obtain in order to complete the transaction and operate the Projects as set forth on **Schedule 4.1(j)**.

"Purchaser Required Consents" shall have the meaning set forth in **Section 6.5**.

"Purchaser Taxes" shall have the meaning set forth in **Section 9.3(d)**.

"Purchaser Title Objections" shall have the meaning set forth in **Section 3.1(c)(i)**.

"Purchaser Title Objections Cap" shall have the meaning set forth in **Section 3.1(c)(iv)**.

"Purchaser Transaction Expenses" shall mean, without duplication, the aggregate amount of all fees, costs and expenses reasonably incurred by Purchaser or any of its Affiliates in connection with the negotiation, preparation and execution of this Agreement and the Ancillary Agreements and the consummation of the transactions contemplated by this Agreement, which shall include any reasonable legal, accounting, financial advisory and other third party advisory or consulting fees and expenses.

"Purchaser's Knowledge" shall mean the actual knowledge of any Designated Purchaser Representative, with no heightened duty to investigate imposed on such individual above that of an ordinary and prudent individual in a similar position or involved in a similar transaction or position.

"R&W Insurer" shall mean Ryan Transactional Risk as the claim representative for the insurers under the R&W Policy.

"R&W Policy" shall have the meaning set forth in **Section 7.8(a)**.

"Real Property Agreements" shall mean (a) all of the Leases and (b) all other Contracts that grant, convey or assign to Seller or any of its Affiliates a fee, leasehold, easement or other ownership, use or occupancy interest, or an option to acquire any of the foregoing interests, in the Land for the ownership, use, operation or maintenance of the Projects, to which Seller or any of its Affiliates is a party, together with all amendments, assignments and modifications as to any of such Contracts.

"Regulatory Disallowance Agreement" shall mean the Regulatory Disallowance Agreement between the Parties, substantially in the form attached hereto as **Exhibit T** incorporated by reference herein, to be dated as of the Closing Date and delivered by the Parties at Closing.

"Release" shall mean, with respect to Hazardous Materials, any sudden, intermittent or gradual release or discharge of any Hazardous Materials in the Environment, including any burial, incineration, spray, injection, abandonment, deposit, spillage, leakage, seepage, pouring, emission, emptying, throwing, dumping, placing, exhausting, escape, leaching, migration, dispersal, dispensing, disposal or other movement of any Hazardous Materials in the Environment regardless of whether such Release occurred before the date hereof.

"Replacement Support Obligation" shall have the meaning set forth in **Section 7.18**.

"Required Regulatory Approvals" shall mean the FERC Approvals and the MPSC Approval.

"Reserved Easements" shall mean the easements for distribution and Substation improvements sitting as well as Seller's electrical distribution equipment, substantially in the form set forth in **Exhibit E-1** and as generally described on **Exhibit O** attached hereto and incorporated by reference herein, respectively, which in each case may be updated by mutual agreement of the Parties following the Effective Date pursuant to **Section 3.1(f)** and **Section 3.1(g)**.

"Reserved Easements Real Property" shall mean, with respect to each Reserved Easement, the real property subject to such Reserved Easement generally described and depicted on **Exhibit O** attached hereto,

which may be updated by mutual agreement of the Parties following the Effective Date, pursuant to **Section 3.1(f)** and **Section 3.1(g)**.

"Residential Fee Simple Real Property" shall have the meaning set forth in **Section 4.1(u)**.

"Residential Fee Simple Real Property Deed" shall mean, with respect to the Residential Fee Simple Real Property, the covenant deed conveying the Residential Fee Simple Real Property to Purchaser substantially in the form attached hereto as **Exhibit E-2**.

"Response Notice" shall have the meaning set forth in **Section 9.5**.

"Restoration Obligations" shall have the meaning set forth in **Section 7.5(c)**.

"Rogers Project" shall have the meaning set forth in the Recitals.

"Seller" shall have the meaning set forth in the Preamble.

"Seller 401(k) Plans" shall have the meaning set forth in **Section 7.6(g)**.

"Seller Employee" shall mean an employee of Seller that is not a Transferred Employee and continues employment with Seller subsequent to the Closing Date.

"Seller Indemnified Party" shall have the meaning set forth in **Section 9.3**.

"Seller Proration Credits" shall have the meaning set forth in **Section 8.4(a)**.

"Seller Required Consents" shall have the meaning set forth in **Section 5.5**.

"Seller Taxes" shall mean any and all liabilities for the following Taxes, in each instance regardless of whether any such Taxes are reflected or shown as due or payable on any Tax Return, and regardless of whether any such Taxes are assessed, payable or due prior to, on or after the Closing Date: (a) any and all Property Taxes for which Seller is responsible pursuant to **Section 8.4(b)**; (b) any and all Taxes (other than Property Taxes for which Seller is responsible pursuant to **Section 8.4(b)**) imposed on or payable by Seller or any of its Affiliates, regardless of the Tax period to which such Taxes relate; (c) any and all Taxes imposed on or payable in respect to any of the Projects or any of the Project Assets, or for which any of the Projects or any of the Project Assets may be liable, assessed, or subject, in each case, to the extent such Taxes are attributable to the Pre-Closing Tax Period; (d) any and all Taxes of any member of an affiliated, consolidated, combined, or unitary group of which Seller (or any predecessor) is or was a member on or prior to the Closing Date, including pursuant to Treasury Regulations Section 1.1502-6 or any analogous or similar state, local, or foreign Law; (e) any and all Taxes of any Person imposed on or payable by Purchaser as a transferee or successor, by contract or pursuant to any Law or otherwise, in respect of the Project or any of the Project Assets, which Taxes relate to an event or transaction occurring on or prior to the Closing Date; and (f) Transfer Taxes for which Seller is responsible pursuant to **Section 8.4(d)**.

"Seller Transaction Expenses" shall mean, without duplication, the aggregate amount of all fees, costs and expenses reasonably incurred by Seller or any of its Affiliates in connection with the negotiation, preparation and execution of this Agreement and the Ancillary Agreements and the consummation of the transactions contemplated by this Agreement, which shall include any reasonable legal, accounting, financial advisory and other third party advisory or consulting fees and other expenses.

"Seller-Allocated Amounts" shall mean, with respect to any condemnation or eminent domain proceedings with respect to any portion of a Project Asset that occurs after the Effective Date, any portion of any such award or proceeds that is allocable to loss of use of such Project Asset prior to Closing.

"Seller's Knowledge" shall mean the actual knowledge of any Designated Seller Representative, with no heightened duty to investigate imposed on such individual above that of an ordinary and prudent individual in a similar position or involved in a similar transaction or position.

"Seller's Marks" shall mean (a) the name "Consumers Energy Company" or the names of any other Affiliate of Seller or any variations or derivations thereof, whether alone or in combination with one or more other words, (b) any trademarks, trade names, or other intellectual property rights owned or used by Seller or otherwise associated with Seller or any of its Affiliates, and (c) the marks listed on **Exhibit R**.

"Seller's Title Election Period" shall have the meaning set forth in **Section 3.1(c)(i)**.

"Seller's Title Response" shall have the meaning set forth in **Section 3.1(c)(i)**.

"Shoreline Licenses" shall mean the agreements regarding usage and access to shorelines listed in **Exhibit D**.

"Straddle Period" shall mean any Tax period that begins on or before, and ends after, the Closing Date.

"Subsidiary" shall mean, with respect to each Project, the Person wholly owned by Purchaser which on or after the Closing Date owns the Project Assets associated with such Project.

"Substation" shall mean a substation described on **Exhibit B**.

"Support Obligations" shall have the meaning set forth in **Section 5.19**.

"Survey" shall mean, for each Project, an ALTA/NSPS survey of the applicable Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property.

"Survey Order Date" shall have the meaning set forth in **Section 3.1(b)**.

"Tangible Personal Property" shall mean the tangible personal property owned by Seller related solely to the Projects and Project Assets and located on the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property, including but not limited to (a) the Project Equipment located on the Fee Simple Real Property and the Calkins Bridge Project Easement Reservation Real Property used in the operation of the Projects and (b) the items listed on **Schedule 1.1(b)**, but shall exclude the Excluded Assets.

"Target Employees" shall mean (a) all Non-Union Employees providing services to the Projects, and (b) all Union Employees providing services to the Projects who do not exercise bumping rights in accordance with the Collective Bargaining Agreement.

"Tax" or "Taxes" shall mean any taxes, fees, levies, duties, tariffs, imposts and other charges of any kind, imposed by or payable to any Governmental Authority, including taxes or other charges on, measured by or with respect to income, gross or net receipts, capital, net worth, real or personal property, sales, use, capital gain, transfer, excise, license, production, unclaimed property, escheatment, franchise, employment, social security (or similar), occupation, payroll, registration, governmental pension or

insurance, withholding, royalty, severance, stamp or documentary, ad valorem, value added, business, premium, windfall profits, environmental, custom, duty, capital stock, profits, withholding, unemployment, disability, alternative or add-on minimum, estimated or other tax (including any interest, penalties, or additions to tax), in each case including any interest, penalty, or addition thereto, whether disputed or not, and including any obligation to indemnify or otherwise assume or succeed to the Tax Liability of any other Person.

"Tax Compliance Certificate" shall have the meaning set forth in **Section 8.5(b)**.

"Tax Purchase Price" shall have the meaning set forth in **Section 2.3(a)**.

"Tax Returns" shall mean any report, declaration, claim for refund, form, return, election, statement or other information (including any amendments) required to be supplied to a Governmental Authority or maintained by a Person with respect to Taxes, including information returns, any amendments thereof or schedule or attachment thereto and any documents (a) with respect to the calculation, determination, assessment or collection of any Tax, or (b) accompanying requests for the extension of time in which to file any such report, form, return, statement or other information.

"Temporary Substation Easements" shall mean those temporary substation easements substantially in the form attached hereto as **Exhibit C**, incorporated by reference herein, which may be updated by mutual agreement of the Parties following the Effective Date, pursuant to **Section 3.1(f)** and **Section 3.1(g)**.

"Temporary Substation Easements Real Property" shall mean, with respect to each Temporary Substation Easement, the real property subject to such Temporary Substation Easement listed on **Exhibit C**, which may be updated by mutual agreement of the Parties following the Effective Date, pursuant to **Section 3.1(f)** and **Section 3.1(g)**.

"Third Party Claim" shall have the meaning set forth in **Section 9.7(a)**.

"Third Party Claim Response Period" shall have the meaning set forth in **Section 9.7(a)**.

"Tippy Project" shall have the meaning set forth in the Recitals.

"Title Commitment" shall have the meaning set forth in **Section 3.1(a).**

"Title Company" shall mean, subject to the terms of **Section 3.1(a)**: (a) Fidelity National Title; (b) Transnation Title; (c) Stewart National Title; (d) Michigan Trusted Title; (e) Amrock, LLC; and (f) ASK Services, Inc.

"Title Documents" shall mean, in respect of a Title Commitment, all documents referenced in such Title Commitment.

"Title Objection Date" shall mean, with respect to each Project, the Day that is thirty (30) Business Days after the later of Purchaser's receipt of (a) the Title Commitment (including all Title Documents) for the Fee Simple Real Property or, if applicable, the Calkins Bridge Project Easement Reservation Real Property in respect of such Project and (b) a Survey, if ordered by Purchaser, in respect of such Project.

"Title Objection Notice" shall have the meaning set forth in **Section 3.1(c)(i)**.

"Title Policy" shall mean the applicable issuing Title Company's irrevocable commitment to issue a standard ALTA owner's title insurance policy to Purchaser at Purchaser's sole cost in a policy amount to

be determined by Purchaser in its sole discretion, insuring that title to the Fee Simple Real Property and the Calkins Bridge Project Easement Reservation Real Property described therein is vested in Purchaser subject only to the Permitted Exceptions.

"Tower Leaseback Agreements" shall mean (a) that certain Master Leaseback Agreement by and between Vertical Bridge Towers IV, LLC and Consumers Energy Company, dated as of December 5, 2023 and (b) that certain Master Leaseback Agreement by and between Vertical Bridge NTCF, LLC and Consumers Energy Company, dated as of December 5, 2023.

"Transfer Taxes" shall mean any transfer, documentary, sales, use, stamp, registration, value added, and other such Taxes and all conveyance fees, recording charges (including transfer taxes associated with recording of the Deed), and other fees and charges (including any penalties and interest) incurred in connection with the transactions contemplated by this Agreement and the Ancillary Agreements.

"Transferred Employees" shall have the meaning set forth in **Section 7.6(a)**.

"Transferred Non-Union Employees" shall have the meaning set forth in **Section 7.6(c)**.

"Transferred Union Employees" shall have the meaning set forth in **Section 7.6(b)**.

"Transition Services Agreement" shall mean the Transition Services Agreement between the Parties, substantially in the form attached hereto as **Exhibit P** incorporated by reference herein, with such supplements or other changes are as otherwise agreed to by the Parties pursuant to **Section 7.13**, and to be delivered by the Parties at Closing.

"Treasury Regulations" shall mean the regulations promulgated under authority of the Code by the United States Department of Treasury, as amended from time to time. All references herein to specific sections of the regulations shall be deemed also to refer to any corresponding provisions of succeeding regulations, and any reference to temporary regulations shall be deemed also to refer to any corresponding provisions of final regulations.

"Trust Indenture" shall mean the indenture dated as of September 1, 1945, between Consumers Power Company (now known as Consumers Energy Company) and City Bank Farmers Trust Company (now held by The Bank of New York Mellon, successor trustee) and all supplemental indentures thereto, as may be further amended and/or supplemented from time to time.

"Union" shall mean, collectively, the Utility Workers Union of America (affiliated with the Congress of Industrial Organizations) and its Michigan State Utility Workers Counsel.

"Union Employees" shall mean the Union employees of Seller listed on **Part I** of **Schedule 5.16(b)**.

"Union Notice" shall mean a notice to the Union from Purchaser regarding the Closing and Purchaser's assumption of the Collective Bargaining Agreement, substantially in the form attached hereto as **Exhibit W-2** incorporated by reference herein.

"WARN Act" shall mean the Worker Adjustment and Retraining Notification Act, 29 U.S. Stat. § 2101 *et seq*. and any state law equivalent.

"Webber Project" shall have the meaning set forth in the Recitals.

Section 1.2. Terms Generally.

(a) The definitions in **Section 1.1** shall apply equally to both singular and plural forms and to correlative forms of the terms defined.

(b) Whenever the context may require, any pronoun shall include the corresponding masculine, feminine and neuter forms.

(c) The words "include", "includes" and "including" shall be deemed to be followed by the phrase "without limitation".

(d) The words "hereby", "herewith", "hereto", "herein", "hereof", "hereunder" and words of similar import refer to this Agreement (including exhibits, schedules and Disclosure Schedules to this Agreement) in its entirety and not to any part hereof unless the context shall otherwise require.

(e) The word "or" has the inclusive meaning represented by the phrase "and/or".

(f) Unless the context shall otherwise require, all references herein to Articles, Sections, Exhibits, Schedules and the Disclosure Schedules shall be deemed references to Articles, Sections and Exhibits of, and Schedules and the Disclosure Schedules to, this Agreement and references to "paragraphs" or "clauses" shall be to separate paragraphs or clauses of the section or subsection in which the reference occurs.

(g) Unless the context shall otherwise require, any references to any Contract (including this Agreement), document or Law shall be deemed to be references to such Contract, document or Law as amended, supplemented or modified from time to time in accordance with its terms and the terms hereof, as applicable, and in effect at any given time (and, in the case of any Law, to any successor provisions); *provided*, that any Contract or document listed in the Disclosure Schedules shall only be deemed to include any amendments, supplements or modifications that have been Made Available to Purchaser.

(h) Unless the context shall otherwise require, references to any Person include references to such Person's successors and permitted assigns, and in the case of any Governmental Authority, to any Person(s) succeeding to its functions and capacities.

(i) Any reference to any federal, state, local, or foreign statute or Law shall be deemed also to refer to all rules and regulations promulgated thereunder, unless the context shall otherwise require.

(j) All monetary figures shall be in United States Dollars unless otherwise specified.

(k) The phrase "to the extent" shall mean the degree to which a subject or thing extends, and such phrase shall not simply mean "if".

(l) All accounting terms used herein and not expressly defined herein shall have the meanings given to them under GAAP.

(m) The phrase "ordinary course of business" shall mean "ordinary course of business, consistent with past practice (including with respect to quantity and timing) during the Lookback Period".

ARTICLE 2

AGREEMENT; PURCHASE PRICE; ASSUMED LIABILITIES AND EXCLUDED LIABILITIES

Section 2.1. Agreement to Sell and Purchase; Excluded Assets; Assumed Liabilities; Excluded Liabilities.

(a) Purchase and Sale. Subject to the terms and provisions hereof, at the Closing, Seller shall (i) sell, transfer, convey, assign and deliver to Purchaser, and Purchaser shall purchase and accept from Seller, all of Seller's right, title and interests in, to and under the Project Assets, but specifically excluding the Excluded Assets, free and clear of all Liens other than Permitted Exceptions, and (ii) transfer, convey, assign and deliver to Purchaser, and Purchaser shall accept from Seller, all of Seller's right, title and interests in, to and under the Residential Fee Simple Real Property, subject to **Section 2.1(e)**.

(b) Excluded Assets. Seller shall have no obligation to, and does not, transfer any interest or rights in any of the following assets and properties owned by Seller or, in the case of **clause (i)** below, a third party (the "Excluded Assets"):

(i) (A) any improvements, equipment, systems, facilities or structures owned by Seller or third parties that are located within the Reserved Easements Real Property and Temporary Substation Easements Real Property, including the Substations and (B) any improvements, equipment, systems, facilities or structures owned by METC or third parties that are located within the METC Easements, which, in each case, for the avoidance of doubt, does not include any Tangible Personal Property listed in **Schedule 1.1(b)**;

(ii) materials relating to Seller's marketing efforts and the other parts of the process related to the potential sale of the Project Assets, including all documents, information and communications with other potential purchasers;

(iii) projections, forecasts and other internal memoranda or materials;

(iv) appraisals, internal analyses, computer software (except that third party software licensed to Seller and used solely in the operation of the Projects which is transferable without notice to and/or consent of the licensor and without expense to Seller shall be considered a Project Asset), and submissions relating to Seller's obtaining of internal authorizations or approvals;

(v) attorney and accountant work product, and all other materials subject to any legal privilege in favor of Seller;

(vi) organizational documents relating to Seller or its Affiliates;

(vii) the Excluded Permits;

(viii) any Project Assets removed from the FERC Licensed Property pursuant to the FERC License Amendment Approvals;

(ix) the Excluded Contracts, each of which is listed on **Schedule 2.1(b)**; and

(x) those assets described on **Schedule 2.1(b)**.

(c) Assumed Liabilities. From and after the Closing, Purchaser shall assume, and Purchaser hereby agrees to pay, perform according to their terms, satisfy and discharge when due or when required to be performed or discharged all Liabilities of Seller of every kind, nature, character and description relating to, arising from or associated with the Projects or the Project Assets, regardless of whether any such Liability arose or was incurred prior to, on or after the Closing, other than Excluded Liabilities (the "Assumed Liabilities"). For the avoidance of doubt, Assumed Liabilities shall include all Liabilities in respect of the Project Contracts and the Project Permits (other than Excluded Liabilities), and the Assumed Environmental Liabilities, in each case regardless of whether any such Liabilities arose or were incurred prior to, on or after the Closing. From and after the Closing, Seller shall have no Liability with respect to the Assumed Liabilities.

(d) Excluded Liabilities. Purchaser shall have no obligation to and does not assume any of the following Liabilities of Seller, which shall be retained by and remain the sole responsibility of Seller (the "Excluded Liabilities"):

(i) all Liabilities relating to, arising from or associated with the Excluded Assets, whether arising prior to, on or after the Closing;

(ii) Liabilities resulting from the default by Seller or any of its Affiliates of any Project Contract arising or accruing on or prior to the Closing;

(iii) Liabilities resulting from the default by Seller or any of its Affiliates of any Project Permit, arising or accruing during the Lookback Period;

(iv) Liabilities resulting from (A) Seller's employment of any Business Employee, including with respect to any Employee Benefit Plan offered or maintained by Seller (i.e., PTO, bonuses, etc.), (B) Seller's employment of the Target Employees prior to the Closing Date, (C) or arising out of or related to the Collective Bargaining Agreement (other than Liabilities resulting from, arising out of or related to the Transferred Union Employees first occurring after the Closing Date), and (D) those items listed on **Schedule 2.1(d)**;

(v) all Liabilities for any Seller Taxes;

(vi) Liabilities caused by the acts or omissions of Seller or any of its Affiliates on the Reserved Easements Real Property and the Temporary Substation Easements Real Property, including in connection with the construction, operation, maintenance and decommissioning of the Substations and distributions lines located on the Reserved Easements Real Property and the Temporary Substation Easements Real Property and, in each case, not caused by the acts or omissions of Purchaser or any of Affiliates on the Reserved Easements Real Property or the Temporary Substation Easements Real Property, whether arising prior to, on or after the Closing (collectively, the "Excluded Environmental Liabilities");

(vii) all indebtedness of Seller;

(viii) any liabilities for the payment of services incurred in connection with the negotiation, preparation or execution of this Agreement or the transactions contemplated

by this Agreement by or on behalf of Seller, including any fees and disbursements of legal counsel, accountants, brokers, financial advisors or other representatives of Seller;

(ix) all Liabilities arising out of or related to any acts or omissions of Seller relating to, arising from or associated with the Project Assets occurring after the Closing, except the foregoing shall not apply to Seller's performance under the Consumers Interconnection Agreements;

(x) all liabilities for the payment of work and services performed under the Project Contracts prior to the Closing Date; and

(xi) all Liabilities listed on **Schedule 2.1(d)**.

(e) Residential Fee Simple Real Property. Notwithstanding anything in this Agreement to the contrary, except as expressly set forth in this **Section 2.1(e)**, **Section 4.1(u)**, and **Section 8.2(u)**, (i) the Residential Fee Simple Real Property and any agreements related thereto shall not be considered Project Assets or Excluded Assets for purposes of this Agreement, and (ii) the terms and conditions of this Agreement, including Seller's representations and warranties contained herein, shall not apply to the Residential Fee Simple Real Property and any agreements related thereto.

Section 2.2. Purchase Price.

(a) Consideration. The aggregate consideration for all of the Project Assets and the assumption by Purchaser of the Assumed Liabilities shall be an amount equal to (i) Thirteen Dollars ($13.00), *minus* (ii) the Purchaser Proration Credit, as determined in accordance with **Section 8.4**, *plus* (iii) the Seller Proration Credit, as determined in accordance with **Section 8.4** (such aggregate amount of **clauses (i)**, **(ii)** and **(iii)**, the "Purchase Price").

(b) Method of Payment of Purchase Price. Subject to **Section 2.2(c)**, the Purchase Price, (i) if such amount is a positive number, shall be paid by Purchaser to Seller by wire transfer of immediately available funds to the account specified in writing by Seller for such purpose or, if so requested in writing by Seller, by such alternative means of delivery of immediately available funds or other method of payment as is reasonably acceptable to Purchaser, or (ii) if such amount is a negative number, shall be paid by Seller to Purchaser by wire transfer of immediately available funds to the account specified in writing by Purchaser for such purpose or, if so requested in writing by Purchaser, by such alternative means of delivery of immediately available funds or other method of payment as is reasonably acceptable to Seller.

(c) Closing Payment. On the Closing Date, Purchaser (if the Purchase Price is a positive number) shall pay to Seller, or Seller (if the Purchase Price is a negative number) shall pay to Purchaser, an amount equal to one hundred percent (100%) of the Purchase Price (the "Closing Payment").

Section 2.3. Intended Tax Treatment and Purchase Price Allocation.

(a) For purposes of this Agreement, the Parties agree that for U.S. federal Income Tax purposes, and for purposes of any corresponding provision under state or local Tax Law, (i) Purchaser's purchase of the Project Assets from Seller in exchange for the Purchase Price (including any adjustments thereto pursuant to this Agreement and any Assumed Liabilities and other amounts treated as taxable consideration for such the Project Assets for Income Tax purposes) (the "Tax Purchase Price") shall be treated as the taxable purchase and sale of such assets; and (ii) no Liability assumed by Purchaser in

connection with the transactions contemplated by this Agreement that is attributable to deferred revenue shall be treated under *James M. Pierce Corp. v. Commissioner*, 326 F.2d 67 (8th Cir. 1964), as giving rise to taxable income of the Purchaser or its Affiliates (collectively, the "Intended Tax Treatment"). Each of the Parties agrees to prepare and file all applicable Tax Returns in accordance with such Intended Tax Treatment and will not take any inconsistent position on any Tax Return or during the course of any audit, litigation, or other proceeding with respect to Taxes, except as otherwise required by applicable Law following a "determination" within the meaning of Section 1313(a) of the Code or similar provision of other applicable Law.

(b) For U.S. federal (and applicable state and local) Income Tax purposes, the Parties shall allocate the Tax Purchase Price among the Project Assets on an allocation schedule in accordance with Section 1060 of the Code and the Treasury Regulations promulgated thereunder (the "Allocation Methodology"). Within sixty (60) Days following the Closing Date, Purchaser shall deliver to Seller an allocation schedule of the Tax Purchase Price among the Project Assets for Income Tax purposes in accordance with the Allocation Methodology (the "Allocation Schedule") for Seller's review and comment. Seller shall review the Allocation Schedule and provide any comments to Purchaser within thirty (30) Days from delivery to Seller (the "Allocation Review Period"). If Seller does not submit any comments to the Allocation Schedule within such Allocation Review Period, then Seller will be deemed to have approved such Allocation Schedule as prepared by Purchaser. If Seller delivers comments to Purchaser with respect to the Allocation Schedule within such Allocation Review Period, Purchaser and Seller shall use good faith efforts to resolve any dispute in connection with such comments. In the event Purchaser and Seller are unable to agree on any such comments to the Allocation Schedule within ten (10) Days after Seller provides its comments, Purchaser and Seller shall engage the Accounting Firm to resolve the dispute in accordance with the Allocation Methodology. In resolving any dispute with respect to the Allocation Schedule, the Accounting Firm (i) shall be bound by the Allocation Methodology, (ii) may not assign a value to any item greater than the highest value claimed for such item or less than the lowest value for such item claimed by either Purchaser or Seller, (iii) shall restrict its decision to such items included in Seller's objection(s) which are then in dispute, (iv) may review only the written presentations of Purchaser and Seller in resolving any matter which is in dispute and relevant provisions of applicable Tax Law, and (v) shall render its decision in writing within thirty (30) Days after the disputed item(s) have been submitted to it. The resolution of any disputed items by the Accounting Firm shall be conclusive and binding on the Parties for the purposes of this Agreement. The costs of the Accounting Firm shall be borne by each Party in the percentage inversely proportionate to the percentage of the total amount of the total items submitted for dispute that are resolved in such Party's favor. Any adjustments to the Purchase Price shall be allocated in accordance with the Agreed Allocation.

(c) The Parties agree to file their respective IRS Forms 8594 and all federal, state and local Tax Returns in accordance with the Allocation Schedule (as finally determined in accordance with **Section 2.3(b)**) (such allocation, the "Agreed Allocation") and no Party shall take or permit others to take on its behalf any position, whether in connection with a Tax audit, a Tax Return or otherwise, that is inconsistent with the Agreed Allocation unless required to do so pursuant to a final "determination" within the meaning of Section 1313(a) of the Code or other applicable Law; *provided*, *however*, that nothing contained herein shall prevent Seller or Purchaser or any of their respective Affiliates from settling any proposed deficiency or adjustment by any Governmental Authority based upon or arising out of the Agreed Allocation and no Party shall be required to contest or litigate in any forum any proposed deficiency or adjustment by any Governmental Authority challenging the Agreed Allocation; and *provided further*, that no Party will be unreasonably impeded in its ability and discretion to negotiate, compromise or settle any Tax audit, claim or similar proceeding in connection with the Agreed Allocation. Notwithstanding anything herein to the contrary, the requirements set forth in this **Section 2.3** shall not bind Purchaser (or its Affiliates) in determining the allocation of the Tax Purchase Price for purposes of GAAP in preparing their financial statements.

Section 2.4. Withholding. Purchaser or its designees will be entitled to deduct or withhold from any amounts payable under this Agreement any Taxes or other amounts required under the Code or any applicable Law to be deducted and withheld; *provided*, that (a) Purchaser shall provide Seller with notice as soon as reasonably practicable upon becoming aware of any such requirement to deduct and withhold from any consideration otherwise payable to Seller (and in any case prior to making the deduction or withholding), and (b) the Parties shall use their respective commercially reasonable efforts in seeking to reduce or eliminate any such withholding or deduction to the extent permitted by applicable Law. To the extent that any such amounts are so deducted or withheld, such amounts will be treated for all purposes of this Agreement as having been paid to the Person in respect of which such deduction and withholding was made.

ARTICLE 3

SURVEY AND TITLE COMMITMENT

Section 3.1. Title and Survey.

(a) Title. With respect to the Fee Simple Real Property or, if applicable, the Calkins Bridge Project Easement Reservation Real Property used in connection with each Project, Seller shall, at Seller's cost, order (to the extent not ordered prior to the Effective Date) a commitment of title insurance issued by the applicable Title Company with respect to the applicable Fee Simple Real Property or Calkins Bridge Project Easement Reservation Real Property (each a "Title Commitment") and request copies of all Title Documents from the Title Company within five (5) Business Days after the Effective Date and upon receipt thereof, Seller shall deliver each applicable Title Commitment, including all Title Documents, to Purchaser. Following delivery of all of the Title Commitments, the Parties shall endeavor to engage a single Title Company to act as Escrow Agent in connection with the issuance of each Title Policy and the conveyance of fee title to the Fee Simple Real Property.

(b) Survey. Purchaser acknowledges that Seller has provided the Internal Mapping to Purchaser prior to the Effective Date. Purchaser may, at its sole cost and expense, have one or more Surveys prepared for each Project for Purchaser's benefit. In the event Purchaser elects to have the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property surveyed, Purchaser shall order the applicable Surveys, if any, within the later of ten (10) Business Days (the "Survey Order Date") after the later of receipt of the applicable Title Commitment or the Effective Date, which Survey Order Date may be extended by up to an addition twenty (20) Business Days by the mutual consent of Purchaser and Seller, such consent not to be unreasonably withheld, conditioned or delayed. Purchaser shall provide written notice to Seller promptly after the Survey Order Date regarding Purchaser's decision to order a Survey and shall keep Seller apprised as to the status of Survey completion. Purchaser's failure to order a Survey in respect to any applicable Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property by the applicable Survey Order Date shall be deemed a waiver of any right to make objection to anything that would be disclosed by such Survey and/or a physical inspection of such Fee Simple Real Property or Calkins Bridge Project Easement Reservation Real Property, as applicable.

(c) Objections.

(i) Purchaser shall have until the Title Objection Date for each Project to deliver to Seller a written notice (the "Title Objection Notice") that sets forth in reasonable detail any objections that Purchaser has to any exception referenced in the Title Commitment or Survey, if obtained, for such Project (the "Purchaser Title Objections"); *provided*, *however*, that Purchaser shall have no right to object to any Permitted Exceptions

and shall only be entitled to object to exceptions (and exceptions shall only qualify as Purchaser Title Objections) if: (A) the costs to correct and/or remove any such exception is reasonably likely to exceed Fifty Thousand Dollars ($50,000), individually, or Two Hundred Thousand Dollars ($200,000), in the aggregate, when considered with other exceptions in the Title Commitment or Survey; (B) such exception materially and adversely affects, or is reasonably likely to materially and adversely affect, as determined by Purchaser in its reasonable discretion, Purchaser's ability to use and operate the applicable Project consistent with past practice during the Lookback Period; or (C) such exception is reasonably likely to require the removal or relocation of material Project Equipment used on the Fee Simple Real Property or, if applicable, the Calkins Bridge Project Easement Reservation Real Property in connection with the generation of electricity from the applicable Project. Seller shall have thirty (30) Business Days from its receipt of any Title Objection Notice ("Seller's Title Election Period") to deliver to Purchaser notice as to whether Seller elects to use commercially reasonable efforts to cure any of the Purchaser Title Objections by the Closing Date ("Seller's Title Response"). If Seller fails to provide any Seller's Title Response before the end of Seller's Title Election Period, Seller shall be deemed to have elected not to cure all of the Purchaser Title Objections.

(ii) If Seller elects, or is deemed to have elected, not to cure any one or more of the Purchaser Title Objections, such Purchaser Title Objections shall constitute Permitted Exceptions and Purchaser shall have until the date that is twenty (20) Business Days after Purchaser's receipt of Seller's Title Response (or, if Seller fails to provide any Seller's Title Response to Purchaser Title Objections, twenty (20) Business Days after the date on which Seller's Title Election Period expired) to deliver notice to Seller whether Purchaser will (A) take title to the Fee Simple Real Property or, if applicable, the real property interest in the Calkins Bridge Project Easement Reservation Real Property subject to such Purchaser Title Objection that Seller elected (or was deemed to have elected) not to cure, in which case such Purchaser Title Objections shall constitute Permitted Exceptions, or (B) elect to terminate this Agreement by providing written notice to Seller of such election. If Purchaser elects to terminate this Agreement pursuant to this **Section 3.1(c)(ii)**, then this Agreement shall terminate, and Purchaser and Seller shall have no further obligations or liabilities under this Agreement, except those that expressly survive the termination of this Agreement. In the absence of a timely response by Purchaser in accordance with this **Section 3.1(c)(ii)**, Purchaser shall be deemed to have elected to take title subject to such Purchaser Title Objections that Seller elected (or was deemed to have elected) not to cure, in which case such Purchaser Title Objections shall constitute Permitted Exceptions.

(iii) If Seller elects to use commercially reasonable efforts to cure any one or more of the Purchaser Title Objections, Seller shall have until the Closing Date to complete such cure, failing which Purchaser shall have the option of either (A) proceeding with the Closing (as extended, if necessary) and accepting the title as it then is, or (B) terminating this Agreement by written notice to Seller on the earlier of the Closing Date or the date that is ten (10) Business Days from written notice from Seller to Purchaser that one or more of the Purchaser Title Objections will not be cured by the Closing Date. If Purchaser elects to terminate this Agreement pursuant to this **Section 3.1(c)(iii)**, then this Agreement shall terminate and if Seller has failed to use commercially reasonable efforts to cure any one or more of the Purchaser Title Objections (and was not excused from using such commercially reasonable efforts pursuant to **Section 3.1(c)(iv)** as a result of the Purchaser Title Objections Cap), then Seller shall pay to Purchaser the Purchaser Transaction Expenses,

and, subject to **Section 11.3**, Purchaser and Seller shall have no further obligations or liabilities under this Agreement, except those that expressly survive the termination of this Agreement.

(iv) If Seller elects to cure any one or more Purchaser Title Objections, Seller shall in no event be required to bring suit to clear any claimed title or survey defects. Except for any Automatic Objections, Seller shall not be required to expend more than an aggregate total of One Million Dollars ($1,000,000) to cure all Purchaser Title Objections in respect of all of the Projects (the "Purchaser Title Objections Cap") (thus, by way of example, if Seller expends up to the Purchaser Title Objections Cap in an attempt to cure one or more Purchaser Title Objections, then Seller shall have no further obligation to spend additional funds in connection with any Purchaser Title Objections). Seller shall provide Purchaser written notice, which shall include reasonable supporting evidence and documentation, that Seller has expended more than the Purchaser Title Objections Cap to cure Purchaser Title Objections and that Seller will cease efforts to cure Purchaser Title Objections. If Seller elects not to cure or fails to cure by the Closing Date, Purchaser shall have the option to proceed to Closing or to terminate this Agreement by providing Seller written notice on the earlier of the Closing Date or the date that is ten (10) Business Days from written notice from Seller. If Purchaser elects to proceed with the Closing, then effective as of the Closing Date the PPA Price shall be adjusted pursuant to the Power Purchase Agreement by the amount of the difference between the cost that Seller actually expended and the Purchaser Title Objections Cap, and such Purchaser Title Objections shall constitute Permitted Exceptions. If Purchaser elects to terminate this Agreement pursuant to this **Section 3.1(c)(iv)**, then this Agreement shall terminate, and Purchaser and Seller shall have no further obligations or liabilities under this Agreement, except those that expressly survive the termination of this Agreement.

(d) Purchaser shall be entitled to request that the Title Company provide such affirmative insurance or such ALTA endorsements to each Title Policy as Purchaser may reasonably require, to the extent such affirmative insurance or ALTA endorsements are customarily and reasonably available in the applicable jurisdictions (the "Endorsements"), *provided* that (i) such Endorsements shall be at no cost to, and shall impose no additional Liability on, Seller, and (ii) Seller shall only be required to provide customary and reasonable representations, warranties and indemnification to the Title Company with respect to the Endorsements, *provided* Seller agrees to provide the Title Company the form of Owner's Affidavit attached hereto as **Exhibit K** sufficient to allow the Title Company to delete the exception for mechanics liens and other standard exceptions.

(e) Notwithstanding anything in this Agreement to the contrary, prior to or contemporaneously with the Closing, Seller shall be obligated to satisfy, discharge or cause to be released or removed from the applicable Title Commitment and/or Survey: (i) except for those encumbrances set forth in **Schedule 3.1(e)**, encumbrances that have been voluntarily recorded or otherwise placed or permitted to be placed by Seller against the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property on or following the Effective Date without Purchaser's prior written consent; and (ii) mortgages, deeds of trust, security instruments, financing statements, monetary encumbrances, or other instruments that evidence or secure indebtedness, judgments or Liens against the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property granted by Seller (collectively, the "Automatic Objections"). Automatic Objections shall automatically be deemed Purchaser Title Objections that Seller must cure, satisfy, discharge, or cause to be released prior to the Closing Date, and need not be included in any Title Objection Notice.

(f) After the Effective Date, Seller may, at Seller's sole cost and expense, deliver to Purchaser one or more changes to the terms and legal descriptions and location details of the Reserved Easements and Temporary Substation Easements, and **Exhibit C**, **Exhibit E-1** and **Exhibit O**, as applicable, shall be updated by mutual agreement of the Parties, as necessary.

(g) After the Closing Date, Seller may deliver to Purchaser one or more requested changes to the terms and legal descriptions and location details of the Reserved Easements and Temporary Substation Easements as reflected in the Deeds and Temporary Substation Easements executed and delivered by the Parties as of the Closing Date. Upon such request, the Parties shall work in good faith to reach mutual agreement on any such changes, such agreement not to be unreasonably withheld, conditioned or delayed by either Party. The Parties shall execute such Contracts as may be reasonably necessary to memorialize any such mutually agreed upon changes, including corrective deeds related to the Deeds in connection with the Reserved Easements or amendments to the Temporary Substation Easements, as applicable. If reasonably required by Purchaser, Purchaser shall in accordance with applicable Law and as Purchaser may otherwise reasonably deem necessary, give notice to or seek approval (in form and substance reasonably acceptable to Purchaser) from FERC for any such changes as a condition to executing any such Contracts, in which case, the Parties shall cooperate and work in good faith in accordance with **Section 7.12(m)** to give such notices or seek such approvals as soon as reasonably practicable.

ARTICLE 4

CONDITIONS PRECEDENT, CASUALTY DAMAGE, CONDEMNATION

Section 4.1. **Conditions Precedent Favoring Purchaser**. Purchaser's obligations under this Agreement are expressly subject to the timely fulfillment of the conditions set forth in this **Section 4.1** on or before the Closing, or such earlier date as is set forth below. Each condition may be waived, in whole or in part, only by written notice of such waiver from Purchaser to Seller:

(a) Seller shall have performed and complied with, in all material respects, the obligations required by this Agreement to be so performed or complied with by Seller prior to or at the Closing, and there shall have been delivered to Purchaser a certificate to such effect, dated as of the Closing Date, signed by Seller;

(b) The representations and warranties of Seller contained in **ARTICLE 5** shall be true and accurate on the Effective Date and as of the Closing Date (except those representations and warranties that address matters only as of a specified date, the accuracy of which shall be determined as of that specified date), except where such failure of such representations and warranties to be so true and correct (without giving effect to any limitations as to "materiality", "Material Adverse Effect" or other similar qualifiers set forth in any individual representation or warranty) would not reasonably be expected, individually or in the aggregate, to have a Material Adverse Effect, and there shall have been delivered to Purchaser a certificate to such effect, dated as of the Closing Date, signed by Seller;

(c) Since the Effective Date, there shall have been no Material Adverse Effect, nor shall any event or events have occurred, and no circumstances exist, that, individually or in the aggregate, with or without the lapse of time, would reasonably be expected to result in a Material Adverse Effect, and there shall have been delivered to Purchaser a certificate to such effect, dated as of the Closing Date, signed by Seller;

(d) Purchaser shall have executed the METC Interconnection Agreements, and each such METC Interconnection Agreement shall be in full force and effect as of the Closing;

(e) The Projects shall no longer be bound by the Consumers Umbrella GIA, and Seller shall have provided Purchaser evidence of the same;

(f) Seller shall have obtained a release in recordable form of the Project Assets from the Trust Indenture;

(g) Seller shall have executed (as applicable) and delivered, or caused to be delivered, to Purchaser the items set forth in **Section 8.2**, in form and substance reasonably satisfactory to Purchaser;

(h) No order, injunction, judgment, decree or ruling of any Governmental Authority shall be in effect which restrains, hinders or prohibits the consummation of the transactions contemplated by this Agreement and there shall not have been threatened in writing, nor shall there be pending, any Action by or before any Governmental Authority which is reasonably likely to restrain, hinder, prohibit, or challenge the validity of any of the transactions contemplated hereby or Purchaser's purchase of the Project Assets;

(i) No statute, rule or regulation shall have been enacted or proposed by a Governmental Authority which prohibits or restricts the consummation of the transactions contemplated by this Agreement or Purchaser's purchase of the Project Assets;

(j) The Required Regulatory Approvals, the HSR Approval, the FCC Approval and the Purchaser Regulatory Approvals shall have been duly obtained, made or given, and shall be in full force and effect;

(k) FERC shall have issued an order extending the May 6, 2026 mandatory commencement of construction date set forth in its order dated May 6, 2024 (187 FERC ¶ 62,082) to at least May 7, 2027, and such extension order shall be in full force and effect;

(l) The Seller Required Consents, except as otherwise provided on **Schedule 5.5**, shall have been duly obtained or made, and shall be in full force and effect;

(m) (i) With respect to the Material Environmental Permits and Material Permits set forth on **Part I** of **Schedule 5.13(c)** and **Part I** of **Schedule 5.14(a)**, respectively, which can be transferred to Purchaser or its applicable Subsidiary in accordance with applicable Law, the Parties shall have executed and delivered to the relevant Governmental Authority requests to transfer to Purchaser or such Subsidiary such Material Environmental Permits and Material Permits in accordance with **Part II** of **Schedule 5.13(c)** and **Part II** of **Schedule 5.14(a)**, respectively, and (ii) with respect to the Excluded Permits set forth on **Part I** of **Schedule 5.13(c)** and **Part I** of **Schedule 5.14(a)**, Purchaser or its applicable Subsidiary, shall have obtained such Excluded Permits, except to the extent the failure to obtain any such Excluded Permit does not materially affect Purchaser's, or its applicable Subsidiary's, ability to operate the Projects on and after the Closing Date;

(n) There shall have been no Casualty, or, in the event of one or more such Casualties in respect of which the aggregate amount of such Casualty Losses exceeds or is reasonably likely to exceed the Casualty/Condemnation Threshold (together with any Condemnation Losses), (i) Seller shall have fully corrected and repaired any and all such Casualties, at Seller's sole cost and expense, or (ii) the Parties in good faith shall have mutually agreed to the amount of the Casualty Losses and, effective as of the Closing Date, the PPA Price shall be adjusted by such amount pursuant to the Power Purchase Agreement, in each case, in accordance with **Section 4.3** and **Section 4.5**;

(o) There shall have been no Condemnation, or, in the event of one or more such Condemnations in respect of which the aggregate amount of such Condemnation Losses exceeds or is reasonably likely to exceed the Casualty/Condemnation Threshold (together with any Casualty Losses), the Parties in good faith shall have mutually agreed to the amount of the Condemnation Losses and, effective as of the Closing Date, the PPA Price shall be adjusted by such amount pursuant to the Power Purchase Agreement in accordance with **Section 4.4** and **Section 4.5**;

(p) The R&W Policy shall be in full force and effect, in form and substance reasonably acceptable to Purchaser;

(q) The PLLI shall have been issued, in form and substance reasonably acceptable to Purchaser;

(r) Title Company is irrevocably committed to issue to Purchaser the Title Policy (which may be shown by delivery by the Title Company of a proforma of the Title Policy), or, at Purchaser's request and cost for such additional premiums, such additional Endorsements to the Title Policy as Purchaser may request, and an extended ALTA owner's title insurance policy; *provided*, *however*, that any Endorsement requested by Purchaser, except those Endorsements to be obtained from the Title Company that Seller has expressly agreed to in Seller's Title Response, or issuance of an extended ALTA owner's title insurance policy at Closing, shall not be a condition precedent to Closing;

(s) Seller shall have cured all Automatic Objections;

(t) All Purchaser Title Objections shall have been addressed in accordance with **Section 3.1(c)(i)**;

(u) Seller shall have acquired and delivered to Purchaser the fee simple interest in those certain five residential properties downstream of the Rogers Project generally described and/or depicted on **Exhibit A-3** attached hereto (the "Residential Fee Simple Real Property") and such Residential Fee Simple Real Property shall be unoccupied; and

(v) Each Project shall have a registered CPNode with MISO, and each such CPNode shall have been transferred from Seller to Purchaser.

Section 4.2. Conditions Precedent Favoring Seller. Seller's obligations under this Agreement are expressly subject to the timely fulfillment of the conditions set forth in this **Section 4.2** on or before the Closing, or such earlier date as is set forth below. Each condition may be waived, in whole or part, only by written notice of such waiver from Seller to Purchaser:

(a) Purchaser shall have performed and complied with, in all material respects, the obligations required by this Agreement to be so performed or complied with by Purchaser prior to or at the Closing, and there shall have been delivered to Purchaser a certificate to such effect, dated as of the Closing Date, signed by Purchaser;

(b) The representations and warranties of Purchaser contained in **ARTICLE 6** shall be true and accurate on the Effective Date and as of the Closing Date (except those representations and warranties that address matters only as of a specified date, the accuracy of which shall be determined as of that specified date), except where such failure of such representations and warranties to be so true and correct (without giving effect to any limitations as to "materiality", "Material Adverse Effect" or other similar qualifiers set forth in any individual representation or warranty) would not reasonably be

expected, individually or in the aggregate, to have a Material Adverse Effect, and there shall have been delivered to Seller a certificate to such effect, dated as of the Closing Date, signed by Purchaser;

(c) Purchaser shall have executed (as applicable) and delivered, or caused to be delivered, to Seller the items set forth in **Section 8.3**, in form and substance reasonably satisfactory to Seller;

(d) No order, injunction, judgment, decree or ruling of any Governmental Authority shall be in effect which restrains, hinders or prohibits the consummation of the transactions contemplated by this Agreement and there shall not have been threatened in writing, nor shall there be pending, any Action by or before any Governmental Authority which is reasonably likely to restrain, hinder, prohibit or challenge the validity of any of the transactions contemplated hereby or Seller's sale of the Project Assets;

(e) No statute, rule or regulation of any Governmental Authority shall have been enacted or proposed which prohibits or restricts the consummation of the transactions contemplated by this Agreement or Seller's sale of the Project Assets;

(f) The Required Regulatory Approvals, the HSR Approval, the FCC Approval and the Purchaser Regulatory Approvals shall have been duly obtained, made or given, and shall be in full force and effect;

(g) The Purchaser Required Consents shall have been duly obtained or made, and shall be in full force and effect;

(h) Seller shall have received a Tax identification number with respect to all Reserved Easements;

(i) The R&W Policy shall be in full force and effect, in form and substance reasonably acceptable to Seller;

(j) Purchaser shall have provided to Seller confirmation that the PLLI have been bound and issued to Purchaser in accordance with the terms of **Section 7.11**, together with copies of paid invoices for all premiums and fees for such PLLI to be effective, and the PLLI shall be in full force and effect, in form and substance reasonably acceptable to Seller;

(k) Purchaser shall be bound by the terms of the Collective Bargaining Agreement to the Union Employees;

(l) Purchaser shall have caused all Target Employees to receive an offer of employment as set forth in **Section 7.6(a)**;

(m) Purchaser shall have entered into replacement Tower Leaseback Agreements in accordance with **Section 7.12(n)**, in form and substance reasonably acceptable to Purchaser; and

(n) Purchaser shall have delivered a certificate to Seller dated as of the Closing Date, signed by Purchaser and Hull Street Energy Partners III, L.P. certifying that the Equity Commitment Letter remains in full force and effect as of the Closing Date, such certificate to be in form and substance reasonably acceptable to Seller.

Section 4.3. Risk of Casualty.

(a) In the event of a Casualty, Seller shall promptly, but in no event later than fifteen (15) Business Days following such Casualty event, provide written notice (a "Casualty Notice") to Purchaser describing the particulars of such Casualty, including Seller's good faith estimate of the cost to repair such Casualty (as mutually agreed upon by the Parties in good faith, the "Casualty Loss").

(b) Subject to **Section 4.5**, in the event of a Casualty, Seller shall elect to either (i) repair such Casualty, at Seller's sole cost and expense, not to exceed the Casualty/Condemnation Cap, or (ii) adjust the PPA Price under the Power Purchase Agreement, subject to the Casualty/Condemnation Cap, to account for the aggregate Casualty Loss with respect to such Casualty, in which case Purchaser and Seller in good faith shall mutually agree upon the amount of the Casualty Loss and, effective as of the Closing Date, the PPA Price shall be adjusted by such amount pursuant to the Power Purchase Agreement, *provided*, *however*, any such adjustment shall not include any costs that Seller incurred to repair a Casualty, and Purchaser and Seller shall proceed with the Closing in accordance with this Agreement (subject to the satisfaction or waiver of the conditions precedent to the Closing) and the affected Project(s) and the affected Project Assets shall be sold by Seller to Purchaser in the then "AS-IS" condition of such Project(s) and Project Assets.

(c) If Seller elects to repair a Casualty pursuant to **Section 4.3(b)**, but Seller does not fully correct and repair such Casualty consistent with Prudent Utility Practices by the Outside Closing Date, then Purchaser may elect (i) to terminate this Agreement, in which event, subject to **Section 11.2**, Purchaser and Seller shall have no further obligations or liabilities under this Agreement, except those that expressly survive the termination of this Agreement, or (ii) proceed with the Closing, in which case the Parties in good faith shall mutually agree on the remaining cost to repair such Casualty and, effective as of the Closing Date, the PPA Price shall be adjusted by such amount pursuant to the Power Purchase Agreement, and Purchaser shall accept the affected Project(s) and Project Assets in their then "AS-IS" condition upon the satisfaction or waiver of all other conditions precedent (taking into account the condition of such Project(s) and Project Assets due to such unrepaired Casualty).

Section 4.4. Risk of Condemnation.

(a) In the event of a Condemnation, Seller shall promptly, but in no event later than fifteen (15) Business Days following such Condemnation event, provide written notice (a "Condemnation Notice") to Purchaser describing the particulars of such Condemnation, including Seller's good faith estimate of the anticipated condemnation award and any increase to Purchaser's post-Closing obligations or liabilities resulting from, such Condemnation (as mutually agreed upon by the Parties in good faith, the "Condemnation Loss").

(b) Subject to **Section 4.5**, in the event of a Condemnation event, the Parties shall, pursuant to the terms set forth in the Power Purchase Agreement, adjust the PPA Price, not to exceed the Casualty/Condemnation Cap, to account for the aggregate Condemnation Loss with respect to such Condemnation, in which case Purchaser and Seller in good faith shall mutually agree to the amount of the Condemnation Loss and, effective as of the Closing Date, the PPA Price shall be adjusted by such amount pursuant to the Power Purchase Agreement and Purchaser and Seller shall proceed with the Closing in accordance with this Agreement (subject to the satisfaction or waiver of the conditions precedent to the Closing) and Purchaser shall accept the affected Project(s) and Project Assets in their then "AS-IS" condition upon the satisfaction or waiver of all other conditions precedent (taking into account the condition of such Project(s) and Project Assets due to such Condemnation).

Section 4.5. Limitation on Casualty and Condemnation Relief. Notwithstanding anything to the contrary in **Section 4.3** or **Section 4.4**:

(a) Seller shall not be obligated to repair a Casualty or adjust the PPA Price in accordance with **Section 4.3** or **Section 4.4** unless and until the aggregate amount of Casualty Losses and/or Condemnation Losses exceeds an amount equal to One Million Dollars ($1,000,000) (the "Casualty/Condemnation Threshold"); *provided*, that once the aggregate amount of Casualty Losses and Condemnation Losses exceeds One Million Dollars ($1,000,000), Seller shall be required to repair the Casualty or adjust the PPA Price in accordance with **Section 4.3** or **Section 4.4**, as applicable.

(b) In the event the aggregate amount of Casualty Losses and Condemnation Losses exceeds an amount equal to Twenty-Five Million Dollars ($25,000,000) (the "Casualty/Condemnation Cap"), Seller may terminate this Agreement, in which case, subject to **Section 11.2**, Purchaser and Seller shall have no further obligations or liabilities under this Agreement, except those that expressly survive the termination of this Agreement, by providing written notice to Purchaser within twenty-five (25) Business Days following the Casualty or Condemnation for which such Casualty Loss or Condemnation Loss, as applicable, resulted in an excess of the Casualty/Condemnation Cap.

(c) If Seller elects to terminate this Agreement in accordance with **Section 4.5(b)**, within ten (10) Business Days of Seller's notice of such termination, Purchaser may elect, in its sole discretion, to proceed with the Closing in accordance with this Agreement (subject to the satisfaction or waiver of the conditions precedent to the Closing), in which case (i) the PPA Price shall be adjusted in accordance with **Section 4.3** or **Section 4.4** to account for the aggregate Casualty Losses and/or Condemnation Losses equal to the Casualty/Condemnation Cap, to the extent that Seller has not already incurred those Casualty Losses repairing a Casualty but in no event shall the aggregate amount of adjustments to the PPA Price pursuant to the Power Purchase Agreement be in excess of the Casualty/Condemnation Cap and (ii) Purchaser shall accept the affected Project(s) and Project Assets in their then "AS-IS" condition upon the satisfaction or waiver of all other conditions precedent (taking into account the condition of such Project(s) and Project Assets due to such Condemnation and/or unrepaired Casualty). If Purchaser elects not to proceed with Closing in accordance with this **Section 4.5(c)** or fails to provide Seller with notice of its election to proceed to Closing within ten (10) Business Days of Seller's notice of termination, this Agreement shall terminate in accordance with Seller's notice of termination, as set forth in **Section 4.5(b)**, in which case, subject to **Section 11.2**, Purchaser and Seller shall have no further obligations or liabilities under this Agreement, except those that expressly survive the termination of this Agreement.

Section 4.6. Allocation of Condemnation Proceeds. If a Condemnation occurs after the Effective Date and this Agreement is not terminated as permitted pursuant to the terms of **Section 4.5(b)**, then this Agreement shall remain in full force and effect, Purchaser shall acquire the remainder of the Project Assets upon the terms and conditions set forth herein, and at the Closing:

(a) to the extent that such condemnation award has been paid to Seller prior to the Closing, Purchaser shall receive a credit at the Closing equal to the amount of any such award on account of such Condemnation, less any Seller-Allocated Amount (the "Condemnation Award Credit"); and

(b) to the extent that such condemnation award has not been paid to Seller prior to the Closing, Seller shall assign to Purchaser at the Closing the rights of Seller to, and Purchaser shall be entitled to receive and retain, such award; *provided*, within three (3) Business Days after receipt of such award, Purchaser shall pay to Seller an amount equal to the Seller-Allocated Amount of such award not previously paid to Seller. Purchaser's obligation to pay such amount to Seller shall expressly survive Closing.

ARTICLE 5

REPRESENTATIONS AND WARRANTIES OF SELLER

Seller represents and warrants to Purchaser that, subject to such exceptions as are specifically disclosed in the Disclosure Schedules supplied by Seller to Purchaser and dated as of the Effective Date, all of the following are true and correct as of the Effective Date, except to the extent such representations and warranties are specifically made as of a particular date (in which case such representations and warranties are or will be true and correct as of such date):

Section 5.1. Organization, Authority, Validity and Non-Contravention.

(a) Seller is a Michigan corporation duly formed, validly existing and in good standing under the Laws of the State of Michigan. Seller has all requisite corporate power and authority to carry on its business as it is currently conducted and to own, lease and operate its assets and properties where such assets and properties are now owned, leased or operated.

(b) Seller has all requisite corporate power and authority to enter into this Agreement and the Ancillary Agreements to which Seller is a party, to perform its obligations hereunder and thereunder and to consummate the transactions contemplated hereby and thereby. The execution and delivery by Seller of this Agreement and the Ancillary Agreements to which Seller is a party, and the performance by Seller of its obligations hereunder and thereunder have been duly and validly authorized by all necessary corporate action.

(c) This Agreement has been duly executed and delivered by Seller and constitutes the valid, legal and binding obligation of Seller, enforceable against Seller in accordance with its terms, except as such enforceability may be limited by applicable bankruptcy, insolvency, moratorium, reorganization or other similar laws affecting the enforcement of creditors' rights and subject to general equitable principles. Upon execution and delivery of the Ancillary Agreements to which Seller is a party, each of such Ancillary Agreements will constitute the legal, valid and binding obligation of Seller, enforceable against Seller in accordance with its terms, except as such enforceability may be limited by applicable bankruptcy, insolvency, moratorium, reorganization or other similar laws affecting the enforcement of creditors' rights and subject to general equitable principles.

Section 5.2. Solvency. No petition or notice has been presented, no order has been made and no resolution has been passed for the bankruptcy, liquidation, winding-up or dissolution of Seller. No receiver, trustee, custodian or similar fiduciary has been appointed over the whole or any part of Seller's assets or the income of Seller. Seller has no plan or intention of, nor has Seller received any written notice that any other Person has any plan or intention of, filing, making or obtaining any such petition, notice, order or resolution or of seeking the appointment of a receiver, trustee, custodian or similar fiduciary.

Section 5.3. Litigation.

(a) Except as set forth on **Schedule 5.3(a)**, there is no Action outstanding or pending or, to Seller's Knowledge, threatened, in each case, by Seller or against Seller relating to or affecting the Projects or Project Assets, except, in each case, for any Actions before the MPSC or FERC which (i) are outstanding or pending or, to Seller's Knowledge, threatened by Seller or against Seller, and not related to or affecting solely the Projects or Project Assets, and (ii) which do not (A) restrain, enjoin, or otherwise prohibit or make illegal the consummation of the transactions contemplated by this Agreement, including the sale of the Project Assets or (B) materially and adversely affects the use or operation of the Projects

or the Project Assets consistent with past practice during the Lookback Period, taken as a whole. During the Lookback Period, to Seller's Knowledge, Seller has not incurred any Liabilities to any Person for personal injury, property damage or tort arising out of or related to the Project or the Project Assets.

(b) Seller has not received during the Lookback Period notice of any Order entered against Seller, any Project or any Project Asset which: (i) imposes restrictions on the Project or Project Assets or Seller as it relates to the Project and Project Assets that (A) materially and adversely affects the use or operation of the Projects or the Project Assets consistent with past practice during the Lookback Period, or (B) restrains, enjoins, or otherwise prohibits or makes illegal the consummation of the transactions contemplated by this Agreement, including the sale of the Project Assets; (ii) requires Seller to obtain any consent, authorization, approval or declaration from, or to make any filing, registration with or other notices to, any Governmental Authority (other than the Required Regulatory Approvals, the HSR Approval, the FCC Approval and the Seller Required Consents) in connection with the consummation of the transactions contemplated by this Agreement; or (iii) materially and adversely affects the use or operation of the Projects or the Project Assets consistent with past practice during the Lookback Period, taken as a whole. Seller has not received during the Lookback Period notice of any Order entered against (x) Seller (solely in respect of one or more Projects) or (y) one or more Projects, in each case, which imposes, or would reasonably be expected to impose, any material liability on Purchaser or any of its Subsidiaries following the Closing as the applicable owner of the Project Assets.

Section 5.4. **No Conflicts**. Assuming all of the Required Regulatory Approvals, the HSR Approval, the FCC Approval and the Seller Required Consents have been obtained, the execution and delivery by Seller of and the performance by Seller of its obligations under, this Agreement and the Ancillary Agreements to which it is a party, does not and the consummation of the transactions contemplated hereby and thereby will not:

(a) conflict with or result in a breach of, or constitute a default under (or constitute an event that, with notice or lapse of time or both, would constitute a default under), the organizational documents of Seller;

(b) conflict with or result in a breach of or constitute a default under (or constitute an event that, with notice or lapse of time or both, would constitute a default under) or give rise to a right of termination, cancellation, modification or acceleration of any obligation, to any put or call or similar rights, or to loss of a benefit, in each case, under any Material Contract or Material Permit to which Seller is a party or by which the Project Assets are bound;

(c) conflict with or result in a violation or breach, in each case, in any material respect of any applicable Law; or

(d) result in the creation or imposition of any Lien on any of the Project Assets.

Section 5.5. **Seller Third Party Consents**. **Schedule 5.5** sets forth a true, correct and complete list of all consents, approvals, authorizations, waivers, licenses, registrations, declarations, qualifications, filings or notices of or to Persons, including Governmental Authorities, other than the Required Regulatory Approvals, the HSR Approval and the FCC Approval, that are required in connection with the execution and delivery by Seller of this Agreement or any of the Ancillary Agreements to which Seller is a party, the performance of the obligations of Seller hereunder or thereunder, or the consummation by Seller of the transactions contemplated hereby and thereby (including the sale of all Project Assets to Purchaser) (the "Seller Required Consents"). As of the Closing Date, except as otherwise provided on **Schedule 5.5**, all such Seller Required Consents are in full force and effect and do not impose on Purchaser any additional term, condition, restriction or Liability other than Purchaser's

obligation to assume and comply with the terms, conditions, restrictions and Liabilities in the Project Contracts and Project Permits following the Closing.

Section 5.6. Title to Project Assets.

(a) Except as set forth on **Part I** of **Schedule 5.6(a)**, Seller owns, leases, or licenses from third parties or otherwise has the right to use all Tangible Personal Property necessary to operate the Projects as operated consistent with past practice during the Lookback Period, and has good, valid and marketable title to the Tangible Personal Property, free and clear of all Liens other than Permitted Exceptions, except as where the failure to do so would not, individually or in the aggregate, be material and adverse to (i) the use or operation of the Projects or the Project Assets taken as a whole and consistent with past practice during the Lookback Period, or (ii) the consummation of the transactions contemplated by this Agreement. Except as set forth in **Part II** of **Schedule 5.6(a)**, all items of material Tangible Personal Property (x) have been maintained in all material respects in accordance with Prudent Utility Practice, (y) are in good operating condition and repair, reasonable wear and tear excepted, and (z) are suitable for the purposes for which they are presently used.

(b) As of the Effective Date, to Seller's Knowledge, with respect to Fee Simple Real Property for which Seller has not received a Title Commitment, and except as otherwise shown in the applicable Title Commitment, with respect to Fee Simple Real Property for which Seller has received a Title Commitment, (i) Seller holds good and valid title to the Fee Simple Real Property, and (ii) Seller holds good and valid leasehold or other real property interest, as applicable, pursuant to the Real Property Agreements, in the case of **clauses (i)** and **(ii)**, free and clear of all Liens other than Permitted Exceptions. As of the Closing, except as set forth in the applicable Title Policy, (x) Seller holds good and valid title to the Fee Simple Real Property, and (y) Seller holds good and valid leasehold or other real property interest, as applicable, pursuant to the Real Property Agreements, in the case of **clauses (x)** and **(y)**, free and clear of all Liens other than Permitted Exceptions.

(c) Except as set forth on **Schedule 5.6(c)**, during the Lookback Period, Seller has not received any written notice from a Governmental Authority of any pending condemnation, taking or eminent domain proceedings against any part of the Project Assets.

(d) Except as set forth on **Schedule 5.6(d)**, the Project Assets and the Consumers Umbrella GIA constitute all of the material assets, properties, and rights, tangible and intangible, of any nature whatsoever, used by Seller for the use and operation of the Projects consistent with past practice during the Lookback Period.

(e) Each FERC License is in full force and effect and has not been appealed, terminated or revoked. Except as set forth on **Schedule 5.6(e)**, Seller and the Projects are in compliance with the FERC Licenses in all material respects and Seller has not received any written notification from FERC under Section 31 of the Federal Power Act that Seller or any of the Projects are in material violation of the FERC Licenses.

Section 5.7. Real Property Interests.

(a) Other than the Real Property Agreements, and as set forth in **Schedule 5.7(a)** or as set forth in the applicable Title Commitment, there are no leases, tenancies, subleases, licenses, occupancies, co-tenancies, or other rights of possession or control held by or entered into by Seller in effect, oral or written, related to, associated with, concerning, or affecting the Projects or the Project Assets. Seller has Made Available to Purchaser true, complete and correct copies of the Leases (other than the Flowage Easements) (and any material amendments thereto).

(b) All of the Fee Simple Real Property applicable to each Project is all of the real property in fee owned by Seller and used by Seller in the operation of such Project consistent with past practice during the Lookback Period.

Section 5.8. Reserved.

Section 5.9. Tax Matters.

(a) Seller has filed all Tax Returns that were required to file under applicable Laws and regulations with any Governmental Authority relating to the Project Assets, including the ownership and operation thereof, and all such Tax Returns are true, complete and accurate in all material respects and were prepared in compliance with all applicable Laws. All Taxes due and owing by Seller with respect to the Project Assets, whether or not shown on any Tax Return or assessed by any Governmental Authority, have been timely paid in full.

(b) With respect to the Projects and Project Assets, Seller, and each Affiliate of Seller, have withheld and timely paid to the appropriate Governmental Authority all Taxes (including all sales and use Taxes) required to have been withheld and paid in connection with any amounts paid or owing to any employee, independent contractor, creditor, member, vendor, supplier or other third party. With respect to the Projects and Project Assets, Seller has retained all required Tax exemption certificates and other documentation in respect of payments that are exempt from such Taxes.

(c) No extension or waiver of the limitation period applicable to any Tax Return required to be filed with respect to any Project Asset, or applicable to the payment of any Tax by, or assessment of any Tax against or with respect to, any Project Asset, has been granted, and no such extension or waiver has been requested by or on behalf of Seller.

(d) There are no Liens for Taxes upon any of the Project Assets, including those related to, associated with or concerning the Projects other than Liens for Taxes not yet due or delinquent.

(e) The transactions contemplated by this Agreement will not have an adverse effect on the continuing validity and effectiveness of any Tax exemption, Tax holiday, Tax credit, Tax incentive or similar arrangement or benefit for which Seller has applied for with respect to any of the Project Assets in the Post-Closing Tax Period.

(f) Seller has not received (i) any written notice of any special assessments, levies or Taxes imposed or to be imposed affecting any of the Project Assets, or (ii) any notice of any action regarding the potential formation of any other Governmental Authority empowered to so assess a Tax or levy on the Project Assets. To Seller's Knowledge, no such special assessments, levies or Taxes with respect to the Project Assets have been threatened by any Governmental Authority. The Fee Simple Real Property has not been, nor will it be after Closing, subject to any rollback Taxes.

(g) Except as set forth on **Schedule 5.9(g)**, no dispute, claim, audit or other proceeding by any Governmental Authority is pending or, to Seller's Knowledge, threatened with respect to any Taxes due from or with respect to Seller and the Project Assets. With respect to the Project Assets, no claim has ever been made by a Governmental Authority in a jurisdiction where Seller does not file Tax Returns that Seller is or may be subject to or responsible for the payment of any Tax to that jurisdiction. With respect to the Project Assets, all Tax deficiencies asserted, or assessments made, against Seller as a result of any examinations by any Governmental Authority have been fully paid.

(h) As of the Closing, none of the Project Assets: (i) constitute "tax-exempt bond financed property" or "tax-exempt use property" within the meaning of Code Section 168, (ii) is subject to a lease, safe harbor lease or other arrangement as a result of which such assets are required for federal Income Tax purposes to be treated as owned by a Person other than Seller, (iii) are subject to a "section 467 rental agreement" within the meaning of Section 467(d) of the Code, (iv) are subject to the limitations on "Section 197(f)(9) intangibles" described in Section 197(f)(9) of the Code or any similar law, (v) include any contract or other arrangement (whether oral or written) that is treated (or could be treated) as a "partnership" for federal Income Tax purposes, or (vi) will obligate Purchaser to indemnify, or to make payments to or on behalf of, Seller or any other Person, with respect to Taxes.

(i) Seller is not a "foreign person" as defined in Section 1445(f)(3) of the Code.

(j) With respect to the Projects and Project Assets, Seller is in material compliance with all escheat or unclaimed property Laws, and Seller has no material Liability to pay over any amount to any Governmental Authority any cash or other property under escheat or unclaimed property Laws.

(k) With respect to the Projects and Project Assets, all Taxes required to have been collected and paid on the sale of products or taxable services by Seller (whether or not denominated as sales or use Taxes) have been properly and timely collected and paid, or all sales Tax exemption certificates or other proof of the exempt nature of sales of all products or services have been properly collected and, if required, submitted to the appropriate Governmental Authority.

(l) **Schedule 5.9(l)** lists all states, territories and other jurisdictions (whether foreign or domestic) in which Seller files Tax Returns with respect to the Projects or the Project Assets.

(m) The representations and warranties set forth in this **Section 5.9** are Seller's sole and exclusive representations and warranties regarding Tax matters and cannot be relied upon with respect to Taxes attributable to any Tax period (or portions thereof) beginning after the Closing Date.

Section 5.10. Material Contracts.

(a) **Schedule 5.10(a)** contains a true, complete and correct list of all Material Contracts.

(b) Each Material Contract has been duly authorized and executed by Seller, is in full force and effect, and constitutes a legal, valid, binding and enforceable agreement as to Seller and, except as set forth in **Schedule 5.10(b)**, to Seller's Knowledge, the respective counterparties thereto, and will not be rendered invalid or unenforceable as a result of the transactions contemplated hereby, except, in each case, as such enforceability may be limited by applicable bankruptcy, insolvency, moratorium, reorganization or other similar laws affecting the enforcement of creditors' rights and subject to general equitable principles.

(c) Except as set forth on **Part I** of **Schedule 5.10(c)**, neither Seller, nor to Seller's Knowledge, any other Person party to any Material Contract (i) is in breach of or in default under any Material Contract, (ii) has indicated in writing during the Lookback Period its intention to amend or terminate any Material Contract, or (iii) has made during the Lookback Period any written claims against or sought any indemnification as to any matter arising under or with respect to any Material Contract. Except as set forth on **Part II** of **Schedule 5.10(c)**, to Seller's Knowledge, no event has occurred during the Lookback Period which with the passage of time or giving of notice or both would constitute such a default, result in a loss of rights or permit termination, modification or acceleration under, or result in the creation of any Lien on the Project Assets under any Material Contract. Seller has not received, nor has

Seller delivered during the Lookback Period, a written notice declaring a default under any of the Material Contracts (which has not otherwise been cured).

(d) Except as set forth on **Schedule 5.10(d)**, during the Lookback Period, Seller has timely paid in full all amounts due and payable by Seller pursuant to any Material Contract.

(e) Seller has Made Available to Purchaser true, correct and complete copies of all Material Contracts (other than the Flowage Easements) and any amendments, assignments, supplements or other modifications thereto.

(f) Except as set forth on **Schedule 5.10(f)**, Seller has not sold or transferred, agreed or committed to sell or transfer, or granted any options or rights, in each case, to third parties (other than Seller's retail and wholesale customers) to purchase electric power produced from the Projects after the Closing Date.

(g) Excluding (i) the Material Contracts, (ii) the Real Property Agreements, (iii) the Project Contracts with the applicable suppliers and vendors that are directly related to any Material Contract and that were entered into on terms substantially similar to the standard forms provided to Purchaser, and (iv) the Project Contracts related to the operation and maintenance of the Project Assets, the remaining Project Contracts, in the aggregate, are not reasonably expected to involve or otherwise give rise to payments or expenditures in excess of Six Million Five Hundred Thousand Dollars ($6,500,000) on an annual basis.

Section 5.11. Brokers. Except as set forth on **Schedule 5.11**, Seller has no Liability or obligation to pay fees or commissions to any broker, finder or agent with respect to the transactions contemplated by this Agreement or any of the Ancillary Agreements, including any such Liability for which Purchaser or any of its Affiliates would become liable or obligated based upon arrangements made by Seller.

Section 5.12. Legal Compliance.

(a) Except as set forth on **Schedule 5.12(a)**, Seller has complied during the Lookback Period and is now in compliance, in each case, in all material respects with all applicable Laws (including data privacy Laws) (other than Environmental Laws, which are addressed in **Section 5.13**, and Employment Laws, which are addressed in **Section 5.16**), with respect to the Projects and the Project Assets.

(b) Except as set forth on **Schedule 5.12(b)**, Seller has not received during the Lookback Period written notice of a violation of, or non-compliance with any applicable Laws (other than Environmental Laws, which are addressed in **Section 5.13**, and Employment Laws, which are addressed in **Section 5.16**) relating to the Projects, the Project Assets or the transactions contemplated by this Agreement, and to Seller's Knowledge, no event has occurred and there are no facts, conditions or circumstances that exist that would reasonably be expected (with or without notice or lapse of time, or both) to give rise to any such notification.

Section 5.13. Environmental Compliance.

(a) Except as set forth on **Schedule 5.13(a)**, the Projects and Project Assets are in compliance in all material respects with all Environmental Laws, and have been in compliance in all material respects with all Environmental Laws during the Lookback Period.

(b) Except as set forth on **Schedule 5.13(b)**, Seller has not received any written notice, the subject of which remains outstanding, from any Governmental Authority regarding alleged material violation of, or non-compliance with, any applicable Environmental Law in connection with the use or operation of the Projects or any actual, threatened, or alleged Release of Hazardous Materials at or from (or otherwise affecting) the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property.

(c) **Part I** of **Schedule 5.13(c)** sets forth all material Environmental Permits required in connection with the use or operation of the Project and the Project Assets consistent with past practice during the Lookback Period (the "Material Environmental Permits") which Seller will apply to transfer to Purchaser in accordance with **Part II** of **Schedule 5.13(c)**. All Material Environmental Permits required to be held by Seller have been obtained by it and are valid in full force and effect other than such Material Environmental Permits which have expired in accordance with their terms and are no longer required in connection with the use or operation of the Project and the Project Assets consistent with past practice during the Lookback Period, and to Seller's Knowledge have not been appealed, terminated, or revoked. During the Lookback Period, (i) Seller has operated the Projects and the Project Assets in compliance in all material respects with the Material Environmental Permits, and (ii) Seller has not received written notice of any pending or prior challenge or appeal to any Material Environmental Permits. Seller has Made Available to Purchaser a true, correct and complete copy of each Material Environmental Permit issued and in effect as of the Effective Date.

(d) To Seller's Knowledge, none of the Projects have disposed of or offered for disposal any Hazardous Material except in compliance in all material respects with, and in a manner not likely to give rise to Liability under, Environmental Laws, in each case, during the Lookback Period. To Seller's Knowledge, there is no Action outstanding or pending or threatened, by or against Seller or the Projects or Project Assets pursuant to any material Environmental Law, including the Release of Hazardous Materials at or from (or otherwise affecting) the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property by any Governmental Authority or any other Person, that is reasonably likely to materially and adversely affect the use or operation of the Projects or the Project Assets, consistent with past practice during the Lookback Period, taken as a whole.

(e) To Seller's Knowledge, Seller has Made Available to Purchaser all material non-privileged environmental reports, studies, assessments, regulated material surveys, and other similar documents that have been formally prepared, reviewed, and approved for internal and external distribution which are in Seller's possession or control (including related sampling data) relating to (i) any actual, threatened, or alleged material Releases of Hazardous Materials in, at or migrating from or under the Projects, or (ii) any Project's material non-compliance with Environmental Laws, in each case, during the Lookback Period.

(f) Except for that certain Quitclaim Deed, dated as of February 12, 1982, by and between Consumers Power Company and the State of Michigan, Department of Natural Resources and as disclosed in the Title Commitments, Seller has not entered into any agreement with respect to the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property pursuant to which Seller has assumed any material Liability under Environmental Laws of any third party.

(g) The representations and warranties set forth in this **Section 5.13** are Seller's sole and exclusive representations and warranties regarding Environmental matters.

Section 5.14. Permits.

(a) **Part I** of **Schedule 5.14(a)** sets forth all material Permits (other than Environmental Permits) required in connection with the use or operation of the Projects and the Project Assets consistent with past practice during the Lookback Period, including any Permits required in connection with any work being performed in connection with reconstruction activities (the "Material Permits") which Seller will apply to transfer to Purchaser in accordance with **Part II** of **Schedule 5.14(a)**. All Material Permits required to be held by Seller have been obtained by it and are valid and in full force and effect other than such Material Permits which have expired in accordance with their terms and are no longer required in connection with the use or operation of the Project and the Project Assets consistent with past practice during the Lookback Period, and, to Seller's Knowledge, have not been appealed, terminated, or revoked. Except as set forth in **Part III** of **Schedule 5.14(a)**, Seller is in compliance in all material respects with the Material Permits and during the Lookback Period, has not received any written notification from any Governmental Authority that Seller or any of the Projects or the Project Assets are in violation in any material respect of any such Material Permits.

(b) Seller has Made Available to Purchaser a true, complete and correct copy of each Material Permit issued and in effect as of the Effective Date.

Section 5.15. Insurance. Seller currently maintains insurance with respect to the Project Assets in a manner consistent with its past practice (the "Insurance Policies"). The Insurance Policies are in full force and effect. There are no pending claims under any Insurance Policies relating to the Project Assets. Seller has not received during the Lookback Period (a) any written notice from any insurer of a denial of coverage under any of the Insurance Policies relating to the Project Assets, or (b) any written notice of cancellation or termination of the Insurance Policies. All premiums with respect to the Insurance Policies have been paid in full.

Section 5.16. Employment Matters.

(a) Non-Union Employees. **Part I** of **Schedule 5.16(a)** sets forth a correct and complete list of all Non-Union Employees providing services to the Projects (including all Non-Union Employees on medical or other leave) as of the Effective Date, showing for each as of the Effective Date the Non-Union Employee's name, job title or description, initial date of employment, status (part-time, full-time, exempt, non-exempt, etc.), employing entity, salary or wage level (including a summary description of any bonus or deferred compensation arrangements other than any such arrangements under which payments are discretionary), and also showing any bonus, commission or other remuneration other than salary paid, accrued vacation and/or paid time off, and any bookkeeping account balances for reimbursable benefits (including flexible spending account balances, lifestyle spending account balances and commuter expense account balances) during the year ending December 31, 2025. Seller has provided all individual Contracts between Seller and any Non-Union Employee identified on **Part I** of **Schedule 5.16(a)**. Except as set forth in **Part II** of **Schedule 5.16(a)**, to Seller's Knowledge, with respect to the Non-Union Employees providing services to the Projects, currently and during the Lookback Period:

(i) there are and have been no bargaining relationships or other Contracts or understandings with any labor organization applicable to the Non-Union Employees;

(ii) there are and have been no organizational campaigns, petitions or other formal unionization efforts made or threatened by or on behalf of any labor union;

(iii) there is and has been no worker's compensation liability, experience or matter outside the ordinary course of business;

(iv) there are and have been no strikes, slowdowns, work stoppages, lockouts, concerted refusals by a group to perform their duties, or other labor disputes pending or threatened against or involving Seller;

(v) Seller has not committed any unfair labor practices within the meaning of the NLRA;

(vi) Seller has not implemented any layoffs of employees that violated the WARN Act;

(vii) there are and have been no Actions against Seller pending or threatened to be brought or filed by, with or in any court in any jurisdiction or Governmental Authority regarding Employment Laws and involving any Non-Union Employee;

(viii) Seller is and has been in compliance in all material respects with all applicable Employment Laws;

(ix) no Non-Union Employee is or has been in material violation of any term of any employment agreement, nondisclosure agreement, common law nondisclosure obligation, fiduciary duty, noncompetition agreement, non-solicitation agreement, restrictive covenant agreement or other obligation owed to Seller; or owed to any third party;

(x) Purchaser will not be subject to any claim or liability for any severance pay due or owed as a result of the consummation of the transactions contemplated by this Agreement as long as Purchaser fulfills its obligations under the terms of this Agreement; and

(xi) Seller is and has been in compliance in all material respects with all applicable Laws related to data privacy applicable to Non-Union Employees, and Seller has implemented and maintained reasonable security measures to protect all such employee information subject to protection under data privacy laws from unauthorized access, maintenance, use, or disclosure.

(b) Union Employees. **Part I** of **Schedule 5.16(b)** sets forth a correct and complete list of all Union Employees providing services to the Projects (including all Union Employees on medical or other leave) as of the Effective Date, showing for each as of the Effective Date the Union Employee's name, job title or description, initial date of employment, status (part-time, full-time, exempt, non-exempt, etc.), employing entity, salary or wage level (including a summary description of any bonus or deferred compensation arrangements other than any such arrangements under which payments are discretionary), and also showing any bonus, commission or other remuneration other than salary paid, accrued vacation and/or paid time off, and any bookkeeping account balances for reimbursable benefits (including flexible spending account balances, lifestyle spending account balances and commuter expense account balances) during the year ending December 31, 2025. Except as set forth in **Part II** of **Schedule 5.16(b)**, to Seller's Knowledge, with respect to the Union Employees providing services to the Projects currently and during the Lookback Period:

(i) there are no operative collective agreements or bargaining relationships or other Contracts or understandings with any other labor organization besides the Collective Bargaining Agreement with the Union;

(ii) there is and has been no worker's compensation liability, experience or matter outside the ordinary course of business;

(iii) Seller has not implemented any layoffs of employees that violated the WARN Act;

(iv) Seller is and has been in compliance in all material respects with all applicable Employment Laws;

(v) there are no pending, or threatened claims, grievances, or disputes involving Union Employees or the incumbent Union, including pending arbitration matters;

(vi) Seller is and has been in compliance in all material respects with all applicable Laws related to data privacy applicable to Union Employees, and Seller has implemented and maintained reasonable security measures to protect all employee information subject to protection under data privacy laws from unauthorized access, maintenance, use, or disclosure;

(vii) all Union dues required to be collected or withheld by the Collective Bargaining Agreement are and have been properly withheld, remitted to the authorized bargaining agent, and credited to the correct employees, and there are no disputes regarding Union membership or dues;

(viii) all employment agreements affecting or relating to Union Employees requested by Purchaser, including employment letters or correspondence related thereto outlining or relating to the employment of specific individual employees, confidentiality agreements, non-competition agreements, non-solicitation agreements, and other restrictive covenant agreements have been provided to Purchaser;

(ix) all Union Employees subject to transfer have accurately been identified in **Part I** of **Schedule 5.16(b)**;

(x) complete and accurate information regarding all Union or Union-related compensation, health, welfare, and other employee benefit plans, has been provided to Purchaser;

(xi) there are and have been no strikes, work stoppages, slowdowns, lockouts, concerted refusals by a group to perform their duties, or other material employee or labor disputes currently pending or threatened against or involving Seller;

(xii) Seller has not committed any material unfair labor practices within the meaning of the NLRA;

(xiii) there are and have been no Actions against Seller pending or threatened to be brought or filed by, with, or in any court in any jurisdiction or Governmental Authority regarding Employment Laws and involving any Union Employee; and

(xiv) unless otherwise provided in the Collective Bargaining Agreement, Purchaser shall not be subject to any claim or liability for any severance pay that may be due or owed because of the consummation of the transactions contemplated by this Agreement as long as Purchaser fulfills its obligations hereunder.

(c) With respect to both Union Employees and Non-Union Employees, Seller has delivered to Purchaser true, correct and complete summaries of all (i) material workers' compensation or equivalent claims which are pending or have go-forward obligations, (ii) material charges, grievances, complaints or notices of violation filed with, or otherwise made by, the Occupational Safety and Health Administration or a state occupational safety and health agency, or any equivalent authority in locations outside the United States, which are pending or have go-forward obligations, and (iii) material outstanding employment-related claims against Seller or any Affiliate before or by a Governmental Authority and employment-related claims against Seller or any Affiliate before or by a Governmental Authority concluded or settled in the Lookback Period.

Section 5.17. Employee Benefit Matters.

(a) **Part I** of **Schedule 5.17(a)** contains a true and complete list of each of Seller's pension, benefit, retirement, savings, compensation, profit-sharing, deferred compensation, incentive, bonus, performance award, phantom equity, stock or stock-based, change in control, retention, severance, vacation, paid time off ("PTO"), medical, vision, dental, disability, welfare, Code Section 125 cafeteria, material fringe-benefit and other similar agreement, plan, policy, program or arrangement (and any amendments thereto), including any employment or other service provider agreement that cannot be terminated at-will without further liability, in each case, whether or not reduced to writing and whether funded or unfunded, including each "employee benefit plan" within the meaning of Section 3(3) of ERISA, whether or not Tax-qualified and whether or not subject to ERISA, which is maintained, sponsored, contributed to, or required to be contributed to by Seller or any ERISA Affiliate for the benefit of any Target Employees, or with respect to which Purchaser or any of its Affiliates would reasonably be expected to have any material Liability, contingent or otherwise (as listed on **Part I** of **Schedule 5.17(a)** each, an "Employee Benefit Plan"). No Employee Benefit Plan is subject to any laws outside of the United States. Except as described on **Part II** of **Schedule 5.17(a)**, with respect to the Employee Benefit Plans, Seller hereby represents and warrants:

(i) With respect to each Employee Benefit Plan, Seller has Made Available to Purchaser, to the extent reasonably requested by Purchaser and to the extent applicable and existing, copies of the current (A) plan document, together with any amendments, *provided* that if, for any given Employee Benefit Plan, no document exists that contains the material terms of such Employee Benefit Plan, Seller has Made Available to Purchaser a written summary of material plan terms prior to Effective Date; (B) summary plan description and any summaries of material modification thereof; (C) the most recent Internal Revenue Service determination letter, advisory opinion or opinion letter (if the Employee Benefit Plan is intended to be qualified within the meaning of Section 401(a) of the Code); and (D) all trust agreements, insurance Contracts and other documents relating to the funding or payment of benefits under any Employee Benefit Plan.

(ii) Each Employee Benefit Plan that is intended to be qualified within the meaning of Section 401(a) of the Code has received a favorable determination letter from the Internal Revenue Service, or with respect to a prototype or volume submitter plan, can rely on an opinion letter from the Internal Revenue Service to the prototype plan or volume submitter plan sponsor, to the effect that such Employee Benefit Plan is so qualified. No

event has occurred that could reasonably be expected to give rise to disqualification of any such Employee Benefit Plan under Section 401(a) of the Code.

(iii) Each Employee Benefit Plan has been established, administered and maintained in accordance with its terms and in compliance with all applicable Employment Laws (including ERISA and the Code) in all material respects. Nothing has occurred with respect to any Employee Benefit Plan that has subjected or could reasonably be expected to subject Seller or any of its ERISA Affiliates or, with respect to any period on or after the Closing Date, Purchaser or any of its Affiliates, to a material penalty under Section 502 of ERISA or to a material Tax or penalty under Sections 4975, 4980B or 4980H of the Code. With respect to the Employee Benefit Plans, all required contributions to, and premiums or other payments on account of, each Employee Benefit Plan have been made in all material respects in full on a timely basis, or properly accrued.

(iv) **Schedule 5.17(a)(iv)** lists each Employee Benefit Plan that is subject to Title IV of ERISA. Neither Seller nor any of its ERISA Affiliates has during the six (6) years prior to the Effective Date: (A) failed to timely pay premiums to the Pension Benefit Guaranty Corporation; (B) withdrawn from any Employee Benefit Plan; (C) incurred Taxes under Section 4971 of the Code with respect to any pension plan that is not a Multiemployer Plan; (D) participated in a Multiemployer Plan; (E) sponsored, maintained or participated in a multiple employer welfare arrangement (as defined in Section 3(40) of ERISA); or (F) except as provided in **Schedule 5.17(a)(iv)**, sponsored, maintained or participated in any "pension plan" (as defined in Section 3(2) of ERISA) that is or was subject to Sections 412 or 430 of the Code or Title IV of ERISA.

(v) Other than as required under COBRA or other applicable Law, and as listed in **Schedule 5.17(a)(v)**, (A) no Employee Benefit Plan or other arrangement provides post-termination or retiree health benefits to any individual for any reason, and (B) neither Seller nor any of its ERISA Affiliates has any material liability to provide post-termination or retiree health benefits to any Target Employee.

(vi) There is no pending or, to Seller's Knowledge, threatened action, claim, suit, litigation or other proceeding relating to an Employee Benefit Plan (other than routine claims for benefits), and no Employee Benefit Plan has within the three (3) years prior to the date hereof been the subject of an examination or audit by a Governmental Authority or the subject of an application or filing under a voluntary compliance or similar program sponsored by any Governmental Authority.

(vii) Each Employee Benefit Plan that is subject to Section 409A of the Code has been administered in material compliance with its terms and the operational and documentary requirements of Section 409A of the Code and all applicable regulatory guidance (including, notices, rulings and proposed and final regulations) thereunder. Seller does not have any obligation to gross up, indemnify or otherwise reimburse any Target Employee for any excise Taxes, interest or penalties incurred pursuant to Section 409A or 4999 of the Code.

(viii) Each Employee Benefit Plan that is a "group health plan" within the meaning of Section 5000(b)(1) of the Code is in compliance with the applicable requirements of (i) the Patient Protection and Affordable Care Act of 2010, as amended by the Health Care and Education Reconciliation Act of 2010, including the market reform mandates and the information reporting rules and (ii) COBRA and the regulations

promulgated thereunder. Seller has offered minimum essential health coverage, satisfying affordability and minimum value requirements, to its full-time employees sufficient to avoid liability for assessable payments under Sections 4980H(a) and 4980H(b) of the Code. Seller has complied with the applicable reporting requirements under Sections 6055 and 6056 of the Code.

(ix) Except as set forth in **Schedule 5.17(a)(ix)**, neither the execution and delivery of this Agreement by Seller nor the consummation of the transactions contemplated hereby will: (A) entitle any Transferred Employee to severance pay, unemployment compensation, benefits, incentive compensation, or any similar payment; (B) accelerate the time of payment or vesting or increase the amount of any compensation due to any such Transferred Employee; (C) require any contributions or payments to fund any obligations under any Employee Benefit Plan; or (D) directly or indirectly result in any payment made to or on behalf of any Transferred Employee to constitute a "parachute payment" within the meaning of Section 280G of the Code; and the Seller does not have any obligation to "gross up" any Person for any Taxes under Section 4999 of the Code.

Section 5.18. Anti-Money Laundering and Anti-Terrorism Laws. Neither Seller nor, to Seller's Knowledge, any of its subsidiaries or its parent company, is in violation of the Anti-Money Laundering and Anti-Terrorism Laws. Neither Seller nor, to Seller's Knowledge, any of its Affiliates, is acting, directly or indirectly, on behalf of terrorists, terrorist organizations or narcotics traffickers, including those persons or entities that appear on the Annex to Executive Order No. 13224, or are included on any relevant lists maintained by the Office of Foreign Assets Control of U.S. Department of Treasury, U.S. Department of State, or other U.S. Governmental Authorities, the United Nations Security Council, The European Union or any European Union Member State, all as may be amended from time to time. Neither Seller nor, to Seller's Knowledge, any of its Affiliates or subsidiaries or its parent company, or without inquiry, any of its brokers or other agents, in any capacity in connection with the sale of the Project Assets (A) conducts any business or engages in making or receiving any contribution of funds, goods or services to or for the benefit of any person included in the lists referenced above, (B) deals in, or otherwise engages in any transaction relating to, any property or interests in property blocked pursuant to the Executive Order No. 13224, or (C) engages in or conspires to engage in any transaction that evades or avoids, or has the purpose of evading or avoiding, or attempts to violate, any of the prohibitions set forth in any Anti-Money Laundering and Anti-Terrorism Laws. Neither Seller, nor any person Controlling or Controlled by Seller, is a country, territory, individual or entity named on a Government List, and the monies used in connection with this Agreement and amounts committed with respect hereto, were not and are not derived from any activities that contravene any applicable anti-money laundering or anti-bribery Laws and regulations (including funds being derived from any person, entity, country or territory on a Government List or engaged in any unlawful activity defined under Title 18 of the United States Code, Section 1956(c)(7)).

Section 5.19. Support Obligations. Except as otherwise set forth in **Schedule 5.19**, there are no deposits, guaranties, letters of credit, performance or surety bonds or similar credit support arrangements issued by or for the account of Seller or any of its Affiliates required pursuant to any Project Contract or Project Permit to operate the Project Assets in a manner consistent with past practice during the Lookback Period ("Support Obligations"). **Schedule 5.19** sets forth a true, correct and complete list of all Support Obligations.

Section 5.20. No Other Representations or Warranties. The representations and warranties set forth in **ARTICLE 6** and the Ancillary Agreements to which Purchaser is a party constitute the sole and exclusive representations and warranties of Purchaser in connection with the transactions contemplated by this Agreement, and except for the representations and warranties expressly set forth in

ARTICLE 6 and the Ancillary Agreements to which Purchaser is a party, Seller disclaims reliance on any representations or warranties, either express or implied, by Purchaser, including any representation or warranty expressed or implied in any oral, written, or electronic response to any information request provided to Seller.

Section 5.21. Due Diligence. Seller has Made Available for Purchaser's review all information with respect to the Projects or the Project Assets which is material to the ownership, use, operation or maintenance of the Projects or Project Assets, taken as a whole for all Projects and Project Assets, consistent with past practice during the Lookback Period. To Seller's Knowledge, the information and documentation Made Available to Purchaser in the Data Room that was intentionally created or generated by Seller has been relied upon in the internal operations and management of the Projects and Seller has not intentionally included in the Data Room knowingly false information or knowingly omitted portions of such information or documentation from the Data Room.

ARTICLE 6

REPRESENTATIONS AND WARRANTIES OF PURCHASER

Purchaser, on behalf of itself and its Affiliates, as applicable, represents and warrants to Seller that, subject to such exceptions as are specifically disclosed in the Disclosure Schedules supplied by Purchaser to Seller and dated as of the Effective Date, all of the following are true and correct as of the Effective Date, except to the extent such representations and warranties are specifically made as of a particular date (in which case such representations and warranties are or will be true and correct as of such date):

Section 6.1. Organization, Authority, Validity and Non-Contravention.

(a) Purchaser is a limited liability company duly formed, validly existing and in good standing under the Laws of the State of Delaware. Purchaser has all requisite limited liability company power and authority to carry on its business as it is currently conducted.

(b) Purchaser has all requisite limited liability company power and authority to enter into this Agreement and the Ancillary Agreements to which Purchaser is a party, to perform its obligations hereunder and thereunder and to consummate the transactions contemplated hereby and thereby. The execution and delivery by Purchaser of this Agreement and the Ancillary Agreements to which Purchaser is a party, and the performance by Purchaser of its obligations hereunder and thereunder have been duly and validly authorized by all necessary limited liability company action.

(c) This Agreement has been duly executed and delivered by Purchaser and constitutes the valid, legal and binding obligation of Purchaser, enforceable against Purchaser in accordance with its terms, except as such enforceability may be limited by applicable bankruptcy, insolvency, moratorium, reorganization or other similar laws affecting the enforcement of creditors' rights and subject to general equitable principles. Upon execution and delivery of the Ancillary Agreements to which Purchaser or any of its Affiliates is a party, each of such Ancillary Agreements will constitute the legal, valid and binding obligation of Purchaser or such Affiliate, enforceable against Purchaser or such Affiliate in accordance with its terms, except as such enforceability may be limited by applicable bankruptcy, insolvency, moratorium, reorganization or other similar laws affecting the enforcement of creditors' rights and subject to general equitable principles.

Section 6.2. Solvency. No petition or notice has been presented, no order has been made and no resolution has been passed for the bankruptcy, liquidation, winding-up or dissolution of Purchaser. No receiver, trustee, custodian or similar fiduciary has been appointed over the whole or any part of

Purchaser's assets or the income of Purchaser. Purchaser has no plan or intention of, nor has Purchaser received any written notice that any other Person has any plan or intention of, filing, making or obtaining any such petition, notice, order or resolution or of seeking the appointment of a receiver, trustee, custodian or similar fiduciary.

Section 6.3. Litigation.

(a) There is no Action outstanding or pending or, to Purchaser's Knowledge, threatened, in each case, by Purchaser or against Purchaser, in each case, (i) relating to this Agreement or the transactions contemplated hereby, including the purchase of the Project Assets or (ii) which would reasonably be expected to result in the issuance of an Order restraining, enjoining or otherwise prohibiting or making illegal the consummation of the transactions contemplated hereby, including the purchase of the Project Assets.

(b) Purchaser has not received notice of any Order entered against Purchaser which (i) restrains, enjoins, or otherwise prohibits or makes illegal the consummation of the transactions contemplated by this Agreement, including the purchase of the Project Assets; or (ii) requires Purchaser to obtain any consent, authorization, approval or declaration from, or to make any filing, registration with or other notices to, any Governmental Authority (other than the Required Regulatory Approvals, the HSR Approval, the FCC Approval and the Purchaser Required Consents) in connection with the consummation of the transactions contemplated by this Agreement.

Section 6.4. No Conflicts. Assuming all of the Purchaser Required Consents have been obtained, the execution and delivery by Purchaser of and the performance by Purchaser of its obligations under, this Agreement and the Ancillary Agreements to which it is a party, does not and the consummation of the transactions contemplated hereby and thereby will not:

(a) conflict with or result in a breach of, or constitute a default under (or constitute an event that, with notice or lapse of time or both, would constitute a default under), the organizational documents of Purchaser;

(b) conflict with or result in a breach of or constitute a default under (or constitute an event that, with notice or lapse of time or both, would constitute a default under) or give rise to a right of termination, cancellation, modification or acceleration of any obligation, to any put or call or similar rights, or to loss of a benefit, in each case, under any material Contract or material Permit to which Purchaser is a party or by which its assets are bound; or

(c) conflict with or result in a violation or breach, in each case, in any material respect of any applicable Law.

Section 6.5. Purchaser Third Party Consents. **Schedule 6.5** sets forth a true, correct and complete list of all consents, approvals, authorizations, waivers, licenses, registrations, declarations, qualifications, filings or notices of or to Persons, including Governmental Authorities, other than the Required Regulatory Approvals, the HSR Approval, and the FCC Approval that are required in connection with the execution and delivery by Purchaser of this Agreement or any of the Ancillary Agreements to which Purchaser is a party, the performance of the obligations of Purchaser hereunder or thereunder, or the consummation by Purchaser of the transactions contemplated hereby and thereby (including the purchase of all Project Assets from Seller) (the "Purchaser Required Consents"). As of the Closing Date, all such Purchaser Required Consents are in full force and effect and are free of any term or condition which prohibits or restricts the consummation of the transactions contemplated by this Agreement or the purchase of the Project Assets.

Section 6.6. **Brokers**. Purchaser and its Affiliates have no Liability or obligation to pay fees or commissions to any broker, finder or agent with respect to the transactions contemplated by this Agreement or any of the Ancillary Agreements for which Seller or any of its Affiliates would become liable or obligated based upon arrangements made by Purchaser or any of its Affiliates.

Section 6.7. **Anti-Money Laundering and Anti-Terrorism Laws**. Neither Purchaser nor, to Purchaser's Knowledge, any of its subsidiaries or its parent company, is in violation of the Anti-Money Laundering and Anti-Terrorism Laws. Neither Purchaser nor, to Purchaser's Knowledge, any of its Affiliates, is acting, directly or indirectly, on behalf of terrorists, terrorist organizations or narcotics traffickers, including those persons or entities that appear on the Annex to Executive Order No. 13224, or are included on any relevant lists maintained by the Office of Foreign Assets Control of U.S. Department of Treasury, U.S. Department of State, or other U.S. Governmental Authorities, the United Nations Security Council, The European Union or any European Union Member State, all as may be amended from time to time. Neither Purchaser nor, to Purchaser's Knowledge, any of its subsidiaries or its parent company, in any capacity in connection with the purchase of the Project Assets (i) conducts any business or engages in making or receiving any contribution of funds, goods or services to or for the benefit of any person included in the lists referenced above, (ii) deals in, or otherwise engages in any transaction relating to, any property or interests in property blocked pursuant to the Executive Order No. 13224, or (iii) engages in or conspires to engage in any transaction that evades or avoids, or has the purpose of evading or avoiding, or attempts to violate, any of the prohibitions set forth in any Anti-Money Laundering and Anti-Terrorism Laws. Neither Purchaser, nor any person Controlling or Controlled by Purchaser, is a country, territory, individual or entity named on a Government List, and the monies used in connection with this Agreement and the amounts committed with respect hereto, were not and are not derived from any activities that contravene any applicable anti-money laundering or anti-bribery Laws and regulations (including funds being derived from any person, entity, country or territory on a Government List or engaged in any unlawful activity defined under Title 18 of the United States Code, Section 1956(c)(7)).

Section 6.8. **Inspection**. Purchaser has such knowledge and experience in financial and business matters that it is capable of evaluating the merits and risks of its participation in the transactions contemplated in this Agreement and the Ancillary Agreements. Purchaser has had the opportunity to conduct all such due diligence investigations of the Projects, Project Assets, including the contents of the Data Room and the physical environmental condition of the Project and Project Assets, including the Fee Simple Real Property and the Calkins Bridge Project Easement Reservation Real Property, as it deemed necessary or advisable in connection with entering into this Agreement and the Ancillary Agreements and the transactions contemplated hereby and thereby. Purchaser's acceptance of the Project and Project Assets at Closing shall be based upon its own investigation, examination and determination with respect thereto as to all matters and without reliance upon any express or implied representations or warranties of any nature made by or on behalf of or imputed to Seller, except as set forth in **ARTICLE 5** of this Agreement.

Section 6.9. **No Other Representations or Warranties**. The representations and warranties set forth in **ARTICLE 5** and the Ancillary Agreements to which Seller is a party constitute the sole and exclusive representations and warranties of Seller in connection with the transactions contemplated by this Agreement, and except for the representations and warranties expressly set forth in **ARTICLE 5** and the Ancillary Agreements to which Seller is a party, Purchaser disclaims reliance on any representations or warranties, either express or implied, by Seller, including any representation or warranty expressed or implied in any oral, written, or electronic response to any information request provided to Purchaser or any of its Affiliates. Purchaser has conducted its own independent review and analysis of the business, operations, assets, liabilities, results of operations, financial condition, technology, and prospects of the business of the Projects and acknowledges that Purchaser has been provided access to personnel,

properties, premises, and records of Seller related to the Projects and Project Assets for such purpose. In entering into this Agreement, Purchaser has relied upon, among other things, its due diligence investigation and analysis of Seller, the Projects and the Project Assets. EXCEPT AS OTHERWISE PROVIDED HEREIN, PURCHASER ACKNOWLEDGES AND AGREES THAT THE PROJECT ASSETS ARE BEING ACQUIRED "AS IS, WHERE IS" ON THE CLOSING DATE, AND IN THEIR CONDITION ON THE CLOSING DATE.

ARTICLE 7

COVENANTS OF THE PARTIES

Section 7.1. Reserved.

Section 7.2. Use of Seller's Marks. As soon as practicable, but no later than sixty (60) Days after the Closing, Purchaser shall cause the Projects to cease using any Seller's Marks, including eliminating Seller's Marks from all Project Assets and disposing of any unused stationery and literature of the Projects. From and after such date, except for any intellectual property rights that constitute a part of the Project Assets, Purchaser shall not, and shall cause the Projects not to, use Seller's Marks or any logos, trademarks, trade names, or other intellectual property rights owned or used by Seller, and Purchaser acknowledges that neither it nor the Projects shall have any rights whatsoever to use such intellectual property. During the Interim Period, the Parties shall discuss in good faith and use commercially reasonable efforts to agree on efforts to ensure that the use of Seller's Marks will cease as soon as practicable, but no later than sixty (60) Days after the Closing.

Section 7.3. Exclusivity. During the Interim Period, Seller shall not, and shall not permit its Affiliates, agents and representatives to, directly or indirectly, in the ordinary course of business (a) encourage, solicit, initiate, facilitate or continue inquiries regarding an Acquisition Proposal for the Project Assets; (b) enter into discussions or negotiations with, or provide any information to, any Person (except Purchaser) concerning a possible Acquisition Proposal for the Project Assets; or (c) enter into any Contract (whether or not binding) regarding an Acquisition Proposal. Seller hereby confirms Seller has ceased and caused to be terminated, and caused each of its representatives to cease and cause to be terminated, all discussions or negotiations with any Persons (except Purchaser) with respect to an Acquisition Proposal. If Seller receives any Acquisition Proposal or inquiry which could reasonably be expected to result in an Acquisition Proposal, Seller shall promptly advise Purchaser orally and in writing of such Acquisition Proposal or inquiry.

Section 7.4. Access.

(a) Until the earlier of the end of the Inspection Period or the termination of this Agreement, Purchaser, through its representatives, shall be entitled, upon reasonable advance written notice to Seller, to enter upon the Projects or other Project Assets during normal business hours for investigations and inspections as Purchaser deems reasonably necessary for Purchaser to complete its review and due diligence during the Inspection Period subject to the requirements of this **Section 7.4** and the following limitations: (i) Purchaser shall give Seller written notice at least three (3) Business Days before entering upon the Projects or other Project Assets, and one (1) or more representatives of Seller shall have the right to be present when Purchaser or its representatives conducts its or their investigations on, or otherwise enters upon, the Projects or other Project Assets; (ii) neither Purchaser nor its representatives shall unreasonably interfere with the use, occupancy or enjoyment of the Projects or Project Assets, by Seller or its employees, contractors, customers, licensees or guests; (iii) neither Purchaser nor its representatives shall intentionally damage any Projects, or other Project Assets or any portion thereof; (iv) Seller, in its reasonable discretion, may condition access to the Projects or Project

Assets on the delivery to Seller of a certificate of insurance naming Seller as an additional insured, evidencing commercial general liability insurance issued by an insurance company having a rating of at least "A-VII" by A.M. Best Company, with limits of at least Two Million Dollars ($2,000,000) per occurrence for bodily or personal injury or death and Five Million Dollars ($5,000,000) in the aggregate per location; (v) Purchaser shall (A) use commercially reasonable efforts to perform all on-site activity on an expeditious and efficient basis; and (B) indemnify, defend, reimburse and hold harmless Seller and the other Seller Indemnified Parties from and against any and all Losses (except for Losses from the mere discovery of conditions existing as of the time of inspection, and specifically excluding liabilities, claims, costs, liens or damages to the extent caused by the gross negligence or willful misconduct of Seller, Seller's Affiliates or any agent, contractor, or employee of Seller) incurred or suffered by Seller or any other Seller Indemnified Party as a result of Purchaser or its representatives exercising Purchaser's rights pursuant to this **Section 7.4**; and (vi) Purchaser shall not conduct any invasive investigations, testing, phase II environmental site assessments, or prepare or file a baseline environmental assessment or file a due care plan with the Michigan Department of Environment, Great Lakes, and Energy, soil borings, testing or sampling of any surface or subsurface materials/media or other invasive tests or studies of the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property, Projects or other Project Assets, including subsurface investigations or any sampling, coring, or drilling of soil or other media during the term hereof without Seller's prior written consent which shall not be unreasonably conditioned, delayed or withheld. The foregoing indemnification obligation shall survive Closing or the earlier termination of this Agreement.

(b) During the period following the expiration of the Inspection Period and prior to the Closing or the earlier termination of this Agreement, Seller will use commercially reasonable efforts to provide Purchaser with such assistance as Purchaser may reasonably request in connection with timely performing any Phase I environmental site assessment or conducting any land survey-related work with respect to the Projects, including (i) facilitating Purchaser's access to the Projects or other Project Assets during normal business hours, *provided* that Purchaser complies with the requirements in **Section 7.4(a)(vi)**, (ii) responding to requests from third party consultants, and (iii) making necessary personnel and materials available to Purchaser.

(c) Until Closing, or the earlier termination of this Agreement, Purchaser, or its representatives, shall upon reasonable advance written notice to Seller, be entitled to contact the local zoning office or other municipal offices with respect to its due diligence activities. Seller shall be provided at least five (5) Days prior written notice of all meetings Purchaser or its representatives may have during the Interim Period with any Governmental Authority (including the Michigan Department of Environment, Great Lakes, and Energy) relating to the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property, the Projects or the Project Assets or Purchaser's use thereof.

(d) For purposes of this **Section 7.4**, any advance or prior notice to be given to Seller of an intended inspection of the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property, the Projects or the Project Assets may be given by telephone and e-mail, to Adam Monroe at (231) 429-5033 and adam.monroe@cmsenergy.com; *provided* that such notice has been confirmed by return telephone call or e-mail from such Person.

Section 7.5. Inspections.

(a) During the Inspection Period, Purchaser shall complete (subject to **Section 7.4(a)**) its investigations with respect to the physical and environmental condition of the Projects and the Project Assets ("Inspections"). Prior to the expiration of the Inspection Period, Purchaser may provide Seller with a written notice that Purchaser has determined in good faith that Purchaser's Inspections identified physical and environmental conditions of the Projects or the Project Assets that materially interfere with

Purchaser's ability to perform its obligations under the Power Purchase Agreement and irrevocably elects to terminate this Agreement, along with a summary of all reasons for its conclusion ("Notice to Terminate"), and upon Seller's receipt of a Notice to Terminate (i) Purchaser shall return all written Confidential Information, (ii) this Agreement shall automatically terminate and Purchaser and Seller shall have no further obligations or liabilities under this Agreement, except those that expressly survive the earlier termination of this Agreement. Purchaser's termination rights shall be limited to material deficiencies in the physical condition of the Projects or Project Assets or its discovery of adverse material environmental conditions, in each case, that were either (A) not fully disclosed in information, materials and documents Made Available to Purchaser or (B) which differ in material respects from information, materials and documents Made Available to Purchaser. In the event that no Notice to Terminate is delivered by the expiration of the Inspection Period, then Purchaser shall be deemed to have accepted the condition of Land, the Projects and the Project Assets and the results of all its inspections.

(b) Any additional testing permitted to be performed by Purchaser relating to the environmental condition of the Projects, the Project Assets or otherwise pursuant to **Section 7.4** shall be subject to the following requirements (in addition to compliance with the requirements of **Section 7.4(a)(i)-(vi)**): (i) Purchaser shall supply its proposed scope of work to Seller describing, with specificity, the (A) nature of the testing contemplated, including the locations and number of samples to be obtained, the media (soil, groundwater, surface water, sediment or air) to be sampled, the sampling method and types of samples that will be subject to laboratory or field analysis, the types of contaminants for which the testing is being conducted, and plans for lawful disposal of any materials collected or produced and restoration of the Project Assets to substantially the same condition as existed on the Effective Date, and (B) the anticipated dates that any on site testing will take place; (ii) Purchaser shall provide Seller, upon Seller's written request, copies of any and all data, results, conclusions and reports generated as a result of or during Purchaser's testing relating in any manner to the environmental condition of the Projects or the Project Assets; (iii) Purchaser shall provide Seller with a draft of any final report which will be released to any third party, other than an insurance provider or its agents, and Purchaser shall consider in good faith any of Seller's comments with respect to such final reports; and (iv) any such reports shall be subject to confidentiality restrictions at least as strict as those set forth in **Section 7.9**.

(c) Purchaser, at Purchaser's sole expense, shall restore the Project Assets to substantially the same condition prior to any such Inspections or studies after conducting the same and repair any damage to the Project Assets caused by Purchaser or its representatives without unreasonable delay ("Restoration Obligations"). Purchaser agrees that it will not conduct any drilling or boring at the Land (other than the Fee Simple Real Property or Calkins Bridge Project Easement Reservation Real Property) and may only conduct drilling or boring on the Fee Simple Real Property or Calkins Bridge Project Easement Reservation Real Property with the prior written consent of Seller, which Seller shall not unreasonably withhold. In the event that this Agreement is terminated and the Closing has not occurred for any reason whatsoever, then Purchaser shall tender to Seller, at no cost to Seller, all third-party reports, surveys, and assessments that Purchaser obtained or had prepared from its consultants with respect to the Inspections of the Project Assets under this **Section 7.5**; *provided*, *however*, that Purchaser shall be permitted to redact any information that is proprietary to Purchaser. Any third-party reports, surveys, and assessments delivered to Seller under this Agreement shall be delivered without representation or warranty of any kind or nature as to such reports, surveys, and assessments, including without limitation the completeness or accuracy of any information in same. The provisions of this **Section 7.5** shall survive Closing or the earlier termination of this Agreement.

Section 7.6. Employee Matters.

(a) Within ninety (90) Days after the Effective Date, Purchaser shall, or shall cause an Affiliate of Purchaser to, provide a written offer of employment in accordance with **Section 7.6(c)** to be

effective upon the Closing Date to the Target Employees who are actively employed by Seller in the same position as of the Closing Date (the "Active Employees"), excluding those certain employees set forth on **Schedule 7.6(a)**. Any employees that are identified in **Schedule 7.6(a)** will be listed in accordance with the inverse seniority provisions of Article VII, Section 17 of the Collective Bargaining Agreement. In the case of Target Employees who, as of the Closing Date, are absent from active employment with Seller for any reason (including as a result of layoff, leave of absence, disability, illness or injury) (the "Inactive Employees"), such Inactive Employees shall not be offered employment by Purchaser or its Affiliate, as applicable, unless (i) (A) the Inactive Employee was absent from active employment with Seller as of the Closing Date on account of a short-term disability as determined under Seller's short-term disability plan or the leave provided by the Collective Bargaining Agreement, and (B) such Inactive Employee returns to active employment with Purchaser or its Affiliate, as applicable, within a period of thirty (30) Days following the Closing Date, or (ii) as required by the Collective Bargaining Agreement or applicable Employment Laws. The Business Employees who accept employment with Purchaser or its Affiliate, as applicable, shall be referred to herein as "Transferred Employees". Seller shall terminate the employment relationship with each Transferred Employee as of the Closing Date. Seller and Purchaser shall coordinate the timing of the Closing Date to ensure that Seller has adequate time to provide all notices required under applicable Law and that all bargaining obligations to the Union are made. Notwithstanding the foregoing, Purchaser shall, or cause an Affiliate of Purchaser to, make offers of employment to a sufficient number of Active Employees so as not to trigger any obligations under the WARN Act on the part of Seller.

(b) For each Transferred Employee that is also a Union Employee ("Transferred Union Employees"), Purchaser shall, or shall cause an Affiliate of Purchaser to, continue employment for the Transferred Union Employees in accordance with and subject to the applicable terms and conditions set forth within the Collective Bargaining Agreement.

(c) The offer for each Transferred Employee that is also a Non-Union Employee ("Transferred Non-Union Employee"), Purchaser or its Affiliate shall maintain, for a period of at least twelve (12) months following the Closing Date, (i) a wage rate or base salary, as applicable, that is no less than the wage rate or base salary as in effect for such Transferred Non-Union Employee immediately prior to the Closing Date, (ii) annual cash target bonus opportunity for such Transferred Non-Union Employee that is no less than the annual cash target bonus opportunity (excluding change in control or retention bonuses) as in effect immediately prior to the Closing Date, and (iii) employee benefits comparable, in the aggregate, to those in effect for similarly situated employees of Purchaser and its Affiliates. As of and after the Closing Date, and to the extent permitted by the applicable plan, Purchaser or its Affiliate, as applicable, shall provide to each Transferred Non-Union Employee full credit for all purposes under any Employee Benefit Plan, policy or arrangement of Purchaser for such Transferred Non-Union Employee's service prior to the Closing Date with Seller, to the same extent such service is recognized by Seller under a comparable Employee Benefit Plan in which the Transferred Non-Union Employee participated immediately prior to the Closing Date; *provided* that such service shall not be credited to the extent it would result in a duplication of benefits or with respect to benefit accruals under any defined benefit plan.

(d) Health Coverage for Transferred Non-Union Employees. Purchaser shall take commercially reasonable actions to cause each Transferred Non-Union Employee and his or her eligible dependents to be offered coverage on and after the Closing Date by a group health plan or plans that (i) comply with the provisions of **Section 7.6(c)**, (ii) do not limit or exclude coverage on the basis of any pre-existing condition of such Transferred Non-Union Employee or dependent (other than any limitation already in effect under the applicable group health Employee Benefit Plans) or on the basis of any other exclusion or waiting period not in effect for the Transferred Non-Union Employee under the applicable group health Employee Benefit Plans, and (iii) provide each Transferred Non-Union Employee full credit

under Purchaser's group health plans, for the year in which the Closing Date occurs, for any deductible, co-insurance, and/or co-payment already incurred by the Transferred Non-Union Employee under the applicable group health Employee Benefit Plans and for any other out-of-pocket expenses that count against any maximum out-of-pocket expense provision of the applicable group health Employee Benefit Plans and/or Purchaser's group health plans. To the extent that a Transferred Non-Union Employee was a participant in an Employee Benefit Plan prior to the Closing Date, such Employee Benefit Plan shall be responsible for providing welfare benefits to any participating Transferred Non-Union Employee for claims incurred prior to the Closing Date under, in accordance with, and subject to the generally applicable terms and conditions of such plans. In addition, following the Closing Date, Purchaser shall provide COBRA continuation coverage that satisfies ERISA and Code Section 4980B, to any Transferred Non-Union Employee (and their qualified beneficiaries) who incurs a qualifying event after the Closing Date. For the avoidance of doubt, Seller shall remain liable for COBRA continuation coverage for any former Seller employee who did not become a Transferred Employee at or prior to the Closing Date.

(e) Severance, Transferred Non-Union Employees. With respect to each Transferred Non-Union Employee whose employment is terminated without cause during the period commencing on the Closing Date and ending twelve (12) months after the Closing Date, Purchaser shall provide such Transferred Non-Union Employee with severance benefits no less favorable to those that such Transferred Non-Union Employee would receive under Seller's applicable severance plan or program, as though all conditions of the severance plan or program are met, including the requirement to timely return a valid general release agreement in favor of Purchaser, taking into account and combining such Transferred Non-Union Employee's service with Seller prior to the Closing Date and with Purchaser on and after the Closing Date.

(f) Transferred Non-Union Employee Accrued Vacation, Sick Leave and Personal Time. Purchaser will recognize and assume all liabilities with respect to accrued but unused vacation time for all Transferred Non-Union Employees (including, without limitation, any liabilities for payments in respect of earned but unused vacation time that arise as a result of the transfer of employment contemplated by this **Section 7.6**) ("Accrued Vacation Time Liabilities"). To the extent required by applicable law or by company policy, Seller shall be responsible for making payments to any Transferred Non-Union Employees in respect of earned but unpaid base salary or base wages and unreimbursed business expenses incurred through the Closing Date, in each case, that become due as a result of the transfer of employment contemplated by this **Section 7.6**. Purchaser shall allow Transferred Non-Union Employees to use the vacation, sick leave and personal time in accordance with the terms of Seller's programs in effect immediately prior to the Closing Date (in addition to, and not in lieu of, any vacation accrued under the applicable vacation plans or policies of Purchaser on or following the Closing Date).

(g) Transferred Non-Union Employee 401(k) Plan. Within sixty (60) Days following the Closing Date, Purchaser shall permit participation by the Transferred Non-Union Employees in Purchaser's Tax-qualified defined contribution plan or plans with a cash or deferred feature (the "Purchaser 401(k) Plan") for the benefit of each Transferred Non-Union Employee who, as of immediately prior to the Closing Date, was eligible to participate in a Tax-qualified defined contribution plan maintained by Seller (collectively, the "Seller 401(k) Plans"). As soon as practicable after the Closing Date, the Seller 401(k) Plans shall, to the extent permitted by Section 401(k)(10) of the Code and the Seller 401(k) Plans' applicable terms, make distributions available to Transferred Non-Union Employees, and the Purchaser 401(k) Plan shall accept any such distribution (including loans) as a rollover distribution if so directed by the Transferred Non-Union Employee.

(h) Transferred Non-Union Employee Annual Bonuses. Without limiting the generality of **Section 7.6(c)**, following the Closing Date, Purchaser shall cause the Transferred Non-Union Employees to participate in short-term annual cash incentive compensation plans of Purchaser (as

if each Transferred Non-Union Employee had been employed with Purchaser from the start of Purchaser's applicable plan year) for the remainder of the plan year in which the Closing Date occurs that provide short-term annual cash incentive compensation opportunities that are no less favorable than those provided to such Transferred Non-Union Employees immediately prior to the Closing Date.

(i) Access to Employees & Records After Closing. For a period of three (3) years after the Closing Date, Seller shall have reasonable access to all of the Books and Records of the Transferred Employees, to the extent that such access may reasonably be required in connection with matters relating to or affected by the operations of Seller's business prior to the Closing Date, and any other reasonable need of Seller to consult such Books and Records, including Seller's access to such Books and Records for Tax purposes, including the preparation of Seller's Tax Returns, and any Tax audits. Purchaser also agrees to make the Transferred Employees available to Seller, as reasonably necessary and warranted, to participate and provide testimony in any litigation, investigation, or legal matter that may arise after the Closing Date, that is related to matters they may have witnessed and/or have information or knowledge about in connection with their prior employment with Seller. Such access shall be afforded by Purchaser upon receipt of reasonable advance notice and during normal business hours.

(j) No Solicitation. From and after the Closing Date until the two (2) year anniversary of the Closing Date, Seller shall not, without the prior written consent of Purchaser, directly or indirectly, engage, recruit, solicit or otherwise attempt to engage or hire any Transferred Employee, or induce or attempt to induce any such Transferred Employee to leave employment with Purchaser; *provided*, Seller shall not be prohibited from advertising job openings by use of third party recruiters, newspapers, magazines, the internet, social media or any other media, so long as such efforts are not specifically directed at any Transferred Employee. From and after the Closing Date until the two (2) year anniversary of the Closing Date, Purchaser shall not, without the prior written consent of Seller, directly or indirectly, engage, recruit, solicit or otherwise attempt to engage or hire any Seller Employee, or induce or attempt to induce any such Seller Employee to leave employment with Seller; *provided,* Purchaser shall not be prohibited from advertising job openings by use of third party recruiters, newspapers, magazines, the internet, social media or any other media, so long as such efforts are not specifically directed at any Seller Employee. The Parties agree that the rights and remedies for non-compliance with this **Section 7.6(j)** will be limited solely to seeking specific enforcement of this **Section 7.6(j)**, it being acknowledged and agreed that any such breach or threatened breach will cause irreparable injury to the other Party and that money damages would not provide an adequate remedy.

(k) The provisions of this **Section 7.6** are solely for the benefit of the Parties and nothing in this **Section 7.6** express or implied shall confer upon any Transferred Non-Union Employee or any legal representative or beneficiary thereof or any other Person other than the Parties any rights or remedies, including any right to employment, or continued employment for any specified period, of any nature or kind whatsoever. Nothing in this **Section 7.6** or this Agreement, express or implied, shall be deemed an establishment or amendment of any Employee Benefit Plan or construed to prevent Purchaser or its Affiliates from terminating, amending or modifying any Employee Benefit Plan.

Section 7.7. Operation and Maintenance of Project Assets.

(a) Commencing on the Effective Date and ending on the earlier of the Closing or the termination of this Agreement, except as otherwise consented to by Purchaser in writing, which consent shall not be unreasonably withheld, conditioned or delayed, or as may be required by Seller by the express terms of this Agreement to satisfy a condition precedent to Closing pursuant to **Section 4.1** or **Section 8.2** (and only to the extent such actions are taken consistent with the terms of this Agreement), Seller shall conduct its business with respect to the Projects in the ordinary course and consistent with Prudent

Utility Practices (including with respect to (i) keeping in full force and effect its legal existence, (ii) preserving and maintaining the Project Assets as they are currently being preserved and maintained, (iii) maintaining the Books and Records, (iv) performing and complying in all respects with the Material Contracts, Material Permits, and Material Environmental Permits, (v) maintaining the Insurance Policies, and (vi) performing and complying in all material respects with applicable Law).

(b) Commencing on the Effective Date and ending on the earlier of the Closing or the termination of this Agreement, Seller shall provide written notice to Purchaser promptly following any of the following matters:

(i) Any material emergency (subject to **Section 7.7(e)**), Casualty and Casualty Losses, Condemnation and Condemnation Losses or other similar material change affecting the use or operation of any Project or any of the material Project Assets;

(ii) Responding to any inquiries or requests from FERC related to the FERC Licenses that if occurring on or prior to the Effective Date would need to be disclosed on **Schedule 5.6(e)**;

(iii) Entering into the EGLE Joint Funding Agreements in accordance with **Section 7.12(o)**;

(iv) Entering into a new collection agreement with the U.S. Department of Agriculture Forest Service for annual payment of recreation facility operating and maintenance expenses, or more than one new collection agreements if Closing does not occur during the term of the first new collection agreement, to replace the collection agreement between the U.S. Department of Agriculture Forest Service and Seller for the 2025 fiscal year; or

(v) Seller's or any of Seller's Affiliates' receipt of written notice of (A) any violation or alleged violation of any applicable Law with respect to the Projects or the Project Assets or (B) default or material breach under any Material Contract, Material Permit, Material Environmental Permit or FERC License.

(c) Commencing on the Effective Date and ending on the earlier of the Closing or the termination of this Agreement, Seller shall provide prior written notice to Purchaser of any of the following matters:

(i) Submitting any filings or formal communications to FERC related to the FERC Licenses that would change Seller's obligations, responsibilities or liabilities under the FERC Licenses in effect as of the Effective Date; or

(ii) Making any capital expenditures or committing to make any capital expenditures with respect to the Projects in excess of One Million Dollars ($1,000,000), except (A) for capital expenditures related to operational emergencies, equipment failures or outages or other Casualties or expenditures that Seller reasonably determines are then necessary to maintain the safety and integrity of any Project Asset or (B) for capital expenditures as required by applicable Law, Project Permit or a Governmental Authority.

(d) Commencing on the Effective Date and ending on the earlier of the Closing or the termination of this Agreement, except as set forth in **Schedule 7.7(d)**, Seller shall obtain Purchaser's

written consent, which shall not be unreasonably withheld, conditioned or delayed, prior to taking any of the following actions:

(i) Terminating or modifying any Material Contract, Material Permit, Material Environmental Permit or FERC License;

(ii) Entering into any Project Contract which, if existing as of the Effective Date, would have constituted a Material Contract;

(iii) Selling, conveying, transferring, leasing, licensing, encumbering, or otherwise disposing of, or permitting or allowing the imposition of any Lien (other than Permitted Exceptions) upon, any of the Project Assets, outside of the ordinary course of business;

(iv) The termination or material modification of any Material Permit, FERC License, or failing to obtain or renew any Material Permit, Material Environmental Permit or FERC License required to own and operate the Projects and the Project Assets;

(v) Taking any action under or authorizing or approving any action under the Hardy EPC Agreement, including instructing the counterparty thereto to initiate any work thereunder; or

(vi) Entering into any agreement or otherwise committing to take any actions described in the foregoing clauses.

(e) Notwithstanding **Section 7.7(a)**, **Section 7.7(b)**, **Section 7.7(d)** or any other provision to the contrary in this Agreement, Seller may take such actions with respect to any emergency situation as Seller may reasonably determine necessary or appropriate to comply with Permits or applicable Laws; *provided*, that Seller shall provide prompt notice following such emergency situation.

Section 7.8. R&W Policy.

(a) Contemporaneously with the Effective Date, a buyer-side representation and warranty insurance policy (the "R&W Policy") shall be in effect, to be bound at the Closing, to provide Purchaser with recourse with respect to Losses due to breaches of representations and warranties under **ARTICLE 5**. From and after Closing, Purchaser shall maintain the R&W Policy in full force and effect in accordance with its terms. On or before the Effective Date, Purchaser shall deliver to Seller a true, correct and complete copy of such R&W Policy.

(b) The Parties acknowledge and agree that the R&W Policy shall contain terms and conditions providing that R&W Insurer, in connection with this Agreement, any Ancillary Agreement or certificate delivered pursuant to this Agreement and the transactions contemplated hereby and thereby, (i) has waived its rights to bring any dispute against Seller or any of its Affiliates by way of subrogation, claim for contribution, or otherwise (except in cases of Fraud by Seller), (ii) has waived its rights to bring any dispute against any of Seller's or any of its Affiliates' respective past, present and future representatives by way of subrogation, claim for contribution, or otherwise (except in cases of Fraud by Seller), and (iii) has agreed that none of Purchaser or any of its Affiliates shall have any obligation to pursue any claim against Seller or any of its Affiliates or their respective past, present or future representatives in connection with any Liability under the R&W Policy.

(c) Purchaser shall not, and shall not permit any of its Affiliates to, terminate, waive, amend, modify, or otherwise revise any of the subrogation provisions of the R&W Policy in a manner that is adverse to Seller or any of its Affiliates or representatives without prior written consent of Seller, such consent to be in Seller's sole discretion.

(d) All costs and expenses related to the R&W Policy, including the total premium, deductibles, underwriting costs, brokerage commissions and other fees and expenses of such policy shall be paid one hundred percent (100%) by Purchaser. From and after the Closing, to the extent requested in writing, Seller shall, and shall cause its Affiliates to, use good faith efforts to reasonably cooperate with Purchaser in connection with any claim made under the R&W Policy.

(e) Nothing in this Agreement shall limit the right of Purchaser (or an Affiliate thereof) to make claims against the R&W Policy. For the avoidance of doubt, as between Purchaser, on the one hand, and the R&W Insurer, on the other hand, none of the terms, limitations, conditions and restrictions (including time for asserting claims) set forth in this Agreement are intended to affect the rights of Purchaser (or any Affiliate thereof) under the R&W Policy, which rights shall be governed solely thereby.

(f) Purchaser shall not obtain any other representations and warranties insurance policy or similar insurance policy related to this Agreement, Seller, or any of the Project Assets unless it contains a waiver by the insurer of any indemnification, contribution, subrogation or other rights to pursue any claim against Seller, any of its Affiliates or any of Seller's or any of its Affiliates' respective past, present and future representatives except in the event of Fraud (including rights of Seller to enforce such a waiver) which has been reviewed and approved in writing by Seller, such approval not to be unreasonably withheld, conditioned or delayed.

(g) Seller's Affiliates, on and after the Closing Date, and their past, present and future representatives are intended to be third-party beneficiaries of this **Section 7.8**. The foregoing obligations shall survive Closing.

Section 7.9. Confidentiality.

(a) Each Party shall hold all Confidential Information in confidence and shall not disclose or permit the disclosure of the Confidential Information to any Person without the other Party's prior written consent. Each Party further agrees that, before the Closing, each Party will use the Confidential Information only for purposes of evaluating the Project Assets in connection with its purchase thereof in accordance with the terms of this Agreement. Each Party shall not disclose the transaction contemplated hereby or the Confidential Information to any Person, other than to such Party's employees, officers, directors, attorneys, accountants, lenders, investors and consultants who (i) have a need to review the Confidential Information for the purpose of advising such Party in respect to the transaction contemplated hereby, (ii) have been informed in writing of the confidential nature of such information and (iii) have agreed to be bound by the terms of this Agreement. Each Party shall ensure that all Persons to whom it discloses the Confidential Information shall keep the same confidential in accordance with the terms of this Agreement. In any event, each Party shall be responsible for any breach of this Agreement by any Person to whom such Party discloses the Confidential Information. For the avoidance of doubt, the Equity Commitment Letter shall be treated as Confidential Information of Purchaser.

(b) Notwithstanding the above terms, to the extent that a Party is required to disclose the Confidential Information by any Governmental Authority or by applicable Law or stock exchange rule, or as part of its required Securities and Exchange Commission filings, or pursuant to a subpoena, Order or other legal proceeding, such Party shall, unless prohibited from doing so by Governmental

Authority or applicable Law, notify the other Party (both by telephone and in writing) within one (1) Business Day of its knowledge of such legally required disclosure. Each Party shall reasonably cooperate with the other Party's counsel (at no out-of-pocket cost or expense to the Party required to reasonably cooperate) in any appeal or challenge to such disclosure made by the other Party. If no protective order or similar relief is obtained, such Party shall (i) disclose only that portion of the Confidential Information that it is legally obligated to disclose, (ii) exercise commercially reasonable efforts to obtain reliable assurances that the disclosed information will be kept confidential and (iii) exercise commercially reasonable efforts to provide the other Party with a copy of the information to be disclosed before the same is given to any third party. In addition, and notwithstanding anything to the contrary in this Agreement, each Party may disclose any portion of the Confidential Information in connection with any court filings with respect to any dispute between the Parties with respect to this Agreement or the Project Assets.

(c) If this Agreement is terminated prior to the Closing, (i) each Party shall promptly deliver to the other Party all the Confidential Information which is in tangible form, including any copies such Party has made and other embodiments thereof, and (ii) each Party shall destroy all extracts, summaries and compilations thereof and references thereto which are in such Party's notes, documents, databases or other records (whether prepared by any Party), and in either case such Party will certify to the other Party by written affidavit that it has done so.

(d) Each Party acknowledges that the Confidential Information is of a special, unique, unusual, extraordinary and intellectual character and that the other Party's interest in the Confidential Information may be irreparably injured by such Party's disclosure of such Confidential Information in violation of this Agreement. Each Party further acknowledges and agrees that money damages would not be a sufficient remedy for any breach of this **Section 7.9** by it and that, in addition to all other remedies available at Law or in equity, the other Party shall be entitled to specific performance or injunctive or other equitable relief as a remedy for any breach or potential breach by the such Party of this **Section 7.9** and further agrees to waive any requirement for the securing or posting of any bond in connection with such remedy.

(e) Seller shall remain obligated to comply with the terms of any previously executed Confidentiality Agreement provided to Purchaser.

The provisions of this **Section 7.9** shall survive for a period of twenty-four (24) months following the Closing Date or the earlier termination of this Agreement.

Section 7.10. Memorandum of Environmental Indemnity Agreement. At the Closing, the Parties and Subsidiaries shall finalize and attach exhibits and/or record, as required, the Memorandum of Environmental Indemnity Agreement.

Section 7.11. PLLI. Purchaser and Seller have agreed upon the principal terms, amounts and coverages to be contained in the Pollution Legal Liability with Excess Indemnity Insurance for each Project (the "PLLI"), summaries and/or copies of which are attached hereto as **Exhibit N**. Purchaser shall not disclose to Seller the results of any PLLI related environmental reports, unless Seller requests a copy of such information in writing. Prior to the Closing, Purchaser shall use commercially reasonable efforts to (a) cause the insurance companies to issue the PLLI to Purchaser, identifying Seller as an additional insured in the PLLI for purposes of Purchaser's indemnity obligations and containing the other terms set forth in **Exhibit N** and the PLLI in form acceptable to Seller, and (b) provide Seller evidence that the premiums due for the PLLI have been paid in full. Purchaser shall cause the PLLI to comply with the terms of this Agreement and, except as otherwise provided herein or in any Ancillary Agreement, shall not cause or allow the same to lapse or be modified or amended or any claim under the PLLI settled

and/or released without Seller's prior written consent. The provisions of this **Section 7.11** shall survive the expiration or early termination of this Agreement.

Section 7.12. Governmental Approvals; Required Consents.

(a) Notwithstanding anything to the contrary in this **Section 7.12,** Purchaser shall not submit any application for Governmental Approvals without first obtaining Seller's prior written consent.

(b) Except for (i) the applications for the FERC Approvals, (ii) obtaining Tax identification numbers for the Reserved Easements, (iii) the application for the MPSC Approval, and (iv) the filing for HSR Approval, Purchaser shall be responsible, at its sole cost and expense, for obtaining all Governmental Approvals during the Interim Period, if any. Purchaser shall, at its sole cost and expense, prepare and file all applications for such Governmental Approvals related to Purchaser's ownership and intended use, and Seller shall cooperate and sign as the owner as necessary on applications with respect to any zoning changes and/or mergers of Seller's property in order to be in a position to convey the Project Assets to Purchaser. Other than the legal descriptions and surveys for the Reserved Easements and any reasonably requested documentation in Seller's possession or control as of the Effective Date, in each case which Seller shall provide to Purchaser at no cost and expense to Purchaser and within a reasonable time before such documentation is required in connection with any applications for Governmental Approvals, Purchaser, at its sole cost and expense, shall provide all of the necessary drawings, surveys, elevations, renderings, and other documents required by applicable Laws, and such other documents as may be necessary for the applications for such Governmental Approvals. Each submittal to the applicable Governmental Authorities for such Governmental Approvals shall comply with the requirements of the then applicable Laws applicable to the same. Purchaser shall use commercially reasonable efforts to pursue the Governmental Approvals for which Purchaser is responsible in accordance with this **Section 7.12(b)**.

(c) Each Party acknowledges and agrees that receipt of the FERC Approvals is required as part of the Governmental Approvals and is a condition precedent of Seller and Purchaser to the Closing. Each Party shall cooperate in good faith with the other Party in preparing each application for the FERC Approvals and satisfying FERC requirements, and each Party shall promptly support the other Party as needed to follow-up on all FERC requests with each Party bearing its own costs and sharing equally any third-party, non-legal, expenses. Purchaser acknowledges and agrees that as a condition of granting the FERC Approvals, FERC will require assurances from Purchaser that it has the financial capability to hold the FERC Licenses and operate and maintain the Projects pursuant to the FERC Licenses and applicable Law and that in connection therewith, Purchaser or its Affiliate will provide such customary information about its financial capability with respect to the Projects as FERC may request. The Parties shall (to the extent permitted by applicable Law) promptly furnish each other with copies of any notices, correspondence or other written communication from FERC. Unless otherwise agreed in writing by the Parties, the applications for the FERC Approvals shall be submitted by Seller (and Purchaser, as required) no later than sixty (60) Days after the Effective Date. The Parties recognize that the FERC Approval process does not necessarily have a specific time limit. Both Parties shall use commercially reasonable efforts to pursue the FERC Approvals. Neither Party shall object to or take any action to oppose any of the applications for FERC Approvals. If a Party believes that the other Party has taken any action that would be adverse to the FERC Approvals, that Party shall provide written notice to the other Party taking such action requesting immediate retraction or action to reverse the adverse action.

(d) Each Party acknowledges and agrees that receipt of the MPSC Approval is required as part of the Governmental Approvals and is a condition precedent of Seller and Purchaser to the Closing. Purchaser shall cooperate in good faith with Seller in Seller's preparation of the application and filing for the MPSC Approval and satisfying MPSC requirements, and each Party shall promptly

support the other Party as needed to follow-up on all MPSC requests with each Party bearing its own costs and sharing equally any third-party, non-legal, expenses. Unless otherwise agreed in writing by the Parties, the application for the MPSC Approval shall be submitted by Seller (and Purchaser, as required or permitted) no later than sixty (60) Days after the Effective Date. The Parties recognize that the MPSC Approval process does not necessarily have a specific time limit. Both Parties shall use commercially reasonable efforts to pursue the MPSC Approval. Neither Party shall object to or take any actions to oppose the application for the MPSC Approval. If a Party believes that the other Party has taken any action that would be adverse to the MPSC Approval, that Party shall provide written notice to the other Party taking such action requesting immediate retraction or action to reverse the adverse action.

(e) Purchaser shall cooperate in good faith with Seller in Seller's preparation of the application and filing for the FCC Approval and satisfying FCC requirements, and each Party shall promptly support the other Party as needed to follow-up on all FCC requests with each Party bearing its own costs and sharing equally any third-party, non-legal, expenses. Unless otherwise agreed in writing by the Parties, the application for the FCC Approval shall be submitted by Seller (and Purchaser, as required or permitted) no later than sixty (60) Days after the Effective Date. The Parties recognize that the FCC Approval process does not necessarily have a specific time limit. Both Parties shall use commercially reasonable efforts to pursue the FCC Approval. Neither Party shall object to or take any actions to oppose the application for the FCC Approval. If a Party believes that the other Party has taken any action that would be adverse to the FCC Approval, that Party shall provide written notice to the other Party taking such action requesting immediate retraction or action to reverse the adverse action.

(f) Each Party shall provide the other Party the opportunity to review any and all initial application filings related solely to the Projects and Project Assets with respect to the FERC Approvals set forth in **Section 7.12(c)** by delivering draft copies of such filings to the other Party prior to their submission to FERC. With respect to any such filings required to be submitted in accordance with pre-scheduled filing deadlines, each Party shall ensure that any such filings are provided in draft for the other Party's review no later than five (5) Business Days before the applicable filing deadline.

(g) Seller shall provide Purchaser the opportunity to review any and all initial application filings related solely to the Projects and Project Assets with respect to the MPSC Approval set forth in **Section 7.12(d)** by delivering draft copies of such filings to Purchaser prior to their submission to the MPSC. With respect to any such filings required to be submitted in accordance with pre-scheduled filing deadlines, Seller shall ensure that any such filings are provided in draft for Purchaser's review no later than five (5) Business Days before the applicable filing deadline.

(h) Seller shall provide Purchaser the opportunity to review any and all initial application filings related solely to the Projects and Project Assets with respect to the FCC Approval set forth in **Section 7.12(e)** by delivering draft copies of such filings to Purchaser prior to their submission to the FCC. With respect to any such filings required to be submitted in accordance with pre-scheduled filing deadlines, Seller shall ensure that any such filings are provided in draft for Purchaser's review no later than five (5) Business Days before the applicable filing deadline.

(i) Each Party shall keep the other Party apprised in a prompt manner of the status and substance of any communications with, and inquiries or requests for additional information from any Governmental Authority in connection with the transactions contemplated by this Agreement. The Parties shall promptly respond to such inquiries or requests for additional information made by any Governmental Authority, use their respective commercially reasonable efforts to participate in any hearings, settlement proceedings or other proceedings ordered with respect to the transactions contemplated by this Agreement, and use their respective commercially reasonable efforts to cause all filings, applications, registrations, consents and authorizations required for the consummation of the

transactions contemplated by this Agreement to be obtained at the earliest possible date after the date of applicable filing.

(j) Seller shall cooperate in good faith with Purchaser, and provide such reasonable documentation as required, in connection with, (i) with respect to the Projects (other than the Hardy Project), all necessary notices of self-certification of Qualifying Facility status in accordance with 18 C.F.R. § 292.203(a)(3) for each such Project, and (ii) with respect to the Hardy Project, all necessary notices of self-certification as an "exempt wholesale generator" in accordance with 18 C.F.R. § 366.1 for the Subsidiary that will take ownership of such Project.

(k) Each of Purchaser and Seller shall use commercially reasonable efforts to make, or cause to be made, an appropriate pre-merger notification filing required under the HSR Act with respect to the transactions contemplated hereby within twenty-five (25) Business Days after a date to be mutually agreed to by the Parties (which date shall be no more than one (1) year before the reasonably anticipated Closing). Each of Purchaser and Seller, shall supply as promptly as practicable any additional information and documentary material that may be requested or required pursuant to the HSR Act with respect to the transactions contemplated by this Agreement. Each Party shall promptly support the other Party as needed to provide as promptly as practicable any additional information and documentary material that may be requested pursuant to the HSR Act, with each Party bearing its own costs. Both Parties shall use commercially reasonable efforts to pursue the HSR Approval. Neither Party shall object to or take any actions to oppose the application for the HSR Approval. Each of the Parties shall use commercially reasonable efforts to (i) cooperate with each other in connection with any filing or submission and in connection with resolving any investigation or other inquiry to receive HSR Approval, (ii) keep Purchaser and Seller informed in all material respects of any material communication received by such Party from any Governmental Authority, provide each other with advance copies and a reasonable opportunity to comment on all material proposed notices, submissions, filings, applications, undertakings, and information and correspondence proposed to be supplied to or filed with any Governmental Authority, except the Parties' HSR Act filings, and keep the other party informed in all material respects of any material communication received from a Governmental Authority and (iii) to the extent permitted by Law, permit Purchaser or Seller, as applicable, a reasonable opportunity to attend and participate in any substantive meetings, discussions, telephone conversations, videoconferences, or correspondence with any Governmental Authority; *provided* that materials required to be provided pursuant to this **Section 7.12(k)** may be redacted to remove references (A) concerning the valuation of the Projects, (B) as necessary to comply with contractual arrangements, (C) as necessary to comply with applicable Law, and (D) as necessary to address reasonable privilege or confidentiality concerns; *provided further* that a Party may reasonably designate any competitively sensitive material provided to another Party under this **Section 7.12(k)** as "Outside Counsel Only."

(l) During the Interim Period, the Parties shall use commercially reasonable efforts to provide such information and execute such documents as are reasonably necessary in order to obtain the consent of the counterparty to the Hardy EPC Agreement in accordance with **Section 5.5** in connection with the assignment of the Hardy EPC Agreement to Purchaser; *provided* obtaining such consent shall not be a condition to Closing. If such consent is not obtained prior to Closing, then the Parties will use good faith efforts to obtain such consent following the Closing Date and upon obtaining such consent Seller shall sell, transfer, convey, assign and deliver all of its rights, title, interest and Liabilities (other than Excluded Liabilities), and Purchaser shall accept and assume all of Seller's rights, title, interest and Liabilities (other than Excluded Liabilities) arising, in and to the Hardy EPC Agreement pursuant to an assignment and assumption agreement substantially in the form of **Exhibit F**.

(m) Following Closing, the Parties will continue to cooperate in good faith to apply for and obtain any additional FERC license amendments and other necessary approvals as may be required

in connection with any changes to the Reserved Easements and Temporary Substation Easements pursuant to **Section 3.1(g)** to ensure that: (i) each FERC License, including FERC Licensed Property, includes only real estate and infrastructure needed for Purchaser to meet FERC regulatory requirements; (ii) Purchaser obtains or retains rights to FERC Licensed Property and FERC licensed infrastructure sufficient to meet FERC regulatory requirements; and (iii) Seller obtains or retains rights sufficient to FERC Licensed Property for access to, and for the construction, operation, maintenance, and decommissioning of utility infrastructure located on FERC Licensed Property.

(n) During the Interim Period, Seller shall cooperate and work in good faith to assist Purchaser entering into replacement Tower Leaseback Agreements.

(o) (i) Seller shall use commercially reasonable efforts to enter into joint funding agreements with the Michigan Department of Environment, Great Lakes, and Energy for stream gauges and water quality for the following periods (each, an "EGLE Joint Funding Agreement" and collectively, the "EGLE Joint Funding Agreements"): (a) beginning October 1, 2025 and ending September 30, 2026 and (b) if the Closing has not occurred on or before December 31, 2026, the period beginning October 1, 2026 and ending September 30, 2027, and (ii) Seller shall pay all amounts owed thereunder when due.

Section 7.13. Transition Services Agreement. Between the Effective Date and the Closing, Purchaser and Seller shall cooperate in good faith to discuss and agree to mutually acceptable schedules, annexes or exhibits to the Transition Services Agreement attached hereto as **Exhibit P**. At the Closing, Seller and Purchaser shall enter into the Transition Services Agreement in substantially the form attached hereto as **Exhibit P**, with such supplements or other changes (including as to the schedules, annexes or exhibits to the Transition Services Agreement) as are mutually agreed by Purchaser and Seller prior to the Closing, such agreement not to be unreasonably withheld, conditioned or delayed. Prior to the Closing, Seller shall reasonably cooperate with Purchaser's requests to prepare to provide services under the Transition Services Agreement. In addition, during the Interim Period and for a period not to exceed one hundred and twenty (120) Days following the Closing Date, Seller shall use commercially reasonable efforts (a) to facilitate introductions and provide Purchaser with access to Seller's employees that directly support the Projects to facilitate Purchaser's operation of the Projects from and after Closing consistent with ordinary course of business; and (b) to facilitate introductions to third-party vendors, service providers and other third parties that Seller has contracted with for purposes of the Projects during the Lookback Period to facilitate Purchaser establishing its own direct contractual relationships with such vendors, service providers and other third parties.

Section 7.14. Interconnection Agreements; Transfer of CPNodes.

(a) During the Interim Period, Purchaser shall use commercially reasonable efforts to negotiate and finalize the METC Interconnection Agreements. Seller shall use commercially reasonable efforts to facilitate such efforts, including providing reasonably requested information and addressing any reasonable requests or requirements from METC needed to facilitate such negotiations. Purchaser shall keep Seller informed of the progress and any material developments related to the negotiation and finalization of the METC Interconnection Agreements.

(b) During the Interim Period, Purchaser shall use commercially reasonable efforts to provide such information and execute such documents as Consumers Energy Company, in its capacity as distribution provider, may reasonably request in order to finalize the Consumers Interconnection Agreements for execution by the Parties at Closing.

(c) During the Interim Period, the Parties shall use commercially reasonable efforts to provide such information and execute such documents as METC and MISO may reasonably request in

order to facilitate the transfer and assignment from Seller to Purchaser of the Hardy Interconnection Agreement at Closing.

(d) During the Interim Period, the Parties shall use commercially reasonable efforts to provide such information and execute such documents as MISO may reasonably request in order to facilitate the transfer of the CPNodes for each of the Projects from Seller to Purchaser, such transfer to be effective as of the Closing Date.

Section 7.15. Excluded Permits and Licenses; Seller Required Consents after Closing.

(a) Excluded Permits and Licenses. During the Interim Period, Purchaser shall use commercially reasonable efforts to apply for, negotiate, finalize and obtain replacement Permits or licenses to be effective after Closing for each of the Permits described in **clause (a)** of the definition of Excluded Permits and the Excluded Shoreline Licenses. Seller shall use commercially reasonable efforts to facilitate such efforts, including providing reasonably requested information, and addressing any reasonable requests or requirements from such third parties needed to facilitate such applications or negotiations. Purchaser shall keep Seller informed of the progress and any material developments related to replacements for such Excluded Permits and Excluded Shoreline Licenses. After Closing, Purchaser shall use commercially reasonable efforts to apply for, negotiate, finalize and obtain replacement Permits or licenses for any such Excluded Permits or Excluded Shoreline Licenses which Purchaser was unable to replace on or prior to the Closing.

(b) Seller Required Consents After Closing. As soon as practicable, after the Closing Date, the Parties shall use commercially reasonable efforts to take such actions and execute such documents as may reasonably be required to obtain any Seller Required Consents not obtained as of the Closing Date with respect to any Material Permits and Material Environmental Permits.

Section 7.16. Disclosure Schedules Updates.

(a) Notwithstanding anything to the contrary in this Agreement, Seller may, on or prior to the date that is ten (10) Business Days prior to the Closing, by written notice to Purchaser, supplement or amend the Disclosure Schedules delivered by Seller to Purchaser on the Effective Date to include (i) such matters occurring prior to the Effective Date but first known to Seller after the Effective Date that would cause the failure of the condition precedent set forth in **Section 4.1(c)** and (ii) such matters or information first occurring after the Effective Date that, if existing, occurring or known on or before the Effective Date, would have been required to be set forth or described in the Disclosure Schedule (each, a "Disclosure Schedule Update").

(b) In the event any Disclosure Schedule Update (other than any Permitted Disclosure Schedule Update), individually or in the aggregate with any other Disclosure Schedule Updates (other than Permitted Disclosure Schedule Updates), results in or would reasonably be expected to result in a Disclosure Loss in excess of One Million Dollars ($1,000,000) but less than Five Million Dollars ($5,000,000), the Parties shall proceed with the Closing (subject to the satisfaction or waiver of the conditions precedent to the Closing), and if the Closing occurs then the Parties in good faith shall mutually agree on the aggregate amount of such Disclosure Loss, and effective as the Closing Date the PPA Price shall be adjusted by such amount pursuant to the Power Purchase Agreement; *provided*, that the aggregate amount of such Disclosure Loss shall apply towards the Liability Cap.

(c) In the event any Disclosure Schedule Update (other than a Permitted Disclosure Schedule Update), individually or in the aggregate with any other Disclosure Schedule Updates (other than any Permitted Disclosure Schedule Updates), would result in or would reasonably be expected to

result in a Disclosure Loss in excess of Five Million Dollars ($5,000,000), then Purchaser may elect, in its sole discretion, to terminate this Agreement by written notice to Seller on or before the date that is ten (10) Business Days from the date on which Purchaser received such Disclosure Schedule Update; *provided*, that if Purchaser does not elect to terminate this Agreement in accordance with this **Section 7.16(c)** within such ten (10) Business Day period, the Parties shall proceed with the Closing (subject to the satisfaction or waiver of the conditions precedent to the Closing), and if the Closing occurs the Parties shall in good faith mutually agree on the aggregate amount of such Disclosure Loss (which in no event shall exceed Twenty Million Dollars ($20,000,000)), and effective as of the Closing Date the PPA Price shall be adjusted by such amount pursuant to the Power Purchase Agreement; *provided further*, that the aggregate amount of such Disclosure Loss shall apply towards the Liability Cap.

(d) For the avoidance of doubt, unless and until the Disclosure Loss with respect to any Disclosure Schedule Updates (other than Permitted Disclosure Schedule Updates) equal or exceed One Million Dollars ($1,000,000), no Disclosure Schedule Update shall result in any adjustment to the PPA Price.

(e) For purposes of this Agreement, (i) a "Permitted Disclosure Schedule Update" shall mean a Disclosure Schedule Update as to matters or information with respect to: (A) any Casualty, Casualty Losses, Condemnation or Condemnation Losses for which Seller previously provided notice to Purchaser in accordance with **Section 4.3**, **Section 4.4**, **Section 7.7(b)** or **Section 7.7(c)** or for which Purchaser consented to in accordance with **Section 7.7(d)**; (B) entering into the EGLE Joint Funding Agreements or new collection agreement for which Seller has obtained Purchaser's consent in accordance with **Section 7.7(b)(iii)** or **Section 7.7(b)(iv)**, respectively; (C) any actions by Seller for which Purchaser consented to in accordance with **Section 7.7(d)** solely to the extent Seller's actions were consistent with the terms of such consent and otherwise with the terms of this Agreement; (D) any Title Commitment or Survey, including any exceptions (including Purchaser Title Objections) referenced therein; (E) entering into any retention incentive agreements and/or individual retention and transfer forfeiture agreement with the Transferred Employees to the extent the terms of such agreements are not binding on Purchaser and Seller's hiring of any Union Employee or Non-Union Employee for any vacant position (either disclosed as vacant on the Effective Date on **Schedule 5.16(a)** or **Schedule 5.16(b),** or otherwise vacated during the Interim Period); (F) changes to the Non-Union Employees or Union Employees listed in **Part I** of **Schedule 5.16(a)** or **Part I** of **Schedule 5.16(b)**, including changes to reflect the filling of vacant positions listed thereon and any ordinary course changes to any such scheduled employee's job title, salary, wage or other census information Made Available to Purchaser; or (G) any action taken by Seller by the express terms of this Agreement to satisfy a condition precedent to Closing pursuant to **Section 4.1** or **Section 8.2** (and only to the extent such actions are taken consistent with the terms of this Agreement); and (ii) a "Disclosure Loss" shall mean Losses incurred or suffered by any Purchaser Indemnified Party for claims arising from, related to or suffered as a result of (whether sounding in contract, tort, statute, or whether at Law or in equity, or otherwise) any breach of any representation or warranty made by Seller in the certificate delivered pursuant to **Section 8.2(c)(ii)** which are not covered in full or in part by the R&W Policy.

Section 7.17. Retention of and Access to Books and Records.

(a) Prior to or at the Closing, Seller shall use commercially reasonable efforts to deliver to Purchaser all Books and Records in its possession or control.

(b) Within five (5) Days following the Closing, Seller shall deliver to Purchaser all keys in Seller's possession to all locks on the Project Assets.

(c) From and after the Closing, Seller agrees to retain all Books and Records remaining in Seller's possession or control after the Closing in a manner consistent with Seller's records retention policy. Upon the reasonable request of Purchaser for any Books and Records not otherwise Made Available to Purchaser prior to or at the Closing, Seller shall, if such Books and Records have not been destroyed consistent with Seller's record retention policy, use commercially reasonable efforts to deliver such Books and Records to Purchaser promptly following such request.

Section 7.18. Support Obligations. With respect to each Support Obligation issued by or for the account of Seller or any of its Affiliates under the Project Contracts and Project Permits or Material Environmental Permits that is listed on **Schedule 5.19** (collectively, the "Existing Support Obligations"), Purchaser shall use commercially reasonable efforts to issue or obtain, concurrent with the Closing, a replacement Support Obligation in accordance with the requirements of the respective Material Contract, Material Permit or Material Environmental Permit (the "Replacement Support Obligation"), such that any Existing Support Obligations delivered by Seller and its Affiliates shall be returned and cancelled. To the extent Replacement Support Obligations are not issued or obtained in respect of any Existing Support Obligations as of the Closing (each, an "Outstanding Support Obligations"), then, from and after Closing, Purchaser shall: (a) continue to use commercially reasonable efforts to issue or obtain Replacement Support Obligations in respect of each Outstanding Support Obligation in accordance with the requirements of this **Section 7.18** no later than sixty (60) Days after the Closing Date; and (b) indemnify, defend, reimburse and hold harmless Seller and its Affiliates from and against any and all Losses incurred or suffered by Seller or its Affiliates arising from, related to or suffered as a result of such Outstanding Support Obligations.

ARTICLE 8

CLOSING

Section 8.1. Closing Date. The Closing shall be conducted by the Escrow Agent through a customary escrow arrangement, to be effective as of 11:59 p.m. (Eastern time) on the Closing Date. Once the Closing Date is known by the Parties, the Parties shall promptly provide written notification to the Escrow Agent of the Closing Date, and each Party shall promptly execute an escrow agreement acceptable to the respective Party and the Escrow Agent, which shall contain reasonable terms and conditions customary for the transactions contemplated by this Agreement (the "Escrow Agreement"). Prior to the Closing Date, the Parties shall execute and deliver to the Escrow Agent the items required to be delivered by them at the Closing pursuant to **Section 8.2** and **Section 8.3**. The Escrow Agent shall coordinate the Closing with any other applicable Title Company.

Section 8.2. Seller's Deliveries. At the Closing, Seller shall deliver or cause to be delivered each of the following items, into escrow, executed and acknowledged to the extent appropriate:

(a) The Deeds, substantially in the forms attached hereto as **Exhibit E-1**, dated as of the Closing Date, executed by a duly authorized representative of Seller;

(b) A Bill of Sale and General Assignment, substantially in the form attached hereto as **Exhibit F**, dated as of the Closing Date, executed by a duly authorized representative of Seller, including all transfer documentation in respect of the Project Assets as may be reasonably requested by Purchaser and any applicable documentation required to transfer title to any vehicle or boat as may be required by Michigan Law;

(c) A certificate, substantially in the form attached hereto as **Exhibit J-2**, dated as of the Closing Date, executed by a duly authorized representative of Seller, certifying as to the matters set forth in (i) **Section 4.1(a)**, (ii) **Section 4.1(b)** and (iii) **Section 4.1(c)**;

(d) A certificate of non-foreign status as contemplated under Section 1.445-2(b)(2) of the Treasury Regulations, in form and substance reasonably satisfactory to Purchaser, certifying that Seller (or if Seller is a "disregarded entity" within the meaning of Section 1.1445-2(b)(2)(iii) of the Treasury Regulations, the Person treated as the "owner" of Seller (as defined in such Treasury Regulation)) is not a foreign person;

(e) Copies of all Books and Records required to be delivered in accordance with **Section 7.17(a)**;

(f) Copies of all Seller Required Consents, except as otherwise provided on **Schedule 5.5**;

(g) A certificate, substantially in the form of **Exhibit J-1**, dated as of the Closing Date, executed by a duly authorized representative of Seller, certifying that attached thereto is: (i) a true, accurate and complete copy of a certificate of good standing with respect to Seller, issued by the Secretary of State of the State of Michigan as of a recent date prior to the Closing Date and certifying that Seller is validly existing and in good standing under the Laws of the State of Michigan; (ii) a true, accurate and complete copy of the certificate of incorporation of Seller, as in effect on the Closing Date, certified by the Secretary of State of the State of Michigan as of a recent date prior to the Closing Date; (iii) a true, accurate and complete copy of the resolutions authorizing the execution, delivery and performance by Seller of this Agreement and the Ancillary Agreements to which it is a party, and that such resolutions are in full force and effect as of the Closing Date; and (iv) the incumbency of Seller's officers and representatives that executed this Agreement, the Ancillary Agreements, any other agreement delivered on the Closing Date, and any certificate delivered in connection with the Closing;

(h) (i) An Owner's Affidavit, substantially in the form attached hereto as **Exhibit K**, dated as of the Closing Date, executed by a duly authorized representative of Seller, (ii) such evidence or documents (including consents, authorizations, or approvals) as may be reasonably required by the Title Company relating to the status and capacity of Seller and the authority of the Person or Persons who are executing the various documents on behalf of Seller in connection with the sale of the Fee Simple Real Property, and (iii) any document, affidavit, or instrument reasonably required by Title Company in connection with issuance of the Title Policy, conveyance of fee title to the Fee Simple Real Property and Residential Fee Simple Real Property, or recordation of the Deeds (including real estate transfer valuation affidavits but excluding any indemnification or similar agreements);

(i) A copy of a release, in recordable form, releasing the Project Assets from the Trust Indenture;

(j) The Assignment and Assumption of Real Property Agreements, substantially in the form attached hereto as **Exhibit H**, dated as of the Closing Date, executed by a duly authorized representative of Seller for the Real Property Agreements that are freely transferable;

(k) Each of the Consumers Interconnection Agreements, substantially in the form attached hereto as **Exhibit S**, dated as of the Closing Date, executed by a duly authorized representative of Seller;

(l) The Transition Services Agreement, substantially in the form attached hereto as **Exhibit P**, dated as of the Closing Date, executed by a duly authorized representative of Seller;

(m) The Regulatory Disallowance Agreement, substantially in the form attached hereto as **Exhibit T**, dated as of the Closing Date, executed by a duly authorized representative of Seller;

(n) The Environmental Indemnity Agreement, substantially in the form attached hereto as **Exhibit M-1**, dated as of the Closing Date, executed by a duly authorized representative of Seller;

(o) The Memorandum of Environmental Indemnity Agreement, substantially in the form attached here to as **Exhibit M-2,** dated as of the Closing Date, executed by a duly authorized representative of Seller;

(p) The Memorandum of Understanding, substantially in the form attached hereto as **Exhibit W-1**, dated as of the Closing Date, executed by a duly authorized representative of Seller;

(q) A properly completed and executed IRS Form W-9 of Seller, executed by a duly authorized representative of Seller;

(r) Any Tax Compliance Certificate requested by Purchaser pursuant to **Section 8.5(b)**;

(s) The Temporary Substation Easements, substantially in the form attached hereto as **Exhibit C**, dated as of the Closing Date, executed by a duly authorized representative of Seller;

(t) All other Ancillary Agreements to which Seller is a party, dated as of the Closing Date, executed by a duly authorized representative of Seller;

(u) The Residential Fee Simple Real Property Deed, substantially in the form attached hereto as **Exhibit E-2**, dated as of the Closing Date, executed by a duly authorized representative of Seller; and

(v) Such other documents and instruments as may be reasonably requested by Purchaser, without additional liability exposure or expenditure to or by Seller or the Title Company to complete the transactions contemplated by this Agreement.

Section 8.3. Purchaser's Deliveries. At the Closing, Purchaser shall deliver or cause to be delivered to Seller each of the following items, into escrow, executed and acknowledged by Purchaser to the extent appropriate:

(a) The Closing Payment, in accordance with **Section 2.2(c)**;

(b) A Bill of Sale and General Assignment, substantially in the form attached hereto as **Exhibit F**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser and any applicable documentation required to transfer title to any vehicle or boat as may be required by Michigan Law;

(c) A certificate, substantially in the form attached hereto as **Exhibit L-2**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser, certifying as to the matters set forth in **Section 4.2(a)** and **Section 4.2(b)**;

(d) Copies of all Purchaser Required Consents and Purchaser Regulatory Approvals;

(e) A certificate, substantially in the form attached hereto as **Exhibit L-1**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser, certifying that attached thereto is: (i) a true, correct and complete copy of a certificate of good standing with respect to Purchaser, issued by the Secretary of State of the State of Delaware as of a recent date prior to the Closing Date; (ii) a true, accurate and complete copy of the certificate of formation of Purchaser, as in effect on the Closing Date, certified by the Secretary of State of the State of Delaware as of a recent date prior to the Closing Date; (iii) a true, accurate and complete copy of the resolutions of the managing member of Purchaser authorizing the execution, delivery and performance by Purchaser of this Agreement and the Ancillary Agreements to be executed and delivered by Purchaser in connection with this Agreement, and that such resolutions are in full force and effect as of the Closing Date; and (iv) the incumbency of Purchaser's officers and representatives that executed this Agreement, the Ancillary Agreements, any other agreement delivered on the Closing Date, and any certificate delivered in connection with the Closing;

(f) The Assignment and Assumption of Real Property Agreements, substantially in the form attached hereto as **Exhibit H** dated as of the Closing Date, executed by a duly authorized representative of Purchaser for those Real Property Agreements which are freely transferable;

(g) Each of the Consumers Interconnection Agreements, substantially in the form attached hereto as **Exhibit S**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser (or the applicable Subsidiary);

(h) The Transition Services Agreement, substantially in the form attached hereto as **Exhibit P**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser;

(i) The Regulatory Disallowance Agreement, substantially in the form attached hereto as **Exhibit T**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser;

(j) The Environmental Indemnity Agreement, substantially in the form attached hereto as **Exhibit M-1**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser and each of the Subsidiaries;

(k) The Memorandum of Environmental Indemnity Agreement, substantially in the form attached here to as **Exhibit M-2**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser and each of the Subsidiaries;

(l) Confirmation that the PLLI has been bound together with evidence of the payment of fees and premiums which are a condition to the effectiveness of same;

(m) The Memorandum of Understanding, substantially in the form attached hereto as **Exhibit W-1**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser;

(n) Confirmation that Purchaser shall have delivered the Union Notice, substantially in the form attached hereto as **Exhibit W-2**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser;

(o) The Temporary Substation Easements, substantially in the form attached hereto as **Exhibit C**, dated as of the Closing Date, executed by a duly authorized representative of Purchaser (or the applicable Subsidiary);

(p) All other Ancillary Agreements to which Purchaser or any of its Affiliates are a party, dated as of the Closing Date, executed by a duly authorized representative of Purchaser or its Affiliates, as applicable;

(q) Such evidence or documents as may reasonably be required by the Title Company, including such resolutions which evidence the status and capacity of Purchaser and the authority of the Person or Persons who are executing the various documents described herein on behalf of Purchaser in connection with the purchase of the Project Assets; and

(r) Such other documents and instruments as may be reasonably requested by Seller, without additional liability exposure or expenditure to or by Purchaser or the Title Company to complete the transactions contemplated by this Agreement.

Section 8.4. Costs and Prorations.

(a) General. Property Taxes and assessments, utility expenses and Lease payments with respect to the Project Assets shall be prorated between Seller and Purchaser as of the Closing Date in accordance with this **Section 8.4**. Except as otherwise provided in this **Section 8.4**, Property Taxes and assessments, utility expenses and Lease payments ("Prorated Costs") shall be prorated on an accrual basis. All such Prorated Costs attributable to the period prior to the Closing Date shall be allocated to Seller, and all such Prorated Costs attributable to the period commencing on the Closing Date shall be allocated to Purchaser. Any Prorated Costs paid by Seller prior to the Closing Date which are attributable to the period following the Closing Date shall result in a dollar-for-dollar upward adjustment of the Purchase Price in an amount equal to the total of such Prorated Costs ("Seller Proration Credits"). Any Prorated Costs paid by Purchaser prior to the Closing Date which are attributable to the period prior to the Closing Date shall result in a dollar-for-dollar downward adjustment of the Purchase Price in an amount equal to the total of such Prorated Costs ("Purchaser Proration Credits"). To the extent any Prorated Costs remain outstanding or arise after the Closing Date, and such Prorated Costs are attributable to the period prior to the Closing Date, Purchaser may pay such Prorated Costs in which case such Prorated Costs shall result in a dollar-for-dollar downward adjustment of the Purchase Price in an amount equal to the total of such Prorated Costs (the "Purchaser Post-Closing Credits"). Purchaser may invoice Seller from time to time for any Purchaser Post-Closing Credits, *provided* that each invoice shall include reasonable documentation of the Purchaser Post-Closing Credits and Purchaser's payment of the same. Seller shall pay any Purchaser Post-Closing Credits within thirty (30) Days of receipt of an invoice from Purchaser. All apportionments and prorations made hereunder shall be made based on the number of Days of ownership of the Project Assets in the period applicable to the apportionment. All adjustments and prorations shall be done without duplication. The provisions of this **Section 8.4** shall survive the Closing.

(b) Property Taxes.

(i) All personal property taxes, real property taxes, or similar ad valorem Taxes with respect to the Project Assets, other than special assessments as addressed in **Section 8.4(c)** (collectively, the "Property Taxes"), shall be prorated at the Closing as follows and as set forth in **Schedule 8.4(b)(i)(C)**, *provided*, *however*, to the extent any Property Taxes are not identified by the Parties at the Closing, such Property Taxes shall be prorated between the Parties and the Parties shall be responsible for such Property Taxes as follows:

(A) Any such Property Taxes shall be deemed to cover the calendar year in which the applicable Property Tax becomes a Lien on the Project Assets (the "Lien Date", i.e., July 1 for summer Taxes and December 1 for winter Taxes).

(B) Any such Property Taxes for which the Lien Date occurs in calendar years prior to the calendar year of the Closing shall be paid by Seller in full prior to the Closing without any charge to, reimbursement from or proration with Purchaser.

(C) In accordance with **Schedule 8.4(b)(i)(C)**, any such Property Taxes for which the Lien Date occurs in the calendar year of the Closing shall be paid by Purchaser or Seller, and prorated between Purchaser and Seller as of the Closing Date, with Seller being responsible for the share of Property Taxes applicable to the period of its ownership up to and including the Closing Date and Purchaser responsible for the Taxes applicable to the period of Purchaser's ownership after the Closing Date.

(D) For the avoidance of doubt, any Property Taxes paid by Purchaser in accordance with **Section 8.4(b)(i)(C)** for which Seller is responsible shall be included as a Purchaser Proration Credit or Purchaser Post-Closing Credit, as applicable, and shall operate as a dollar-for-dollar downward adjustment to the Purchase Price. For the avoidance of doubt, any Property Taxes paid by Seller in accordance with this **Section 8.4(b)(i)(C)** for which Purchaser is responsible shall be included as a Seller Proration Credit and shall operate as a dollar-for-dollar upward adjustment to the Purchase Price.

(ii) With respect to any prorations with respect to any Property Taxes, if the most recent Property Tax bill received by Seller before the Closing Date is not the actual current Property Tax bill, then Seller and Purchaser shall prorate the Property Taxes at the Closing by applying one hundred percent (100%) of the Property Tax rate for the period covered by the most current available Property Tax bill to the latest assessed value. Any refunds of Property Taxes made after the Closing shall first be applied to the unreimbursed third-party costs incurred by Seller or Purchaser in obtaining the refund, then paid to Seller (for the period prior to the Closing Date) and to Purchaser (for the period commencing on and after the Closing Date).

(c) Assessment Installments. If there are special assessments pending against any Project Assets, Seller shall pay any installments of such special assessments that are due and payable prior to the Closing Date and Purchaser shall pay all installments of such special assessments on or after the Closing Date, with each Party responsible for such special assessments applicable to the period of such Party's ownership. For the avoidance of doubt, any installments paid by Purchaser on or after the Closing Date which apply to pre-Closing periods shall be included as a Purchaser Proration Credit or Purchaser Post-Closing Credit, as applicable, and shall operate as a dollar-for-dollar downward adjustment to the Purchase Price. For the avoidance of doubt, any installments paid by Seller on or after the Closing Date which apply to post-Closing periods shall be included as a Seller Proration Credit and shall operate as a dollar-for-dollar upward adjustment to the Purchase Price.

(d) Transfer Taxes. Notwithstanding anything in this Agreement to the contrary, at the Closing, any Transfer Taxes shall be paid by Seller and Purchaser in equal proportion. The Party required by applicable Law shall, at its own expense, timely file any Tax Return or other document with

respect to such Transfer Taxes and, if required by applicable Law, the other Party will join in the execution of any such Tax Returns and other documentation.

(e) Utilities. To the extent the Project Assets are served by any utilities as of the Closing, final readings and final billings for utilities will be made, if possible, as of the Closing Date, in which event no proration shall be made at the Closing with respect to utility bills; otherwise, a proration shall be made based upon the Parties' reasonable good faith estimate. Notwithstanding the foregoing, Purchaser shall not receive any credit for utility payments due after the Closing to the extent that (i) tenants are obligated under the Leases to pay such amounts, (ii) such amounts are due after the Closing, and (iii) Seller has not received any payments for such amounts. For the avoidance of doubt, to the extent (x) Purchaser pays any utility payments after the Closing Date for costs, expenses and fees incurred, and for services received, prior to the Closing Date, such amounts shall be included as a Purchaser Proration Credit and shall operate as a dollar-for-dollar downward adjustment to the Purchase Price and (y) Seller pays any utility payments on or before the Closing Date for costs, expenses and fees incurred, and for services received, on or after the Closing Date, such amounts shall be included as a Seller Proration Credit and shall operate as a dollar-for-dollar upward adjustment to the Purchase Price.

(f) Closing Costs.

(i) In connection with Closing, Seller shall pay the following costs: (A) survey costs for the Reserved Easements; (B) fifty percent (50%) of the Title Company's customary escrow charges; (C) the fees of its own attorneys; (D) Seller's costs and expenses and fees associated with the FERC Approvals and the MPSC Approval; (E) fifty percent (50%) of all Transfer Taxes in accordance with **Section 8.4(d)**; (F) fifty percent (50%) of all filling fees associated with the HSR Approval; and (G) all of the costs and expenses incurred by Seller in connection with this Agreement and the transactions contemplated hereby which are expressly Seller's obligation.

(ii) In connection with Closing, Purchaser shall pay the following costs: (A) all costs associated with its due diligence, including the cost of Surveys, appraisals, architectural, engineering, credit and updated physical condition and environmental reports that Purchaser orders; (B) the cost of (1) the Title Policy; (2) any affirmative coverage or any endorsements thereto; and (3) any search and exam fees related to a new Title Commitment ordered by Purchaser, if any; (C) charges for any lender's title insurance policies, if any, and all other costs and expenses associated with any Purchaser financing; (D) fifty percent (50%) of the Title Company's customary escrow charges; (E) the fees of its own attorneys; (F) the costs and expenses and fees associated with the Governmental Approvals as set forth in **Section 7.12(b)** and Purchaser's costs and expenses and fees associated with the FERC Approvals and the MPSC Approval; (G) all costs and expenses and fees associated with PLLI; (H) one hundred percent (100%) of all costs and expenses related to the R&W Policy (including the total premium, deductibles, underwriting costs, brokerage commissions and other fees and expenses); (I) fifty percent (50%) of all Transfer Taxes in accordance with **Section 8.4(d);** (J) fifty percent (50%) of all filling fees associated with the HSR Approval; and (K) all of the costs and expenses incurred by Purchaser in connection with this Agreement and the transactions contemplated hereby which are expressly Purchaser's obligation.

(g) For purposes of rent prorations, all rent for each Lease shall be prorated on the basis of the term of that particular Lease (referred to as a "Lease Year"). All rent for each Lease Year in which the Closing occurs, which is actually collected from the tenant, will be prorated as provided in this **Section 8.4(g)**. Seller and Purchaser shall each be entitled to rents attributable to the period of their

respective ownership of the Project Assets. Purchaser shall receive a credit for those rents already collected by Seller attributable to the period starting on the Closing Date with respect to the Project Assets and lasting for the balance of said Lease Year and for any and all pre-paid rents attributable to periods after the Closing Date. For purposes of calculating rent prorations, the per diem base rent amount shall be calculated as the total base rent for the Lease Year divided by the number of Days in that Lease Year. To the extent Purchaser thereafter receives unpaid rents for the Lease Years in which the Closing occurs or for prior periods (including any utility charges owing to Seller), Purchaser shall pay Seller the portion allocable to the period on or prior to the Closing Date, as and when collected by Purchaser. To the extent Seller thereafter receives unpaid rents for the Lease Year in which the Closing occurs or for prior periods (including any utility charges owing to Seller), Seller shall pay Purchaser the portion allocable to the period after the Closing Date, as and when collected by Seller. Purchaser agrees to bill tenants under the Leases for all past due rents and to take its customary actions to collect rents that are accrued but unpaid as of the Closing; *provided*, *however*, that Purchaser shall have no obligation to terminate any Lease or pursue eviction or other legal proceedings against any tenant in connection with the collection of such delinquent rents due Seller. Purchaser shall receive a credit for all security deposits for which Purchaser will be accountable after the Closing.

(h) Obligations set forth in the EGLE Joint Funding Agreements (the "EGLE Funding Obligations") shall be prorated at the Closing as follows:

(A) Each EGLE Funding Obligation shall be deemed to cover the fiscal year beginning October 1 and ending September 30 in which the applicable EGLE Funding Obligation is effective, regardless of when, or if, the applicable EGLE Joint Funding Agreement is executed (the "EGLE Funding Period").

(B) If the EGLE Funding Obligation for such EGLE Funding Period has not been provided or is not available, the EGLE Funding Obligation for such EGLE Funding Period shall be deemed for purposes of the proration in accordance with this **Section 8.4(h)** to be equal to the EGLE Funding Obligation applicable to the immediately preceding EGLE Funding Period for which such obligation amount is available.

(C) Any EGLE Funding Obligation for which the entire EGLE Funding Period occurs prior to the Closing shall be paid by Seller in full prior to the Closing without any charge to, reimbursement from or proration with Purchaser. If the Closing occurs during an EGLE Funding Period, the applicable EGLE Funding Obligation for such EGLE Funding Period shall be paid by Purchaser or Seller, and prorated between Purchaser and Seller as of the Closing Date, with Seller being responsible for the share of EGLE Funding Obligation applicable to the period of its ownership up to and including the Closing Date and Purchaser responsible for the EGLE Funding Obligation applicable to the period of Purchaser's ownership after the Closing Date, each determined by dividing the EGLE Funding Obligation by the number of calendar days in the appliable EGLE Funding Period.

(D) For the avoidance of doubt, to the extent (i) Purchaser pays any EGLE Funding Obligation for which Seller is responsible, such amounts shall be included as a Purchaser Proration Credit or Purchaser Post-Closing Credit, as applicable, and shall operate as a dollar-for-dollar downward adjustment to the Purchase Price and (ii) Seller pays any EGLE Funding Obligation for which Purchaser is responsible, such amounts shall be included as a Seller Proration

Credit and shall operate as a dollar-for-dollar upward adjustment to the Purchase Price.

Section 8.5. Tax Matters.

(a) The Parties (and their respective Affiliates) shall cooperate, as and to the extent reasonably requested by the other Party, in connection with any matter with respect to Taxes with respect to the Project Assets. Such cooperation shall include the retention and (upon the other Party's request) the provision of records and information that are reasonably relevant to any such Tax matter and making employees reasonably available on a mutually convenient basis to provide additional information and explanation of any material provided hereunder. Seller agrees to retain all material Books and Records with respect to Tax matters pertinent to the Project relating to Pre-Closing Tax Periods until the expiration of the statute of limitations (and, to the extent notified by Purchaser, any extensions thereof) applicable thereto and to abide by all record retention agreements entered into with any Tax authority. Further, Seller agrees to give Purchaser reasonable written notice prior to transferring, destroying or discarding any such Books and Records and, upon the reasonable request of Purchaser, shall allow Purchaser to make copies of such Books and Records.

(b) At Purchaser's request, Seller shall take all actions reasonably necessary to comply with the requirements of any applicable Tax clearance certificate procedures of each jurisdiction in which any Project or Project Asset is situated or in which any business related thereto is conducted, including the filing of any Tax exemption or Tax clearance certificates as Purchaser may request (each, a "Tax Compliance Certificate"). Seller shall promptly deliver to Purchaser a copy of all certificates and other documents filed with a Governmental Authority pursuant to this **Section 8.5(b)**. If any Governmental Authority asserts that Seller is liable for any Tax, Seller shall promptly pay or in good faith contest any and all such amounts and shall provide evidence to Purchaser that such liabilities have been paid in full or otherwise satisfied or contested.

(c) Except as otherwise provided in **Section 8.4(d)**, (i) Seller shall prepare or cause to be prepared and file or cause to be filed all Tax Returns required to be filed by Seller under applicable Law with respect to the Project Assets and the Projects for all Pre-Closing Tax Periods; and (ii) Purchaser shall file all Tax Returns required to be filed by Purchaser under applicable Law with respect to the Project Assets and the Projects for all Post-Closing Tax Periods.

(d) With respect to the preparation and filing of employment Tax Returns, Seller and Purchaser will follow the "Standard Procedure" specified in Rev. Proc. 2004-53, 2004-2 C.B. 320, Section 4, whereby, among other things, Purchaser will be responsible for and perform all employment Tax withholding, payment and reporting duties with respect to any wages and other compensation paid by Purchaser to employees who continue employment with Purchaser following the Closing Date and Seller will be responsible for and perform all employment Tax withholding, payment and reporting duties with respect to any wages and other compensation paid by Seller.

ARTICLE 9

INDEMNIFICATION

Section 9.1. Survival. Notwithstanding anything in this Agreement to the contrary, the Parties, intending to modify any applicable statute of limitations agree that, except for Seller's indemnification obligations under **Section 9.2(d)**, which shall survive Closing for a period of two (2) years: (a) the representations and warranties of Seller contained in **ARTICLE 5** and in any certificate delivered pursuant to this Agreement shall not survive Closing and shall terminate at Closing, and Seller shall have

no Liability after the Closing for any inaccuracy therein or breach thereof, (b) the representations and warranties of Purchaser contained in **ARTICLE 6**, and in any certificate delivered pursuant to this Agreement shall survive Closing for a period of twelve (12) months, (c) the obligations contained in this Agreement that are to be performed prior to Closing shall survive Closing for a period of twelve (12) months, and (d) the obligations contained in this Agreement that are to be performed at or after the Closing shall survive the Closing in accordance with their respective terms or, if no survival term is specified, then until fully performed (*provided*, that the foregoing shall not limit (i) any claim or recovery that may be available to Purchaser under the R&W Policy or (ii) any claim of Fraud committed by a Party in connection with the transactions contemplated by this Agreement).

Section 9.2. **Indemnity by Seller**. From and after the Closing Date, and subject to the limitations set forth in **ARTICLE 10**, Seller shall indemnify, defend, reimburse and hold harmless Purchaser and Purchaser's Affiliates, together with their respective members, shareholders, managers, directors, officers, employees, agents, advisors, attorneys, accountants and consultants (each a "Purchaser Indemnified Party") from and against any and all Losses incurred or suffered by any Purchaser Indemnified Party for claims arising from, related to or suffered as a result of any of the following (whether sounding in contract, tort, statute, or whether at Law or in equity, or otherwise):

(a) any breach of, or failure to perform, any obligation of Seller contained in this Agreement;

(b) any Excluded Liabilities;

(c) (i) any and all Liability for Taxes to which the Project Assets may be subject, assessed or otherwise encumbered with respect to any Pre-Closing Tax Period, (ii) any and all Liability for Taxes of Seller or any of its Affiliates or direct or indirect partners, shareholders or members, or (iii) Taxes of any Person imposed on Seller as a transferee or successor or by contract, which Taxes relate to an event or transaction occurring before the Closing; and

(d) any and all Liability arising out of, or related to, the real property "exceptions" referenced on **Schedule 5.6(e)** and identified in the current project boundary map for the Croton Project and identified in section 15, T.12.N., R.11.W, Croton Township, Newaygo County, Michigan, of the Exhibit G-1 Project Area Map (FERC No. 2468-5) approved by FERC order dated June 23, 1995 (71 FERC ¶ 62,216 (1995)).

Section 9.3. **Indemnity by Purchaser**. From and after the Closing Date, Purchaser shall indemnify, defend, reimburse and hold harmless Seller and Seller's Affiliates, together with their respective members, shareholders, managers, directors, officers, employees, agents, advisors, attorneys, accountants and consultants (each a "Seller Indemnified Party") from and against any and all Losses incurred or suffered by any Seller Indemnified Party for claims arising from, related to or suffered as a result of any of the following (whether sounding in contract, tort, statute, or whether at Law or in equity, or otherwise):

(a) any breach of any representation or warranty made by Purchaser in this Agreement or in any certificate delivered pursuant to this Agreement;

(b) any breach of, or failure to perform, any obligation of Purchaser contained in this Agreement;

(c) any Assumed Liabilities (other than Assumed Environmental Liabilities which are addressed exclusively in the Environmental Indemnity Agreement); and

(d) (i) any and all Liability for Taxes to which the Project Assets may be subject, assessed or otherwise encumbered with respect to any Post-Closing Tax Period, (ii) any and all Liability for Taxes of Purchaser or any of its Affiliates or direct or indirect partners, shareholders or members, or (iii) Taxes of any Person imposed on Purchaser as a transferee or successor or by contract, which Taxes relate to an event or transaction occurring at or after the Closing (collectively, "Purchaser Taxes"); *provided*, *however*, that "Purchaser Taxes" shall not include (x) any Seller Taxes; (y) any Taxes described in **Section 9.2(c)**; or (z) any Taxes resulting from or attributable to any breach or inaccuracy of any representation or warranty contained in **Section 5.9**.

Section 9.4. Claims for Indemnification. If Purchaser or Seller seeks indemnification under **Section 9.2** or **Section 9.3** (in either case, the "Indemnified Party"), then the Indemnified Party shall give written notice (a "Claim Notice") to the other Party from which it seeks indemnity pursuant to this **ARTICLE 9** (the "Indemnifying Party") as soon as practicable after the Indemnified Party becomes aware of any fact, condition or event which may give rise to Losses for which indemnification may be sought under this **ARTICLE 9** (a "Claim"). The failure of the Indemnified Party to give a Claim Notice to the Indemnifying Party hereunder shall not affect such Indemnified Party's rights to indemnification hereunder, except to the extent that the Indemnifying Party is materially prejudiced by such failure. Each Claim Notice shall state that such Indemnified Party believes that such Indemnified Party is entitled to indemnification, compensation or reimbursement under this **ARTICLE 9**, and contain a brief description of the circumstances supporting such belief that such Indemnified Party is so entitled to indemnification, compensation or reimbursement and shall, to the extent possible, contain a good faith, non-binding, preliminary estimate of the amount of Losses such Indemnified Party claims to have so incurred or suffered (the "Claimed Amount").

Section 9.5. Response Notice; Uncontested Claims. Within ten (10) Business Days after receipt by the Indemnifying Party of a Claim Notice, such Indemnifying Party may deliver to the Indemnified Party a written response (the "Response Notice") in which such Indemnifying Party: (a) agrees that the Indemnified Party is entitled to the full Claimed Amount; (b) agrees that the Indemnified Party is entitled to part, but not all, of the Claimed Amount (such amount agreed to under **Section 9.5(a)** or **Section 9.5(b)**, the "Agreed Amount"); or (c) indicates that the Indemnifying Party disputes the entire Claimed Amount. Any part of the Claimed Amount that is not agreed to pursuant to the Response Notice shall be the "Contested Amount." If a Response Notice is not received within such ten (10) Business Day period, then the Indemnifying Party shall be deemed to have disputed the entire Claimed Amount (such amount, also a "Contested Amount"). If the Parties are unable to resolve the dispute relating to any Contested Amount within sixty (60) Days after the delivery of the Response Notice, then the Parties shall be entitled to resort to any legal remedy available to such Parties to resolve such dispute.

Section 9.6. Setoff; Adjustment of PPA Price.

(a) In addition to any remedies provided herein or available to a Party hereunder, each Party shall have the right to setoff any Agreed Amount or other sum owed to it and any Purchaser Indemnified Party or Seller Indemnified Party (as appropriate) under this **ARTICLE 9** against any liability or other amount owed by it to any Purchaser Indemnified Party or Seller Indemnified Party (as appropriate) under this Agreement or any other Ancillary Agreement. The deduction of any such sum shall operate for all purposes as a complete discharge (to the extent of such sum) of the obligation to pay the amount from which such sum was withheld and deducted and will not constitute a default under this Agreement or any other Ancillary Agreement. Neither the exercise of, nor the failure to exercise, such right of setoff will constitute an election of remedies or limit a Party in any manner in the enforcement of any other remedies that may be available to it.

(b) Seller shall be permitted, but not required, to satisfy, in whole or in part, (i) any Agreed Amount or (ii) any other sum owed to Purchaser and any Purchaser Indemnified Party under this **ARTICLE 9** through an adjustment to the PPA Price pursuant to the Power Purchase Agreement, in which case the Parties in good faith shall mutually agree on the sum owed to Purchaser or the Purchaser Indemnified Party pursuant to **clause (ii)** above, and effective as of date Seller notifies Purchaser of its election pursuant to this **Section 9.6(b)** to satisfy, in whole or in part, any Agreed Amount or mutually agreed amount pursuant to **clause (ii)** above, the PPA Price shall be adjusted by the Agreed Amount or such amount, as the case maybe, pursuant to the Power Purchase Agreement.

Section 9.7. Third Person Claims.

(a) If any claim or demand in respect of which an Indemnified Party might seek indemnity under this **ARTICLE 9** is asserted against such Indemnified Party by a Person other than a Party (a "Third Party Claim"), the Indemnified Party shall give a Claim Notice, including copies of all relevant pleadings, documents and information, to the Indemnifying Party within fifteen (15) Business Days following the receipt of notice of the Third Party Claim by the Indemnified Party; *provided*, that, the failure to so notify the Indemnifying Party shall not relieve the Indemnifying Party of its obligations hereunder except to the extent that the Indemnifying Party is materially prejudiced by such failure. The Indemnifying Party shall have five (5) Business Days after its receipt of such Claim Notice (the "Third Party Claim Response Period"), within which to give notice to the Indemnified Party, in writing, either denying its obligations to, or agreeing to, indemnify and defend the Third Party Claim under this **ARTICLE 9**.

(b) If the Indemnifying Party notifies the Indemnified Party that it agrees to indemnify and defend the Indemnified Party against the Third Party Claim within the Third Party Claim Response Period, then the Indemnifying Party may assume the conduct and control through counsel reasonably acceptable to the Indemnified Party of the defense of such Third Party Claim and shall at its expense defend such Third Party Claim by all appropriate proceedings, which proceedings will be diligently prosecuted to a final conclusion or will be settled, and shall, subject to **ARTICLE 10**, pay all Losses of the Indemnified Party incurred or accrued and paid and resulting or arising from such Third Party Claim; *provided*, that, unless consented to by the Indemnified Party (which consent shall not be unreasonably withheld, conditioned or delayed), the Indemnifying Party shall not enter into any settlement that (i) does not fully, finally and unconditionally release the Indemnified Party from all Liability with respect to such Third Party Claims, (ii) requires a non-monetary commitment by the Indemnified Party, including but not limited to compliance with an injunction or other equitable relief, or (iii) could reasonably be expected to result in Losses (cumulative of all Losses to which the Indemnified Party may be entitled to under this **ARTICLE 9**) in excess of the limits set forth in **ARTICLE 10**. If the Indemnifying Party assumes the defense of such Third Party Claim, the Indemnifying Party shall be responsible for posting any bonds or other security required in connection with such Third Party Claim. The Indemnified Party will reasonably cooperate in such defense, including making available to the Indemnifying Party all records and documents reasonably requested in writing by the Indemnifying Party that are within the Indemnified Party's control or that the Indemnified Party can reasonably obtain relating to the Third Party Claim, and all costs or expenses incurred or accrued and paid by the Indemnified Party at the request of the Indemnifying Party shall be paid by the Indemnifying Party promptly as statements are received. An Indemnified Party, at its expense, may participate in, but not control, any defense or settlement of any Third Party Claim conducted by the Indemnifying Party pursuant to this **Section 9.7(b)** or take any other actions it reasonably believes to be necessary or appropriate to protect its interests.

(c) If (i) the Indemnifying Party fails to assume the defense of a Third Party Claim in accordance with **Section 9.7(b)** within the Third Party Claim Response Period, (ii) the Claim for indemnification relates to or arises in connection with any criminal proceeding, action, indictment,

allegation or investigation, (iii) the Third Party Claim seeks an injunction or equitable relief against the Indemnified Party, (iv) under applicable standards of professional conduct, a conflict of interest on any significant issue related to such proceeding exists between the Indemnifying Party, on the one hand, and an Indemnified Party, on the other hand, (v) the amount in controversy in such Third Party Claim is in excess of the liability limitations set forth in **ARTICLE 10**, (vi) the Third Party Claim related to Taxes, or (vii) the Third Party Claim is made by any Governmental Authority, then, in each case, upon notice to the Indemnifying Party, the Indemnified Party may, in its sole discretion, retain counsel satisfactory to it to assume such defense on behalf of and for the sole account and risk of the Indemnifying Party, and in the case of **clauses (i)** through **(vii)** the Indemnifying Party shall pay all reasonable fees and expenses of such counsel for the Indemnified Party, and the Indemnifying Party and the Indemnified Party shall cooperate in the defense of any such matter. In the event that the Indemnified Party assumes the conduct and control of the defense of a Third Party Claim, then the Indemnifying Party shall not be liable for any settlement effected without its prior written consent (which consent shall not be unreasonably withheld, conditioned or delayed).

(d) If the Indemnifying Party notifies the Indemnified Party that it acknowledges its obligation to indemnify and defend the Indemnified Party with respect to a Third Party Claim, or it is otherwise determined that the Indemnifying Party is obligated to indemnify and defend the Indemnified Party with respect to a Third Party Claim, the Losses of the Indemnified Party incurred or accrued and paid and resulting from or arising out of such Third Party Claim in the amount finally determined will be conclusively deemed a Loss under this **ARTICLE 9**, and the Indemnifying Party shall pay the full amount of such Losses to the Indemnified Party on demand subject to the limits set forth in **ARTICLE 10**.

Section 9.8. **Mitigation**. Notwithstanding anything to the contrary contained herein, each Indemnified Party will act in good faith to take commercially reasonable steps to mitigate all Losses that may be subject to indemnity hereunder.

Section 9.9. **Tax Treatment of Certain Post-Closing Payments**. Except as otherwise required by applicable Law, Seller, Purchaser and their respective Affiliates shall treat any and all payments under this **ARTICLE 9** as an adjustment to the Purchase Price for all Tax purposes.

ARTICLE 10

LIMITATION OF LIABILITY; LIMITED REMEDIES AND DAMAGES

Section 10.1. **Limitation of Liability**. Notwithstanding anything to the contrary in this Agreement, (a) no Party's aggregate liability for Losses arising out of or relating to this Agreement and the Ancillary Agreements, including any breach of representations, warranties, covenants, or obligations contained herein, including pursuant to **Section 9.2**, or **Section 9.3**, as applicable, shall exceed Twenty Million Dollars ($20,000,000) in the aggregate (the "Liability Cap"), (b) Seller's aggregate liability for Losses arising under **Section 9.2(d)** shall not exceed One Million Dollars ($1,000,000), and (c) except for claims pursuant to **Section 9.2**(c), no Party shall be entitled to seek a claim against the other Party unless such claim exceeds One Hundred Thousand Dollars ($100,000) (individually or in the aggregate), in which case once such threshold has been met, all Losses shall be indemnifiable hereunder; *provided*, *however*, that the limitations set forth in **clauses (a)**, **(b)** and **(c)** above shall not apply to the Regulatory Disallowance Agreement, the Interconnection Agreements, the Power Purchase Agreement or the Environmental Indemnity Agreement or otherwise limit or restrict in any respect Purchaser's Liability (or that of any other Person) under the Regulatory Disallowance Agreement, the Interconnection Agreements, the Power Purchase Agreement or the Environmental Indemnity Agreement, including in respect of Assumed Environmental Liabilities. Except in the event of Fraud and as provided in **Section 7.16**, Seller shall have no Liability whatsoever in respect of any and all Losses, detriment, or prejudice

however incurred or suffered by Purchaser or any of its Affiliates or other Purchaser Indemnified Parties as a result of any of Seller's representations and warranties contained in this Agreement, any Ancillary Agreement (excluding the Regulatory Disallowance Agreement, the Interconnection Agreements and the Power Purchase Agreement) or any certificate delivered pursuant to this Agreement, including for the avoidance of doubt in any circumstances where Purchaser is not able for any reason whatsoever to obtain coverage of representations and warranties or indemnity under the R&W Policy (including any failure to enter into the R&W Policy, refusal by R&W Insurer to indemnify, invalidity or ineffectiveness of the R&W Policy, breaches by Purchaser of provisions of the R&W Policy, wrong submission by Purchaser of claims under the R&W Policy, application of limitations such as de minimis, thresholds and/or caps, duration, exclusions, or any other reason). Purchaser hereby acknowledges that, after the Closing Date, except in the case of Fraud, the R&W Policy shall be the sole and exclusive source of recovery and remedy for any Losses sustained, suffered or incurred by the Purchaser Indemnified Parties resulting from any breach, misstatement, misrepresentation, inaccuracy or omission by Seller of the representations and warranties contained in this Agreement, any Ancillary Agreement (excluding the Regulatory Disallowance Agreement, the Interconnection Agreements and the Power Purchase Agreement) or in any certificate delivered pursuant to this Agreement.

Section 10.2. Exclusive Remedy. EXCEPT AS PROVIDED FOR IN THE ENVIRONMENTAL INDEMNITY AGREEMENT AND FOR CLAIMS FOR FRAUD BY A PARTY IN CONNECTION WITH THE TRANSACTIONS CONTEMPLATED BY THIS AGREEMENT, THE EXPRESS REMEDIES SET FORTH IN **Section 3.1**, **Section 4.3**, **Section 4.4**, **Section 4.5**, **Section 4.6**, **Section 7.16**, **Section 10.1** OR **Section 11.1**, SUBJECT TO **Section 11.2**, **Section 11.3**, **Section 11.4** AND **Section 11.5**, AND (FROM AND AFTER THE CLOSING) THE INDEMNITIES SET FORTH IN **ARTICLE 9**, AND ANY CLAIMS COVERED UNDER THE R&W POLICY, ARE THE SOLE AND EXCLUSIVE REMEDIES FOR A PARTY UNDER OR RELATING TO THIS AGREEMENT, WHETHER BASED ON STATUTE, IN TORT, COMMON LAW, STRICT LIABILITY, CONTRACT OR OTHERWISE, AND ALL OTHER REMEDIES OR DAMAGES AT LAW OR IN EQUITY ARE HEREBY WAIVED BY EACH PARTY. NOTWITHSTANDING THE FOREGOING, NOTHING IN THIS **ARTICLE 10** SHALL LIMIT ANY PERSON'S RIGHT TO SEEK AND OBTAIN ANY EQUITABLE RELIEF TO WHICH ANY PERSON SHALL BE ENTITLED, OR TO SEEK ANY REMEDY ON ACCOUNT OF ANY PERSON'S FRAUD.

Section 10.3. Limitation on Damages. NEITHER PARTY SHALL BE LIABLE TO THE OTHER PARTY OR ANY INDEMNIFIED PARTY (AS APPROPRIATE) FOR ANY EXEMPLARY, SPECIAL, INDIRECT, REMOTE, OR SPECULATIVE DAMAGES; *PROVIDED*, *HOWEVER*, THAT SUCH LIMITATION OF LIABILITY SHALL NOT APPLY (A) TO FRAUD OF A PARTY OR (B) WITH RESPECT TO ANY THIRD-PARTY CLAIM THAT INCLUDES SUCH DAMAGES AND WHICH IS SUBJECT TO A PARTY'S INDEMNIFICATION OBLIGATION HEREUNDER.

ARTICLE 11

TERMINATION

Section 11.1. Termination. This Agreement may be terminated, and the transactions contemplated hereby may be abandoned, prior to the Closing:

(a) Mutual Consent. By mutual written consent of the Parties.

(b) Law. By Seller or Purchaser upon written notice to the other Party, in the event that any final and non-appealable Law becomes effective that restrains, enjoins or otherwise prohibits or makes illegal the consummation of the transactions contemplated by this Agreement; *provided*, *however*,

that neither Party may terminate this Agreement pursuant to this **Section 11.1(b)** if such final and non-appealable Law resulted from such Party's failure to fulfill in any material respect any obligation under this Agreement required to be fulfilled by such Party on or prior to the Closing Date.

(c) FERC Approvals.

(i) By either Party, upon written notice to the other Party, if (A) all FERC Approvals have not been received by the Outside Closing Date, or (B) FERC has issued a final Order rejecting any application for such FERC Approvals; *provided*, that a Party shall not have the right to terminate this Agreement pursuant to this **Section 11.1(c)** if such delay in obtaining the FERC Approvals, or rejection of any application for the FERC Approvals, is due to any action or omission of such Party in breach of this Agreement;

(ii) By Seller, upon written notice to Purchaser, if Purchaser (A) without the prior written consent of Seller, elects to withdraw any application for the FERC Approvals for any reason unrelated to a default by Seller, (B) takes any actions to object or oppose any application for the FERC Approvals, or (C) fails to use commercially reasonable efforts to pursue the FERC Approvals; or

(iii) By Purchaser, upon written notice to Seller, if Seller (A) without the prior written consent of Purchaser, elects to withdraw any application for the FERC Approvals for any reason unrelated to a default by Purchaser, (B) takes any actions to object or oppose any application for the FERC Approvals, or (C) fails to use commercially reasonable efforts to pursue the FERC Approvals.

(d) MPSC Approval.

(i) By either Party, upon written notice to the other Party, if (A) the MPSC Approval has not been received by the Outside Closing Date, or (B) the MPSC has issued a final Order rejecting the application for such MPSC Approval; *provided*, that a Party shall not have the right to terminate this Agreement pursuant to this **Section 11.1(d)** if such delay in obtaining the MPSC Approval, or rejection of the application for the MPSC Approval, is due to any action or omission of such Party in breach of this Agreement;

(ii) By Seller, upon written notice to Purchaser, if Purchaser (A) without the prior written consent of Seller, elects to withdraw the application for the MPSC Approval for any reason unrelated to a default by Seller, (B) takes any actions to object or oppose the application for the MPSC Approval, or (C) fails to use commercially reasonable efforts to pursue the MPSC Approval; or

(iii) By Purchaser, upon written notice to Seller, if Seller (A) without the prior written consent of Purchaser, elects to withdraw any application for the MPSC Approval for any reason unrelated to a default by Purchaser, (B) takes any actions to object or oppose the application for the MPSC Approval, or (C) fails to use commercially reasonable efforts to pursue the MPSC Approval.

(e) Seller Material Breach. By Purchaser, upon written notice to Seller, in the event Seller (i) breaches in any material respect any of its representations and warranties under this Agreement on or after the Effective Date or (ii) fails to perform in any material respect any of its obligations under this Agreement after Purchaser has performed or tendered performance in all material respects of its obligations due to be performed up to such date in accordance with this Agreement, in the case of (i) and

(ii) above, and such breach or failure is not cured within the earlier of (A) sixty (60) Days after Seller's receipt of written notice of such breach and (B) the Outside Closing Date.

(f) Purchaser Material Breach. By Seller, upon written notice to Purchaser, in the event Purchaser (i) breaches in any material respects any of its representations and warranties under this Agreement on or after the Effective Date or (ii) fails to perform in any material respect any of its obligations under this Agreement after Seller has performed or tendered performance in all material respects of its obligations due to be performed up to such date in accordance with this Agreement, in the case of (i) and (ii) above, and such breach or failure is not cured within the earlier of (A) sixty (60) Days after Purchaser's receipt of written notice of such breach and (B) the Outside Closing Date.

(g) Closing Date. At any time after the Outside Closing Date, by either Party, upon written notice to the other Party, if the Closing has not occurred by the Outside Closing Date; *provided*, *however*, that neither Party may terminate this Agreement pursuant to this **Section 11.1(g)** if the failure of the applicable conditions precedent to be fulfilled by the Outside Closing Date resulted from such Party's failure to perform in any material respect any obligation under this Agreement required to be performed by such Party on or prior to the Closing Date.

(h) Purchaser Bankruptcy. By Seller, upon written notice to Purchaser, upon the Bankruptcy of Purchaser.

(i) Seller Bankruptcy. By Purchaser, upon written notice to Seller, upon the Bankruptcy of Seller.

Section 11.2. Effect of Termination Prior to Closing. If this Agreement is validly terminated pursuant to **Section 3.1**, **Section 4.3**, **Section 4.4**, **Section 4.5**, **Section 7.5**, **Section 7.16** or **Section 11.1**, then, subject to **Section 11.3**, **Section 11.4** and **Section 11.5**, all further obligations of the Parties under this Agreement (other than the provisions which by their terms are intended to survive the expiration or termination of this Agreement) shall be terminated, and neither Party nor any of its Affiliates shall have any Liability as a result of such termination or any actions or inactions by such Party prior to such termination, including in respect of any breach of this Agreement, other than as provided for in **Section 11.3** or **Section 11.4**, but subject to **Section 11.5**.

Section 11.3. Payment of Purchaser Transaction Expenses. If this Agreement is validly terminated by Purchaser pursuant to **Section 3.1(c)(iii)** (solely in the event such termination is caused by Seller's failure to use commercially reasonable efforts to cure one or more of the Purchaser Title Objections), **Section 11.1(c)(iii)**, **Section 11.1(d)(iii)**, **Section 11.1(e)(ii)** (excluding **Section 11.1(e)(i)**), or **Section 11.1(i),** then Seller shall pay to Purchaser an amount equal to the Purchaser Transaction Expenses promptly, but in no event more than twenty (20) Business Days, after the termination of this Agreement.

Section 11.4. Payment of Seller Transaction Expenses. If this Agreement is validly terminated by Seller pursuant to **Section 11.1(c)(ii)**, **Section 11.1(d)(ii)**, **Section 11.1(f)(ii)** (excluding **Section 11.1(f)(i)**), or **Section 11.1(h)**, then Purchaser shall pay to Seller an amount equal to the Seller Transaction Expenses promptly, but in no event more than twenty (20) Business Days, after the termination of this Agreement.

Section 11.5. Liquidated Damages. The Parties acknowledge that: (a) the agreements contained in **ARTICLE 11** are an integral part of the transactions contemplated hereby; (b) the damages resulting from termination of this Agreement under the circumstances where Purchaser Transaction Expenses or Seller Transaction Expenses are payable pursuant to **Section 11.3** or **Section 11.4** are

uncertain and incapable of accurate calculation and therefore, the amounts payable pursuant to **Section 11.3** and **Section 11.4** is not a penalty but rather constitutes liquidated damages in a reasonable amount that will compensate the respective Party for the efforts and resources expended while negotiating this Agreement and in reliance on this Agreement and on the expectation of the consummation of the transactions contemplated hereby; and (c) without the agreements contained in this **ARTICLE 11**, the Parties would not have entered into this Agreement.

ARTICLE 12

DISPUTE RESOLUTION

Section 12.1. Dispute Resolution. In the event of any dispute, controversy, or claim arising out of or relating to this Agreement (a "Dispute"), the Parties shall first attempt in good faith to resolve the Dispute through informal methods. Each Party shall designate a representative from its management to meet and confer in good faith to seek a mutually agreeable resolution. These discussions shall commence within ten (10) Business Days of a Party providing written notice of the Dispute to the other Party. If the Dispute is not resolved through initial management discussions within thirty (30) Business Days, then the Parties shall escalate the matter to executive management. Each Party shall designate an executive officer to engage in further discussions. These discussions shall commence within ten (10) Business Days following the conclusion of the initial management discussions and shall continue for a period of up to thirty (30) Business Days. If the Dispute remains unresolved after both levels of management discussion, either Party may pursue any remedies available at law or in equity. All discussions and negotiations pursuant to this **Section 12.1** shall be confidential and subject to the terms of **Section 7.9**.

ARTICLE 13

MISCELLANEOUS

Section 13.1. Entire Agreement. This Agreement, together with the Ancillary Agreements, constitutes the entire agreement between the Parties with respect to the transactions contemplated herein, and supersedes all prior discussions, understandings or agreements between the Parties with respect to the transactions contemplated herein. All Exhibits and Schedules attached hereto are a part of this Agreement and are incorporated herein by reference.

Section 13.2. Binding On Successors and Assigns. Subject to **Section 13.3**, this Agreement shall be binding upon and inure to the benefit of the Parties and their respective successors and permitted assigns.

Section 13.3. Assignment. Prior to the Closing Date, without the prior written consent of the other Party, which consent shall not be unreasonably withheld, delayed or conditioned, neither Party shall, directly or indirectly, assign this Agreement or any of its rights or obligations hereunder. Any attempted assignment in violation hereof shall be null and void and of no force or effect. Notwithstanding any permitted assignment by a Party of this Agreement or any of its rights or obligations hereunder, such assigning Party shall remain liable under this Agreement unless the other Party agrees in writing that such assigning Party shall be relieved of its Liabilities under this Agreement, such agreement not to be unreasonably withheld, conditioned or delayed.

Section 13.4. Waiver. The excuse or waiver of the performance by a Party of any obligation of the other Party under this Agreement shall only be effective if evidenced by a written statement signed by the Party so excusing or waiving. No delay in exercising any right or remedy shall constitute a waiver thereof, and no waiver by Seller or Purchaser of the breach of any obligation in this Agreement shall be

construed as a waiver of any preceding or succeeding breach of the same or any other obligation or condition of this Agreement.

Section 13.5. Governing Law; Jurisdiction.

(a) This Agreement and all documents executed and delivered in connection herewith shall be construed in accordance with the internal Laws of the State of Michigan without regard to the principles of choice of law or conflicts of law.

(b) Seller and Purchaser hereby agree that any suit, action, or proceeding, whether claim or counterclaim, brought or instituted by any Party on or with respect to this Agreement or which in any way relates, directly or indirectly, to this Agreement or any event, transaction, or occurrence arising out of or in any way connected with this Agreement or the transactions contemplated hereby, or the dealings of the Parties with respect thereto, shall be tried only by a court and not by a jury. **TO THE FULLEST EXTENT PERMITTED BY LAW, EACH PARTY HEREBY EXPRESSLY WAIVES ANY RIGHT TO A TRIAL BY JURY IN ANY SUCH SUIT, ACTION, OR PROCEEDING DIRECTLY OR INDIRECTLY ARISING OUT OF, UNDER OR IN CONNECTION WITH THIS AGREEMENT**. **EACH PARTY FURTHER WAIVES ANY RIGHT TO CONSOLIDATE ANY ACTION IN WHICH A JURY TRIAL HAS BEEN WAIVED WITH ANY OTHER ACTION IN WHICH A JURY TRIAL CANNOT BE OR HAS NOT BEEN WAIVED.**

(c) Each of Seller and Purchaser: (i) agree that any Action arising out of or based upon this Agreement or the subject matter hereof or any documents delivered in connection herewith shall be brought only in the courts of the State of Michigan or the United States District Court for the Eastern District of Michigan; (ii) irrevocably submits itself to the exclusive jurisdiction of the such courts for the purpose of any Action arising out of or based upon this Agreement or the subject matter hereof or any documents delivered in connection herewith; (iii) waives, and agrees not to assert, by way of motion, as a defense or otherwise, in any such Action, any claim that it is not subject personally to the jurisdiction of the above named courts, that its property is exempt or immune from attachment or execution, that the action is brought in an inconvenient forum, that the venue of such Action is improper or that this Agreement or the subject matter hereof may not be enforced in or by such court; (iv) consents to the transfer of any Action filed in another court to an applicable court identified in **clause (i)** above; and (v) consents to service of process by registered mail at the address to which notices are to be given if personal service is not, with the exercise of commercially reasonable efforts, possible.

The provisions of this **Section 13.5** shall survive the Closing or earlier termination of this Agreement.

Section 13.6. Counterparts. This Agreement may be executed in any number of counterparts and it shall be sufficient that the signature of each Party appear on one or more such counterparts. All counterparts shall collectively constitute a single agreement.

Section 13.7. Notices. All notices or other communications required or provided to be sent by either Party shall be in writing and shall be sent by: (a) any nationally known overnight delivery service for next Day delivery; (b) delivered in person; or (c) by e-mail. A notice sent by delivery service shall be deemed received on the date noted as delivered on the receipt. A notice delivered in person shall be deemed effective on the date when received. A notice sent by email shall be effective if receipt is acknowledged by the intended recipient. All notices shall be addressed to the Parties at the addresses below:

To Seller:	Consumers Energy Company One Energy Plaza Jackson, MI 49201 Attn: Erin Busby Email: Erin.M.Busby@cmsenergy.com
and a copy to:	Consumers Energy Company One Energy Plaza Jackson, MI 49201 Attn: Robert Beach Email: Robert.Beach@cmsenergy.com
and a copy to:	Troutman Pepper Locke, LLP 401 9th Street, N.W. Suite 1000 Washington, D.C. 20004 Attn: Todd Coles, Esq. Email: Todd.Coles@Troutman.com
To Purchaser:	Confluence Hydro, LLC c/o Hull Street Energy, LLC 4747 Bethesda Avenue, Suite 1220 Bethesda, MD 20814 Attn: Randall Osteen; Charles Arsenault Email: rosteen@hullstreetenergy.com; carsenault@hullstreetenergy.com
and a copy to:	McGuireWoods LLP 500 E. Pratt Street, Suite 1000 Baltimore, MD 21202 Attn: Brian Kelly Email: bkelly@mcguirewoods.com

Any address or name specified above may be changed by notice given to the addressee by the other Party in accordance with this **Section 13.7**. The inability to deliver notice because of a changed address of which no notice was given as provided above, or because of rejection or other refusal to accept any notice, shall be deemed to be the receipt of the notice as of the date of such inability to deliver or rejection or refusal to accept. Any notice to be given by any Party hereto may be given by the counsel for such Party.

Section 13.8. Attorneys' Fees. In the event of a judicial or administrative proceeding or action by one Party against the other Party with respect to the interpretation or enforcement of this Agreement, the prevailing Party shall be entitled to recover reasonable costs and expenses, including reasonable attorneys' fees and expenses, whether at the investigative, pretrial, trial or appellate level. The prevailing Party shall be determined by the court based upon an assessment of which Party's major arguments or position prevailed.

Section 13.9. IRS Real Estate Sales Reporting. Purchaser and Seller hereby agree that the Title Company shall act as "the person responsible for closing" the transaction which is the subject of this Agreement pursuant to Section 6045(e) of the Code and shall prepare and file all informational

returns, including IRS Form 1099 S, and shall otherwise comply with the provisions of Section 6045(e) of the Code.

Section 13.10. **Modification of Agreement**. No modification of this Agreement shall be deemed effective unless in a written amendment signed by Seller and Purchaser that expressly states that it is intended to modify this Agreement.

Section 13.11. **Knowledge**.

(a) Purchaser acknowledges that the Designated Seller Representatives are named solely for the purpose of defining the scope of Seller's Knowledge and not for the purpose of imposing any liability on or creating any duties running from the Designated Seller Representatives to Purchaser and Purchaser agrees that no Designated Seller Representative shall have any liability under this Agreement or in connection with the transactions contemplated hereby.

(b) Seller acknowledges that the Designated Purchaser Representatives are named solely for the purpose of defining the scope of Purchaser's Knowledge and not for the purpose of imposing any liability on or creating any duties running from the Designated Purchaser Representatives to Seller and Seller agrees that no Designated Purchaser Representative shall have any liability under this Agreement or in connection with the transactions contemplated hereby.

Section 13.12. **Descriptive Headings; Word Meaning**. The descriptive headings of the paragraphs of this Agreement are inserted for convenience only and shall not control or affect the meaning or construction of any provisions of this Agreement. Words such as "herein", "hereinafter", "hereof" and "hereunder" when used in reference to this Agreement, refer to this Agreement as a whole and not merely to a subdivision in which such words appear, unless the context otherwise requires. The singular shall include the plural and the masculine gender shall include the feminine and neuter, and vice versa, unless the context otherwise requires. The word "including" shall not be restrictive and shall be interpreted as if followed by the words "without limitation."

Section 13.13. **Time of the Essence**. Time is of the essence of this Agreement and all obligations and deadlines hereunder. Without limiting the foregoing, Purchaser and Seller hereby confirm their intention and agreement that time shall be of the essence of each and every provision of this Agreement, notwithstanding any subsequent modification or extension of any date or time period that is provided for under this Agreement. The agreement of Purchaser and Seller that time is of the essence of each and every provision of this Agreement shall not be waived or modified by any conduct of the Parties, and the agreement of Purchaser and Seller that time is of the essence of each and every provision of this Agreement may only be modified or waived by the express written agreement of Purchaser and Seller that time shall not be of the essence with respect to a particular date or time period, or any modification or extension thereof, which is provided under this Agreement.

Section 13.14. **Construction of Agreement**. This Agreement shall not be construed more strictly against one Party than against the other Party merely by virtue of the fact that it may have been prepared primarily by counsel for one of the Parties, it being recognized that both Purchaser and Seller have contributed substantially and materially to the preparation of this Agreement.

Section 13.15. **Severability**. The Parties intend and believe that each provision in this Agreement comports with all applicable Laws. If, however, any provision in this Agreement is found by a court of law to be in violation of any applicable Law, or public policy, or if in any other respect such a court declares any such provision to be illegal, invalid, unlawful, void or unenforceable as written, then it is the intent of both Parties that, consistent with and with a view towards preserving the economic and

legal arrangements between the Parties as expressed in this Agreement, such provision shall be given force and effect to the fullest possible extent, and that the remainder of this Agreement shall be construed as if such illegal, invalid, unlawful, void, or unenforceable provision were not contained herein, and that the rights, obligations, and interests of the Parties under the remainder of this Agreement shall continue in full force and effect.

Section 13.16. **No Recording**. The provisions hereof shall not constitute a Lien on the Project Assets. Neither Purchaser nor its agents or representatives shall record or file this Agreement or any notice or memorandum hereof in any public records. If Purchaser breaches the foregoing provision, this Agreement shall, at Seller's election, terminate. Purchaser hereby irrevocably appoints Seller as its true and lawful attorney-in-fact, coupled with an interest, for the purpose of executing and recording such documents and performing such other acts as may be necessary to terminate any recording or filing of this Agreement in violation of this provision.

Section 13.17. **No Implied Agreement**. None of Seller or Purchaser shall have any obligations in connection with the transaction contemplated by this Agreement unless both Seller and Purchaser, each acting in its sole discretion, elects to execute and to deliver to the other Party this Agreement. No correspondence, course of dealing or submission of drafts or final versions of this Agreement between Seller and Purchaser shall be deemed to create any binding obligations in connection with the transaction contemplated hereby, and no contract or obligation on the part of Seller or Purchaser shall arise unless and until this Agreement is fully executed by Seller and Purchaser. Once executed and delivered by Seller and Purchaser, this Agreement shall be binding upon them notwithstanding the failure of any broker or other Person to execute this Agreement.

Section 13.18. **Facsimile Signatures**. Seller and Purchaser agree that signatures on this Agreement may be made by electronic means in lieu of an original handwritten signature and said electronic signatures shall be binding. This Agreement may be delivered by a facsimile or an electronic transmission thereof, each of which shall be deemed an original. Any document generated by the Parties with respect to this Agreement, including this Agreement, may be imaged and stored electronically and introduced as evidence in any proceeding as if original business records. Neither Party will object to the admissibility of such images as evidence in any proceeding on account of having been stored electronically.

Section 13.19. **Publicity**. The Parties agree that, except as may be required by applicable Law or stock exchange rule (including the MPSC and/or rules and regulations of the Securities and Exchange Commission and the New York Stock Exchange, if applicable), prior to the Closing, no Party shall contact or conduct negotiations with public officials (except in connection with the Governmental Approvals contemplated by this Agreement and any due diligence activities hereunder), make any public pronouncements, issue press releases or otherwise furnish information regarding this Agreement or the transactions contemplated to any third party without the consent of the other Party, which consent shall not be unreasonably withheld, conditioned or delayed. After the Closing, Purchaser agrees not to disclose specific Purchase Price information in any public pronouncements, press releases or other such disclosures (excluding therefrom any disclosure required by the Securities and Exchange Commission) without Seller's consent, which consent shall not be unreasonably withheld, conditioned or delayed.

Section 13.20. **Further Assurances**. Each Party shall, from time to time, promptly upon the request of the other Party, furnish to the other Party such further information or assurances, execute and deliver such additional documents, instruments and conveyances, and take such other actions and do such other things, in each case, as may be reasonably requested by the other Party consistent with the provisions of this Agreement and necessary to carry out the provisions of this Agreement and each of the other Ancillary Agreements and give effect to the transactions contemplated hereby and thereby.

[The balance of this page has intentionally been left blank. Signature pages follow.]

IN WITNESS WHEREOF, Seller and Purchaser have executed this Agreement as of the Effective Date.

Execution Version

SELLER DISCLOSURE SCHEDULES

in connection with the

PURCHASE AND SALE AGREEMENT

dated as of
September 3, 2025

by and between

CONSUMERS ENERGY COMPANY

and

CONFLUENCE HYDRO, LLC

This Disclosure Schedule is being furnished by Consumers Energy Company, a Michigan corporation (the "Company"), in connection with the execution and delivery of that certain Purchase and Sale Agreement (the "Agreement"), dated as of September 3, 2025, by and between the Company and Confluence Hydro, LLC, a Delaware limited liability company ("Purchaser"). Except as otherwise limited herein or in the Agreement, all disclosures contained in this Disclosure Schedule are made as of Effective Date.

The information set forth in any particular section or subsection of this Disclosure Schedule shall apply only to the corresponding section or subsection of the Agreement and shall not be deemed to apply to any other representation or warranty unless a specific cross-reference is expressly made. Disclosure of a matter in any section of the Disclosure Schedule shall not affect (directly or indirectly) the interpretation of the Agreement or the scope of the disclosure obligation of the Company under the Agreement. This Disclosure Schedule may include items or information which the Company is not required to disclose under the Agreement. The fact that any matter or event is disclosed in a section of the Disclosure Schedule does not necessarily mean that it is material to the Company, whether considered individually or in combination with other matters or events disclosed herein.

In disclosing the information set forth herein, the Company expressly does not waive any attorney-client privilege associated with any such information or any protection afforded by the "work product doctrine" with respect to any of the matters disclosed herein.

The headings and descriptions of the representations and warranties used herein are for convenience of reference only and do not alter the meaning of any provision of the Agreement.

Capitalized terms used but not otherwise defined herein shall have the meanings ascribed to them in the Agreement.

Generating Equipment

Alcona Project Generating Equipment

- Unit 1. 1924 WS Morgan Francis vertical runner with 29’ of head powering a 4.0MW GE generator at 90 RPM, 5000 volts.
- Unit 2. 1924 WS Morgan Francis vertical runner with 29’ of head powering a 4.0MW GE generator at 90 RPM, 5000 volts.

Calkins Bridge Project Generating Equipment

- Unit 1. 1935 Leffell Propeller vertical runner with 16’ of head powering a 0.45MW GE generator at 180 RPM, 4800 volts.
- Unit 2. 1935 Leffell Propeller vertical runner with 16’ of head powering a 0.9 MW GE generator at 120 RPM, 4800 volts.
- Unit 3. 1935 Leffell Propeller vertical runner with 16’ of head powering a 1.2MW GE generator at 112.5 RPM, 4800 volts.

Cooke Project Generating Equipment

- Unit 1. 1911 Allis Chalmers Francis horizontal runner with 39’ of head powering a 1.5MW GE generator at 180 RPM, 2500 volts.
- Unit 2. 1911 Allis Chalmers Francis horizontal runner with 39’ of head powering a 3.0MW GE generator at 180 RPM, 2500 volts.
- Unit 3. 1911 Allis Chalmers Francis horizontal runner with 39’ of head powering a 3.0MW GE generator at 180 RPM, 2500 volts.

Croton Generating Equipment

- Unit 1. 1907 Allis Chalmers Francis horizontal runner with 40’ of head powering a 3.24MW Westinghouse generator at 225 RPM, 7500 volts.
- Unit 2. 1907 Allis Chalmers Francis horizontal runner with 40’ of head powering a 3.24MW Westinghouse generator at 225 RPM, 7500 volts.
- Unit 3. 1915 Allis Chalmers Francis vertical runner with 40’ of head powering a 1.26MW Allis Chalmers generator at 150 RPM, 7500 volts.

- Unit 4. 1915 Allis Chalmers Francis vertical runner with 40’ of head powering a 1.26MW Allis Chalmers generator at 150 RPM, 7500 volts.

Five Channels Generating Equipment
- Unit 1. 1912 Allis Chalmers Francis horizontal runner with 35’ of head powering a 3.0MW GE generator at 150 RPM, 2500 volts.
- Unit 2. 1912 Allis Chalmers Francis horizontal runner with 35’ of head powering a 3.0MW GE generator at 150 RPM, 2500 volts.

Foote Project Generating Equipment
- Unit 1. 1918 Allis Chalmers Francis vertical runner with 39’ of head powering a 3.0MW GE generator at 90 RPM, 5000 volts.
- Unit 2. 1918 Allis Chalmers Francis vertical runner with 39’ of head powering a 3.0MW GE generator at 90 RPM, 5000 volts.
- Unit 3. 1918 Allis Chalmers Francis vertical runner with 39’ of head powering a 3.0MW GE generator at 90 RPM, 5000 volts.

Hardy Project Generating Equipment
- Unit 1. 1931 I. P Morris Francis vertical runner with 99.5’ of head powering a 10.0MW GE generator at 163.5 RPM, 7500 volts.
- Unit 2. 1931 I.P. Morris Francis vertical runner with 99.5’ of head powering a 10.0MW GE generator at 163.5 RPM, 7500 volts.
- Unit 3. 1931 I.P. Morris Francis vertical runner with 99.5’ of head powering a 12.5MW GE generator at 163.5 RPM, 7500 volts.

Hodenpyl Project Generating Equipment
- Unit 1. 1925 Allis Chalmers Francis vertical runner with 67.5’ of head powering a 9.0MW Allis Chalmers generator at 120 RPM, 7500 volts.
- Unit 2. 1925 Allis Chalmers Francis vertical runner with 67.5’ of head powering a 9.0MW Allis Chalmers generator at 120 RPM, 7500 volts.

Loud Project Generating Equipment
- Unit 1. 1913 Allis Chalmers Francis Horizontal runner with 27’ of head powering a 2.0MW GE generator at 120RPM, 2500 volts.
- Unit 2. 1913 Allis Chalmers Francis Horizontal runner with 27’ of head powering a 2.0MW GE generator at 120RPM, 2500 volts.

Mio Project Generating Equipment
- Unit 1. 1916 Allis Chalmers Francis vertical runner with 29’ of head powering a 2.5MW Allis Chalmers generator at 80 RPM, 2500 volts.
- Unit 2. 1916 Allis Chalmers Francis vertical runner with 29’ of head powering a 2.5MW Allis Chalmers generator at 80 RPM, 2500 volts.

Rogers Project Generating Equipment
- Unit 1. 1923 Allis Chalmers Francis vertical runner with 40’ of head powering a 1.68MW Allis Chalmers generator at 150 RPM, 7500 volts.
- Unit 2. 1923 Allis Chalmers Francis vertical runner with 40’ of head powering a 1.68MW Allis Chalmers generator at 150 RPM, 7500 volts.
- Unit 3. 1923 Allis Chalmers Francis vertical runner with 40’ of head powering a 1.68MW Allis Chalmers generator at 150 RPM, 7500 volts.
- Unit 4. 1923 Allis Chalmers Francis vertical runner with 40’ of head powering a 1.68MW Allis Chalmers generator at 150 RPM, 7500 volts.

Tippy Project Generating Equipment

- Unit 1. 1918 WS Morgan Francis vertical runner with 56’ of head powering a 6.67MW Westinghouse generator at 109.1 RPM, 7500 volts.
- Unit 2. 1918 WS Morgan Francis vertical runner with 56’ of head powering a 6.67MW Westinghouse generator at 109.1 RPM, 7500 volts.
- Unit 3. 1918 WS Morgan Francis vertical runner with 56’ of head powering a 6.67MW Westinghouse generator at 109.1 RPM, 7500 volts.

Webber Project Generating Equipment

- Unit 1. 1907 Leffell Francis horizontal runner with 26’ of head powering a 2.3MW GE generator at 164 RPM, 2500 volts.
- Unit 2. 1949 Leffell Propeller vertical runner with 26’ of head powering a 1.0MW EMC generator at 200 RPM, 2500 volts.

Interconnection Equipment

Alcona Project Interconnect Equipment (Not in Substation)

- 112 and 212 Disconnect switches
- 116 and 216 breakers
- Generator # 1
- Generator #2
- Conductors and connections between 4.8kV main bus through to generator 1 and generator 2 including 112, 116, 212, 216

Cooke Project Interconnect Equipment (In Substation)

- Conductors from substation bus to 262B switch
- Conductors from substation bus to 164 switch

Croton Project Interconnect Equipment (In Substation)

- Transformer Bank 1
- 135, 242 and 244 Disconnect switches
- 246 Breaker
- Station power fuses
- 7200 line reactor
- 46kV bus and bus connections from tie to transformer bank 1
- 7200 Bus PTs
- 7200 Bus and bus connections from transformer 1 and station power fusing through to the plant including 135, 244, 242, 246

Croton Project Interconnect Equipment (Not in Substation)

- 7200V conductors to plant

Five Channels Project Interconnect Equipment (In Substation)

- Conductors from substation bus to 166 breaker

Foote Project Interconnect Equipment (In Substation)

- 112, 212, 312 switches
- 116, 216, 316 breakers
- Station power fused switch
- Station power transformer
- 4.8kV conductors, PTs, and connectors in sections containing 116, 216, 316

Foote Project Interconnect Equipment (Not in Substation)

- 4.8kV conductors and connectors from 116, 216, 316 to the plant

Hardy Project Interconnect Equipment (Not in Substation)

- ~1800 feet of 138kV transmission line

Hodenpyl Project Interconnect Equipment (In Substation)

- 299 Disconnect Switch
- Transformer Bank 2
- Conductors from 299 to TB2 and from TB2 to plant
- Conductors from load side of station power disconnect to plant

Hodenpyl Project Interconnect Equipment (Not in Substation)

- Conductors from TB2 to plant
- Conductors from load side of station power disconnect to plant

Loud Project Interconnect Equipment (In Substation)

- 299 Disconnect
- Transformer Bank 2
- From 299 disconnect switch to the TB2 and from TB2 to plant

Loud Project Interconnect Equipment (Not in Substation)

- Transformer Bank #2
- Connections to plant

Mio Project Interconnect Equipment (In Substation)

- 688 Disconnect Switch
- Conductors from the 138kV bus to 688 switch and from 688 to plant

Rogers Project Interconnect Equipment (In Substation)

- From 199 disconnect switch to the plant

Rogers Project Interconnect Equipment (Not in Substation)

- Transformer Bank #1
- Connections from 199 to TB 1 and from TB 1 to plant

Tippy Project Interconnect Equipment (In Substation)

- 2A, 291, and 293 disconnect switch
- 295 grounding switch
- 299 Breaker
- Transformer Bank 2
- 138kV Bus and conductors through TB2, including 295, 291, 293, and 299
- Bus and connectors from TB2 to the plant including the 2A switch

Tippy Project Interconnect Equipment (Not in Substation)

- Conductors from 2A to plant

Webber Project Interconnect Equipment (In Substation)

- 199 and 399 Disconnects and fusing
- Transformer Bank 1
- Transformer Bank 3
- All equipment in the plant
- Connections from substation bus work to the 199 and the 399 disconnects. Also, all connections from the 199 through to the plant and from the 399 through to the plant

Caulkins Bridge Project Interconnect Equipment (Not in Substation)

- Pole and 191 fused switch
- 199 Breaker
- Transformer Bank #1 (TB 1)
- All interconnections between the 191, 199, and TB 1

21. General Contract for Technical and Consulting Services dated as of February 2, 2015, by and between Seller and FK Engineering, PLLC, a Michigan professional limited liability company, d/b/a FK Engineering Associates, as amended from time to time.

22. General Contract for Technical and Consulting Services dated as of April 10, 2014, by and between Seller and GEI Consultants of Michigan, P.C., a Michigan professional corporation, as amended from time to time.

23. General Contract for Labor and Material dated as of May 12, 2009, by and between Seller and Gemellaro Systems Integration, Inc., a Michigan corporation, as amended from time to time.

24. General Contract for Labor and Material dated as of June 14, 2001, by and between Seller and Grand Traverse Crane Corporation, as amended from time to time.

25. General Contract for Technical and Consulting Services dated as of September 29, 2003, by and between Seller and Holland Engineering, Inc., a Michigan corporation, as amended from time to time.

26. General Contract for Labor and Material dated as of November 1, 2013, by and between Seller and Hydro Tech, Inc., an Ontario Canada corporation, as amended from time to time.

27. General Contract for Labor and Material dated as of September 15, 2022, by and between Seller and Integrated Power Services, LLC, a Delaware limited liability company, as amended from time to time.

28. General Contract for Labor and Material dated as of October 11, 2016, by and between Seller and Caribou Services, Inc. d/b/a Jons to Go, a Michigan corporation, as amended from time to time.

29. General Contract for Technical and Consulting Services dated as of May 15, 2001, by and between Seller and Kleinschmidt Associates, Inc., as amended from time to time.

30. General Contract for Labor and Material dated as of January 4, 2016, by and between Seller and Macallister Machinery Co., Inc., a Michigan corporation, as amended from time to time.

31. General Contract for Labor and Material dated as of April 17, 2023, by and between Seller and Michels Construction Inc., a Delaware corporation, as amended from time to time.

32. General Contract for Labor and Material dated as of May 1, 2020, by and between Seller and Newkirk Electric Associates, Inc., a Michigan corporation, as amended from time to time.

33. General Contract for Labor and Material dated as of January 1, 2024, by and between Seller and Newkirk Electric Associates, Inc., a Michigan corporation, as amended from time to time.

34. General Contract for Labor and Material dated as of August 1, 1999, by and between Seller and Northern A-1 Services, Inc., a Michigan corporation, as amended from time to time.

35. General Contract for Labor and Material dated as of September 26, 2018, by and between Seller and Northern Machining & Repair, Inc., a Michigan corporation, as amended from time to time.

36. General Contract for Labor and Material dated as of March 21, 2016, by and between Seller and O'Donnells Earthworks, LLC, a Michigan limited liability company, as amended from time to time.

37. General Contract for Technical and Consulting Services dated as of February 1, 1996, by and between Seller and Soil and Materials Engineers, Inc., a Michigan corporation, as amended from time to time.

38. General Contract for Technical and Consulting Services dated as of November 15, 2021, by and between Seller and Testing Engineers & Consultants, Inc., a Michigan corporation, as amended from time to time.

39. General Contract for Technical and Consulting Services dated as of January 18, 2017, by and between Seller and Robert G. Ganser d/b/a Transformer Consulting Services, as amended from time to time.

40. General Contract for Technical and Consulting Services dated as of May 11, 2017, by and between Seller and West Consultants, Inc., a California corporation, as amended from time to time.

41. General Contract for Labor and Material dated as of September 5, 2012, by and between Seller and West Shore Services, Inc., a Michigan domestic profit corporation, as amended from time to time.

42. General Contract for Technical and Consulting Services dated as of July 1, 2023, by and between Seller and Wightman & Associates, Inc., a Michigan corporation, as amended from time to time.

43. General Contract for Technical and Consulting Services dated as of December 5, 2013, by and between Seller and Golder Associates, Inc., a Georgia corporation, as amended from time to time.

44. Contract for Labor and Material dated as of April 1, 2025, by and between Seller and Great Lakes Land Clearing LLC, a Michigan limited liability company, as amended from time to time.

45. Contract for Foote Hydro Trash Rack Cleaning System dated as of December 13, 2021, by and between Seller and ATLAS-SSI, Inc., a Mississippi corporation, as amended by the Contract Change Order No. 1 dated as of December 14, 2024.

46. Contract dated as of July 6, 2021, by and between Seller and Wonderware North d/b/a Q-Mation, as amended from time to time.

47. Contract for Technical and Consulting Services dated as of September 20, 2023, by and between Seller and Clear Energy Brokerage & Consulting, LLC, as amended from time to time.

48. Master Leaseback Agreement (Cash-Flowing) dated as of December 5, 2023, between Seller and Vertical Bridge Towers, IV, LLC, a Delaware limited liability company.

49. Master Leaseback Agreement (Non-Cash-Flowing) dated as of December 5, 2023, between Seller and Vertical Bridge Towers, IV, LLC, a Delaware limited liability company.

50. Contract for Labor and Material dated as of January 9, 2024, by and between Seller and Hardman Construction, Inc., a Michigan corporation, as amended by the Contract Change Order No. 01 dated as of November 18, 2024.

51. Contract for Labor and Material dated as of January 22, 2024, by and between Seller and Hardman Construction, Inc., a Michigan corporation, as amended by the Contract Change Order No. 01 dated as of April 12, 2024, as further amended by the Contract Change Order No. 02 dated as of August 30, 2024, and as further amended by the Contract Change Order No. 03 dated as of November 19, 2024.

52. Contract for Labor and Material dated as of March 31, 2023, by and between Seller and Hydro Tech USA, Inc., a Delaware corporation, as amended by the Contract Change Order No. 01 dated as of January 3, 2024, as further amended by the Contract Change Order No. 02 dated as of October 1, 2024, and as further amended by the Contract Change Order No. 03 dated as of November 20, 2024.

2. Excluded Permits

1. The Excluded Permits set forth on Schedule 5.13(c) are hereby incorporated by reference.
2. The Excluded Permits set forth on Schedule 5.14(a) are hereby incorporated by reference.

Applications

Application	Use
AVEVA PI Historian	Historian data aggregation and reporting
SAP	HR/Timesheets
SAP	Work Management
SAP	Asset Management
SAP	Finance
SAP	Supply Chain
SAP	Project System
eSOMS	Lockout/Tagout
eSOMS	Digital Logbook
Primavera P6	Scheduling
Unifier	Enterprise Project Management
GeoTab	Vehicle Tracking
SuccessFactors	Learning and Development
SAP Ariba	Contract Management
Microsoft Office	Outlook, Word, PowerPoint, excel, etc.
DevonWay	Regulatory Commitment Tracking
Enviance	Regulatory Commitment Tracking
ProjectWise	Drawings and Engineering
Sharepoint	Operating Procedures, Dam Safety, etc.
Generation Portal	Used for MISO forecasting
Power Apps	Various applications (for example Seller's standard work app, emergency action plan – stored in Sharepoint)
Power BI	Reporting
OneDrive	File storage for users
GADS	Tracks generation outages (hyrdos supply data)

Acre AccessIt Universal	Security access control software
Rubrik	Backup / recovery / ransomware solution (software & hardware) per Schedule 1.1 (b) Tangible Personal Property, Transfer note 2
Nozomi	Part of vulnerability mgmt. solution per Schedule 1.1 (b) Tangible Personal Property, Transfer note 3
Security Tools	Microsoft Azure Connected Machine Agent, Microsoft Monitoring Agent (Azure Monitor Agent), Microsoft Defender for Endpoint, Carbon Black App Control Agent, Vmware Carbon Black Edr Sensor and RSA MFA Agent For Microsoft Windows, CyberArk

Transfer Note 1: As indicated in Schedule 1.1(b), Tangible Personal Property, the identified Hyper V VM servers in that Schedule 1.1(b) will transfer to Purchaser. However, the Hyper-V Microsoft software will not transfer to Purchaser and will need to be purchased by Purchaser from the vendor.

Alcona Project:

In Existing Substation	199 circuit switcher Transformer bank 1 All PTs, conductor, and connectors inside the substation unless noted otherwise
Not in Existing Substation	166 and 126 Breaker 162, 124, and 125 Disconnect switches Bus PTs 4.8kV main bus and by-pass bus work for 126 breaker 4.8kV from plant wall to distribution transformers 138kV transmission lines to the 199 4.8kV distribution circuit to distribution transformers. Distribution bypass equipment to bypass the plant proper

Cooke Project:

In Existing Substation	199 circuit switcher 262, 262A, 1-2 disconnect switch 1-5 fused switch Transformer bank 1 Transformer bank 2 Voltage regulator 1-6 Breaker All PTs, conductor, and connectors inside the substation unless noted otherwise
Not in Existing Substation	46kV transmission lines to the 199 8.3kV distribution circuit.

Croton Project:

In Existing Substation	138kV substation is owned by ITC 46kV substation is owned by Seller unless noted in plant Right of ways into and out of the substation

Not in Existing Substation	None

Five Channels Project:

In Existing Substation	199 circuit switcher Transformer bank 1 All PTs, conductor, and connectors inside the substation unless noted otherwise 2.4kV fuse and distribution line
Not in Existing Substation	46kV transmission lines to the 199 2.4kV distribution circuit.

Foote Project:

In Existing Substation	399, 362, 364, 365, 162, 1-2 Switches 299 and 1-5 Fused Switch Transformer Bank 1 Transformer Bank 2 Transformer Bank 3 366 and 1-6 Breaker All 46kV conductors and connectors All 8.32kV conductors and connectors 4.8kV conductors and connectors in sections containing 366 breaker and transformers 1, 2, and 3
Not in Existing Substation	46kV transmission lines to the 199 8.3kV distribution circuit.

Hodenpyl Project:

In Existing Substation	46kV substation unless noted on plant side including station power transformer and disconnect switches
Not in Existing Substation	46kV transmission lines to the 1388, 1188, 1277, and 1288 138kV line (ITC) to the 199 breaker

Loud Project:

In Existing Substation	1373, 1371, 1182, 1184, 1271, 1273, and 152 disconnect switch 1377, 1188, and 1277 Breakers 156 Circuit Switcher Cap Bank #1 Station Power fused disconnect and transformer Station Power transformer secondary fused switch All PTs, conductor, and connectors inside the sub unless noted in plant ownership
Not in Existing Substation	46kV transmission lines to the 1377, 1188. and 1277 breakers

Mio Project (METC Owned):

In Existing Substation	138kV substation unless noted on plant side
Not in Existing Substation	None

Rogers Project:

In Existing Substation	182, 184, 282, 284, and 199 disconnect switch 188 and 288 Breakers All PTs, conductor, and connectors inside the sub
Not in Existing Substation	46kV transmission lines to the 188 and 288 breakers

Tippy Project (METC Owned):

In Existing Substation	171, 173, 282, 284, 382, 284, 271, and 273 disconnect switch 177, 288, 388, and 277 Breakers All PTs, conductor, and connectors inside the sub
Not in Existing Substation	138kV transmission lines to the 177, 277, 288 and 388 breakers

Webber Project:

In Existing Substation	171, 173, 182, 184 Disconnect switches 177 and 188 breakers PTs, conductor, and connections associated with the Ionia No 2 line and the David line
Not in Existing Substation	46kV transmission lines to the 188 and 177 breakers

Caulkins Bridge Project:

In Existing Substation	None
Not in Existing Substation	Up to pole where 191 fused switch and alternative station power source is located Right of way (see note)

Schedule 2.1(d)

Excluded Liabilities

(iv)

None.

(xi)

None.

Schedule 3.1(e)

Title and Survey (Encumbrances)

1. Croton Project Shoreline Property Easement: Seller has ongoing actions to ensure existing structures along the Croton Project impoundment are consistent with FERC Operating License Land Management Plan requirements. Seller has discovered that approximately twenty-five (25) parcels adjacent to the Croton Project pond currently have installed structures on Seller-owned property along the shoreline (mainly docks, seawalls, and stairs) that Seller has not found a previous record of approval under the FERC Operating License Land Management Plan licensing program. FERC staff is aware of these structures and has not issued a violation or other finding of non-compliance.

2. Item #1 on Schedule 7.7(d) is hereby incorporated by reference.

Schedule 4.1(j)

Purchaser Regulatory Approvals

1. Purchaser obtaining market-based rate authorization for wholesale sales of electric energy, capacity and ancillary services from FERC.

2. Purchaser being recognized as Market Participant (as defined in the MISO Rules) by MISO.

Schedule 5.3(a)

Litigation

1. Consumers Energy has periodically received emails and phone calls from a neighboring landowner at the Calkins Bridge Project (Mr. Ken and Mrs. Kathy Yonker) containing various complaints on operations at Calkins Bridge up to and including alleged property damage related to dam operations. Mr. Yonker has made past claims at FERC related to these claims, and FERC has not found a valid basis for those claims. Seller has approximately seventeen (17) instances of correspondence from Mr. Yonker since 2020 and has responded in writing twice since 2021, denying all claims made against Seller.

2. Seller has issued a license to River Queen Excursions LLC to operate a paddle boat tourism business (the "Paddle Boat") at the Foote Project. The Paddle Boat was partially submerged in March 2025. Recovery efforts resulted in significant damage to the Paddle Boat, which is currently beached on the shore of the Foote Project pond. Oscoda Township is currently pursuing a court order to compel the removal of the paddleboat, which may result in its destruction. It is possible that River Queen Excursions LLC will pursue claims related to damage to the Paddle Boat and its tourism business against the Township and Seller, although Seller does not believe that there is validity to such claims.

3. Seller is aware that State of Michigan agencies and stakeholder groups have claims that operations at the Alcona, Foote, Mio, Croton, Tippy, and Hodenpyl Projects result in downstream waters exceeding temperature limits contained in the FERC Operating Licenses. Those groups have petitioned FERC to find Seller in violation of those water quality standards, by FERC has officially responded that no such violation has occurred. The Michigan Hydro Relicensing Coalition has indicated an intent to raise this issue during any relicensing action taken with respect to the above-referenced Projects.

Schedule 5.5

Seller Third Party Consents

1. The following contracts cannot be assigned by Seller to Purchaser without the prior written consent of the contract counterparty:

   a. Contract for Hardy Dam Rehabilitation dated as of January 3, 2025, by and between Seller and Kokosing Industrial, Inc.*
   b. Large Generator Interconnection Agreement (LGIA) between Seller, Michigan Electric Transmission Company and Midcontinent Independent System Operator, Inc. (formerly Midwest Independent System Transmission Operator, Inc.), effective July 25, 2008.

2. Release of the Projects and Project Assets from that certain Indenture dated as of September 1, 1945, between Consumers Power Company (now known as Consumers Energy Company) and City Bank Farmers Trust Company (now held by The Bank of New York Mellon, successor trustee) and all supplemental indentures thereto, as may be further amended and/or supplemented from time to time.

3. Right of first refusal of METC pursuant to Section 10.1 of the Amended and Restated Easement Agreement dated April 29, 2002, between Seller and Michigan Electric Transmission Company.

4. The approvals or consents required for transfer of the Material Environmental Permits pursuant to Part II of Schedule 5.13(c).*

5. The approvals or consents required for transfer of the Material Permits pursuant to Part II of Schedule 5.14(a).*

6. Consents or approvals required to transfer the CPNodes for each of the Projects.

* The Seller Required Consents marked with the asterisk (*) above may not be obtained by the Closing Date pursuant to Section 7.12(l) and Section 7.15(b) of the Agreement, and therefore may be delivered following the Closing.

Schedule 5.6(a)

Project Assets (Title)

Part I

None.

Part II

1. The Hodenpyl Project's Unit 2 ("Hodenpyl Unit 2") is out of service ("OOS") as of the Effective Date. Hodenpyl Unit 2 has a wiped thrust bearing and the unit is planned to be overhauled to return such unit back to service. The scope of work is expected to include the replacement of bearings, machining the shaft, converting to wooden thrust bearing, wicket gate refurbishment and any additional items that are identified during the scope of work. Hodenpyl Unit 2 is expected to be transferred OOS at Closing.

2. The Hodenpyl Project's spillway hoists are being replaced under warranty repair. New hoists are scheduled to be installed in 2025.*

3. The Rogers Project's Unit 2 has a wiped bearing. Repairs are scheduled to be completed in 2025.*

4. The Loud Project's Unit 1 has a governor pressure issue. Such issue is under warranty with repairs scheduled to be completed in 2025.*

5. The Calkins Bridge Project's Unit 1 rebuild (and turbine runner replacement) is ongoing. Such rebuild is scheduled to be completed in 2025.*

6. The Cooke Project's Units 1, 2, and 3 head gates replacement is ongoing. Such replacement is expected to be completed in 2025. *

7. The Tippy Project jib crane requires warranty work which is scheduled to be completed in 2025.*

8. The Hardy Project does not meet current criteria for spillway capacity. The spillway remediation scope of work is expected to include modification of the auxiliary spillway, compaction of the embankment and restoration of the spillway crest, a new pedestrian bridge to the intake tower, and improvements to the splash wall. Such remediation work is not expected to be completed prior to Closing.

9. The Hardy Project's Unit 2 ("Hardy Unit 2") is OOS. Hardy Unit 2 has a wiped thrust bearing that may require additional work scope to return such unit back to service. Hardy Unit 2 is expected to be transferred OOS at Closing.

10. The Alcona Project's Unit 2 ("Alcona Unit 2") is operational but may require repairs. The scope of work for such repairs is expected to include a new thrust bearing and any additional items that are identified during such thrust bearing work. Such repair of Alcona Unit 2 is not expected to be completed prior to Closing.

11. The Rogers Project does not meet current criteria for spillway capacity. The remediation plan for the spillway to meet the current criteria for spillway capacity is under evaluation and any necessary work is not expected to be completed prior to Closing.

12. The Webber Project's Unit 1 ("Webber Unit 1") is operational but may require repairs to replace a runner and overhaul the unit. The work scope for such repairs is expected to include the: (i) replacement of bearings, wicket gates, runner, draft tube, (ii) shaft machining, and (iii) any additional items that are identified during such scope of work. Such repair of Webber Unit 1 is not expected to be completed prior to Closing.

13. The Hodenpyl Project's Unit 1 is operational but exhibits an oil release due to a vacuum condition that is occurring at such unit. As of the Effective Date, Seller has been unable to resolve such condition and is evaluating the installation of a wood (Lignum vitae) bearing to remediate the oil release. Such remediation work is not expected to be completed prior to Closing.

14. The Mio Project's Unit 1 is operational but exhibits an oil release due to a leaking wicket-gate arm pit that is occurring at such unit. Remediation of the leaking wicket-gate arm pit is not expected to occur prior to Closing.

15. The Alcona Project does not meet current criteria for spillway capacity. Evaluation of the Project's spillway, in relation to the current criteria for spillway capacity, includes the Risk Informed Decision Making Implementation method of dam safety evaluation which is expected to influence remediation options for the Project's auxiliary spillway. At the Project, high artesian pressures have been observed historically and these conditions are being studied and analyzed. Such study and analysis work is expected to continue into 2026 and is not expected to be completed prior to Closing.

* The scheduled work completion timelines for all entries above marked with the asterisk (*) are subject to change due to numerous factors which include the procurement of equipment and materials, contractor performance, and the provisions of any contracts applicable to such work.

Schedule 5.6(c)

Project Assets (Condemnation)

None.

Schedule 5.6(d)

Project Assets (Sufficiency)

1. The Warning Siren Equipment listed on Schedule 1.1(b).

2. The Applications, Circuits, Security – Control Boards, POTS lines, and Radio Equipment listed on Schedule 2.1(b).

3. The US Forest Service Special Use Permit for the Loud Project and the Five Channels Project, issued November 22, 1913, listed in Part I of Schedule 5.14(a), is hereby incorporated by reference.

4. The MDNR Natural River Zoning Permit No. A2023018U for the Alcona Project, issued March 8, 2024, listed in Part I of Schedule 5.13(c), is hereby incorporated by reference.

Schedule 5.6(e)

Project Assets (FERC Licenses)

1. In September 2022, the Michigan Department of Natural Resources ("DNR") petitioned FERC to find Seller in violation of Article 401 of the Croton Project's Operating License. This was related to a single instance at the Croton Project where the utility failed to adequately operate the Croton Project in re-regulation mode, resulting in downstream river fluctuations, which DNR claimed threatened aquatic resources. FERC subsequently issued Seller an Article 401 violation via a December 2022 letter. Neither DNR nor FERC identified any actual damages to aquatic resources.

2. In May 2021, a series of related oil releases occurred at the Mio Project, resulting in violation notices from FERC and U.S. Environmental Protection Agency ("EPA"). Both EPA and FERC requested follow-up information from Seller, which was submitted to the agencies in October 2021 and February 2022, respectively. Neither EPA nor FERC have provided notice of resolution of this matter to Seller.

3. Item #1 on Schedule 3.1(e) is hereby incorporated by reference.

4. Seller has noted in annual reports required by Article 404 for the Weber Project that a discrepancy exists between a Seller-owned dissolved oxygen monitor installed at the end of the pier between the spillway and tailrace and third-party contractor-owned dissolved oxygen monitors located at the pier and farther downstream of the Weber Project. Seller has reported to FERC that the dissolved oxygen monitor infrequently monitors low dissolved oxygen levels, but the corresponding third-party contractor's monitored dissolved oxygen levels are above the minimum required levels. Seller has consistently reported these discrepancies, has made changes to monitoring equipment, and FERC has not issued a finding of non-compliance.

5. In January 2025, Seller's staff at the Hodenpyl Project noticed a reduction in turbine oil, which led to a discovery that 2024 project work resulted in intermittent oil loss to the river. EGLE followed up in April 2025 with a request for additional information. Seller responded to EGLE with an April 7, 2025, submittal. FERC was also notified of this release, which was submitted in January, 2025. EGLE has not provided notice of resolution of this matter to Seller.

6. In connection with a recent communication with FERC staff regarding a routine filing for a revision to Exhibit A to the FERC License for the Croton Project, Seller was asked about certain "exceptions" to the project boundary for the Croton Project which FERC staff indicated appeared in its internal database. As a result of this inquiry, Seller has reviewed the current project boundary map for the Croton Project (Exhibit G-1 to the FERC License) and discovered two small parcels of land (totaling approximately 1 acre) which appear to be within the current project boundary but which Seller does not own. Seller has since reviewed prior documentation, including prior project boundary maps, filed with or issued by FERC with respect to the Croton Project, but has been unable to conclusively determine the significance of FERC's decision to approve an "exception" from the project boundary by FERC. The current project boundary map (Exhibit G-1 to the FERC License) affirmatively identifies these two parcels as "exceptions" without further explanation. According to the license order for the Croton Project (FERC Project No. P-2468), "The project consists of: (1) All lands, to the extent of the Licensee's interest in those lands show by exhibit G." Consumers Power Co., 68 FERC ¶ 61,079 at p. 61,422 (1994) (emphasis added). Because Seller

identified these parcels as “exceptions” in its Exhibit G-1 filed with FERC, and because FERC approved the Exhibit G-1 map with this disclosure, Seller does not believe that it is out of compliance with this provision of the license order, but is making this disclosure because of the uncertainty surrounding the treatment of these two parcels in the project boundary map.

Schedule 5.7(a)

Real Property Interests

1. Schedule 3.1(e) is hereby incorporated by reference.

2. Master Leaseback Agreement (Cash-Flowing) dated as of December 5, 2023, between Seller and Vertical Bridge Towers, IV, LLC, a Delaware limited liability company.

3. Master Leaseback Agreement (Non-Cash-Flowing) dated as of December 5, 2023, between Seller and Vertical Bridge Towers, IV, LLC, a Delaware limited liability company.

4. The Excluded Shoreline Licenses.

Schedule 5.9(g)

Seller Tax Returns (Proceedings)

None.

REDACTED

Schedule 5.9(l)

Seller Tax Returns (Jurisdictions)

1. Michigan – Corporate Income Tax
2. Michigan – Sales and Use Tax
3. Curtis Township – Real and Personal Property Tax
4. Valley Township – Real and Personal Property Tax
5. City of Allegan – Real and Personal Property Tax
6. Oscoda Township – Real and Personal Property Tax
7. Big Prairie Township – Real and Personal Property Tax
8. Croton Township – Real and Personal Property Tax
9. Mecosta Township – Real and Personal Property Tax
10. Aetna Township – Real and Personal Property Tax

15. Big Creek Township – Real and Personal Property Tax
16. Dickson Township – Real and Personal Property Tax
17. Norman Township – Real and Personal Property Tax
18. Lyons Township – Real and Personal Property Tax
19. Portland Township – Real and Personal Property Tax

Schedule 5.10(a)

Material Contracts

1. Joint Funding Agreement by and between the Michigan Department of Environment, Great Lakes, and Energy and Seller, with a start date of October 1, 2024, and end date of September 30, 2025, as may be replaced from time to time in accordance with Section 7.12(o) of the Agreement.

2. Collection Agreement dated as of April 1, 2005, by and between the U.S. Department of Agriculture, Forest Service, Huron-Manistee National Forests and Seller, as amended from time to time.

3. Contract for Five Channels Unit 1 Wicket Gate and Loud Unit 2 Wicket Gate dated as of March 17, 2025, by and between Seller and Hydro Tech USA Inc., a Delaware corporation.

4. Contract for Labor and Material dated as of January 15, 2025, by and between Seller and C&M Asset Holdings LLC dba Champagne & Marx Excavating, a Michigan corporation, as amended by that certain Contract Change Order No. 1, dated as of March 21, 2025.

5. Contract for Alcona Hydro Trash Rack Cleaning System dated as of November 1, 2024, by and between Seller and ATLAS-SSI, INC., a Mississippi corporation, as amended from time to time.

6. Contract for Technical and Consulting Services dated as of July 10, 2024, by and between Seller and Basinger Engineering Incorporated dba Schnabel Engineering of Michigan, Inc., a North Carolina professional corporation.

7. Contract for Hydro Electric Plant Governor Upgrade Project dated as of January 10, 2018, by and between Seller and American Governor Company, a Delaware corporation, as amended by the Contract Change Order No. 01 dated February 1, 2019, as further amended by the Contract Change Order No. 02 dated May 28, 2019, as further amended by the Contract Change Order No. 03 dated August 30, 2019, as further amended by the Contract Change Order No. 04 dated as of April 23, 2020, as further amended by the Contract Change Order No. 05 dated August 21, 2020, as further amended by the Contract Change Order No. 06 dated November 23, 2020, as further amended by the Contract Change Order No. 07 dated December 21, 2020, as further amended by the Contract Change Order No. 08 dated June 25, 2021, as further amended by the Contract Change Order No. 09 dated October 11, 2021, as further amended by the Contract Change Order No. 10 dated November 29, 2021, as further amended by the Contract Change Order No. 11 dated April 28, 2022, as further amended by the Contract Change Order No. 12 dated April 30, 2023, and as further amended by the Contract Change Order No. 13 dated February 5, 2024.

8. Contract for Cooke Mid Slope Remediation and Headgate Replacement dated as of February 16, 2024, by and between Seller and Fisher Contracting Company, a Michigan corporation, as amended by the Contract Change Order No. 1 dated as of March 28, 2024.

9. Contract for Labor and Material dated as of February 7, 2024, by and between Seller and Hydro Tech USA Inc., a Delaware corporation, as amended by the Contract Change Order No. 01 dated as of January 24, 2025.

10. General Contract for Technical and Consulting Services dated as of February 20, 2020, by and between Seller and Basinger Engineering Incorporated d/b/a Schnabel Engineering of Michigan, Inc., a North Carolina professional corporation, as amended by the Contract Change Order No. 1

dated as of April 30, 2021, as further amended by the Contract Change Order No. 2 dated as of July 6, 2022, and as further amended by the Contract Change Order No. 3 dated as of November 22, 2022.

11. Major Equipment Purchase Contract dated as of November 30, 2021, by and between Seller and Lemke Industrial Machine LLC ("Lemke"), as amended by the Change Order No. 1 dated as of May 1, 2023, and as further amended by the Change Order No. 2 dated as of July 1, 2024 (the "Lemke Master Contract").

12. Contract for Hardy Dam Rehabilitation dated as of January 3, 2025, by and between Seller and Kokosing Industrial, Inc., an Ohio corporation.*

13. The following purchaser orders entered into pursuant to the General Contract for Technical and Consulting Services dated as of February 2, 1998, by and between Seller and Barr Engineering Company, a Minnesota corporation, as amended by the Contract Change Order No. 01 dated as of November 6, 1998, as further amended by the Contract Change Order No. 2 dated as of February 3, 1999, as further amended by the Contract Change Order No. 3 dated as of October 5, 2000, as further amended by the Contract Change Order No. 4 dated as of January 22, 2003, as further amended by the Contract Change Order No. 5 dated as of December 7, 2003, as further amended by the Contract Change Order No. 6 dated as of January 20, 2006, as further amended by the Contract Change Order No. 7 dated as of January 7, 2008, as further amended by the Contract Change Order No. 8 dated as of June 16, 2008, as further amended by the Contract Change Order No. 9 dated as of February 26, 2009, as further amended by the Contract Change Order No. 10 dated as of February 1, 2010, as further amended by the Contract Change Order No. 11 dated as of February 22, 2011, as further amended by the Contract Change Order No. 12 dated as of January 23, 2012, as further amended by the Contract Change Order No. 13 dated as of April 2, 2014, as further amended by the Contract Change Order No. 14 dated as of February 18, 2025, and as further amended by the Contract Change Order No. 15 dated as of March 22, 2016:

    a. Purchase Order No. 4400125301, dated as of March 28, 2024.
    b. Purchase Order No. 4400125455, dated as of April 4, 2024.
    c. Purchase Order No. 4400125804, dated as of April 18, 2024.
    d. Purchase Order No. 4400128834, dated as of September 11, 2024.
    e. Purchase Order No. 4400131729, dated as of January 17, 2025.
    f. Purchase Order No. 4400132852, dated as of March 5, 2025.
    g. Purchase Order No. 4400132857, dated as of March 5, 2025.
    h. Purchase Order No. 4400135011, dated as of June 3, 2025.

14. The following purchase orders entered into pursuant to the General Contract for Labor and Material dated as of April 10, 2015, by and between Seller and Fisher Contracting Company, a Michigan corporation, as amended from time to time:

    a. Purchase Order No. 4400124826, dated as of March 7, 2024.
    b. Purchase Order No. 4400126848, dated as of June 5, 2024.
    c. Purchase Order No. 4400134453, dated as of May 8, 2025.

15. Large Generator Interconnection Agreement (LGIA) by and between Seller, Michigan Electric Transmission Company, LLC, a Michigan limited liability company, and Midcontinent

Independent System Operator, Inc. (formerly Midwest Independent System Transmission Operator, Inc.), a Delaware non-profit, non-stock corporation, effective July 25, 2008.

16. The Leases.

17. The Shoreline Licenses.

18. The Flowage Easements.

19. The Calkins Bridge Project Easement Reservation.

20. Memorandum of Understanding executed as of March 9, 1995, by and between Seller and the Michigan Department of Natural Resources.

21. Memorandum of Understanding executed as of September 21, 1994, by and between Seller and the Michigan Department of Natural Resources.

22. Offer of Settlement dated as of July 25, 2005, by and among Seller, the United States Department of Agriculture Forest Service, the United States Department of Interior Fish and Wildlife Services, the Michigan Department of Natural Resources, and the Michigan Hydro Relicensing Coalition pursuant to the Federal Energy Regulatory Commission.

23. Offer of Settlement dated as of November 23, 1992, by and among Seller, the United States Department of Agriculture Forest Services, the United States Department of Interior Fish and Wildlife Services, the Michigan Department of Natural Resources, the United States Department of Interior National Park Service, and the Michigan State Historic Preservation Officer pursuant to the Federal Energy Regulatory Commission.

24. Contract for Tippy Dam Unit 1 Bearing Replacements dated as of June 9, 2022, by and between Seller and Hydro Tech Inc., a Canadian corporation, as amended by the Contract Change Order No. 01 dated as of January 18, 2024, amended by the Contract Change Order No. 02 dated February 1, 2024, and as amended by Contract Change Order No. 3, dated January 22, 2025 (the "Tippy Bearing Replacement Contract").

*The Material Contract marked with an asterisk (*) above is a Material Contract as of the Effective Date, but shall not be a Material Contract or Project Contract as of the Closing Date if the associated Seller Required Consent set forth on Schedule 5.5 is not obtained prior to Closing.

Schedule 5.10(b)

Material Contracts (Enforceability)

None.

Schedule 5.10(c)

Material Contracts (Breaches or Defaults)

Part I.

In connection with the Lemke Master Contract, Seller submitted a warranty claim for the Hodenpyl Project spill gate on April 22, 2025, to Lemke regarding Hodenpyl Spillgate Hoist Equipment (the "Lemke Warranty Claim").

Part II.

None.

Schedule 5.10(d)

Material Contracts (Payments)

Seller is currently withholding approximately $500,000 from payment to Lemke in connection with the Lemke Warranty Claim.

Schedule 5.10(f)

Material Contracts (Third Party Rights)

None.

Schedule 5.11

Broker Fees

1. The fees, rates and expenses owing pursuant to the Contract for Technical and Consulting Services dated as of September 20, 2023, by and between Seller and Clear Energy Brokerage & Consulting, LLC, as amended.

Schedule 5.12(a)

Legal Compliance (Applicable Laws)

1. **Hodenpyl Project**: Hodenpyl elevator permit – 5-year inspection not completed in a timely manner which has been resolved.

2. **Croton Project**: Croton elevator permit – 5-year inspection not completed in a timely manner which has been resolved.

3. Schedule 5.3(a) is hereby incorporated by reference.

REDACTED

Schedule 5.12(b)

Legal Compliance (Notices)

1. Item #1 on Schedule 3.1(e) is hereby incorporated by reference.

2. Schedule 5.12(a) is hereby incorporated by reference.

Schedule 5.13(a)

Environmental Matters (Environmental Laws)

1. Item #3 on Schedule 5.3(a) is hereby incorporated by reference.

2. During a survey of building materials at the Hardy Project, it was determined that some areas of the structure may have used caulking that contains Polychlorinated Biphenyls ("PCBs"). Handling of impacted materials will be subject to the EPA's Toxic Substances Control Act ("TSCA").

3. Recognized Environmental Conditions ("RECs") identified in the preliminary Phase I environmental site assessments identified below on the Fee Simple Real Property:

   a. **Alcona Project** (Preliminary Phase I Environmental Site Assessment, Alcona Dam Hydroelectric Facility & FERC Boundary Parcels, dated April 26, 2024, prepared by Triterra for Seller) - The potential for contamination at the Alcona Project from historical or current operations (Sections 5.1 and 6.3.7). Parcel Tax IDs #030-010-100-005-00 and 030-003-200-010-00 (Fee Parcels). A campground maintenance area was observed in the northeast portion of Alcona Park Campground. Triterra observed several abandoned vehicles, outdoor storage of equipment, and dumped debris on the site.

   b. **Cooke** (Preliminary Phase I Environmental Site Assessment, Cooke Dam Hydroelectric Facility & FERC Boundary Parcels, dated April 26, 2024, prepared by Triterra for Seller) - The potential for environmental impact at the Cooke Project from historical or current operations (Section 5.1). Triterra observed evidence of outdoor equipment storage and potential dumped debris on the 4410 M-65 site (Parcel Tax ID #060-026-100-001-00) (Fee parcel) on historical aerial imagery since at least 1998. Triterra was unable to view the current conditions due to access limitations during site reconnaissance.

   c. **Croton** (Preliminary Phase I Environmental Site Assessment, Croton Hydroelectric Dam and Additional Land Located within the FERC Boundaries, dated April 17, 2024, prepared by Grand Environmental for Seller):

      i. The historical presence of three 175-gallon creosote and one 500-gallon diesel/gasoline underground storage tanks ("USTs") that were previously utilized at the Croton Project and were reported to have been removed in 1989 and 1988, respectively with no documentation of site assessment sampling or analysis. The USTs are located on parcel number 62-20-18-200-016 a Fee Simple Real Property parcel.

      ii. The identification of two historically disturbed areas of land located in the northwest tip (parcel number 62-16-32-100-004) and southwest portions of the Croton Project (parcel number 62-20-18-200-016), which are non-fee and Fee Simple Real Property parcels, respectively.

   e. **Five Channels** (Preliminary Phase I Environmental Site Assessment, Five Channels Dam Hydroelectric Facility & FERC Boundary Parcels, dated April 26, 2024, prepared by Triterra for Seller) - The potential for environmental impact at the Five Channels Project from historical and current operations (Section 5.1). Seller's headquarters for the Five Channels Project (6051 M-65) (Fee Simple Real Property parcel) is located north of the Five Channel Project powerhouse. Various garages and maintenance buildings have been constructed and razed on the site since at least 1938

and the outdoor storage of materials/debris and equipment was observed in the western portion of the site in historical aerials. Maintenance operations are associated with the use and storage of various hazardous materials and vehicle maintenance and fueling. Additionally, one 1,000-gallon UST containing gasoline was installed in 1967 and removed in 1990. Triterra did not encounter records regarding the UST closure procedures, the condition of the UST during closure, or records of confirmation sampling performed during closure. The potential exists for an unknown or unreported gasoline release to occur. The location of the suspected contamination plume may fall within the critical distance to the subject parcel building(s) to create a potential vapor intrusion concern.

f. **Foote** (Preliminary Phase I Environmental Site Assessment, Alcona Dam Hydroelectric Facility & FERC Boundary Parcels, dated April 26, 2024, prepared by Triterra for Seller):

    i. The documented presence of contamination at the Foote Project from historical USTs (Section 4.3.4). Triterra reviewed an Initial Assessment Report ("IAR") for the site located at 1879 W. River Road in Oscoda, Michigan (Fee Simple Real Property parcel) (parcel ID: 062-034-400-002-00). According to the IAR, contamination exists within soil and groundwater on the subject parcel as a result of releases from historical USTs present on the subject parcel and the adjoining parcel.

    ii. The potential for contamination at the Foote Project from historical USTs (Section 4.2). Old Orchard Park – 833/881/883 E. River Road (Fee Simple Real Property parcel) - One 1,000-gallon UST containing gasoline was installed in 1989 and removed in 1995; and one 500-gallon UST containing an unknown substance was installed in 1986 and removed in 1987. These USTs were associated with the Orchard Park Store. Additionally, one 1,000-gallon UST of gasoline was removed in 1995 and was associated with the Old Orchard Park Maintenance building. Triterra did not encounter records regarding the UST closure procedures, condition of tank during closure, or records of confirmation sampling performed during closure.

h. **Hardy** (Preliminary Phase I Environmental Site Assessment, Hardy Hydroelectric Dam and Additional Land Located within the FERC Boundaries, dated April 12, 2024, prepared by Grand Environmental for Seller):

    i. The former use of a UST for the hydroelectric plant with no site assessment report on parcel 16-28-400-004 owned by Seller (Fee Simple Real Property parcel).

    ii. The potential presence of a historical landfill on or adjacent the Hardy Project near parcel 16-16-400-003 owned by Seller (Fee Simple Real Property parcel).

    iii. The presence of plugged dry holes and a plugged gas well within and near the FERC boundaries located on parcels 16-28-300-004, 16-16-400-002, 16-22-200-003, 54-09-031-001-000, 54-09-032-001-000, and 54-09-021-003-000, which are all owned by Seller (Fee Simple Real Property parcels).

k. **Hodenpyl** (Preliminary Phase I Environmental Site Assessment, Hodenpyl Hydroelectric Dam and Additional Land Located within the FERC Boundaries, dated April 4, 2024, prepared by Grand Environmental for Seller):

i. A 250-gallon tote and approximately 24 drums of unknown contents stored around a storage building at the Lions Club roadside park on parcel # 2312-11-2101, located on the south side of M-115 and owned by Seller.

ii. The presence of observed historical dumping at the Hodenpyl Project, including scrap metal and drums on parcel # 510902510001, a Seller owned parcel just west of the hydroelectric plant in Marilla Township, Manistee County.

m. **Tippy** (Preliminary Phase I Environmental Site Assessment, Tippy Hydroelectric Dam and Additional Land Located within the FERC Boundaries, dated April 12, 2024, prepared by Grand Environmental for Seller):

i. The presence of a UST that was closed in place with no documented site assessment sampling completed on parcel # 51-05-031-100-01, addressed as 1325 Tippy Dam Road, and owned by Seller.

ii. The presence of a former UST that was removed in 1989 with no documented site assessment sampling and the potential presence of ASTs and gas pumps at Camp Mana Pine addressed as 991-998 Emmons Road, Wellston, MI on parcels 51-10-005-225-00 and/or 51-10-006-100-00, owned by Seller.

iii. Historical AST cradle of unknown purpose and former substation as well as historical storage yard immediately south of the powerhouse building on parcel # 51-05-031-100-01, addressed as 1325 Tippy Dam Road and owned by Seller.

iv. The presence of observed historical dumping on parcel # 51-05-031-100-01, addressed as 1325 Tippy Dam Road, and owned by Seller since at least 1938, including scrap metal, concrete, wood and empty drums south of the operations buildings.

4. Electronic mail from EPA to Seller on March 14, 2025, titled "Re: Notice of Federal Interest - Oil Discharge to the Foote Dam Pond and Au Sable River at 1775 E River Road, Oscoda Twp, MI 48750" regarding the discharge or substantial threat of discharge of oil, as detailed therein.

5. Item #5 on Schedule 5.6(e) is hereby incorporated by reference.

6. Seller has obtained lead and asbestos testing results at the following Projects. The handling of lead and asbestos containing material may be subject to local, state and/or federal regulations.

a. Lead - Alcona, Allegan, Cooke, Croton, Five Channels, Foote, Hardy, Hodenpyl, Loud, Mio, Rogers, Tippy, Webber.

b. Asbestos – Allegan, Five Channels, Foote, Hodenpyl, Rogers, Webber.

Schedule 5.13(b)

Environmental Compliance (Notices)

1. Item #3 on Schedule 5.3(a) is hereby incorporated by reference.

2. Item #5 on Schedule 5.6(e) is hereby incorporated by reference.

3. Item #4 on Schedule 5.13(a) is hereby incorporated by reference.

* The Material Environmental Permits marked with an asterisk (*) above are Material Environmental Permits as of the Effective Date, but shall not be Material Environmental Permits or Project Permits as of the Closing Date if the associated Seller Required Consent set forth on Schedule 5.5 is not obtained prior to Closing.

** The Material Environmental Permit marked with two asterisks (**) above is an Excluded Permit.

Part II.

Transfer Note 1. This Permit may be transferred to another person upon written approval of EGLE. The permittee must submit a written request to EGLE to transfer the Permit to the new owner. The new owner must also submit a written request to EGLE to accept transfer. The new owner must agree, in writing, to accept all conditions of the Permit. A single letter signed by both Parties that includes all the above information may be provided to EGLE. EGLE will review the request and, if approved, will provide written notification to the new owner. For avoidance of doubt, if the activities authorized under this Permit are not anticipated to be complete as of the Closing Date, the Parties shall jointly apply to transfer such permit to Purchaser in accordance with this Part II of this Schedule 5.13(c).

Transfer Note 2. In the event of any change in ownership or control of facilities from which the authorized discharge emanates, the following requirements apply: Not less than thirty (30) days prior to the actual transfer of ownership or control – for non-CAFOs, or within thirty (30) days of the actual transfer of ownership or control – for CAFOs, the permittee shall submit to the Department via MiEnviro Portal (https://mienviro.michigan.gov) a written agreement between the current permittee and the new permittee containing: 1) the legal name and address of the new owner; 2) a specific date for the effective transfer of permit responsibility, coverage and liability; and 3) a certification of the continuity of or any changes in operations, wastewater discharge, or wastewater treatment. If the new permittee is proposing changes in

operations, wastewater discharge, or wastewater treatment, the Department may propose modification of this permit in accordance with applicable laws and rules.

Transfer Note 3. *324.9112(3) Except as provided in subsection (4), if property subject to a permit under this part is transferred, both of the following are transferred with the property:*

(a) The permit, including the permit obligations and conditions.

(b) Responsibility for any violations of the permit that exist on the date the property is transferred.

(4) If property is subject to a permit under this part and a parcel of the property, but not the entire property, is transferred, both of the following are transferred with the parcel:

(a) The permit obligations and conditions with respect to that parcel, but not the permit itself.

(b) Responsibility for any violations of the permit with respect to that parcel that exist on the date the parcel is transferred.

(5) If property subject to a permit under this part is proposed to be transferred, the transferor shall notify the transferee of the permit in writing on a form developed by the department and provided by the county enforcing agency or municipal enforcing agency. The notice shall inform the transferee of the requirements of subsection (2) and, as applicable, subsection (3) or (4). The notice shall include a copy of the permit. The transferor and transferee shall sign the notice, and the transferor shall submit the signed notice to the county enforcing agency or municipal enforcing agency before the property is transferred.

(6) A county enforcing agency or municipal enforcing agency may charge a fee for the transfer of a permit under subsection (3) or (4). The fee shall not exceed the administrative costs of transferring the permit. Fees collected under this subsection shall only be used for the enforcement and administration of this part by the enforcing agency. (See MCL Section 324.9112)

Transfer Note 4. Michigan Administrative Code R281.54(c). A zoning permit is valid for 2 years and is not transferable. All structures shall be completed within 2 years from the date of issuance of the zoning permit.

Schedule 5.14(a)

Permits (Material Permits)

Part I.

Dam	Permit Type	Permit No.	Issue Date	Effective Date	Expiration	Status	Permit Use	Transfer Notes
Croton	Annual Elevator Certificate of Operation*	004858	N/A	N/A	11/26/2025	In Effect	Operations (non-essential)	Transfer Note 1

***** The disclosures regarding the Union Employees in this Part I of Schedule 5.16(b) are marked with an asterisk (*) because the initial date of employment, status, employing entity, salary or wage level, bonus, commission or other remuneration other than salary paid, accrued vacation and/or paid time off, and any bookkeeping account balances for reimbursable benefits has been Made Available to Purchaser and will be updated at Closing.

Part II.

1. Generation Transfer Settlement Agreement between Seller and Union dated as of March 7, 2022.
2. AuSable River (5 Channels) On Call Agreement dated as of March 9, 2022.
3. Hydro Settlement Agreement between Seller and Union dated as of June 10, 2022.
4. Hydroelectric Generating Plants Webber/Calkins Bridge Coverage Agreement between Seller and Union dated as of September 19, 2018.
5. 2016 Addendum to Attachment 24 of the 2010 Memorandum of Agreement dated as of October 18, 2016.
6. Temporary Union Instructor Agreement between Seller and Union dated as of February 7, 2012.
7. Memorandum of Experimental 4-10 Schedule delivered by Seller to Union dated as of May 12, 1998.
8. Hydro Control Monitoring System Agreement between Seller and Union dated as of February 1, 2016.
9. Vacation Donation Agreement (OM&C/CCC) between Seller and Union dated as of June 1, 2020
10. The Union has filed an arbitration demand related to a difference of interpretation of a new term in the 2025 – 2030 OM&C Working Agreement. Seller and Union agreed in negotiations that

employees covered by the 2025 – 2030 OM&C Working Agreement and who work a four (4) day, ten (10) hour shift, would no longer automatically be assigned a five (5) day, eight (8) hour shift in work weeks within which there is a paid holiday. Seller's interpretation is that the vacation and paid time off provisions still apply so that when employees covered by the 2025 – 2030 OM&C Working Agreement is on a four (4) day, ten (10) hour shift takes paid time off for the full week in which there is a paid holiday, the schedule is reverted to a five (5) day, eight (8) hour schedule. Seller applied its interpretation for the 4th of July holiday and the Union has demanded the instant grievance. The Union's expected interpretation is that when employees covered by the 2025 - 2030 OM&C Working Agreement work a four (4) day, ten (10) hour shift they will never be reverted to a five (5) day, eight (8) hour shift in a week that includes a paid holiday, regardless of their use of vacation or other paid time off.

Support Obligations

1. Permit WRP035989 v.1 includes wetland and stream mitigation conditions which includes, among others, an obligation for the permittee to provide a surety bond or letter of credit to EGLE in in a form equivalent to the financial assurance models on EGLE's website at 'www.michigan.gov/wetlands' in an amount equal to $2,075,000 (the cost opinion for the selected stream mitigation projects as detailed in the report by Muskegon River Watershed Assembly dated October 13, 2022) to ensure that the stream mitigation is constructed, the conservation easement is recorded, monitoring is completed, and corrective actions are performed as required to comply with the mitigation requirements and conditions of this permit. The permittee shall also provide a surety bond or letter of credit to the EGLE in a form identical to the financial assurance models on EGLE's website at 'www.michigan.gov/wetlands' in the amount of $432,000 to ensure that the replacement wetland is constructed, the conservation easement is recorded, monitoring is completed, and corrective actions are performed as required to comply with the restoration requirements and conditions of this permit. Prior to the transfer of this permit to another person, the new person must obtain and provide a financial instrument acceptable to EGLE in the name of the new person and in the amount required by this permit.

2. Permit WRP032238 v1.1 includes a primary condition to mitigate the loss of wetlands by acquiring wetland mitigation banking credits from a bank site in the Au Sable River Watershed or Ecoregion VII.2.2. The permittee (Seller) has provided a surety bond in the amount of $50,400 to ensure that the mitigation banking credits will be purchased once available. The permittee shall submit documentation of credit acquisition to EGLE prior to the release of the financial assurance document.

Schedule 7.7(d)

Operation and Maintenance of Project Assets

1. Seller discovered that property owners on and adjacent to the Croton Project impoundment have installed seawalls, docks and other shoreline structures without Seller's authorization. Seller engaged in negotiations with Croton Township stakeholders on this issue and, in 2022, developed a mutually acceptable form of easement agreement to ensure Seller retained appropriate authorization over structures installed into the impoundment.

   Seller initially identified 264 properties that have affected structures on and adjacent to the Croton Project impoundment. Through March 31, 2025: (i) 235 property owners have signed easement agreements, (ii) five (5) properties were ultimately determined to not have impacted structures, and (iii) twelve (12) properties have indicated that they will sign easement agreement but have not yet returned the necessary documents. Furthermore, there are twelve (12) properties that have refused to sign any document related to Seller's authority over their structures.

   Seller is in the process of pursuing quiet title actions for the twenty-four (24) properties that have not signed the easement agreement. While pursuing such actions, Seller will continue working with the property owners to obtain sign off on the necessary authorizations.

   During the Interim Period, for the remaining for the twenty-four (24) properties that have structures on and adjacent to the Croton Project's impoundment have not signed the easement agreement, Seller shall be permitted to continue with the actions described herein to obtain easement agreements or a court order quieting title without the consent of Purchaser.

   In addition to the easement agreement actions, as described above, Seller is actively working to enter "multi-owner" dock licenses for docks located on the Croton Project impoundment. These licenses are intended to capture property owners that do not own property adjacent to the Croton Project impoundment and who have located docks on road ends, platted parks, and outlots. These docks are designated as "multi-owner" docks because they are shared with multiple other individuals. Seller is targeting a resolution of these multi-owner docks in 2025.

2. In connection with the Lemke Master Contract, Seller and Lemke are in the process of entering Contract Change Order No. 3 which is expected to result in a reduction to the contract price in the amount of approximately $622,000. Seller expects that Contract Change Order No. 3 will be executed during the Interim Period.

   In connection with the execution of Contract Change Order No. 3, as set forth above, Seller and Lemke are also working to resolve the warranty claim, as set forth in Part I of Schedule 5.10(c).

3. The following WRD – Resources Permits for the Loud Project and Cooke Project are in the process of being obtained by Seller and is expected to be obtained in the Interim Period. The Company is also in the process of obtaining the following MDNR Natural River Zoning Permit for the Alcona Project.

   The pending WRD – Resources Permit for the Cooke Project pertains to a project to replace the right tailrace retaining wall. This work includes installing a temporary cofferdam, dewatering the work area,

and removing and rebuilding the approximately 135 lineal feet existing wall in kind. This permit is expected to be submitted to EGLE in August 2025 and work on this project is expected to start in late spring/early summer 2026.

The pending WRD – Resources Permit for the Loud Project pertains to remediation work for the core wall along the left embankment of the Loud Project impoundment, approximately 1,500 feet long. A portion of the Loud Project left tailrace retaining wall will also be repaired and replaced. This permit is expected to be submitted to EGLE in September 2025 and work is expected in 2026.

The pending MDNR Natural River Zoning Permit for the Alcona Project pertains to adding one (1) cubic yard of riprap along six (6) feet of the west wingwall of the Alcona Project. This permitting effort may result in an amendment to the existing MDNR Natural River Zoning Permit for the Alcona Project, Permit No. A2023018U, or result in a standalone permit. An application is expected to be submitted to the MDNR in 2025 and work is expected to also begin in 2025.

Dam	Permit Type	Permit No.	Issue Date	Effective Date	Expiration	Status	Permit Use	Transfer Notes
Cooke	WRD - Resources: Resources Individual Permit	Pending	Pending	Pending	Pending	Pending	Project Specific	Refer to Transfer Note 1 in Schedule 5.13(c)
Loud	WRD - Resources: Pending	Pending	Pending	Pending	Pending	Pending	Project Specific	Refer to Transfer Note 1 in Schedule 5.13(c)
Alcona	MDNR Natural River Zoning Permit	Pending	Pending	Pending	Pending	Pending	Project Specific	Refer to Transfer Note 4 in Schedule 5.13(c)

4. As set forth on Schedule 5.17(a)(ix), Seller expects to offer all Non-Union Employees a retention incentive agreement which would provide such Non-Union Employees 150% of base annual pay as of Closing.

   Seller expects to offer all Union Employees an individual retention and transfer forfeiture agreement which would provide such Union Employees: (i) a payment of 5% of annual base pay for executing the agreement within thirty (30) days of offer; (ii) 95% of annual base pay for forfeiting transfer rights under the CBA at the time of Closing; and (iii) 50% of annual base pay to forfeiture placement rights under the CBA at the time of Closing.

5. In connection with the Tippy Bearing Replacement Contract, Seller and Hydro Tech Inc. are in the process of entering Contract Change Order No. 4 for a bearing replacement project at Tippy Project unit 1 which adds $630,355.07 to the contract price to bring the total contract price of this contract to $3,241,067.50.

6. The following WRD - Resources: Resources Individual Permit for the Hardy Project is subject to revision due to changes Seller needs to make for stream mitigation. Seller is working with the issuing

Governmental Authority to obtain the revised Permit. At this time, it is not known if such revision will impact the term of the referenced Permit.

Exhibit A-1

Legal Description of the Land

Alcona Project

Parcel 1:
Southwest 1/4 of Section 3, Township 25 North, Range 5 East, lying Westerly and Southerly of Alcona Park, under water, EXCEPT small islands.

Parcel 2:
Southeast 1/4 of Section 3, Township 25 North, Range 5 East, lying Southwesterly of the South line of former AuSable & NW D&M Railroad right-of-way - Alcona Park.

Parcel 3:
Southwest 1/4 of Section 3, Township 25 North, Range 5 East, lying Southwesterly of South line of former AuSable & NW D&M Railroad right-of-way and Easterly of Alcona Pond - Alcona Park.

Parcel 4:
East 1/2 of the East 1/2 of Section 4, Township 25 North, Range 5 East, lying Westerly of Alcona Pond - Alcona Park.

Parcel 5:
East 1/2 of the East 1/2 of Section 4, Township 25 North, Range 5 East, EXCEPT Alcona Park, ALSO EXCEPT East of center thread of AuSable River, ALSO EXCEPT islands lying Westerly of said thread.

Parcel 6:
East 1/2 of the Northeast 1/4 of Section 9, Township 25 North, Range 5 East, lying Westerly of Alcona Pond - Alcona Park.

Parcel 7:
East 1/2 of the Northeast 1/4 of Section 9, Township 25 North, Range 5 East, EXCEPT Alcona Park. ALSO the Northeast 1/4 of the Southeast 1/4 of Section 9, Township 25 North, Range 5 East.

Parcel 8:
North 3/4 of Section 10, Township 25 North, Range 5 East, lying above waters of Alcona Pond - Alcona Park, EXCEPT that part lying Northeasterly of centerline of AuSable Road.

Parcel 9:
Entire Section 10, Township 25 North, Range 5 East, EXCEPT Alcona Park, ALSO EXCEPT the South 1/2 of the Southeast 1/4, ALSO EXCEPT the Northeast 1/4 of the Northeast 1/4 lying Northeasterly of the centerline of AuSable Road. All land under water.

Parcel 10:
North 3/4 of West 1/2 of Section 11, Township 25 North, Range 5 East, lying Southwesterly of former AuSable & Northwestern Railroad & Easterly of Alcona Pond - Alcona Park.

Parcel 11:
West 1/2 of Section 11, Township 25 North, Range 5 East, lying South and West of AuSable Road; EXCEPT Alcona Park; ALSO EXCEPT South 1/2 of the Southwest 1/4 of Section 11, Township 25 North, Range 5 East.

Parcel 12:
West 3/4 of Section 14, Township 25 North, Range 5 East, lying Northerly of county road, EXCEPT North 1/2 of the Northwest 1/4 of the Northeast 1/4, ALSO EXCEPT the North 1/2 of the Northeast 1/4 of the Northwest 1/4 & Dam.

Parcel 13:
Southeast 1/4 of the Northeast 1/4 of Section 15, Township 25 North, Range 5 East.

Parcel 14:
Southeast 1/4 of the Northeast 1/4 of Section 16, Township 25 North, Range 5 East.

Parcel 15:
Southwest 1/4 of the Northeast 1/4 of Section 16, Township 25 North, Range 5 East.

Hardy Project

Parcel 1:
Government Lots 1, 2, 3, 5 and 6, Section 9, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan.

Parcel 2:
So much of the Southwest 1/4 of the Southwest 1/4 of Section 10, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, as lies below an elevation of 835 feet, United States Geological Survey Datum (mean tide at New York City), together with a strip of land 200 feet wide immediately above and adject to the line established by such elevation.

Parcel 3:
Government Lots 1, 2, 3, 4, 5, 6 and 7, Section 15, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, EXCEPTING THEREFROM That part of Government Lots 2, 3, 5 and 6 of Section 15, Township 14 North, Range 10 West, described as: Beginning at a point on the East and West 1/4 line of said section, which said point is South 89 degrees 33 minutes 39 seconds West, 1941.97 feet from the East 1/4 corner of said section; thence continuing along said East and West 1/4 line of said section South 89 degrees 33 minutes 39 seconds West 641.36 feet; thence North 21 degrees 07 minutes 34 seconds West, 2738.22 feet to the point of curvature of a 11,609.16 foot radius curve to the right; thence Northwesterly along the arc of said curve 217.167 feet (said curve having a chord bearing North 20 degrees 35 minutes 25 seconds West, 217.164 feet) to a point on the North line of said section; thence along said North line of said section South 88 degrees 23 minutes 16 seconds East, 648.35 feet; thence South 21 degrees 07 minutes 34 seconds East, 2931.27 feet to the point of beginning; Together with all rights of ingress and egress, if any there be, to, from, and between the above described lands and the remainders of said Government Lots 2, 3, 5 and 6. ALSO that part of said Government Lot 6 of Section 15, Township 14 North, Range 10 West described as: Beginning at a point on the East and West 1/4 line of said section, which said point is South 89 degrees 33 minutes 39 seconds West, 1823.73 feet from the East ¼ corner of said section; thence continuing along said East and West 1/4 line of said section South 89 degrees 33 minutes 39 seconds West, 118.24 feet; thence North 21 degrees 07 minutes 34 seconds West, 106.89 feet; thence North 89 degrees 33 minutes 39 seconds East, 156.00 feet; thence South 00 degrees 26 minutes 21 seconds East, 100.0 feet to the point of beginning. The Lands described above in fee contains 41.17 acres, more or less, of which 0.58 acres, more or less, are subject to the existing right of way.

Parcel 4:
Northeast 1/4 of the Northeast 1/4 and Southwest 1/4 of the Northeast 1/4 of Section 16, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan. AND Government Lots 1, 2, 3, 4, 5, 6 and 7, Section 16, Township 14 North, Range 10 West. AND Northwest 1/4 of Southwest 1/4 of Section 16, Township 14 North, Range 10 West AND The Northwest 1/4 of the Northeast 1/4 the Southeast 1/4 of Northeast 1/4 and Southwest 1/4 of the Southwest 1/4 of Section 16, all being in Township 14 North, Range 10 West. EXCEPTING THEREFROM The West 1/2 of the Southwest 1/4 and the West 40 acres of Government Lot 5, all in Section 16, Town 14 North, Range 10 West.

Parcel 5:
Government Lot 4, Section 20, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, EXCEPTING THEREFROM Part of Government Lot 4, Section 20, Town 14 North, Range 10 West, described as follows: Commencing at the Northeast corner; thence South 148.5 feet to the point of beginning; thence South 165 feet; thence West 132 feet; thence North 165 feet; thence East 132 feet to the point of beginning.

Parcel 6:
Government Lots 1, 2, 3, 5 and 6, Section 20, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, EXCEPTING THEREFROM, a parcel of land in the Southwest 1/4 of Section 20, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, described as: Commencing at the Southeast corner of Section 20, Town 14 North, Range 10 West; thence West along the South Section line 361 feet to the point of beginning; thence North 104 feet; thence North 51 degrees West 208 feet; thence North 25 degrees West 782 feet; thence West to the Muskegon River; thence Southeasterly along the Muskegon River to the South line of Section 20; thence East along the South Section line to the point of beginning.

Parcel 7:
A parcel of land in the Southeast 1/4 of Section 20, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, described as: Commencing at the Southeast corner of Section 20, Town 14 North, Range 10 West; thence West, along the South Section line, 361 feet to the POINT OF BEGINNING; thence North 104 feet; thence North 51 degrees West 208 feet; thence North 25 degrees West 782 feet; thence West to the Muskegon River; thence Southeasterly along the Muskegon River to the South line of Section 20; thence East, along the South Section line, to the point of beginning.

Parcel 8:
Government Lots 1, 2, 3, 4, 5, 6, 7 and 9, Section 21, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, EXCEPTING THEREFROM The West 40 acres of Government Lot 2; the North 40 acres of Government Lot 3, thereof.

Parcel 9:
A parcel of land in the Township of Mecosta, Mecosta County, Michigan, described as: So much of the following described land as lies below an elevation of 835 feet USGS Datum (mean tide at New York City), together with a strip of land 200 feet wide immediately above and adjacent to the line established by such elevation to wit: Lot number 8 of Section 21, Town 14 North, Range 10 West. EXCEPTING THEREFROM:

A part of Government Lot 8, Section 21, Town 14 North, Range 10 West, described as follows: Begin at the South 1/4 corner of said Section 21; run thence North 00 degrees 21 minutes 18 seconds East, along the North & South 1/4 line 338 feet; thence South 84 degrees 52 minutes 46 seconds East, 135.27 feet; thence South 86 degrees 00 minutes 16 seconds East, 160.31 feet; thence North 88 degrees 56 minutes 20 seconds East, 300.08 feet; thence North 84 degrees 56 minutes 38 seconds East, 301.33 feet; thence North 82 degrees 52 minutes 10 seconds East, 100.85 feet; thence North 78 degrees 10 minutes 15 seconds East, 105.15 feet; thence North 63 degrees 14 minutes East, 224.35 feet to the East line of Government Lot 8; thence South 00 degrees 10 minutes 39 seconds West, 475 feet to the South line of said section; thence South 89 degrees 42 minutes 10 seconds West, 1298.78 feet to the place of beginning.

Parcel 10:
That part of Government Lot 10, Section 21, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, lying Northerly of the Creek running in an Easterly and Westerly direction across said Lot. AND So much of Government Lot 10, Section 21, Township 14 North, Range 10 West, lying Southerly of the Creek running in an Easterly and Westerly direction across said Lot as lies below an elevation of 840 feet, United States Geological Survey Datum (mean tide at New York City), together with a strip of land 200 feet wide immediately above and adjacent to the line established by such elevation.

Parcel 11:
So much of the Southwest 1/4 of the Northwest 1/4, Section 22, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, as lies below an elevation of 840 feet, United States Geological Survey Datum (mean tide at New York City) together with a strip of land 200 feet wide immediately above and adjacent to the line established by such elevation.

Parcel 12:
Southwest 1/4 of the Northwest 1/4, also known as Government Lot 1, Section 28, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan. AND Government Lots 2, 3 and 4, Section 28, Township 14 North, Range 10 West. AND The Southeast 1/4 of the Northwest 1/4, Section 28, Town 14 North, Range 10 West.

Parcel 13:
Government Lots 3, 7 and 8, Section 29, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan.

Parcel 14:
Government Lot 5, Section 29, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, EXCEPTING THEREFROM the West 40 rods of Government Lot 5 of Section 29, Township 14 North, Range 10 West.

Parcel 15:
The South 300 feet of the West 660 feet of the Southwest 1/4 of the Southwest 1/4 of Section 29, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan.

Parcel 16:
That part of the Southeast 1/4 of the Southeast 1/4, Section 30, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, lying South and East of the angling highway which crosses said land near the Southeast corner thereof.

Parcel 17:
Government Lots 1, 2, 3, 4, 5, 6, 7, 8 and 9, and Northwest 1/4 of Southeast 1/4, Section 31, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan. EXCEPTING THEREFROM the Northwest 1/4 of the Northwest 1/4 and that part of Government Lot 3, described as the West 1/2 of the Northeast 1/4 of the Northwest 1/4; and that part of Government Lot 4, described as: The Northwest 1/4 of the Southwest 1/4 of the Northwest 1/4, all in Section 31, Township 14 North, Range 10 West.

Parcel 18:
Government Lot 9, and the East 1/2 of the Southeast 1/4, Section 31, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan.

Parcel 19:
All that part of Government Lot 3 of Section 32, Town 14 North, Range 10 West, lying Westerly of the West 1/8 line of said Section 32 of said Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, excepting therefrom that portion of said above- described land which maybe overflowed by the backwaters of Hardy Dam, so-called.

Parcel 20:
Lots 1, 2, 5 and 6, Section 6, Township 13 North, Range 10 West, Mecosta Township, Mecosta County, Michigan. AND That part of Lots 3 and 4, Section 6, Township 13 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, situated in the Northwest 1/4 of said Section. EXCEPTING THEREFROM any part thereof which may lie within the South 40 acres of Government Lot 3 and the South 40 acres of Government Lot 4, all in Section 6, Town 13 North, Range 10 West.

Parcel 21:
Southwest 1/4 of the Northwest 1/4 and the Northwest 1/4 of the Southwest 1/4, Section 18, Township 13 North, Range 10 West, Mecosta Township, Mecosta County, Michigan.

Parcel 22:
Southwest 1/4 of the Northwest 1/4, Section 19, Township 13 North, Range 10 West, Mecosta Township, Mecosta County, Michigan. AND Northwest 1/4 of the Northwest 1/4 of Section 19, Township 13 North, Range 10 West, Mecosta Township, Mecosta County, Michigan.

Parcel 23:
Northwest 1/4 of the Northwest 1/4 of Section 22, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan. EXCEPTING THEREFROM the East 10 acres of the Northwest 1/4 of the Northwest 1/4 of Section 22, Township 14 North, Range 10 West.

Parcel 24:
Government Lot 6, Section 29, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, EXCEPTING THEREFROM the West 40 rods of Government Lot 6 of Section 29, Township 14 North, Range 10 West, EXCEPT a triangular parcel of land out of the Southeast corner thereof, described as: Beginning at the Southeast corner of said description; thence North 400 feet; thence Southeasterly in a straight line to a point on the South line of said Section which is 400 feet West of the place of beginning; thence East to the place of beginning.

Parcel 25:
Government Lot 8 and the Northwest 1/4 of the Southeast 1/4 lying Southerly and Easterly of Hardy Pond of Section 31, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan.

Parcel 26:
Government Lots 1, 2, 3 and 4, Section 32, Township 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan. AND Southwest 1/4 of the Northeast 1/4 of Section 32, Township 14 North, Range 10 West. AND East 1/2 of the Northeast 1/4, Section 32, Township 14 North, Range 10 West.

Parcel 27:
The South half of the Northwest quarter, and Government Lots 1, 2 3 and 4, Section 1, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 28:
Government Lots 5 and 6, Section 1, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan, excepting therefrom The South 14 feet of the West 200 feet of the Northeast 1/4 of the Southeast 1/4; and the East 28 feet of the Southwest 1/4 of the Southeast 1/4, EXCEPT the South 408.85 feet thereof; all being a part of Section 1, Township 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 29:
Government Lots 1 and 2, Section 11, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 30:
Government Lots 6 and 7, Section 12, Town 13 North, Rang 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 31:
The East half of the Southeast quarter, and the Southwest quarter of the Northeast quarter, and Government Lots 1, 2, 3, 4 and 5 inclusive, Section 12, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 32:
That part of the Southwest quarter of the Southwest quarter, lying Southwesterly of Hardy Pond, Section 12, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 33:
That part of the West half, lying Westerly of Hardy Pond, Section 13, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 34:
The Southwest 1/4 of the Northeast 1/4, the Southwest 1/4 of the Northwest 1/4, the Northwest 1/4 of the Northwest 1/4, the Southeast 1/4 of the Northwest 1/4 and the West 1/2 of the Southwest 1/4, and Government Lots 1, 2, 3, 4, 5, 6, 7 and 8, all in Section 13, Township 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan, EXCEPTING THEREFROM that part of the West 1/2 of said Section lying Westerly of Hardy Pond.

Parcel 35:
That part of the West half of the Southwest quarter, lying Southerly of the River, Section 14, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 36:
The South 1/2 of the Northwest 1/4, the East 1/2 of the Southwest 1/4, the Northwest 1/4 of the Southeast 1/4, and the South 1/2 of the Southeast 1/4, and a parcel of land 18 rods square in the Northwest corner of Government Lot 1, all in Section 14, Township 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 37:
That part of Section 15 North of the River, excepting therefrom, the North half of the Northwest quarter; also except Government Lot 4 Northerly of the pond and Westerly of the bayou; also except that part of the Northeast quarter of the Southeast quarter of the Northeast quarter Northerly of the river; also except the West half of the East half of the Northeast quarter Northerly and Easterly of the river except the North 850 feet thereof; also except the East 330 feet of the East half of the West half of the Northeast quarter lying Northerly and Easterly of the river, except the North 850 feet thereof, all in Township 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 38:
That part of the Northeast quarter of the Southeast quarter of the Northeast quarter Northerly of the river; also the West half of the East half of the Northeast quarter Northerly and Easterly of the river except the North 850 feet thereof; also the East 330 feet of the East half of the West half of the Northeast quarter lying Northerly and Easterly of the river, Section 15, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 39:
That part of Government Lot 4 Northerly of the pond and Westerly of the bayou, Section 15, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 40:

Government Lots 5 and 6, Section 15, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 41:
The Southeast quarter of the Northeast quarter; also, the Southeast quarter of the Southwest quarter; also, The Southwest quarter of the Southeast quarter; also the East half of the Southeast quarter, Section 16, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 42:
That part of the South half of the Southeast quarter, lying southerly of the Muskegon River, and Government Lot 5, all in Section 21, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 43:
The Northwest quarter of the Southeast quarter; and Government Lots 1, 2, 3 and 4, excepting therefrom, the West 660 feet of Government Lot 4, Section 21, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 44:
The West 660 feet of Government Lot 4, Section 21, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 45:
That part of the Northwest quarter of the Northwest quarter, lying North of the river; ALSO Government Lots 7 and 8, all in Section 22, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 46:
The Northeast quarter; ALSO the East half of the Northwest quarter, ALSO Government Lots 1, 2, 3, 4, 5 and 6 inclusive, Section 22, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan, excepting therefrom A parcel of land located in the Northeast 1/4 of Section 22, Town 13 North, Range 11 West, being more particularly described as follows: The Southeast 1/4 of the Northeast 1/4 of said Section 22, excepting therefrom the following described parcel: To find the Place of Beginning, commence at the East 1/4 corner of said Section 22; thence North 89 degrees 40 minutes 26 seconds West along the East and West 1/4 line of said section, 1026.50 feet to the Place of Beginning; thence continuing North 89 degrees 40 minutes 26 seconds West along the East and West 1/4 line of said section, 300 feet to the East 1/8 line of said section; thence North 00 degrees 34 minutes 35 seconds East along the East 1/8 line of said section, 400 feet; thence South 89 degrees 40 minutes 26 seconds East, 300 feet; thence South 00 degrees 34 minutes 35 seconds West, 400 feet to the Place of Beginning. (Bearings are based on the East line of the Southeast 1/4 of said Section 22 assumed as North 00 degrees 17 minutes 11 seconds East).

Parcel 47:
Incomplete description: That part of Government Lots 4 and 5 and the South 400 feet of the West 300 feet of the Southwest quarter of the Northeast quarter, Section 22, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 48:
Government Lot 3, and that part of Government Lots 4, 5 and 6 lying below the waterline of Hardy Pond, all in Section 23, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 49:
That part of Government Lot 4, known as The Southeast quarter of the Northwest quarter, Section 23, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 50:
Government Lots 1 and 2, Section 23, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 51:
The Northeast quarter of the Southeast quarter and that part of Government Lots 4, 5 and 6 lying above the waterline of Hardy Pond, excepting therefrom all that part of Government Lot 4 known as the Southeast quarter of the Northwest quarter, Section 23, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 52:
The Southeast quarter of the Southwest quarter, and the South half of the Southeast quarter, Section 23, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 53:
That part of the Northwest quarter of the Northwest quarter lying Northerly of Hardy Pond, Section 24, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 54:
Government Lots 1 and 2, Section 24, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 55:
The East half of the Northeast quarter; the Southwest quarter of the Northeast quarter; the North half of the Southwest quarter; and Government Lots 3 and 4 except that part of the Northwest quarter o the Northwest quarter lying Northerly of Hardy Pond, all in Section 24, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 56:
Government Lot 3, Section 27, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 57:
Government Lot 1, Section 27, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 58:
The Northwest quarter of the Northeast quarter and Government Lot 2, Section 27, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 59:
The Northwest quarter of the Southwest quarter, Section 27, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 60:
The Southwest quarter of the Northwest quarter; and the Southeast quarter of the Northwest quarter; and Government Lot 5 except the Easterly 200 feet of that part of Government Lot 5 westerly of Hardy Pond, Section 28, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 61:
The Easterly 200 feet of that part of Government Lot 5 Westerly of Hardy Pond; and that part of Government Lot 6 Westerly of Hardy Pond, Section 28, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 62:
That part of the Northeast quarter of the Northeast quarter lying North and East of the river; and the Southeast quarter of the Southeast quarter; and Government Lots 1, 2 and 9, except that part lying South of Croton Hardy Road in Government Lot 2, all in Section 28, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 63:
Government Lots 3, 7 and 8, Section 28, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 64:
Government Lot 1, Section 29, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Parcel 65:
The North 10.01 acres of the Northeast quarter of the Northeast quarter, Section 33, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan.

Hodenpyl Project

2312-01-2101
The Northwest 1/4 of Section 1, Town 23 North, Range 12 West, EXCEPT the Southeast 1/4.

2312-02-1101
The Northeast 1/4 of Section 1, EXCEPT commencing at the intersection of the North line of Section 1 and the West line of the former Manistee & Northeastern Railroad Right of Way, thence West to west right of way line of Mesick Highway, thence South 224 feet, thence West 10 rods, thence South to North boundary former Railroad Right of Way, thence Northeasterly along Railroad Right of Way to point of beginning and EXCEPT the West 1/2 of the Northeast 1/4 lying North of Manistee & Northeastern Railroad Right of Way and commencing South 52 degrees 43' West 1458 feet from the intersection of the Southerly Right of Way line of former Manistee & Northeastern Railroad Right of Way and the Westerly line of Mesick Highway, thence South 37 degrees 17' East 1205.5 feet, thence Westly to the North/South 1/4 line, thence North to Southerly Right of Way, thence Northeasterly along Railroad Right of Way to point of beginning. ALSO East 3/4 of the South 1/2 of Section 2, Town 23 North, Range 12 West, EXCEPT AA Railroad Right of Way.

2312-09-4401
The Southeast 1/4 of the Southeast 1/4 of Section 9, Town 23 North, Range 12 West.

2312-10-1201
The West 1/2 of the Northeast 1/4; the South 1/2 of the Southeast 1/4 of the Northeast 1/4; the Southeast 1/4 EXCEPT the Northwest 1/4 of the Southeast 1/4 lying Northerly and Westerly of the Hodenpyl Dam Pond; the Southwest 1/4 of the Southwest 1/4; and the East 1/2 of the Southwest 1/4 lying Southerly of the former Manistee and Northeastern Railroad right of way, all in Section 10, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan.

2312-10-4201
The Northwest 1/4 of the Southeast 1/4 lying Northerly and Westerly of the Hodenpyl Dam Pond, Section 10, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan.

2312-11-2101
The Southeast quarter (SE1/4) of the Southwest quarter (SW1/4) of Section eleven (11), Township twenty-three (23) North, Range twelve (12) West. AND The Southwest quarter (SW1/4) of the Northwest quarter (NW1/4) and Northwest quarter (NW1/4) of Southwest quarter (SW1/4) of Section eleven (11), all in Township twenty-three (23) North, Range twelve (12) West. AND The East half (E1/2) of the Northwest quarter (NW1/4) and the Northeast quarter (NE1/4) of the Southwest quarter (SW1/4) of Section eleven (11) and that part of the Northwest quarter (NW1/4) of the Northwest quarter (NW1/4) of Section eleven (11) lying East of Manistee River, all in Township Twenty-three (23) North, Range twelve (12) West. AND the North half (N1/2) of the Northwest quarter (NW1/4), West of Manistee River except Railroad Right of Way; Southwest quarter (SW1/4) of Southwest quarter (SW1/4), and a parcel of land two hundred (200) feet East and West by four hundred fifty (450) feet North and South situated in Southwest corner of Southwest quarter (SW1/4) of Northeast quarter (NE1/4), all in Section eleven (11), Township twenty-three (23) North, Range twelve (12) West. LESS AND EXCEPT: That part of the West thirty (30) rods of the Northwest quarter (NW1/4) of the Northwest quarter (NW1/4) of Section eleven (11), Township twenty-three (23) North, Range twelve (12) West, lying Southerly of the Ann Arbor Railroad right of way. LESS AND EXCEPT: That part of the Southwest one-quarter (SE1/4) of the Southwest one-quarter (SW1/4) of Section eleven (11), Township twenty-three (23) North, Range twelve (12) West, lying Southeasterly of the Ann Arbor Railroad right of way. LESS AND EXCEPT: That part of Southeast quarter (SE1/4) of Northwest quarter (NW1/4) lying Northerly of Hodenpyl Dam Pond EXCEPT the East 300 feet thereof.

2312-11-2401
That part of Southeast quarter (SE1/4) of Northwest quarter (NW1/4) lying Northerly of Hodenpyl Dam Pond EXCEPT the East 300 feet thereof.

2312-15-1201
Part of Section 15, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan, described as: The West 3/4 of the North 1/2, EXCEPT the South 4 rods of the Southwest 1/4 of the Northeast 1/4; the East 510 feet of the North 520 feet of the Southwest 1/4; the West 466.5 feet of the North 466.5 feet of the Southwest 1/4; and commencing at the Northwest corner of the Southeast 1/4, thence East 840 feet; thence South 39 degrees West 265 feet; thence South 71 degrees 30 minutes West 710 feet to the 1/4 line; thence North 420 feet to the point of beginning.

2312-16-1101
All of Section 16, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan, EXCEPT Mesick RV Park Campground, also EXCEPT the West 1/2 of the Northwest 1/4, also EXCEPT the Northeast 1/4 of the Northwest 1/4.

2312-16-3101
Part of Section 16, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan, described as follows: The Southeasterly 300 feet of the Northeast 1/4 of the Southwest 1/4 lying Northwesterly of the Hodenpyl Impoundment; also that part of the Southeast 1/4 of the Southwest 1/4 lying Northwesterly of the Hodenpyl Impoundment; also the South 3/4 of the Southwest 1/4 of the Southwest 1/4 below contour 819.7 feet and Northerly of road. ALSO, ingress and egress rights on over and across the abandoned roadway formerly known as Manistee River Drive, leading Southerly and Northeasterly from # 3 1/2 Road in Section 20, to Hodenpyl Dam Road, also called Beers Road, also called Mesick-Marilla Road, in Section 16.

2312-17-4301
The South 1/2 of the Southeast 1/4 of Section 17, Town 23 North, Range 12 West, Except Trailer Park.

2312-17-4401
The Southerly 200 feet of the South 1/2 of the Southeast 1/4 lying Northerly of Hodenpyl Pond, Section 17, Town 23 North, Range 12 West.

2312-19-1301
The entire Section lying South of County Road, except the North 1/2 of the Northeast 1/4 and Except the North 1/2 of the Northwest 1/ 4 and Except that part of the Southeast 1/ 4 of the Northwest 1/ 4 lying Northwesterly of County Road right of way and Except Trailor Park, Section 19, Town 23 North, Range 12 West.

2312-19-2401
All of the following lying Northerly of Hodenpyl pond, South 1/2 of Southeast 1/4, South 1/2 of South 1/2 of Northeast 1/4, South 1/2 of Southeast 1/4 of Northwest 1/4 of Section 19, Town 23 North, Range 12 West.

2312-20-1101

The entire Northeast quarter (NE1/4); East half (E1/2) of Northwest quarter (NW1/4); Southwest quarter (SW1/4) of Northwest quarter (NW1/4); entire Southwest quarter (SW1/4); and Northwest quarter (NW1/4) of Southeast quarter (SE1/4). Also the Northeast quarter (NE1/4) of Southeast quarter (SE1/4); Southwest quarter (SW1/4) of Southeast quarter (SE1/4) and Southeast quarter (SE1/4) of Southeast quarter (SE1/4), all in Section twenty (20), Township twenty-three (23) North, Range twelve (12) West. LESS AND EXCEPT: Southerly 200 feet of the North 1/2 of the Northeast 1/4 and the East 1/2 of the Northeast 1/4 of the Northwest 1/4 lying Northerly of Hodenpyl Pond in Section 20, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan.

2312-20-1102
Southerly 200 feet of the North 1/2 of the Northeast 1/4 and the East 1/2 of the Northeast 1/4 of the Northwest 1/4 lying Northerly of Hodenpyl Pond in Section 20, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan.

2312-21-1201
The entire Northwest quarter (NW1/4); Northwest quarter (NW1/4) of Southwest quarter (SW1/4); South half (S1/2) of Southwest quarter (SW1/4) and Southwest quarter (SW1/4) of Southeast quarter (SE1/4), and West half (W1/2) of Northeast quarter (NE1/4) and Northeast quarter (NE1/4) of Southwest quarter (SW1/4), all in Section twenty-one (21), Township twenty-three (23) North, Range twelve (12) West.
LESS AND EXCEPT: The Southeast 1/4 of the Southwest 1/4 and the Southwest 1/4 of the Southeast 1/4 of Section 21, Town 23 North, Range 12 West. LESS AND EXCEPT AN EASEMENT TO THE STATE OF MICHIGAN: A parcel of land in the Northwest 1/4 of the Southeast 1/4 of Section 21, Town 23 North, Range 12 West, described as follows: To find the place of beginning of this description commence at the South 1/4 post of said section; thence South 89 degrees 36 minutes 45 seconds East along the South line of said section 783.30 feet to the survey center line of Highway M-37; thence North 11 degrees 54 minutes 30 seconds West along the survey center line of Highway M-37 a distance of 419.31 feet to the point of curve at Station 796 57.63 of said highway; thence Northerly along the survey center line of Highway M-37 on a 1 degree 30 minutes curve to the right to a point on the curve at Station 813 55; thence Westerly on a perpendicular to the tangent of said Station 813 55, 150.00 feet to the Westerly right of way line of Highway M-37 and the place of beginning of this description; running thence Northerly along the Westerly right of way line of said highway 300.00 feet; thence Westerly on a perpendicular to the tangent of the last aforementioned point 100.00 feet; thence Southerly parallel to and 100.00 feet distant from the Westerly right of way line of said highway to a point 100.00 feet Westerly of and measured perpendicular to the tangent of the place of beginning; thence Easterly 100.00 feet to the place of beginning.
2312-21-2201
Northwest 1/4 of the Northwest 1/4 lying Northerly of the Hodenpyl Dam Pond, Section 21, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan.

2312-29-1101
The North 1/2 of the North 1/2 of Section 29, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan, EXCEPT the Northeast 1/4 of the Northeast 1/4 of Section 29, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan.

2312-30-1101
The Northeast 1/4 of the Northeast 1/4; the South 1/4 of the Northwest 1/4 of the Northeast 1/4; the Southwest 1/4 of the Northeast 1/4 lying North of Tar Creek; the Northeast 1/4 of the Northwest 1/4; the West 1/2 of the Northwest 1/4, EXCEPT, Commencing 55 feet North and 192.4 feet East of the West 1/4

post; thence East 170 feet; thence North 03 degrees 07 minutes 10 seconds West 316 feet; thence North 76 degrees 57 minutes 10 seconds West 177.05 feet; thence North 53 degrees 44 minutes 30 seconds West 165.41 feet; thence South 86 degrees 52 minutes 50 seconds West 54.65 feet; thence South 252.54 feet; thence South 14 degrees 04 minutes 40 seconds East 153.83 feet; thence South 46 degrees 21 minutes 40 seconds East 91.46 feet; thence East to the Point of Beginning; and the Northwest 1/4 of the Southwest 1/4, all in Section 30, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan.

2312M-111302
A parcel of land two hundred (200) feet East and West by four hundred fifty (450) feet North and South situated in Southwest corner of Southwest quarter (SW1/4) of Northeast quarter (NE1/4) in Section eleven (11), Township twenty-three (23) North, Range twelve (12) West.

2312M-114201
That part of the Southwest quarter (SW1/4) of the Southeast quarter (SE1/4) of Section eleven (11) lying North and West of the Ann Arbor Railroad in Township twenty-three (23) North, Range twelve (12) West. AND Northwest quarter (NW1/4) of Southeast quarter (SE1/4) of Section eleven (11), Township twenty-three (23) North, Range twelve (12) West, EXCEPT the Ann Arbor Railroad right of way across said premises.

2412-36-2301
The South Half (S 1/2) of the Northwest Quarter (NW 1/4) of Section thirty-six (36), Township twenty-four (24), Range twelve (12) West. LESS and EXCEPT: A parcel of land located in the Southeast 1/4 of the Northwest 1/4 of Section 36, Town 24 North, Range 12 West, described as: Commencing at the West 1/4 corner of said Section; thence North 87°46'22" East, 1896.34 feet along the East and West 1/4 line of said Section to the point of beginning of this description; thence continuing North 87°46'22" East, 212.00 feet to a survey iron on the Westerly bank of the Manistee River; thence due North 45 feet; thence Westerly along a line measured 45 feet North of and parallel to the East and West 1/4 line, 212.00 feet; thence South 45 feet to the point of beginning.

2412-36-3302
The East 1/4 of the Southwest 1/4 of the Southwest 1/4; the Southeast 1/4 of the Southwest 1/4; all that part of the Southwest 1/4 of the Southeast 1/4 lying West of the Manistee River; that part of the Northwest 1/4 of the Southeast 1/4 lying South of the Manistee River; the North 96 feet of that part of the South 1/2 of the Southeast 1/4 East of the Manistee River; and commencing at the Southwest corner of Section, North 20°30' East 100 feet, East 200 feet, South 100 feet to the South line of Section, West to the beginning. Portions of this subject property are land locked.

2412-VG-001
The West 3/4 of the Southwest 1/4 of the Southwest 1/4 of Section 36, Township 24 North, Range 12 West, EXCEPT Lots 7, 8, 40, 44, 45, 46, 47, 51, 69, 70, 71, 72 and 98 of the recorded plat of the Village of Glengarry; Subject to the right of way reserved by the Manistee & Northeastern Railroad Company in deeds recorded in Liber 2 of Misc., page 141 and Liber 49, page 451 and the right of way and depot grounds conveyed to the Ann Arbor Railroad Company by deed in Liber 65, page 13. LESS AND EXCEPT: That part of the Southwest 1/4 of the Southwest 1/4 of Section 36, Township 24 North, Range 12 West lying Westerly of the right of way of the former Manistee and Northeastern Railroad. ALSO LESS AND EXCEPT: Lot No. 97 of the recorded plat of the Village of Glengarry, Section 36, Town 24 North, Range

12 West. AND Including: Lot No. 40 of the recorded plat of the Village of Glengarry, Section 36, Town 24 North, Range 12 West.

2412-VS-0103
South 1/2 of the Southeast 1/4 of Section 36, Township 24, Range 12 West, EXCEPT that part lying West of the Manistee River and EXCEPT Lot 1, the North 1/2 of Lot 2, Lots 4, 6, 7 and 8 in Block One (1), of the Village of Sherman, as shown by the recorded plat thereof and EXCEPT Court House Square of the Village of Sherman, and EXCEPT Lot 1, Block Two (2), of the Village of Sherman.

09-024-375-01
The Southeast 1/4 of Section 24, Township 23 North, Range 13 West, EXCEPT the Northwest 1/4 of the Southeast 1/4. ALSO 25 acres in Southwest 1/4 East of Manistee and Northeastern Railroad Right Way.

09-025-100-01
The Northeast 1/4 of Section 25, Township 23 North, Range 13 West, EXCEPT the Southwest 1/4 of the Northeast 1/4, ALSO EXCEPT commencing at the East 1/4 corner, thence North 272.70 feet for a point of beginning, thence North 252.54 feet; thence South 86 degrees 52 minutes 50 seconds West 54.09 feet; thence South 14 degrees 4 minutes 40 seconds East 257.17 feet to the point of beginning. Also the Northeast 1/4 of the Northwest 1/4.

Loud Project

060-021-200-001-00
256 acres in the Northwest 1/4 of Section 21, Town 24 North, Range 6 East, EXCEPT commencing on the North and South line 1305.97 feet North of center of section; thence South 50 degrees 25 minutes 45 seconds West 365.4 feet; thence North 39 degrees 34 minutes 15 seconds West 181 feet; thence North 46 degrees 8 minutes 20 seconds East 160.44 feet; thence North 39 degrees 48 minutes 30 seconds East 162.79 feet; thence North 39 degrees 31 minutes East 142.58 feet; thence South 39 degrees 34 minutes 15 seconds East to North and South line; thence South to Point of Beginning. Also Northeast 1/4 except Southwest 1/4 of Northeast 1/4 and section commencing on the North and South 1/4 line 1305.97 feet North of center of section; thence North 50 degrees 25 minutes 45 seconds East 94.6 feet; thence North 39 degrees 34 minutes 15 seconds West to North and South 1/4 line; thence South to Point of Beginning except part of East 1/2 of Northeast 1/4 lying Northerly and Easterly of center thread of Ausable River.

060-019-200-001-00
Land in the South 1/2 of the Southwest 1/4 of the Southwest 1/4 of the Southeast 1/4, Town 24 North, Range 6 East, Section 19.

Mio Project

Parcel 1:
The South 1/2 of the Southwest 1/4, Section 2, Township 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan. EXCEPT that certain parcel of land located within the Southeast 1/4 of the Southwest 1/4 of Section 2, Township 26 North, Range 2 East, bounded by a line beginning at a point on the North and South 1/4 line along the East boundary of said 40 acre tract 400 feet South of the Northeast corner of said 40 acre tract; thence running North 89 degrees 41 minutes West parallel with the North boundary of said 40 acre tract to the Shore of Mio Pond; thence Southeasterly and Easterly along the shore

of Mio Pond to the intersection of the shore of Mio Pond with the 1/4 line along the East boundary of said 40 acre tract; thence North along said 1/4 line 375 feet to the point of beginning. FURTHER EXCEPT That part of the South 1/2 of the Southwest 1/4 of said Section, lying Southerly of the center thread of the Au Sable River, and also the portion of the island located in the Southwest 1/4 of the Southwest 1/4 of said Section 2 which lies Northerly of said center thread.

Parcel 2:
A parcel of land in the Township of Big Creek, Oscoda County, Michigan, described as: The West 250 feet of the South 57 rods of the Northwest 1/4 of Section 3, Town 26 North, Range 2 East. AND A parcel of land in the Township of Big Creek, Oscoda County, Michigan, described as: The West 250 feet of the Southwest 1/4 of the Northwest 1/4 of Section 3, Town 26 North, Range 2 East, EXCEPTING therefrom the South 57 rods thereof. AND A parcel of land in the Township of Big Creek, Oscoda County, Michigan, described as: The West 384 feet of the Northwest 1/4 of the Northwest 1/4 of Section 3, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan. AND The East 80 feet of the West 330 feet of the Southwest 1/4 of the Northwest 1/4, Section 3, Town 26 North, Range 2 East.

Parcel 3:
The West 1/2 of the Southwest 1/4; That part of the Southeast 1/4 of the Northwest 1/4 covered in the backwaters of Mio Pond; That part of the Southwest 1/4 of the Northeast 1/4, lying Southerly and Westerly of the highway; the Northwest 1/4 of the Southeast 1/4; the Southwest 1/4 of the Southeast 1/4; and the Southeast 1/4 of the Southeast 1/4, Section 3, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan, excepting therefrom, All that part of the Southwest 1/4 of the Southeast 1/4 of Section 3, Town 26 North, Range 2 East, lying Easterly of the Au Sable River and Northerly and Westerly of the county highway. ALSO excepting that part of the East 1/2 of the Southwest 1/4 and West 1/2 of the Southeast 1/4 of said Section 3, all lying Southerly of the center thread of the Au Sable River; and any islands located within Section 3 which lie Northerly of said center thread; EXCEPT a strip of land 330 feet wide across the West 1/2 of Section 11, the Northeast 1/4 of the Northeast 1/4 of the Northwest 1/4 of Section 10 and the Southwest 1/4 of Section 3, Town 26 North, Range 2 East, the Easterly and Northeasterly line of said strip being 115 feet Easterly and 115 feet Northeasterly of the survey center line of an existing transmission line, described as follows: To find the place of beginning of this description, commence at the Southwest corner of said Section 11, run thence North 89 degrees 58 minutes East along the South line of said Section 1547.80 feet to the survey center line of an existing transmission line and the place of beginning of this description; thence North 00 degrees 20 minutes 54 seconds West along said survey center line 2239 feet; thence North 63 degrees 40 minutes 54 seconds West along said center line 4574 feet; thence North 43 degrees 59 minutes 54 seconds West along said centerline approximately 2537 feet to the Southerly bank of Mio Pond on the Au Sable River; thence continuing North 43 degrees 59 minutes 54 seconds West along said center line to the center thread of said river and the place of ending of this description; and FURTHER EXCEPTING that portion of said Section 3 lying Southwesterly of the previously described fee exception.

Parcel 4:
All that part of the Southwest 1/4 of the Southeast 1/4 of Section 3, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan, lying Easterly of the Au Sable River and Northerly and Westerly of the county highway.

Parcel 5:
The East 80 feet of the Southeast 1/4 of the Northeast 1/4 of Section 4, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan.

Parcel 6:
The South 1/2 of Section 4, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan, excepting therefrom that part of the South 1/2 of said Section 4, lying Southerly of the center thread of the Au Sable River, and also any islands located Northerly of the center thread of the Au Sable River within said Section 4.

Parcel 7:
The West 1/2 of the Northeast 1/4, Section 5, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan. AND The Northeast 1/4 of the Southeast 1/4, Section 5, Town 26 North, Range 2 East, excepting therefrom, that part of the Northeast 1/4 of the Southeast 1/4, lying South and Westerly of the center thread of the Au Sable River. AND The Southeast 1/4 of the Northeast 1/4, Section 5, Town 26 North, Range 2 East. AND The Northwest 1/4 of the Southeast 1/4, Section 5, Town 26 North, Range 2 East.

Parcel 8:
Entire Northeast 1/4 and the Northeast 1/4 of the Northwest 1/4, Section 10, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan, EXCEPT that part of the Northeast 1/4 of the Northwest 1/4 and the Northeast 1/4 of said Section 10, all lying Southerly of the center thread of the Au Sable River; and also any island or portions of islands located in the Northeast 1/4 of said section which lie Northerly of said center thread; EXCEPT a strip of land 330 feet wide across the West 1/2 of Section 11, the Northeast ¼ and the Northeast 1/4 of the Northwest 1/4 of Section 10 and the Southwest 1/4 of Section 3, Town 26 North, Range 2 East, the Easterly and Northeasterly line of said strip being 115 feet Easterly and 115 feet Northeasterly of the survey center line of an existing transmission line, described as follows: To find the place of beginning of this description, commence and the Southwest corner of said Section 11, run thence North 89 degrees 58 minutes East along the South line of said Section 1547.80 feet to the survey center line of an existing transmission line and the place of beginning of this description; thence North 00 degrees 20 minutes 54 seconds West along said survey center line 2239 feet; thence North 63 degrees 40 minutes 54 seconds West along said center line 4574 feet; thence North 43 degrees 59 minutes 54 seconds West along said center line approximately 2537 feet to the Southerly bank of Mio Pond on the Au Sable River; thence continuing North 43 degrees 59 minutes 54 seconds West along said center line to the center thread of said river and the place of ending of this description; and further excepting that portion of the Northeast 1/4 of the Northwest 1/4 of Section 10, lying Southwesterly of the previously described fee exception.

Parcel 9:
Entire Section 11, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan, Except the South 30 acres of the Southwest 1/4 of the Southwest 1/4 thereof; EXCEPT that part of the West 1/2 of said Section 11, lying Southerly of the center thread of the Au Sable River; and also any islands or portions of islands located in the West 1/2 of said Section 11, which lie Northerly of said center thread; EXCEPTING from this description the South 30 acres of the Southwest 1/4 of the Southwest 1/4 of said Section 11, and also EXCEPTING a strip of land 330 feet wide across the West 1/2 of Section 11, the Northeast 1/4 and the Northeast 1/4 of the Northwest 1/4 of Section 10 and the Southwest 1/4 of Section 3, Town 26 North, Range

2 East, the Easterly and Northeasterly line of said strip being 115 feet Easterly and 115 feet Northeasterly of the survey center line of an existing transmission line, described as follows: To find the place of beginning of this description, commence at the Southwest corner of said Section 11, run thence North 89 degrees 58 minutes East along the South line of said Section 1547.80 feet to the survey center line of an existing transmission line and the place of beginning of this description; thence North 00 degrees 20 minutes 54 seconds West along said survey center line 2239 feet; thence North 63 degrees 40 minutes 54 seconds West along said centerline 4574 feet; thence North 43 degrees 59 minutes 54 seconds West along said center line approximately 2537 feet to the Southerly bank of Mio Pond on the Au Sable River; thence continuing North 43 degrees 59 minutes 54 seconds West along said center line to the center thread of said river and the place of ending of this description.

Parcel 10:
The Southeast 1/4 of the Northeast 1/4, and the Northeast 1/4 of the Southeast 1/4, Section 12, Town 26 North, Range 2 East, Except 1 square acre in the Southeast corner thereof. Also except any part thereof in the Original Plat of the Village of Mio, ALSO EXCEPT A parcel of land in the Northeast 1/4 of the Southeast 1/4 of Section 12, Township 26 North, Range 2 East, described as: Beginning at a point 2043.68 feet North of the Southeast corner of said Section 12; running thence West 200 feet; thence North 100 feet; thence East 200 feet; thence South 100 feet to the place of beginning. ALSO EXCEPT A piece of parcel of land in the Northeast 1/4 of the Southeast 1/4 of Section 12, Township 26 North, Range 2 East, described as follows: To find the point of beginning of this description, begin at the Southeast corner of said Section, run thence North along the East line of said Section 2043.68 feet to the Southeast corner of a parcel of land previously conveyed by Consumers Power Company to Fred M. Avery and wife, Hortense R., by a deed dated November 28, 1950; thence West along the South line of said land previously conveyed to Avery 200 feet to the Southwest corner of said land previously conveyed to Avery and the place of beginning of this description; running thence West 160 feet; thence North 100 feet; thence East 160 feet to the Northwest corner of said land previously conveyed to Avery; thence South along the West line of said land previously conveyed to Avery 100 feet to the place of beginning. ALSO EXCEPT All that part of the following described Tract "A" which lies Easterly of the proposed Westerly right of way line of Highway M-33/M-72. Tract "A" - The Northeast 1/4 of the Southeast 1/4 of Section 12, Town 26 North, Range 2 East, Big Creek Township, EXCEPTING THEREFROM entire Block 6 of the Plat of the Village of Mio, according to the plat thereof, as recorded in Liber 1 of Plats, Page 1 of Oscoda County Records. Said parcel does include Blocks 1, 2, 3, 4 and 5 of said Plat of the Village of Mio. ALSO EXCEPTING THEREFROM a parcel of land described as: Beginning at a point 2043.6 feet North of the Southeast corner of said Section; thence running West 360 feet; thence North 100 feet; thence East 360 feet; thence South 100 feet to the point of beginning. The proposed Westerly right of way line of Highway M-33/M-72 is described as: To find the place of beginning of said Westerly right of way line commence at the Southeast corner of Section 7, Town 26 North, Range 3 East, Mentor Township; thence North 89 degrees 51 minutes 58 seconds East along the South line of said Section 1.79 feet; thence North 00 degrees 11 minutes 54 seconds West 1600.00 feet to the point of beginning of said Westerly right of way line; thence South 89 degrees 48 minutes 06 seconds West 100.00 feet; thence North 00 degrees 11 minutes 54 seconds West 54.10 feet to the point of curvature of a 2391.83 foot radius curve to the right; thence Northerly along the arc of said curve 450 feet to the point of ending. ALSO EXCEPT A parcel of land in the Village of Mio, being part of the Northeast 1/4 of the Southeast 1/4 of Section 12, Town 23 North, Range 2 East, being more particularly described as: To find the place of beginning of this description commence at the Southeast corner of said Section 12;

thence North 00 degrees 11 minutes 04 seconds West 1335.87 feet along the East line of said Section to the intersection of the centerline of vacated 4th Street and the East line of said Section; thence South 89 degrees 59 minutes 50 seconds West 312.84 feet along said centerline of 4th Street to the East line of Deyarmond Street and the point of beginning of this description; thence continuing South 89 degrees 59 minutes 50 seconds West 66.00 feet along said vacated 4th Street centerline to the West line of Deyarmond Street as in the recorded Plat of the Village of Mio; thence North 00 degrees 12 minutes 48 seconds West 296.75 feet along said West line of Deyarmond Street to the Northeast corner of Block 5 and the South line of 3rd Street of said plat; thence North 89 degrees 47 minutes 01 seconds East 96.00 feet along the South line of said 3rd Street to the Northwest corner of Block 6 of said plat; thence South 00 degrees 12 minutes 48 seconds East 297.00 feet to the point of beginning.

Parcel 11:
All that part of The Northwest 1/4 and the West 1/2 of the Northeast 1/4, lying Northerly of the Mio Pond, Section 12, Town 26 North, Range 2 East, excepting therefrom, that part of the Southwest 1/4 of the Northwest 1/4 lying Westerly of the pond. Also except the Northwest 1/4 of the Northeast 1/4, thereof.

Parcel 12:
All that part of the North 1/2 of the Southwest 1/4 and the Southwest 1/4 of the Southwest 1/4, Town 26 North, Range 2 East, Section 12, EXCEPT that part of the East 1/2 thereof, Southeasterly of a line 150 feet Southeasterly, Beginning 160 feet North of the Southwest corner; thence Northeasterly to the South 1/8 line and the Northwest 1/4 of the Southeast 1/4, EXCEPT land beginning on the North-South 1/4 line at the South 1/8 line; thence East 264 feet; thence North 100 feet; thence Westerly 140 feet North of the point of beginning; thence continuing Westerly 31 feet, Southerly to a point 52 feet West and 120 feet South of the point of beginning; thence Easterly 52 feet; thence North 120 feet to the point of beginning. (County Park Site) Also West and 120 feet South of point of beginning; thence East 52 feet; thence North 120 feet to the point of beginning. (City Park Site)

Parcel 13:
The East 12 rods of the Northeast 1/4 of Section 14, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan, EXCEPT the East 66.00 feet of the following described "Tract A". ALSO EXCEPT that part of the following described "Tract A" lying Easterly and Southeasterly of the following described line: Beginning at a point on the East-West 1/4 line of Section 14, Town 26 North, Range 2 East, that is West 198 feet from the East 1/4 corner of said Section 14; thence North 33.00 feet; thence North 48 degrees 01 minutes 58 seconds East 300 feet to the point of ending, EXCEPTING that part hereinbefore described. The East 12 rods of the Northeast 1/4 of Section 14, Town 26 North, Range 2 East. AND The West 430 feet of the Southeast 1/4 of the Southwest 1/4 of Section 14, Town 26 North, Range 2 East. AND A triangular parcel of land in the Southeast corner of the Southwest 1/4 of the Southwest 1/4 of Section 14, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan, described as follows: To find the place of beginning of this description, commence at the Southwest corner of said Section; run thence North 89 degrees 46 minutes 30 seconds East along the South line of said Section 1324.38 feet to the place of beginning of this description; thence continuing North 89 degrees 46 minutes 30 seconds East along said South line of said Section 4.87 feet to the West 1/8 line of said Section; thence North 00 degrees 17 minutes 24 seconds West along said West 1/8 line of said Section 32.02 feet; thence South 08 degrees 21 minutes 19 seconds West 32.38 feet to the place of beginning. AND A parcel of land in the Township of

Big Creek, described as: The West 30 rods of the Northeast 1/4 of the Southwest 1/4 of Section 14, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan, EXCEPT the North 200 feet of the East 100 feet, said land being more particularly described as follows: To find the place of beginning of this description, commence at the West 1/4 post of said section; run thence North 89 degrees 59 minutes 50 seconds East along the East and West 1/4 line of said Section 1329.72 feet to the West 1/8 line of said Section and the place of beginning of this description; thence continuing North 89 degrees 59 minutes 50 seconds East along said East and West 1/4 line of said Section 395.01 feet; thence South 00 degrees 17 minutes 24 seconds East 200 feet; thence North 89 degrees 59 minutes 50 seconds East 100 feet to the East line of the West 30 rods of the Northeast 1/4 of the Southwest 1/4 of said Section; thence South 00 degrees 17 minutes 24 seconds East along said East line of the West 30 rods of the Northeast 1/4 of the Southwest 1/4 of said Section 1091.4 feet to the South 1/8 line of said Section; thence South 89 degrees 53 minutes 10 seconds West along said 1/8 line of said Section 495 feet to the West 1/8 line of said Section; thence North 00 degrees 17 minutes 24 seconds West along said West 1/8 line of said Section 1292.36 feet to the place of beginning. AND The West 430 feet of the East 1/2 of the Northwest 1/4 of Section 14, Town 26 North, Range 2 East, Big Creek Township, Oscoda County, Michigan.

Parcel 14:
A parcel of land in the Township of Mentor, Oscoda County, Michigan, described as: The Southwest 1/4 of the Northwest 1/4 of Section 7, Township 26 North, Range 3 East, lying North of the Au Sable River and West of the Westerly line of Highway M-33/M-72.

Rogers Project

Parcel 1:
Beginning at the West 1/4 corner of Section 1, Township 14 North, Range 10 West; thence North 223 feet; thence East to river; thence Southwesterly along river to the West section line; thence North 77 feet to the point of beginning.

Parcel 2:
The South 223 feet of the East 174 feet of the Northeast 1/4 of Section 2, Township 14 North, Range 10 West. EXCEPT the plat of Riverside Gardens, according to the recorded plat thereof, Mecosta County Records.

Parcel 3A:
The Northeast 1/4 of the Southeast 1/4, lying East of US 131, Section 10, Township 14 North, Range 10 West.

Parcel 3B:
The Southeast 1/4 of the Northeast 1/4, lying East of US 131, Section 10, Township 14 North, Range 10 West.

Parcel 4:
The West 40 acres of Government Lot 3, Section 11, Township 14 North, Range 10 West, EXCEPT Miller Dale Plat, according to the recorded plat thereof, Mecosta County Records. ALSO Government Lot 4, Section 11, Township 14 North, Range 10 West.

Parcel 5:
Government Lot 5 and Government Lot 11, lying East of State Road, Section 11, Township 14 North, Range 10 West.

Parcel 6A:
Government Lot 1, Section 14, Township 14 North, Range 10 West. ALSO Government Lot 2 West of Old State Road, Section 14, Township 14 North, Range 10 West. ALSO that part of Government Lot 2 lying between U.S. 131 and the old original Grand Rapids and Big Rapids and Big Rapids State Road as follows: Beginning at a point 50 feet West of center line of South abutment of bridge over Muskegon River on U.S. 131 known as Bridge File BR. one of fifty four-Twelve-One F.A. 132; thence 130 feet West along river bank to center line of old original Grand Rapids and Big Rapids State Road; 290 feet in a Southeasterly direction on center of original Grand Rapids and Big Rapids State Road to intersection with West side of U.S. 131 one F.A. 132; thence 230 feet North along West side of U.S. 131 to beginning, Section 14, Township 14 North, Range 10 West. EXCEPTING THEREFROM: A triangular parcel in the Northwest 1/4 of the Southwest 1/4 lying Westerly of U.S. 131 and Easterly of County Road running in Northwesterly and Southeasterly direction across the Northwest 1/4 of the Southwest 1/4 and being bounded on the North by East and West 1/4 line.

Parcel 6B:
A parcel of land 16 rods North and South by 10 rods East and West in the Southwest corner of the Southwest 1/4 of Northeast 1/4 of Section 14, Township 14 North, Range 10 West.

Parcel 7:
That part of Government Lot 2 lying between U.S. 131 and the old original Grand Rapids and Big Rapids and Big Rapids State Road as follows: Beginning at a point 50 feet West of center line of South abutment of bridge over Muskegon River on U.S. 131; thence 130 feet West along river bank to center line of old original Grand Rapids and Big Rapids State Road; thence South 14 degrees 40 minutes 47 seconds West 103.33 feet; thence South 33 degrees 35 minutes 48 seconds East 185.86 feet to West side of U.S. 131; thence North 12 degrees 30 minutes East 230 feet on U.S. 131 to point of beginning.

Parcel 8:
Government Lot 3, Section 14, Township 14 North, Range 10 West. EXCEPT Beginning at Northwest corner; thence East 695 feet; thence South 27 degrees 04 minutes East 207.15 feet; thence Southeasterly along highway on a 03 degree 51 minute 50 second curve 308.20 feet to point of beginning; thence continuing Southeasterly 255 feet; thence South 89 degrees 33 minutes East 250 feet; thence North 08 degrees 20 minutes West 126.21 feet; thence North 13 degrees 23 minutes West 128.7 feet; thence North 89 degrees 33 minutes West 250 feet to point of beginning. ALSO EXCEPT Beginning at Northwest section corner; thence South 74 feet; thence North 88 degrees 51 seconds East to highway; thence Northwesterly

to North section line; thence South 88 degrees 51 seconds West 623.79 feet to point of beginning. ALSO EXCEPT that part conveyed by deeds recorded in Liber 280, Page 174 and Liber 284, Page 490.

Parcel 9:
Lot 17, Riverside Gardens, according to the recorded plat thereof, Mecosta County Records.

Tippy Project

Parcel 1:
A parcel assessed for tax purposes as:
Entire Section 31, Town 22 North, Range 13 West, EXCEPT, Government Lots 1, 2, 3 and 4, but not including dam spillway and power facilities. ALSO EXCEPT, in the North 1/2 of the Northwest 1/4 lying South of the South line of Tower Road extended Westerly to Dilling Road and also that part West of Dilling Road, also except North 1/2 of Northeast 1/4. ALSO EXCEPT, commencing at the Southwest corner of said Section for Point of Beginning, thence South 88 degrees 19 minutes 08 seconds East 1451.25 feet to West 1/8 line, thence North 184.17 feet, thence North 88 degrees 19 minutes 08 seconds West 1449.28 feet, thence South 184.10 feet to Point of Beginning. ALSO EXCEPT, commencing 1330.39 feet North of Southwest corner of said Section for Point of Beginning, thence continuing North 450.34 feet, thence South 88 degrees 11 minutes 08 seconds East 67.07 feet, thence South 339.90 feet to centerline of existing road, thence Southwesterly along arc of curve to left 131.94 feet (chord bears and distance South 30 degrees 30 minutes 17 seconds West 125.71) to Point of Beginning.

Parcel 2:
A parcel assessed for tax purposes as:
Government Lots 3 and 4 of Section 31, Town 22 North, Range 13 West, EXCEPT dam spillway and power facilities. ALSO, North 1/2 of the Northwest 1/4, EXCEPT, that part lying North of South line of Tower Road extension and East of Dilling Road/State Park.

Parcel 3:
Government Lot 2 of Section 36, Town 22 North, Range 14 West.

Parcel 4:
A parcel assessed for tax purposes as:
Part of Government Lot 1 of Section 36, Town 22 North, Range 14 West, commencing at Southeast corner of said Section, thence North 1942.92 feet to Point of Beginning, North 23 degrees 36 minutes 29 seconds West 95.60 feet, thence North 89 degrees 51 minutes 04 seconds West 1285.81 feet, thence North 630.8 feet, thence East to Manistee River, thence Southerly and Easterly upstream along river to East line of said Section, thence South along East line to Point of Beginning.

Parcel 5:
Northwest 1/4 of the Northwest 1/4 of the Northwest 1/4 of Section 5, Town 21 North, Range 13 West lying Southerly of backwaters of Tippy Dam.

Parcel 6:
A parcel assessed for tax purposes as:

All that part of North 3/4 Southwest 1/4 lying Westerly of Tippy Dam backwaters of Section 5, Town 21 North, Range 13 West.

Parcel 7:
Part of the Northeast 1/4 of Section 6, Town 21 North, Range 13 West, more fully described as: Commencing at the East 1/4 corner of said Section 6, thence North 01 degrees 51 minutes 12 seconds East along the East line of said Section 6, 2022.21 feet to Point of Beginning, thence continuing North 01 degrees 51 minutes 12 seconds East 437.15 feet, thence South 66 degrees 32 minutes 35 seconds West 48.93 feet, thence South 87 degrees 41 minutes 47 seconds West 74.31 feet; thence North 67 degrees 21 minutes 31 seconds West, 118.36 feet, thence South 33 degrees 33 minutes 05 seconds West, 337.00 feet, thence South 65 degrees 53 minutes 50 seconds East 438.74 feet to Point of Beginning.

Parcel 8:
A parcel assessed for tax purposes as:
The South 1/2 of the Northwest 1/4 of the Northeast 1/4 and the North 1/2 of the Southwest 1/4 of the Northeast 1/4 of Section 8, Town 21 North, Range 13 West.

Parcel 9:
A parcel of land in the Southwest 1/4 of Section 16, Town 21 North, Range 13 West, described as: Commencing at the Southwest corner of said section, run then South 89 degrees 49 minutes 55 seconds East, along the South line of said Section 925.94 feet, thence North 01 degrees 23 minutes 38 seconds East parallel with the West 1/8 line of said Section 323.98 feet to point which said point is 60 feet distant Northerly of Consumers Power Company's existing towner line, as measured at right angles, and the Place of Beginning for this description; thence continuing North 01 degrees 23 minutes 38 seconds East parallel with said West 1/8 line of said section 1797.29 feet, thence South 89 degrees 45 minutes 23 seconds East, 800 feet; thence South 01 degrees 23 minutes 38 seconds West, parallel with said West 1/8 line 800 feet; thence North 89 degrees 45 minutes 23 seconds West 87.51 feet to the centerline of Dam Road; thence South 08 degrees 13 minutes 10 seconds East along centerline 121.71 feet, thence South 48 degrees 00 minutes 55 seconds West along the center line of said road 391.98 feet; thence South 21 degrees 48 minutes 42 seconds West along the center line of said road 213.61 feet; thence South 50 degrees 03 minutes 21 seconds West along the center line of said road 162.42 feet, thence South 27 degrees 12 minutes 9 seconds West along the center line of said road 50 feet, thence South 09 degrees 21 minutes 16 seconds West 289.18 feet; thence South 31 degrees 32 minutes 07 seconds West 63.32 feet to point 60 feet northerly of the center line of Consumers Power Company's existing tower line, as measured at right angles; thence North 64 degrees 17 minutes 56 seconds West parallel with the center line of said tower line 173.40 feet to Point of Beginning.

<u>Webber Project</u>

Parcel 1:
A strip of land 132 feet in width described as beginning at the low watermark on the Easterly bank of the Grand River at its intersection with the East and West 1/4 line of Section 29, Town 7 North, Range 5 West, running thence South 90 degrees East along said East and West 1/4 line to a point 81.93 feet west (measured along said East and West 1/4 line) from the East line of said Section, thence South 48 degrees East (along

a line hereinafter referred to as Course A) 522.67 feet to the low watermark on the Northerly bank of said river in the West 1/2 of Section 28 of said Township and Range, thence Northeasterly along said river at low watermark to a point 132 feet Northeasterly (measured at right angles) from said Course A, thence North 48 degrees West 581.34 feet to a point 132 feet North (measured at right angles) from the East and West 1/4 line of said Section 29, thence West parallel with said East and West 1/4 line and 132 feet distant North therefrom to the low watermark on the Easterly bank of said river, thence Southerly along said river to the place of beginning.

Parcel 2:
A parcel of land in the Township of Lyons described as: That part of the Southeast fractional 1/4 of Section 32, lying Westerly of the Grand River and below contour 687.80 United States Government Survey Datum, Section 32, Town 7 North, Range 5 West.

Parcel 3:
Beginning at center of Section 33, thence East 120 rods, thence North to the center thread of the Grand River, thence Southwesterly upstream along the center thread of said river to the place of beginning, Section 3, Town 7 North, Range 5 West.

Parcel 4:
A parcel of land in the Township of Lyons, described as: That part of the West 110 acres of the Northwest 1/4 of Section 33, lying Northwesterly of the Grand River and below contour 687.80 United States Government Survey Datum, Section 33, Town 7 North, Range 5 West. A parcel of land in the Township of Lyons described as: That part of the East 47 acres of the Northwest 1/4 of Section 33, lying Northerly of Grand River and Southerly of the angling highway. A parcel of land in the Township of Lyons, described as: That part of the Southwest fractional 1/4 of Section 33 North of the Grand River lying below contour 687.80 United States Government Survey Datum, Section 33, Town 7 North, Range 5 West.

Parcel 5:
That part of the Southwest fractional 1/4 of Section 33, lying South of the Grand River below contour 687.80 United States Government Survey Datum, Section 33, Town 7 North, Range 5 West.
That part of the West 1/2 of the Southeast 1/4 of Section 33 lying Southeasterly of the Grand River and below contour 687.80 United States Government Survey Datum, Section 33, Town 7 North, Range 5 West.
Parcel 6:
So much of that part of the Northeast 1/4 of Section 33, Town 7 North, Range 5 West, lying Westerly of the Grand River, as is included in a strip of land 100 feet wide running across said premises being 50 feet wide on each side of a line which said line is described as beginning on the North line of said Section 33, at a point not more than 300 feet East of the North 1/4 post of said Section, thence running Southeasterly in a straight line to the South line of said above described land at a point not more than 900 feet East of the North and South 1/4 line of said Section 33.

Parcel 7:
Commencing at a point on the North and South 1/4 line of Section 33 in said Township situated 932 feet South of the North 1/4 post of said Section running thence South 89 degrees 50 minutes East 1540 feet; thence North 41 degrees East 510 feet to the Grand River, thence up stream along the river to the North and

South 1/4 line of said Section, thence North on the 1/4 line 472 feet more or less to the place of beginning. Except: A part of the Northeast 1/4 described as commencing at the North 1/4 corner of Section 3, thence South along the North/South 1/4 line 932 feet to the point of beginning; thence North 89 degrees 58 minutes East 452.71 feet, thence South parallel with North/South 1/4 line 483.88 feet, thence North 81 degrees 45 minutes West 457.45 feet to the
North/South 1/4 line; thence North 418 feet along the North/South 1/4 line to the point of beginning.

Parcel 8:
That part of the South 8.35 chains of Section 17, Town 6 North, Range 5 West, and the North 68 rods of Section 20, Town 6 North, Range 5 West, lying Westerly of the Grand River and below Elevation 687.80 United States Government Survey Datum, said land being occupied as one parcel.

Parcel 9:
That part of Section 4, Town 6 North, Range 5 West, lying Northerly of Grand River and below Elevation 687.80 United States Government Survey Datum. Also, that part of Section 4, Town 6 North, Range 5 West, lying Southerly of Grand River and below Elevation 687.80 United States Government Survey Datum.

Parcel 10:
That part of Island No. 1 lying South of the North line and West of the East line of Section 5, Town 6 North, Range 5 West.

Parcel 11:
That part of the East 1/2 of Section 5, Town 6 North, Range 5 West, lying Westerly of Grand River and below Elevation 687.80 United States Government Survey Datum.

Parcel 12:
That part of the West 1/2 of the Southwest 1/4 of Section 3, Town 6 North, Range 5 West, lying Northeasterly of the Grand River and below Elevation 687.80 United States Government Survey Datum.

Parcel 13:
That part of the West 1/2 of Section 20, Town 6 North, Range 5 West, Except the North 68 rods thereof lying Westerly of the Grand River and below Elevation 687.80 United States Government Survey Datum.

Parcel 14:
That part of the West 1/2 of Section 20, Town 6 North, Range 5 West, lying Easterly of the Grand River and below Elevation 687.80 United States Government Survey Datum.

Parcel 15:
That part of the North 1/2 of Section 9, Town 6 North, Range 5 West, lying Northerly of the Grand River and below Elevation 687.80 United States Government Survey Datum. That part of the North 1/2 of Section 9, Town 6 North, Range 5 West, lying Southerly of the Grand River and below Elevation 687.80 United States Government Survey Datum. Islands 19 and 20, Section 9, Town 6 North, Range 5 West.

Parcel 16:
That part of the West 1/2 of Section 17, Town 6 North, Range 5 West, except the South 8.35 chains thereof, lying Westerly of the Grand River and below Elevation 687.80 United States Government Survey Datum. That part of Section 17, Town 6 North, Range 5 West, lying Easterly of the Grand River and below Elevation 687.80 United States Government Survey Datum. Islands 12, 13, 14, and 15, Section 17, Town 6 North, Range 5 West.

Parcel 17:
That part of the Northwest 1/4 of Section 10, Town 6 North, Range 5 West, lying Southeasterly of the Grand River and below Elevation 687.80 United States Government Survey Datum.

EXHIBIT A-2

Project Descriptions

1. **Alcona Project (FERC No. 2447)**. The Alcona Project is located on the Au Sable River in northeastern Michigan, about three miles west of Glennie, Michigan. The Alcona Project was completed in 1924 with a combined capacity of the two turbine-generator units of approximately 8.0MWs. The FERC boundary encompasses approximately 1,800 acres. Of this acreage, 725 acres are dry land, with the remaining balance consisting of the bottom lands for the reservoir.

2. **Calkins Bridge Project (FERC No. 785)**. The Calkins Bridge Project is located on the Kalamazoo River in Allegan County, approximately six miles northwest of the City of Allegan. The Calkins Bridge Project was completed in 1936 with a combined rated capacity of its three units of approximately 2.55 MWs. The FERC boundary encompasses approximately 1,800 acres. Of this acreage, 141 acres are dry land, with the remaining balance consisting of the bottom lands for the reservoir.

3. **Cooke Project (FERC No. 2450)**. The Cooke Project is located on the Au Sable River in Iosco County, downstream from the Five Channels Project, and about twelve miles west of Oscoda, Michigan. The project was completed in 1911 with a combined capacity of the three generating units of approximately 7.5 MWs. The FERC boundary encompasses approximately 2,400 acres. Of this acreage, 773 acres are dry land, with the remaining balance consisting of the bottom lands for the reservoir.

4. **Croton Project (FERC No. 2468)**. The Croton Project construction started in 1904, with the first two generating units coming online in 1907. The second two units were added in 1915 for a total capacity of approximately 9.0 MWs. The Croton Project is located on the Muskegon River, near Croton Township. The Croton Project is downstream of the Rogers and Hardy Projects. The FERC boundary contains approximately 1,600 acres. Of this acreage, 400 acres are dry land, with the remaining balance consisting of the bottom lands for the reservoir.

5. **Five Channels Project (FERC No. 2453)**. The Five Channels Project is located on the Au Sable River about 17 miles west of Oscoda in Iosco County, Michigan, upstream of the Cooke Project impoundment. The Five Channels Project, completed in 1912, has two generating units with a combined capacity of approximately 6.0 MWs. The FERC boundary contains approximately 600 acres. Of this acreage, 350 acres are dry land, with the remaining balance consisting of the bottom lands for the reservoir.

6. **Foote Project (FERC No. 2436)**. The Foote Project is located on the Au Sable River in Iosco County, Michigan, about 6 miles west of Oscoda. The Foote Project was completed in 1918 with a combined capacity of the three turbine-generator units of approximately 9.0 MWs. The FERC boundary contains approximately 3,300 acres. Of this acreage, 1,500 acres is dry land, with the remaining balance consisting of the bottom lands for the reservoir.

7. **Hardy Project (FERC No. 2452)**. The Hardy Project is located on the Muskegon River near Oxbow, Michigan. The Hardy Project was completed in 1931 and is downstream of the Rogers Project and upstream from the Croton Project. The Hardy Project's three generating units have a combined capacity of approximately 32.5 MWs. The FERC boundary contains approximately 8,800 acres. Of this acreage, 5,000 acres are dry land, with the remaining balance consisting of the bottom lands for the reservoir.

8. **Hodenpyl Project (FERC No. 2599)**. The Hodenpyl Project is on the Manistee River, approximately 23 miles northwest of Cadillac, Michigan. The Hodenpyl Project is approximately 12 river miles upstream of the Tippy Project. The dam was completed in 1925 with a combined rated capacity of approximately 18.0 MWs. The FERC boundary contains approximately 4,300 acres. Of this acreage, 2,500 acres is dry land, with the remaining balance consisting of the bottom lands for the reservoir.

9. **Loud Project (FERC No. 2449)**. The Loud Project is located on the Au Sable River in Iosco County, Michigan, upstream from the Five Channels Project. The Loud Project was completed in 1913 with a combined capacity of the two turbine-generators of approximately 4.0 MWs. The FERC boundary contains approximately 1,300 acres. Of this acreage, 510 acres is dry land, with the remaining balance consisting of the bottom lands for the reservoir.

10. **Mio Project (FERC No. 2448)**. The Mio Project is in Oscoda County, Michigan on the Au Sable River near the town of Mio. The Mio Project was completed in 1916 with a combined capacity from its two generating units of approximately 5.0 MWs. The FERC boundary contains approximately 1,800 acres. Of this acreage, 500 acres are dry land, with the remaining balance consisting of the bottom lands for the reservoir.

11. **Rogers Project (FERC No. 2451)**. The Rogers Project is located on the Muskegon River approximately six miles south of Big Rapids, Michigan. Constructed in 1905, and rebuilt after a fire in 1922, the Rogers Project has four generating units that have a combined capacity of approximately 6.72 MWs. The Roger Project is upstream of both Hardy and Croton Dams. The FERC boundary contains approximately 800 acres. Of this acreage, 350 acres are dry land, with the remaining balance consisting of the bottom lands for the reservoir.

12. **Tippy Project (FERC No. 2580)**. The Tippy Project is located on the Manistee River approximately 19 miles east of Manistee, Michigan and approximately 12 river miles downstream of the Hodenpyl Project. The Tippy Project was completed in 1918 and has three generating units that have a combined capacity of approximately 20.0 MWs. The FERC boundary contains approximately 2,800 acres. Of this acreage, 1,500 acres are dry land, with the remaining balance consisting of the bottom lands for the reservoir.

13. **Webber Project (FERC No. 2566)**. The Webber Project is located on the Grand River near Ionia, Michigan. Constructed in 1907, the Webber Project has approximately 3.3 MW of combined capacity from its two generating units. The FERC boundary contains approximately 800 acres. Of this acreage, 140 acres are dry land, with the remaining balance consisting of the bottom lands for the reservoir.

All generating capacity, measurements, and boundary descriptions contained herein are estimates and shall not be relied upon by Purchaser. Additionally, past performance and capacity is not a guarantee of future performance or capacity for each Project. Purchaser may obtain a survey as provided in Section 3.1(b) of the Agreement.

EXHIBIT C

Form of Temporary Substation Easements

TEMPORARY SUBSTATION EASEMENT AGREEMENT

THIS TEMPORARY SUBSTATION EASEMENT AGREEMENT (this "**Agreement**") is made this _____ day of _____, 2___ (the "**Effective Date**"), by and between **CONFLUENCE HYDRO, LLC**, a Delaware limited liability company ("**Grantor**"), a grantor for indexing purposes; and **CONSUMERS ENERGY COMPANY**, a Michigan corporation ("**Grantee**"), a grantee for indexing purposes (the Grantor and Grantee are sometimes referred to individually as the "**Party**" or collectively as the "**Parties**").

W I T N E S S E T H:

1. That for and in consideration of the sum of Ten and 00/100 Dollars ($10.00), cash in hand paid, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Grantor hereby grants and conveys unto Grantee and its apportionees, licensees, permittees, invitees, successors, successors-in-title and assigns, and their respective agents, employees, servants, tenants, subtenants, licensees, permittees, customers, invitees, contractors and subcontractors (collectively, the "**Grantee Parties**"), the following exclusive (except as expressly provided herein) and rights, privileges and easements of right-of-way (collectively, the "**Easements**"):

(a) The rights to lay, construct, install, maintain, improve, alter, inspect, repair, replace, relocate and operate an electric transmission and distribution substation, together with all appurtenances, equipment and facilities necessary or desirable for the purposes of transmitting and distributing electric power and for ancillary telecommunications and other communications purposes (whether or not related to the transmission or distribution of electric power), including, but not limited to, transformers, regulators, capacitors, wires, lines, poles, towers, structures, cables, guy wires, conduits, pipes, mains, manholes, handholes, meters, attachments, ground connections, equipment, fences, telecommunications equipment and all accessories desirable in connection with the foregoing, any of which may be located above or below ground (collectively, the "**Substation Facilities**"), on, under, over, upon, through and across that certain real property of Grantor situated in the County of _____, Michigan (the "**Substation Property**"), which Substation Property is more particularly described on Exhibit B, attached hereto and by this reference made a part hereof (the "**Substation Easement**"). The Substation Easement is designated as [_____] on that certain [plat of survey] entitled [_____], prepared by [_____] and dated [_____] (the "**Plat**"), a copy of which is attached hereto as Exhibit A, and by this reference made a part hereof, and to which Plat reference is hereby made for a more particular description of the Substation Easement.

(b) The non-exclusive rights of vehicular and pedestrian ingress and egress to and from the Substation Property and/or Mobile Substation Property (as defined below) and **[INSERT PUBLIC ROW]** on, under, over, upon, through and across a portion of certain real property of Grantor situated in the County of _____ , Michigan (the "**Access Easement Property**"), which Access Easement Property is more particularly described on Exhibit C, attached hereto and by this reference made a part hereof (the "**Access Easement**"). The Access Easement is designated as [_____] on the Plat, and to which Plat reference is hereby made for a more particular description of the Access Easement.

(c) The right to enter upon and trim, cut, remove, destroy, or otherwise control all trees and vegetation located on that certain real property of Grantor situated in the County of _____, Michigan (the "**Protection Easement Property**"), which Protection Easement Property is more particularly described on Exhibit D attached hereto and by this reference made a part hereof and the right to trim, cut, remove, destroy, or otherwise control all trees and vegetation 80 feet outside of the fence and remove all hazard trees in accordance with the above (the "**Protection Easement**").

(d) The right to from time to time install, operate, maintain, and remove a mobile electric substation (the "**Mobile Substation**"), with associated electric lines and equipment and perimeter fencing, on, under, over, upon, through and across that certain real property of Grantor situated in the County of _____, Michigan (the "**Mobile Substation Property**"), which Mobile Substation Property is more particularly described on Exhibit E, attached hereto and by this reference made a part hereof, together with any temporary pole structures, poles, or any combination of same, wires, cables, conduits, crossarms, braces, guys, anchors, transformers, electric control circuits and devices, location markers and signs, communication systems, utility lines, protective apparatus, and all other equipment, appurtenances, associated fixtures, and facilities or incidental to or for the operation or protection thereof (the "**Mobile Substation Easement**").

The Substation Property, Access Easement Property, the Protection Easement Property, and Mobile Substation Property are hereinafter collectively referred to as the "**Easement Areas**".

2. Grantor and Grantee agree that this Agreement shall be for a term commencing on the Effective Date and terminating on the earlier of: (i) the date on which the Substation Facilities are decommissioned and (ii) ten (10) years following the Effective Date (the "**Term**"), and Grantee has constructed a new substation on certain other real property owned by Grantor. Upon completion of the decommissioning of the Substation Facilities and construction of the new substation on such certain other real property owned by Grantor, as evidenced by written notice from Grantee to Grantor, Grantee shall execute and record a termination and release of this Agreement in form mutually agreeable to Grantor and Grantee.

3. Grantor hereby agrees that among the easement rights conveyed to Grantee and the Grantee Parties are the rights to: (a) clear, remove and dispose of, from time to time, all natural or manmade obstructions in the Substation Property, Mobile Substation Property or on the Access Easement Property and adjacent to and outside the Easement Areas, as Grantee may deem necessary or desirable for the construction, installation, operation, maintenance, repair, relocation, replacement, improvement or alteration of the Substation Facilities; (b) have unobstructed and unrestricted ingress and egress over the Access Easement in order to provide unobstructed and unrestricted access to the Substation Facilities at all times; and (c) keep the Easement Areas clear of all buildings or structures, trees, stumps, roots and undergrowth and to trim or fell any tree outside the Easement Areas which, in the opinion of Grantee, may constitute a hazard or endanger the safe or proper use or operation of the Access Easement or the Substation Facilities, including, but not limited to, any tree that in falling or being felled could come within fifteen (15) feet of the Easement Areas.

4. No buildings or other structures may be constructed in the Easement Areas without the prior written consent of Grantee, which consent may be withheld in Grantee's sole and absolute discretion. With the prior written consent of Grantee, in its sole and absolute discretion, Grantor, its lessees, successors, successors-in-title and assigns, may use the unenclosed portions of the Easement Areas for any purpose not inconsistent with the rights hereby granted (the "**Permitted Encroachments**"), provided that such Permitted Encroachments do not interfere with or endanger any of the Easements or other rights hereby

granted, including, but not limited to, the construction, operation or maintenance of the Substation Facilities or Mobile Substation or ingress to and egress from the Easement Areas and/or or any part thereof. In no event shall Grantor or its lessees, invitees, licensees, successors, successors-in-title or assigns have the right to access any portion of the Substation Easement or any of the Substation Facilities or any portion the Mobile Substation or Mobile Substation Easement when a Mobile Substation is present on the Mobile Substation Easement. Grantee shall at all times have the right to cross or cut through any Permitted Encroachments and upon prior notice to Grantor, when reasonably possible under the circumstances, (except in emergency situations where no notice shall be required), to interrupt, prevent or alter the use thereof, for the purposes of constructing, maintaining, operating, repairing, altering or replacing the Substation Facilities, Mobile Substation, or any part thereof.

5. No delay or interruption by Grantee or Grantee Parties in the use or enjoyment of any right or easement hereby granted shall result in the loss, limitation or abandonment of any of the rights, title, interests, Easements or estates granted hereby. No rights, privileges or Easements granted under this Agreement are intended for public use (other than the use of the Access Easement, the Substation Easement, Protection Easement, and the Mobile Substation Easement by public safety, emergency and fire personnel and vehicles).

6. The Easements and other rights set forth in this Agreement shall be for the use, benefit and enjoyment of Grantee and Grantee Parties. This Agreement, each and all of its terms, conditions and provisions, and the Easements, rights, and privileges created hereby shall be binding upon and shall inure to the benefit of Grantee and Grantor and their respective successors, successors-in-title, and assigns. Grantor agrees that all of the Easements, rights and privileges set forth herein shall touch, concern, burden and run with the title to the Substation Property, Mobile Substation Property, Protection Easement Property, and the Access Easement Property.

7. Grantor hereby represents and warrants that (i) for the duration of the Term, Grantee and Grantee Parties shall have quiet enjoyment and peaceable possession, use and enjoyment of the Easement Areas and (ii) Grantee and Grantor and its successors, successors-in-title and assigns shall execute and deliver such further assurances thereof as may be required.

8. The Substation Facilities and Mobile Substation shall at all times be and remain the property of Grantee. Grantee shall have the right to inspect, rebuild, repair, improve, relocate within the Substation Property and make such changes, alterations, substitutions, additions to or extensions of the Substation Facilities and Mobile Substation as Grantee may from time to time deem advisable.

9. Grantor hereby establishes that, as a covenant running with the title to the Substation Property and Mobile Substation Property and for the benefit of Grantee and Grantee Parties neither Grantor nor any of its successors, successors-in-title or assignor their respective lessees, tenants, customers, invitees, permittees or licensees shall file, assert or maintain, be a party to or permit to be filed, maintained or asserted any suit, cause of action, claim or proceeding of any kind or nature against any one (1) or more of the Grantee or Grantee Parties for any damages (including, but not limited to, indirect, punitive or consequential damages), liabilities, expenses, losses, costs, injuries (including death) or claims based on or in any way arising out of or related to the intrusion, transmittal or occurrence of any noises, sounds, sound waves, light, vibrations or similar effects from the Easements and/or the Substation Facilities or Mobile Substation on, under, over, upon, through, across and around the Substation Property or Mobile Substation Property, nor shall Grantor or any such occupant, user, lessee, tenant, customer, invitee, permittee or licensee of the Substation Property or Mobile Substation Property permit, bring or support any action to modify or change the current zoning or use permitted for the Substation Property or Mobile Substation Property without the prior written consent of Grantee, such consent not to be unreasonably withheld, conditioned or delayed.

10. Each Party (the "**Indemnifying Party**") shall defend, indemnify and hold harmless the other Party (each, an "**Indemnified Party**") from and against any and all third party (excluding affiliates of Indemnified Party) claims, litigation, actions, proceedings, losses, damages, liabilities, obligations, costs and expenses, including reasonable attorneys' fees, court costs and litigation expenses, for personal or property damage (collectively, "**Claims**") suffered or incurred by such Indemnified Party, as a result of a breach of this Agreement by the Indemnifying Party or the Indemnifying Party's negligent or willful misconduct in using the Easement Area. In no event shall either Party be liable to the other Party to the extent any Claim is caused by, arising from or contributed by the negligence or intentional misconduct of such other Party.

11. After the Effective Date, Grantee may, at Grantee's sole cost and expense, deliver to Grantor one or more reasonably requested changes to the terms, legal descriptions and/or location details of the Easements and/or Easement Areas as reflected herein. Upon such request, the Parties shall work in good faith to reach mutual agreement on any such changes, such agreement not to be unreasonably withheld, conditioned or delayed by either Party. The Parties shall execute an amendment to this Agreement in recordable form as may be reasonably necessary to memorialize any such mutually agreed upon changes. If reasonably required by Grantor, Grantor shall in accordance with applicable law and as Grantor may otherwise reasonably deem necessary, give notice to or seek approval (in form and substance reasonably acceptable to Grantor) from the Federal Energy Regulatory Commission ("**Commission**") for any such changes as a condition to executing any such amendment, in which case, the Parties shall cooperate and work in good faith to give such notices or seek such approvals as soon as reasonably practicable. Upon the execution of any such amendment, Grantee shall cause the amendment to be recorded at Grantee's sole cost and expense. For the avoidance of doubt, any costs or expenses reasonably incurred in connection with any changes requested by Grantee pursuant to this Section 11 shall be borne fully by Grantee.

12. This Agreement contains the entire agreement between the parties hereto relating to the subject matter hereof and supersedes all prior and contemporaneous negotiations, understandings and agreements, written or oral, between the parties hereto. This Agreement shall not be amended, modified or terminated and no waiver of any provision hereof shall be effective unless set forth in a written instrument executed with the same formality as this Agreement.

13. If any provision of this Agreement shall be unenforceable in whole or in part, such provisions shall be limited to the extent necessary to render the same valid, or shall be excised from this Agreement, as circumstances require, and this Agreement shall be construed as if such provision had been incorporated herein as so limited or as if such provision had not been included herein, as the case may be.

14. This Assignment may be executed in any number of counterparts, and it shall be sufficient that the signature of each party appears on one or more such counterparts. All counterparts shall collectively constitute a single agreement.

15. All questions with respect to the construction of this Agreement and the rights and liabilities of the parties hereto shall be determined in accordance with the applicable provisions of the laws of the State of Michigan.

16. Notwithstanding any other provision contained herein, Grantor, its successors, and assigns, have the right to perform any and all acts required by the conditions of the license for Project No. [_____], Commission orders, Commission delegated staff orders or directives, or the Commission's regulations in effect from time to time, at any time, without the prior approval of Grantee.

[SIGNATURE PAGES FOLLOW]

IN WITNESS WHEREOF, Grantor and Grantee have caused this Agreement to be executed by their respective duly authorized representatives as of the day and year first above written.

EXHIBIT E-1

Form of Quitclaim Deed

QUITCLAIM DEED

CONSUMERS ENERGY COMPANY (formerly Consumers Power Company), a Michigan corporation, One Energy Plaza, Jackson, Michigan 49201, Grantor,

for the sum of $_____, receipt of which Grantee hereby acknowledges,

quitclaims to

_____, Grantee,

the following described land located in the Township of _____, _____ County, State of Michigan:

See Exhibit A attached hereto.[1]

(IF DECLARATION OF RESTRICTIVE COVENANT WAS RECORDED) subject to the terms conditions, regulations, restrictions, easements, covenants, and other matters of record including a Declaration of Restrictive Covenant recorded on _____ in Liber _____, Page _____, _____County Records, reserving to Grantor, its successors and assigns, forever, the following easements and rights:[2]

a) an easement for the purposes of constructing, operating, maintaining, inspecting (including aerial patrol), surveying, replacing, reconstructing, improving, removing, relocating, changing the size of, enlarging, and protecting a line or lines of electric facilities, said line or lines may vary in voltage from 0-46kV, together with any pole structures, poles, or any combination of same, wires, cables, conduits, crossarms, braces, guys, anchors, transformers, electric control circuits and devices, location markers and signs, communication systems, utility lines, protective apparatus and all other equipment, appurtenances, associated fixtures, and facilities, for existing or future needs, whether above or below grade, useful or incidental to or for the operation or protection thereof, and to conduct such other activities as may be convenient in connection therewith as determined by Grantor for the purpose of transmitting and distributing electricity in, on, over, under, across, and through a 40-foot wide strip of land, with an additional 10-feet of either side of the 40-foot wide strip for temporary workspace described as follows:

   (centerline description)

   together with the right to i) at any time and from time to time enter the land herein conveyed to trim, cut down, destroy, and otherwise remove or control any trees, brush, roots, and other vegetation within this 40-foot wide easement, and ii) at any time and from time to time enter the land herein conveyed to trim, cut down, destroy, and otherwise remove or control any trees, brush, roots, and other vegetation located outside of this 40- foot wide easement which are of such a height or are of such a species whose mature height that in falling directly to the ground could come into contact with the Grantor's, its successors' and assigns, electric facilities located within this 40-foot wide easement. By accepting this deed, Grantee agrees, for

[1] NTD: Tax ID Number to be included with the legal description set forth on Exhibit A.

[2] NTD: Quitclaim Deed to be finalized for each Project based on necessary Reserved Easements.

Grantee and Grantee's heirs, successors, and assigns, that Grantee, and Grantee's heirs, successors, and assigns, shall i) not build, create, construct, or permit to be built, created, or constructed, any obstruction, building, septic system, drain field, fuel tank, pond, swimming pool, lake, pit, well, foundation, engineering works, installation or any other type of structure over, under, or on within said 40-foot wide easement, whether temporary or permanent, natural or man-made; ii) not materially alter the ground elevation within said 40-foot wide easement; and iii) allow Grantor access over the entirety of the land herein conveyed to access said 40-foot wide easement.

b) an easement for the purposes of constructing, operating, maintaining, inspecting (including aerial patrol), surveying, replacing, reconstructing, improving, removing, relocating, changing the size of, enlarging, and protecting a line or lines of electric facilities, said line or lines may vary in voltage from 47-138kV, together with any pole structures, poles, or any combination of same, wires, cables, conduits, crossarms, braces, guys, anchors, transformers, electric control circuits and devices, location markers and signs, communication systems, utility lines, protective apparatus and all other equipment, appurtenances, associated fixtures, and facilities, for existing or future needs, whether above or below grade, useful or incidental to or for the operation or protection thereof, and to conduct such other activities as may be convenient in connection therewith as determined by Grantor for the purpose of transmitting and distributing electricity in, on, over, under, across, and through an 80-foot wide strip of land, with an additional 10-feet of either side of the 80-foot wide strip for temporary workspace described as follows:

(centerline description)

together with the right to i) at any time and from time to time enter the land herein conveyed to trim, cut down, destroy and otherwise remove or control any trees, brush, roots, and other vegetation within this 80-foot wide easement, and ii) at any time and from time to time enter the land herein conveyed to trim, cut down, destroy and otherwise remove or control any trees, brush, roots, and other vegetation located outside of this 80-foot wide easement which are of such a height or are of such a species whose mature height that in falling directly to the ground could come into contact with the Grantor's, its successors' and assigns, electric facilities located within this 80-foot wide easement. By accepting this deed, Grantee agrees, for Grantee and Grantee's heirs, successors, and assigns, that Grantee, and Grantee's heirs, successors, and assigns, shall i) not build, create, construct, or permit to be built, created, or constructed, any obstruction, building, septic system, drain field, fuel tank, pond, swimming pool, lake, pit, well, foundation, engineering works, installation or any other type of structure over, under, or on within said 80-foot wide easement, whether temporary or permanent, natural or man-made; ii) not materially alter the ground elevation within said 80-foot wide easement; and iii) allow Grantor access over the entirety of the land herein conveyed to access said 80-foot wide easement.

c) an easement for the purposes of constructing, operating, maintaining, inspecting (including aerial patrol), surveying, replacing, reconstructing, improving, removing, relocating, changing the size of, enlarging, and protecting a substation with all applicable appurtenances including but not limited to switching stations, transformers, line or lines of electric facilities together with any pole structures, poles, or any combination of same, wires, cables, conduits, crossarms, braces, guys, anchors, transformers, electric control circuits and devices, location markers and signs, communication systems, utility lines, protective apparatus and all other equipment, appurtenances, associated fixtures, and facilities, for existing or future needs, whether above or below grade, useful or incidental to or for the operation or protection thereof, and to conduct such other activities as may be convenient in connection therewith as determined by Grantor, said easement to include the fenced area as well as a 20-foot area outside of the fence allowing for temporary works space, appurtenances including but not limited to grounding pads, switch poles, etc. and screening which may include vegetation, and driveway (ingress/Egress) 20 feet in width.

   a. Also reserving an easement for mobile substation and or battery site, to be placed adjacent to the substation utilizing an area of not more than 100 feet by 100 feet.

(fenced area description)

together with the right to i) at any time and from time to time enter the land herein conveyed to trim, cut down, and otherwise remove or control any trees, brush, roots, and other vegetation within 80 feet of the fenced area, and ii) at any time and from time to time enter the land herein conveyed to trim, cut down, and otherwise remove or control any trees, brush, roots, and other vegetation located within 80 feet of the fenced area are of such a height or are of such a species whose mature height that in falling directly to the ground could come into contact with the Grantor's, its successors' and assigns, electric facilities located within this easement. By accepting this deed, Grantee agrees, for Grantee and Grantee's heirs, successors, and assigns, that Grantee, and Grantee's heirs, successors, and assigns, shall i) not build, create, construct, or permit to be built, created, or constructed, any obstruction, building, septic system, drain field, fuel tank, pond, swimming pool, lake, pit, well, foundation, engineering works, installation or any other type of structure over, under, or on within said easement, whether temporary or permanent, natural or man-made; ii) not materially alter the ground elevation within said easement; and iii) allow Grantor access over the entirety of the land herein conveyed to access said easement.

d) Excepting and reserving to the Grantor, its successor and assigns forever: a) all right, title, and interest in and to all coal, oil, gas, gas and other minerals not including sand, clay, or gravel in or under the surface of the land herein conveyed, and b) the exclusive right to store, restore, and/or protect oil, natural gas, carbon dioxide and other minerals in the subsurface strata underlying said land, but without entering upon the surface of the land herein conveyed.

Notwithstanding any other provision contained herein, in connection with the easements and rights reserved by Grantor herein, Grantee, its successors, and assigns, have the right to perform any and all acts required by the conditions of the license for Project No. _____, Federal Energy Regulatory Commission ("Commission") orders, Commission delegated staff orders or directives, or the Commission's regulations in effect from time to time, at any time, without the prior approval of Grantor.

Grantor may, at Grantor's sole cost and expense, deliver to Grantee one or more requested changes to the terms, legal descriptions and/or location details of the easement rights as reflected herein. Upon such request, the parties shall work in good faith to reach mutual agreement on any such changes, such agreement not to be unreasonably withheld, conditioned or delayed by either party. The parties shall execute a mutually agreed upon instrument in recordable form as may be reasonably necessary to memorialize any such mutually agreed upon changes. If reasonably required by Grantee, Grantee shall in accordance with applicable law and as Grantee may otherwise reasonably deem necessary, give notice to or seek approval (in form and substance reasonably acceptable to Grantee) from the Commission for any such changes as a condition to executing any such instrument, in which case, the parties shall cooperate and work in good faith to give such notices or seek such approvals as soon as reasonably practicable. Upon the execution of any such instrument, Grantor shall cause the instrument to be recorded at Grantor's sole cost and expense.

a) This conveyance is made expressly subject to rights and interests granted by Grantor to Michigan Electric Transmission Company ("METC") in respect to the above-described land as set forth in and on the terms and conditions of a certain Amended and Restated Easement Agreement between Grantor and METC dated April 29, 2002 (the "Easement Agreement"); which Easement Agreement is recorded in various counties, including _____ County where it is recorded in Liber _____ at Page _____.

Grantor does not hereby convey or assign to Grantee any rights to receive any part of the Base Rent payable by METC, its successors or assigns, under the Easement Agreement; and (as provided in Section 10.2 of the Easement Agreement) Grantor reserves all rights to receive said Base Rent in respect to the herein conveyed land.

Grantor also does not convey or assign to Grantee, and Grantor reserves, all rights and interests under Article 5 of the Easement Agreement in respect to the herein conveyed land; such reserved rights and interests expressly including (without limiting any other rights or interests under said Article 5 of the Easement Agreement) all rights under said Article 5: (i) to receive notice of any "Additions/Alterations" (as defined in said Article 5 of the Easement Agreement) to be undertaken by METC on the herein conveyed land, and (ii) to specify and to enforce work and design restrictions and precautions that METC is to follow in connection with an Addition/Alteration.

Grantor also does not convey or assign to Grantee, and Grantor reserves, all rights under, and subject to the terms and conditions of, the Easement Agreement to use and occupy and to authorize any third parties to use and occupy METC's Transmission Facilities with facilities constituting "Compatible Uses" as defined in the Easement Agreement, and to receive all revenues for any such third party uses or occupations of METC's Transmission Facilities.

b) Also reserving to Grantor the easement and right to enter at all times upon the land herein conveyed and to: (a) construct, operate, maintain, repair, inspect (including aerial patrol,) survey, improve, change the size of, enlarge, remove, relocate, reconstruct, and replace any number of existing or future electric and/or communications lines and facilities, which may consist of towers, pole structures, poles, wires, cables, conduits, crossarms, transformers, braces, guys, anchors, antennas and/or other fixtures and appurtenances, on, over, under and across any part of the land herein conveyed, including all public highways upon or adjacent to said land; and (b) cut, trim, remove, destroy or otherwise control any or all trees and brush which may, in the opinion of Grantor, interfere or threaten to interfere with or be hazardous to the construction, operation or maintenance of any of said lines and facilities. Grantee covenants and agrees, as a covenant that will run with the land, that no buildings or other structures will at any time be placed under or over any of said lines or facilities or within such proximity thereto as to interfere with, or in the opinion of Grantor threaten to interfere with, the construction, operation or maintenance of any of said lines or facilities. It is understood that the lines and facilities referred to above in this paragraph may, in whole in or part, be physically located on Transmission Facilities of METC pursuant to applicable provisions of the Easement Agreement, and/or may, in whole or in part, be located on the herein conveyed land separate from and independent of any Transmission Facilities of METC.

Except for the rights and interests under the Easement Agreement that are reserved to Grantor herein, Grantor's rights and interests under the Easement Agreement are, with respect (and only with respect) to the herein conveyed land, hereby conveyed to Grantee. Except specifically in connection with the use or exercise of rights under the Easement Agreement reserved by Grantor herein, Grantor's covenants, agreements and obligations under the Easement Agreement shall, with respect (and only with respect) to the herein conveyed land pass to Grantee and, as expressly provided in Section 10.2 of the Easement Agreement, Grantor shall not hereafter be liable therefore.

It is further understood that as used in any of the foregoing provisions hereof, references to "Grantor," "Grantee" and "METC" shall include their respective successors and assigns.

STATEMENT UNDER MCL 560.109(3): Grantor grants to Grantee the right to make all allowable divisions of the land conveyed, under Section 108 of the Parcels Division Act, 1967 PA 288, as amended.

NOTICE UNDER MCL 560.109(4): The land conveyed may be located within the vicinity of farmland or a farm operation. Generally accepted agricultural and management practices which may generate noise, dust, odors, and other associated conditions may be used and are protected by the Michigan Right to Farm Act.

CONSUMERS ENERGY COMPANY ("Grantor"), whose address is _____, conveys and grants to **CONFLUENCE HYDRO, LLC ("Grantee")**, whose address is _____, the following described land situated in the [City/Township/Village] of _____, County of _____, and State of Michigan, more fully described as follows:

[insert legal description]

Commonly known as: _____
Tax Parcel ID No: _____

together with all rights and easements appurtenant and belonging thereto and all and singular tenements, hereditaments, and appurtenances thereunto belonging or in any way appertaining, for the full consideration of One ($1.00) Dollar, subject to existing easements, interests, encumbrances, and restrictions of record, if any, the lien of taxes not yet due and payable, and all appliable building and zoning ordinances. Grantor covenants and agrees that Grantor has not previously done or committed or willingly suffered to be done or committed any act, matter, or thing that would cause the premises or any part of them to be charged or encumbered in title, estate, or otherwise.

STATEMENT UNDER MCL 560.109(3): The Grantor also grants to the Grantee the right to make all divisions of the land conveyed under Section 108 of the Land Division Act, Act No. 288 of Public Acts of 1967, as amended. Notwithstanding the foregoing, Grantor makes no representations or warranties regarding whether any divisions are available or the number of divisions that may be available or whether any such divisions are permissible under local zoning ordinances.

NOTICE UNDER MCL 560.109(4): The land conveyed may be located within the vicinity of farmland or a farm operation. Generally accepted agricultural and management practices which may generate noise, dust, odors and other associated conditions may be used and are protected by the Michigan Right to Farm Act.

This transfer is exempt from county transfer tax pursuant to MCL 207.505(a) and exempt from state transfer tax pursuant to MCL 207.526(a).

Form of Bill of Sale and General Assignment

[Attached.]

Form of Bill of Sale and General Assignment

This **BILL OF SALE AND GENERAL ASSIGNMENT** (the "Bill of Sale") is executed on [_____ __, 202_] (the "Effective Date") by and between **CONSUMERS ENERGY COMPANY**, a Michigan corporation ("Assignor"), and **CONFLUENCE HYDRO, LLC**, a Delaware limited liability company ("Assignee"). Assignor and Assignee are sometimes referred to herein individually as a "Party" and collectively as the "Parties". Capitalized terms used but not defined in this Bill of Sale shall have the meanings given to such terms in the Purchase and Sale Agreement (defined below).

RECITALS

WHEREAS, Assignor and Assignee have entered into that certain Purchase and Sale Agreement, dated as of September 3, 2025 (the "Purchase and Sale Agreement"), pursuant to which, among other things, Assignor has agreed to sell, transfer, convey, assign and deliver all of its rights, title, interest and Liabilities (other than Excluded Liabilities), and Assignee has agreed to accept and assume all of the rights, title, interest and Liabilities (other than Excluded Liabilities) arising, in and to all of the Project Assets and Assumed Liabilities;

WHEREAS, Assignor desires to sell, transfer, convey, assign and deliver all of its rights, title, interest and Liabilities (other than Excluded Liabilities) in and to the Project Assets (other than the Real Property Agreements and the Fee Simple Real Property) and Assumed Liabilities to Assignee;

WHEREAS, Assignee desires to accept and assume all of the rights, title, interest and Liabilities (other than Excluded Liabilities) arising in and to the Project Assets (other than the Real Property Agreements and the Fee Simple Real Property) and Assumed Liabilities; and

WHEREAS, the execution and delivery of this Bill of Sale by Assignor and Assignee is a condition to the obligations of the Parties to complete the transactions contemplated by the Purchase and Sale Agreement.

NOW, THEREFORE, in consideration of the premises and the mutual representations, warranties, covenants, and agreements set forth in this Bill of Sale and in the Purchase and Sale Agreement, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

AGREEMENT

1. **Sale, Transfer and Assignment of Purchased Assets**. Effective as of the Effective Date, Assignor hereby sells, transfers, conveys, assigns and delivers to Assignee, and Assignee hereby accepts from Assignor, all of Seller's rights, title and interests in, to and under the Project Assets (other than the Real Property Agreements and Fee Simple Real Property), but specifically excluding the Excluded Assets, free and clear of all Liens other than Permitted Exceptions. Delivery of this Bill of Sale constitutes receipt by Assignee of such Project Assets (other than the Real Property Agreements and Fee Simple Real Property), to have and to hold all such Project Assets (other than the Real Property Agreements and Fee Simple Real Property) for Assignee and its successors and assigns for their own use and behalf forever.

2. **Assumption**. Assignee hereby accepts the foregoing assignment and assumes, and agrees to pay, perform according to their terms, satisfy and discharge when due or when required to be performed or

discharged all Assumed Liabilities (other than Assumed Liabilities relating to, arising from or associated with the Real Property Agreements and the Fee Simple Real Property), but specifically excluding the Excluded Liabilities, regardless of whether such Assumed Liabilities arose or were incurred prior to, on or after the Effective Date.

3. **Interpretation**. Nothing in this Bill of Sale, whether express or implied, is intended to or shall be construed to modify, expand or limit in any way the terms of the Purchase and Sale Agreement. To the extent that any provision of this Bill of Sale conflicts or is inconsistent with the terms of the Purchase and Sale Agreement, the Purchase and Sale Agreement will govern.

4. **Binding on Successors and Assigns**. Subject to Section 13.3 (Assignment) of the Purchase and Sale Agreement, this Bill of Sale shall be binding upon and inure to the benefit of the Parties and their respective successors and permitted assigns.

5. **Governing Law; Jurisdiction**. The governing law and jurisdiction provisions set forth in Section 13.5 (Governing Law; Jurisdiction) of the Purchase and Sale Agreement shall apply to this Bill of Sale, *mutatis mutandis*.

6. **Headings**. The headings used in this Bill of Sale are for purposes of convenience only and shall not be used in construing the provisions hereof.

7. **Counterparts**. This Bill of Sale may be executed in any number of counterparts, and it shall be sufficient that the signature of each Party appears on one or more such counterparts. All counterparts shall collectively constitute a single agreement.

Form of Assignment and Assumption of Real Property Agreements

This **ASSIGNMENT AND ASSUMPTION OF REAL PROPERTY AGREEMENTS** (the "Assignment") is executed on [_____, 202_] (the "Effective Date") by and between **CONSUMERS ENERGY COMPANY**, a Michigan corporation ("Assignor"), and **CONFLUENCE HYDRO, LLC**, a Delaware limited liability company ("Assignee"). Assignor and Assignee are sometimes referred to herein individually as a "Party" and collectively as the "Parties". Capitalized terms used but not defined in this Assignment shall have the meanings given to such terms in the Purchase and Sale Agreement (defined below).

RECITALS

WHEREAS, Assignor and Assignee have entered into that certain Purchase and Sale Agreement, dated as of September 3, 2025 (the "Purchase and Sale Agreement"), pursuant to which, among other things, Assignor has agreed to sell, transfer, convey, assign and deliver all of its rights, title, interest and Liabilities (other than Excluded Liabilities), and Assignee has agreed to accept and assume all of the rights, title, interest and Liabilities (other than Excluded Liabilities) arising, in and to all of the Real Property Agreements and Assumed Liabilities (in connection therewith), which include, without limitation, those agreements set forth in Exhibit A attached hereto and by reference made a part hereof;

WHEREAS, Assignor desires to sell, transfer, convey, assign and deliver all of its rights, title, interest and Liabilities (other than Excluded Liabilities) in and to the Real Property Agreements and Assumed Liabilities (in connection therewith) to Assignee;

WHEREAS, Assignee desires to accept and assume all of the rights, title, interest and Liabilities (other than Excluded Liabilities) arising in and to the Real Property Agreements and Assumed Liabilities (in connection therewith); and

WHEREAS, the execution and delivery of this Assignment by Assignor and Assignee is a condition to the obligations of the Parties to complete the transactions contemplated by the Purchase and Sale Agreement.

NOW, THEREFORE, in consideration of the premises and the mutual representations, warranties, covenants, and agreements set forth in this Assignment and in the Purchase and Sale Agreement, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

AGREEMENT

1. **Assignment.** Effective as of the Effective Date, Assignor hereby sells, transfers, conveys, assigns and delivers to Assignee, and Assignee hereby accepts from Assignor, all of Seller's rights, title and interests in, to and under the Real Property Agreements, but specifically excluding the Excluded Assets, free and clear of all Liens other than Permitted Exceptions. Delivery of this Assignment constitutes receipt by Assignee of such Real Property Agreements, to have and to hold all such Real Property Agreements for Assignee and its successors and assigns for their own use and behalf forever.

2. **Assumption.** Assignee hereby accepts the foregoing assignment and assumes, and agrees to pay, perform according to their terms, satisfy and discharge when due or when required to be performed or discharged all Assumed Liabilities (in connection with the Real Property Agreements), but specifically

excluding the Excluded Liabilities, regardless of whether such Assumed Liabilities arose or were incurred prior to, on or after the Effective Date.

3. **Interpretation**. Nothing in this Assignment, whether express or implied, is intended to or shall be construed to modify, expand or limit in any way the terms of the Purchase and Sale Agreement. To the extent that any provision of this Assignment conflicts or is inconsistent with the terms of the Purchase and Sale Agreement, the Purchase and Sale Agreement will govern.

4. **Binding on Successors and Assigns**. Subject to Section 13.3 (Assignment) of the Purchase and Sale Agreement, this Assignment shall be binding upon and inure to the benefit of the Parties and their respective successors and permitted assigns.

5. **Governing Law; Jurisdiction**. The governing law and jurisdiction provisions set forth in Section 13.5 (Governing Law; Jurisdiction) of the Purchase and Sale Agreement shall apply to this Assignment, *mutatis mutandis*.

6. **Headings**. The headings used in this Assignment are for purposes of convenience only and shall not be used in construing the provisions hereof.

7. **Counterparts**. This Assignment may be executed in any number of counterparts, and it shall be sufficient that the signature of each Party appears on one or more such counterparts. All counterparts shall collectively constitute a single agreement.

SECRETARY'S CERTIFICATE OF CONSUMERS ENERGY COMPANY

[•], 202[_]

This Secretary's Certificate is being executed and delivered pursuant to that certain Purchase and Sale Agreement, dated as of September 3, 2025 (as may be amended, restated, supplemented or otherwise modified from time to time, the "Purchase and Sale Agreement"), by and between Consumers Energy Company, a Michigan corporation (the "Company") and Confluence Hydro, LLC, a Delaware limited liability company (the "Purchaser"). Capitalized terms used but not defined herein shall have the meaning ascribed to them in the Purchase and Sale Agreement.

Pursuant to Section 8.2(g) of the Purchase and Sale Agreement, the undersigned hereby certifies to Purchaser, solely in his or her capacity as Secretary or Assistant Secretary of the Company (and not in his or her personal or individual capacity) that:

1. Attached hereto as Exhibit A is a true, accurate and complete copy of a certificate of good standing with respect to the Company, issued by the Secretary of State of the State of Michigan as of [•], 202[_].

2. Attached hereto as Exhibit B is a true, accurate and complete copy of the certificate of incorporation of the Company, as in effect on the date hereof, certified by the Secretary of State of the State of Michigan as of [•], 202[_].

3. Attached hereto as Exhibit C is a true, accurate and complete copy of the resolutions of the Company authorizing the execution, delivery and performance by the Company of the Purchase and Sale Agreement and the Ancillary Agreements to be executed and delivered by the Company in connection with the Purchase and Sale Agreement, and such resolutions are in full force and effect as of the date hereof.

4. Attached hereto as Exhibit D is an incumbency certificate of the officers of the Company, each holding the office(s) set forth opposite his or her name, and the signature appearing opposite such officer's name is his or her genuine signature. As of the date hereof, each such officer is duly authorized to execute the Purchase and Sale Agreement, the Ancillary Agreements, and the other documents, instruments, agreements or certificates to be delivered pursuant thereto.

CONSUMERS ENERGY COMPANY

CLOSING CERTIFICATE

[•], 202[_]

This Closing Certificate (this "Certificate") is provided pursuant to Section 8.2(c) of that certain Purchase and Sale Agreement, dated as of September 3, 2025 (as may be further amended, restated, supplemented or otherwise modified from time to time, the "Purchase and Sale Agreement"), by and between Consumers Energy Company, a Michigan corporation ("Seller"), and Confluence Hydro, LLC, a Delaware limited liability company ("Purchaser"). All capitalized terms used but not defined herein shall have the meanings ascribed to them in the Purchase and Sale Agreement.

The undersigned, acting solely on behalf of Seller in his or her capacity as a duly authorized officer of Seller and not in his or her individual capacity, hereby certifies on behalf of Seller that, as of the date hereof:

1. Seller has performed and complied with, in all material respects, the obligations required by the Purchase and Sale Agreement to be so performed or complied with by Seller prior to or as of the date hereof.

2. The representations and warranties of Seller contained in Article 5 of the Purchase and Sale Agreement were true and accurate on the Effective Date and are true and correct as of the date hereof as though made on and as of the date hereof (except those representations and warranties that address matters only as of a specified date, the accuracy of which shall be determined as of that specified date), except where the failure of such representations and warranties to be so true and correct (without giving effect to any limitation as to "materiality", "Material Adverse Effect" or other similar qualifiers set forth in any individual representation or warranty) would not reasonably be expected, individually or in the aggregate, to have a Material Adverse Effect.

3. Since the Effective Date, there has been no Material Adverse Effect, nor any event or events occurring, and no circumstances existing that, individually or in the aggregate, with or without the lapse of time, would reasonably be expected to result in a Material Adverse Effect.

1. That to the best of Affiant's knowledge, the Owner is the owner of the Premises described in said Title Commitment.

2. That to the best of Affiant's knowledge and except as set forth in the Title Commitment, Owner's fee simple title to the Premises has been peaceable and undisturbed during the time Owner has held fee simple title to the Premises, and that to the best of Affiant's knowledge, title to the Premises has not been disputed or questioned during the time Owner has held fee simple title to the Premises.

3. That to the best of Affiant's knowledge, no proceedings in bankruptcy or receivership have been instituted by or against the Owner within the last ten (10) years, and that to the best of Affiant's knowledge, the Owner has never made an assignment for the benefit of creditors.

4. That to the best of Affiant's knowledge, there is not any action or proceeding now pending in any state or federal court in the United States, to which the Owner is a party and which affects the Premises; nor is there any state or federal court judgment, state or federal tax lien, or any other state or federal lien of any kind or nature against the Owner, which could constitute a lien or charge upon the Premises.

5. That to the best of Affiant's knowledge, during the preceding ninety (90) days there has not been any construction or major repair work performed on the Premises, or, that in the event work has been any construction or major repair work performed on the Premises during such ninety (90) day period, that all such construction and major repair work have been completed and are acceptable to the Owner, the Owner has paid in full all contractors, laborers, and materialmen for such construction or major repair work during such ninety

(90) day period, except as shown on an exhibit attached hereto.

6. That, to the best of Affiant's knowledge, there are not any delinquent real estate taxes or unpaid current real estate taxes affecting the Premises, nor any pending or levied assessments affecting the Premises. That, to the best of Affiant's knowledge, there are no delinquent amounts owed for water, sewer, refuse, or other municipal charges that could constitute a lien on the Premises.

7. That to the best of Affiant's knowledge and except as set forth in the Title Commitment, Owner is not a party to any unrecorded mortgages, conditional bills of sale, retention of title agreements, security agreements, agreements not to sell or encumber, financing statements, or personal property leases, which affect the Premises or which affect any fixtures, appliances, or equipment now installed in or on the Premises

8. (a) That to the best of Affiant's knowledge, all tenants or parties who have leasehold or tenancy rights to occupy any portion of the Premises are those listed on the rent roll annexed hereto as Exhibit "A". (b) That to the best of Affiant's knowledge, no party has any option, right of first offer, or right of first refusal to purchase all or part of the Premises, except: the Amended and Restated Easement Agreement, dated as of April 29, 2002, Between Owner and Michigan Electric Transmission Company, a Michigan corporation.

9. Owner has not entered into any agreement with any commercial real estate broker or property manager for the payment of a fee or real estate commission relating to the purchase, sale, property management, leasing, mortgaging or other licensed services pertaining to the Premises other than such fees or commissions that will be paid in full in connection with the instant transaction, as follows:

   Contract for Technical and Consulting Services, dated as of September 20, 2023, between Owner and Clear Energy Brokerage & Consulting, a Michigan Limited Liability Corporation, as amended. _____

10. Owner will not take any action or fail to take any action that would result in a defect, lien, encumbrance, adverse claim, or other matter (each a "Title Defect") being filed or recorded against the Premises between the effective date of the Title Commitment and the date of recording of the insured documents (the "Gap Period"). In consideration of the Company issuing its policy or policies of title insurance, without an exception on Schedule B thereof for any Title Defect arising or being recorded during the Gap Period, Owner hereby agrees to promptly remove, bond, or otherwise dispose of any Title Defect arising or recorded during the Gap Period.

11. This affidavit is made for the purpose of inducing the Company to issue its policy or policies of title insurance, and Owner acknowledges that, in issuing its policy or policies, the Company is placing material reliance upon the facts stated in this affidavit. Affiant avers the foregoing statements are true and correct to the best of Affiant's knowledge and belief.

WRITTEN CONSENT OF THE SOLE MEMBER OF
CONFLUENCE HYDRO, LLC
a Delaware limited liability company

[●], 202[●]

Confluence Hydro Holdco, LLC, a Delaware limited liability company (the "Member"), the sole member of Confluence Hydro, LLC a Delaware limited liability company ("Company"), acting pursuant to the Limited Liability Company Agreement of the Company, dated as of June 13, 2025 (the "LLCA"), has the power and authority to conduct the business of the Company and does hereby adopt the following recitals and resolutions pursuant to this written consent in lieu of a meeting of the Member (this "Written Consent"), effective as of the date hereof:

RECITALS:

WHEREAS, capitalized terms not otherwise defined herein shall have the meanings set forth in the LLCA or the Purchase and Sale Agreement (defined below), as applicable.

APPROVAL OF PURCHASE OF THE PROJECT ASSETS

WHEREAS, Company is negotiating a Purchase and Sale Agreement (the "Purchase and Sale Agreement") to be entered into by and between Company and Consumers Energy Company, a Michigan corporation ("Seller");

WHEREAS, Seller is the sole owner of the Project Assets and Liabilities;

WHEREAS, Company desires to purchase, acquire and accept from Seller, and Seller desires to sell and assign to Company, the Project Assets and Assumed Liabilities (the "Assets") all in accordance with, and on the terms and subject to, the conditions set forth in the Purchase and Sale Agreement (the "Acquisition").

NOW, THEREFORE, BE IT RESOLVED, that the Member hereby authorizes the execution, delivery and performance of the Purchase and Sale Agreement and each of the Ancillary Agreements to which Company is a party and the consummation of the Acquisition and the other transactions contemplated by the Purchase and Sale Agreement, and each of which are hereby, approved and adopted in all respects by the Member;

RESOLVED, FURTHER, that the Member deems it advisable and in the best interests of Company, and authorizes Company, to consummate the Acquisition and the other transactions contemplated by the Purchase and Sale Agreement;

RESOLVED, FURTHER, that Company be, and hereby is, authorized, empowered, directed and instructed to enter into, deliver, execute and record any declarations, documents, instruments, certificates and assignments and take all actions as may be necessary, desirable or required to finalize and carry out the purpose and intent of the Purchase and Sale Agreement, including, without limitation, the execution, delivery and performance of the Ancillary Agreements, the obligations of Company under the Purchase and Sale Agreement and the signing of such documents as are required to consummate the Acquisition and the other transactions contemplated by the Purchase and Sale Agreement; and

RESOLVED, FURTHER, that Edward Quinn, Craig Herlihy, and Randall Osteen, each in their capacity as an officer of Company (each an "Authorized Officer" and collectively, the "Authorized Officers"), acting alone without the need for joinder with any other Authorized Officer, are hereby authorized, empowered, directed and instructed to execute and deliver for and on behalf of the Member and Company all declarations, agreements, consents, certificates, assignments, instruments and other documents necessary or related to the execution and performance of the Purchase and Sale Agreement.

GENERAL AUTHORIZATION AND RATIFICATION

RESOLVED, that the Authorized Officers each be, and hereby are, authorized, empowered, directed and instructed to take any and all other actions which may be necessary or appropriate in order to effectuate the foregoing resolutions, to execute and deliver any and all other declarations, agreements, consents, certificates, assignments, instruments and other documents related thereto or in connection therewith as such officers shall deem necessary or appropriate and in the best interests of the Member and Company and to carry out the respective responsibilities and obligations of such persons with respect to the transaction contemplated therein; and

RESOLVED, FURTHER, that each and every action and proceeding of the Authorized Officers taken or performed on behalf of the Company in connection with the foregoing transaction, along with all declarations, agreements, consents, certificates, assignments, instruments and other documents previously executed and delivered hereby, are approved, adopted, ratified, affirmed and confirmed in all respects and are made the acts and deeds of the Member and Company.

CONFLUENCE HYDRO, LLC

CLOSING CERTIFICATE

[•], 202[•]

This Closing Certificate (this "Certificate") is provided pursuant to Section 8.3(c) of that certain Purchase and Sale Agreement, dated as of September 3, 2025, (as may be further amended, restated, supplemented or otherwise modified from time to time, the "Purchase and Sale Agreement"), by and between Consumers Energy Company, a Michigan corporation ("Seller"), and Confluence Hydro, LLC, a Delaware limited liability company ("Purchaser"). All capitalized terms used but not defined herein shall have the meanings ascribed to them in the Purchase and Sale Agreement.

The undersigned, acting solely on behalf of Purchaser in his or her capacity as a duly authorized officer of Purchaser and not in his or her individual capacity, hereby certifies on behalf of Purchaser that, as of the date hereof:

1. Purchaser has performed and complied with, in all material respects, the obligations required by the Purchase and Sale Agreement to be so performed or complied with by Purchaser prior to or as of the date hereof.

2. The representations and warranties of Purchaser contained in Article 6 of the Purchase and Sale Agreement were true and accurate on the Effective Date and are true and correct as of the date hereof as though made on and as of the date hereof (except those representations and warranties that address matters only as of a specified date, the accuracy of which shall be determined as of that specified date), except where the failure of such representations and warranties to be so true and correct (without giving effect to any limitation as to "materiality", "Material Adverse Effect" or other similar qualifiers set forth in any individual representation or warranty) would not reasonably be expected, individually or in the aggregate, to have a Material Adverse Effect.

[*Signature page follows.*]

IN WITNESS WHEREOF, the undersigned has duly executed this Certificate as of the date first written above.

EXHIBIT M-1

Environmental Indemnity Agreement

[Attached.]

ENVIRONMENTAL INDEMNITY AGREEMENT

THIS ENVIRONMENTAL INDEMNITY AGREEMENT (this "**Agreement**") is made as of [_____], 2025 (the "**Effective Date**") by **CONFLUENCE HYDRO, LLC**, a Delaware limited liability company ("**Indemnitor**"), and each of the entities who have executed this Agreement pursuant to Section 10 of this Agreement (each, a "**Subsidiary**" and, collectively, the "**Subsidiaries**"), in favor of **CONSUMERS ENERGY COMPANY**, a Michigan corporation (together with its successors and assigns, "**Indemnitee**"), and the other Indemnified Parties (as defined below) (each, a "**Party**" and, collectively, the "**Parties**").

RECITALS:

A. Indemnitor and Indemnitee are parties to that certain Purchase and Sale Agreement, dated as of September 3, 2025 (the "**PSA**"), pursuant to which Indemnitee will sell and transfer, and Indemnitor will purchase and acquire, the Project Assets, on the terms and subject to the conditions provided therein.

B. It is a condition precedent to the sale of the Project Assets pursuant to the PSA that Indemnitor execute and deliver this Agreement pursuant to which Indemnitor agrees to provide the indemnifications, covenants, agreements, representations and warranties described in this Agreement for the benefit of Indemnitee and the other Indemnified Parties.

C. Indemnitor is entering into this Agreement to induce Indemnitee to sell and transfer the Project Assets to Indemnitor pursuant to the PSA.

AGREEMENT:

NOW THEREFORE, in consideration of the premises and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Indemnitor hereby represents, warrants, covenants and agrees for the benefit of Indemnitee and the other Indemnified Parties as follows:

1. **Capitalized Terms; Construction**.

(a) Capitalized Terms Defined in PSA. All capitalized terms used herein which are not defined herein shall have the meaning given to them in the PSA.

(b) Capitalized Terms Defined in this Agreement. As used in this Agreement, the following capitalized terms shall have the following meanings:

(i) The term "**Environmental Claim**" means: (A) any Action by a third party, including a Governmental Authority, where Indemnitee or any other Indemnified Party is named as being wholly or partially responsible or liable for an Assumed Environmental Liability; or (B) any written demand, notice, or statement has been made that would lead a reasonable person to conclude that an Action is likely to be asserted, commenced, taken, or otherwise pursued in the future alleging that Indemnitee or any Indemnified Party is wholly or partially responsible or liable for an Assumed Environmental Liability.

(ii) The term "**Indemnified Parties**" means Indemnitee and any of its Affiliates and any of their respective directors, officers, shareholders, members, managers, partners, employees, subsidiaries, agents, successors and assigns.

(iii) The term "**Environmental Losses**" means any and all direct or indirect Losses of

whatever kind or nature, that are related in any way, in whole or in part, to an Assumed Environmental Liability, including:

(A) damages (including loss of use, diminution of value, or natural resource damages), costs, deficiencies, fees, expenses, claims, suits, judgments, awards (including strict liabilities), forfeitures, settlements, equitable relief of any kind, fines, penalties, charges, costs of Remediation incurred to comply with Environmental Law (whether or not performed voluntarily) or other costs to cure;

(B) amounts paid in settlement;

(C) consequential damages to the extent that Indemnitee or any other Indemnified Party is held liable to a third party for such consequential damages;

(D) litigation costs, including reasonable fees of outside counsel and expert witnesses;

(E) costs of engineers or consultants or other advisors; and

(F) investigation costs (including costs for sampling, testing and analysis of soil, sediment, water, air, building materials, and other materials and substances whether solid, liquid or gas).

(iv) The term "**Recoverable Amount**" means an amount equal to the costs that Indemnitee or any other Indemnified Party hereunder has actually incurred for which a remedy is provided under this Agreement, including indemnification pursuant to Section 4.

(v) The term "**Remediation**" means any response, remedial, removal, or corrective action; any activity to clean up, detoxify, decontaminate, contain, abate, or otherwise remediate any Hazardous Materials; any actions to prevent, cure or mitigate any Release or threatened Release of any Hazardous Materials; any action to comply with any Environmental Law or with any Environmental Permits; any inspection, investigation, study, monitoring, assessment, audit, sampling and testing, laboratory or other analysis, evaluation; or remedial design relating to any Release or threatened Release of Hazardous Materials or to anything referred to herein.

(vi) The term "**Security**" means, in the sole discretion of Indemnitor, either:

(A) A cash deposit in an amount equal to Two Million, Five Hundred Thousand Dollars ($2,500,000) into an interest-bearing subaccount held by Indemnitee at a United States commercial bank having assets of at least Ten Billion Dollars ($10,000,000,000) and a credit rating on its long-term senior unsecured debt of at least 'BBB' from Standard & Poor's Rating Group and 'Baa2' from Moody's Investor Services, Inc. upon the deposit of such cash deposit. Such subaccount will be used for the sole purpose of holding cash deposited by or on behalf of Indemnitor as Security pursuant to this Agreement. Indemnitee will remit to Indemnitor any interest earned in the subaccount on a quarterly basis. Indemnitee will release the outstanding balance in the subaccount, if any, to Indemnitor within five (5) Business Days of Indemnitor delivering Security to Indemnitee in the

form and amount provided in (B) below; or

(B) an irrevocable standby letter of credit in an amount equal to Two Million, Five Hundred Thousand Dollars ($2,500,000) and in form and substance reasonably acceptable to Indemnitee, naming Indemnitee as the party entitled to demand payment and present draw requests that:

I. is issued by a United States commercial bank or trust company organized under the laws of the United States of America or a political subdivision thereof, having assets of at least Ten Billion Dollars ($10,000,000,000) (net of reserves) and a credit rating on its long-term senior unsecured debt of at least 'BBB' from Standard & Poor's Rating Group and 'Baa2' from Moody's Investor Services, Inc. upon the issuance of the irrevocable standby letter of credit;

II. by its terms, permits Indemnitee to draw the entire amount available for the purpose of paying Recoverable Amounts;

III. has an initial term of at least one (1) year with automatic renewal each year unless the issuing commercial bank or trust company provides notice to the Indemnitee at least sixty (60) days prior to its expiration date stating its decision not to renew the irrevocable standby letter of credit;

IV. permits Indemnitee to draw the entire amount available if such letter of credit is not renewed or replaced at least thirty (30) days prior to its stated expiration date with substitute Security in accordance with Section 8; and

V. is transferrable by Indemnitee to any person to which Indemnitee may assign this Agreement.

(c) Rules of Construction. Unless the context otherwise requires:

(i) The definitions in this Section 1 shall apply equally to both singular and plural forms and to correlative forms of the terms defined.

(ii) Whenever the context may require, any pronoun shall include the corresponding masculine, feminine and neuter forms.

(iii) The words "include", "includes" and "including" shall be deemed to be followed by the phrase "without limitation".

(iv) The words "hereby", "herewith", "hereto", "herein", "hereof", "hereunder" and words of similar import refer to this Agreement in its entirety and not to any part hereof.

(v) The word "or" has the inclusive meaning represented by the phrase "and/or".

(vi) Unless the context shall otherwise require, all references herein to Sections shall be deemed references to Sections to this Agreement and references to "paragraphs" or "clauses"

shall be to separate paragraphs or clauses of the section or subsection in which the reference occurs.

(vii) Any references to any Contract (including this Agreement), document or Law shall be deemed to be references to such Contract, document or Law as amended, supplemented or modified from time to time in accordance with its terms and the terms hereof, as applicable, and in effect at any given time (and, in the case of any Law, to any successor provisions).

(viii) References to any Person include references to such Person's successors and permitted assigns, and in the case of any Governmental Authority, to any Person(s) succeeding to its functions and capacities.

(ix) Any reference to any federal, state, local, or foreign statute or Law shall be deemed also to refer to all rules and regulations promulgated thereunder, unless the context shall otherwise require.

(x) All monetary figures shall be in United States Dollars unless otherwise specified.

(xi) The phrase "to the extent" shall mean the degree to which a subject or thing extends, and such phrase shall not simply mean "if".

(xii) All accounting terms used herein and not expressly defined herein shall have the meanings given to them under GAAP.

2. **Environmental Claim Covenants**. Indemnitor covenants and agrees that to the extent Indemnitor receives notice from Indemnitee, or otherwise becomes aware, of an Environmental Claim, Indemnitor shall, at its sole cost and expense:

(a) promptly, but in no event later than seven (7) Business Days after Indemnitor receives notice from Indemnitee, or otherwise becomes aware, of an Environmental Claim (the "**Environmental Claim Notice Date**"), inform Indemnitee in writing of the existence, nature, and circumstances of the Environmental Claim, which notice shall include a copy of any written communication received by Indemnitor providing notice of or otherwise asserting the Environmental Claim;

(b) promptly, but in no event later than the Environmental Claim Notice Date, confirm in writing Indemnitor's commitment and obligation to indemnify, defend and hold harmless Indemnitee and the other Indemnified Parties from and against such Environmental Claim pursuant to the terms of this Agreement;

(c) promptly, but in no event later than ten (10) Business Days after the Environmental Claim Notice Date, inform Indemnitee how Indemnitor will respond to and defend against such Environmental Claim;

(d) on a quarterly basis, and as otherwise reasonably requested by Indemnitee, provide a progress report of such Environmental Claim to Indemnitee and share with Indemnitee any third-party reports and other results (but excluding any privileged attorney-client communications) associated with such Environmental Claim or Indemnitor's response to such Environmental Claim; and

(e) promptly after received or issued by Indemnitor, provide to Indemnitee copies of any written notices or other written communications received or issued by or on behalf of Indemnitor from the Person making such Environmental Claim.

3. **Indemnified Rights/Cooperation and Access**.

(a) Indemnitor shall cooperate with and, promptly upon written request by Indemnitee and at no cost to Indemnitee or any of the other Indemnified Parties, provide or cause to be provided to Indemnitee and any Person(s) designated by Indemnitee, including Environmental consultants, engineers, attorneys, or other professionals engaged by Indemnitee (collectively, "**Environmental Consultant**"), access to the Project Assets, including access to the Projects, the Project Assets and the Calkins Bridge Project Easement Reservation Real Property, as applicable, subject to all third party rights that affect the access, use and operations of the Projects, the Project Assets or the Calkins Bridge Project Easement Reservation Real Property, for purposes of assessing any Environmental Claim that Indemnitee becomes aware of, including after Indemnitee is provided written notice as provided in Section 2(a), *provided, however*, that any assessment of any Environmental Claim performed by Indemnitee or its Environmental Consultant pursuant to this Section 3(a), when the conditions in Section 3(b)(i) or Section 3(b)(ii) are not outstanding, shall be performed at the sole cost and expense of Indemnitee.

(b) If (i) Indemnitor denies its obligation or fails to indemnify, defend and hold harmless Indemnitee and the other Indemnified Parties against Environmental Losses in respect of an Environmental Claim pursuant to this Agreement, or (ii) if Indemnitor otherwise materially breaches or defaults any of its other material obligations under this Agreement in respect of such Environmental Losses or Environmental Claims (such material breaches or defaults of material obligations, collectively, "**Material Indemnification Default**") and Indemnitor fails to cure such Material Indemnification Default within thirty (30) Business Days after written notice thereof, then Indemnitee and any Environmental Consultant shall have the right, but not the obligation, (i) to communicate with the Person making the Environmental Claims, (ii) to enter upon the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property, at all reasonable times, subject to all third party rights that affect the access, use and operations of the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property, and (iii) to assess any and all aspects of such Environmental Claim and Environmental Losses, including the right to conduct any Environmental assessments and/or audit (the scope of which shall be limited to the designated Environmental Claims and Environmental Losses), take samples of soil, sediment, groundwater or other air, water or building materials, and reasonably conduct such other invasive tests as Indemnitee or its Environmental Consultants deem necessary or appropriate; *provided, however*, that Indemnitee and its Environmental Consultants shall use good faith efforts to prudently assess Environmental Claims and Environmental Losses in accordance with all Environmental Laws under this Section 3(b). Once Indemnitee exercises its rights to manage an Environmental Claim or an Environmental Loss as set forth in this Section 3(b), Indemnitor shall no longer manage such Environmental Claim or Environmental Loss, until such time as Indemnitee may, upon notice to Indemnitor, relinquish its rights to manage such Environmental Claim or Environmental Loss; *provided*, *however*, that the obligations of Indemnitor hereunder shall not be negated or otherwise affected by the election of Indemnitee. For the avoidance of doubt, the provisions of this Section 3(b) shall in no way limit Indemnitor's indemnification obligations under Section 4(a). Upon written demand, Indemnitor shall pay or, in the sole and absolute discretion of Indemnitee, reimburse, Indemnitee for the payment of all reasonable fees and disbursements made to Environmental Consultants in connection with the exercise by Indemnitee of its rights set forth in this Section 3(b).

(c) Indemnitee acknowledges that Indemnitor shall have sole control over the means by which Indemnitor complies with the obligation set forth herein, so long as Indemnitor: (i) has timely and affirmatively confirmed the Environmental Claim is subject to indemnification by Indemnitor pursuant to Section 4; (ii) has materially complied with and continues to materially comply with, and is not in material breach or default of, its obligations under this Agreement; (iii) without limiting Indemnitor's right to assert defenses to, or pursue a claim under insurance policies respecting, the Environmental Claim, has timely responded and continues to timely respond to any demand, notice, pleading, and the like in connection with

any proceeding regarding an Environmental Claim; and (iv) conducts and performs such activities in material compliance with the terms of this Agreement; *provided*, *however*, in no event shall Indemnitor waive or purport to waive on behalf of Indemnitee or any other Indemnified Party any defense to any Environmental Claim allegedly resulting from the acts and/or omissions of Indemnitee or any other Indemnified Party or assert that Indemnitee or any other Indemnified Party is a potentially responsible party or liable for such Environmental Claim without Indemnitee's prior written consent. Indemnitor agrees that it shall consult with Indemnitee in advance on any response to an Environmental Claim that reasonably may cause Indemnitee's or any other Indemnified Party's liabilities, obligations and operations and/or defenses to same to be adversely affected.

(d) Indemnitor may condition access by Environmental Consultants, Indemnitee, or any Indemnified Party to the Project Assets pursuant to this Section 3 on (i) avoiding unreasonable interference with Subsidiaries' operations, (ii) delivery of one or more certificates confirming that commercially reasonable insurance coverage in favor of one or more Subsidiaries is in place, and/or (iii) indemnification respecting Losses arising out of such access (other than Losses from the mere discovery of conditions existing as of the time of access).

(e) Nothing in this Agreement shall limit or otherwise affect Indemnitee's access rights to the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property as may be contained in any easement, or other agreement benefitting Indemnitee, including the Reserved Easements or Temporary Substation Easements.

4. **Indemnification.**

(a) Indemnitor covenants and agrees, at its sole cost and expense, to defend, indemnify, reimburse and hold harmless each Indemnified Party from and against any and all Environmental Losses incurred or suffered by any Indemnified Party and against any Environmental Claims arising from, related to or suffered as a result of any Assumed Environmental Liabilities (whether sounding in contract, tort, statute, or whether at Law or in equity, or otherwise), including any and all Environmental Losses imposed upon, incurred or suffered by, or Environmental Claim asserted against, any Indemnified Parties in any way, directly or indirectly, arising out of, related to or suffered as a result of:

(i) any presence, Release or threatened Release of any Hazardous Materials in, on, above, onto, under, or emanating or migrating from the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property;

(ii) any actual or proposed Remediation of any Hazardous Substances at any time located in, on, above, onto, under, or emanating or migrating from the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property, whether or not such Remediation is voluntary (*provided* that such voluntary Remediation is undertaken to comply with Environmental Law) or pursuant to court or administrative order, including any removal, remedial or corrective action;

(iii) any past, present, or future non-compliance or violations of any Environmental Law or Environmental Permit in connection with the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property, or operations thereon, including any failure by Indemnitor or any of its Affiliates, including the Subsidiaries, and any successor in title to any or all of the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property, including by any of their respective directors, officers, shareholders, partners, employees, agents, tenants, contractors of any tier, subcontractors, engineers or consultants (individually, an "**Indemnitor Party**" and, collectively, the "**Indemnitor Parties**") to comply with any

Environmental Law or Environmental Permit;

(iv) any act or omission of any Indemnitor Party in accepting any Hazardous Substances for transport to disposal or treatment facilities, incineration vessels or sites selected by an Indemnitor Party;

(v) any act or omission of any Indemnitor Party in arranging for disposal or treatment, or arranging with a transporter for transport, disposal or treatment, of Hazardous Substances relating to the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property;

(vi) any personal injury, wrongful death, property or other damage arising under any statutory or common law or tort law theory by reason of the wrongful acts or omissions of an Indemnitor Party with respect to Environmental matters, including damages assessed for private or public nuisance or for the conducting of an abnormally dangerous activity on or near the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property;

(vii) the imposition, recording or filing or the threatened imposition, recording or filing of any Lien resulting from an Environmental Claim encumbering the Reserved Easements or the Temporary Substation Easement which would interfere with Indemnitee's rights under the Reserved Easement or the Temporary Substation Easement and/or Indemnitee's personal property, fixtures, and equipment; or

(viii) any administrative processes or proceedings or judicial proceedings in any way connected with any matter indemnified in this Section 4(a).

(b) If any Environmental Claim for which Indemnitee or an Indemnified Party might seek indemnification from Indemnitor under Section 4(a) is threatened or asserted against Indemnitee or an Indemnified Party, then Indemnitee will give Indemnitor written notice thereof and thereafter Indemnitor shall defend, indemnify, reimburse and hold harmless Indemnitee and each other Indemnified Party from and against any and all Environmental Claims and associated Environmental Losses in accordance with Section 4(a); *provided* that the failure to so notify Indemnitor shall not relieve Indemnitor of its obligations hereunder.

(c) Notwithstanding anything to the contrary contained in this Agreement or in the PSA, (i) in no event shall the obligations and liabilities of Indemnitor or the Subsidiaries or the rights and benefits of Indemnitee and any of the other Indemnified Parties, in each case, under this Agreement be limited or restricted in any respect by the terms and conditions of the PSA, including the representation and warranties provided therein, and (ii) there shall be no limit, restriction or cap, whether per Environmental Claim or in the aggregate, in respect of Indemnitor's obligations to protect, defend, indemnify, reimburse, release and hold harmless each Indemnified Party from and against any and all Environmental Losses or Environmental Claims under this Agreement.

5. **Duty to Defend and Attorneys and Other Fees and Expenses**. In connection with Indemnitor's indemnification obligations hereunder, Indemnitor shall, at its sole cost and expense, undertake and diligently prosecute to final conclusion or settlement, the defense of any Environmental Claim (if requested by any Indemnified Party, in the name of the Indemnified Party) by attorneys and other professionals approved by such Indemnified Parties, such approval not to be unreasonably withheld, conditioned or delayed. Indemnitor shall utilize good faith efforts to ensure the settlement of any Environmental Claim fully, finally and unconditionally releases Indemnitees and the other Indemnified Parties from all Environmental Losses with respect to such Environmental Claims. Indemnitor shall not

enter into any settlement of an Environmental Claim without the consent of Indemnitee, which consent shall not be unreasonably withheld or delayed. Until such Environmental Claim is ultimately resolved, Indemnitor shall timely respond to any Environmental Claim in any litigation, administrative or other proceeding. Notwithstanding the foregoing, to the extent that Indemnitor defaults on its duty to defend any Indemnified Party, any Indemnified Party may, in their sole and absolute discretion but at Indemnitor's sole cost and expense, engage their own attorneys and other professionals to defend or assist them, and, at the option of such Indemnified Party, their attorneys shall control the resolution of any claim or proceeding, *provided* that no compromise or settlement shall be entered without Indemnitor's consent, which consent shall not be unreasonably withheld, conditioned or delayed. Furthermore, any Indemnified Party may, at their sole cost and expense, engage their own attorneys and other professionals to assist them in monitoring an Environmental Claim.

6. **Unimpaired Liability**. The obligations and liability of Indemnitor and the Subsidiaries under this Agreement shall in no way be limited or impaired in any respect by any subsequent sale, directly or indirectly, of any or all of the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation or any or all of the ownership interest in any Person owning any or all of the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation who succeeds Indemnitor or any Subsidiary as owner of any or all of the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation. In addition, the obligations of Indemnitor and the Subsidiaries under this Agreement shall in no way be limited or impaired by (a) the accuracy or inaccuracy of the representations and warranties made by Indemnitee under the PSA, or (b) Indemnitee's failure to take any action to enforce the terms of the PSA whether with or without notice to Indemnitor or the Subsidiaries and with or without consideration.

7. **Pollution Legal Liability Insurance**. On the Effective Date, Indemnitor shall deliver to Indemnitee, and thereafter maintain during the term of this Agreement, the PLLI. Indemnitor shall not cause or allow the PLLI to lapse or be modified or amended or any claim under the PLLI settled and/or released without Indemnitee's prior written consent. Indemnitor shall cause the renewal or replacement of the PLLI at least thirty (30) days before its expiration or termination.

8. **Security**.

(a) No later than five (5) Business Days after the Effective Date, Indemnitor shall deliver to Indemnitee and thereafter maintain the Security during the term of this Agreement. Indemnitee shall be entitled to draw upon the Security if (a) such amount is a Recoverable Amount and (b) Indemnitee provides to Indemnitor reasonable detail of such Recoverable Amount. Upon any such draw, Indemnitor will have five (5) Business Days to replace any amount drawn on the Security. The Security contemplated in this Section 8 constitutes security for, but does not limit, Indemnitor's obligations or liabilities hereunder and shall not be Indemnitee's exclusive remedy for Indemnitor's breach of or failure to perform under this Agreement. Nor does the limitation on Indemnitee's ability to draw upon the Security only for Recoverable Amounts limit Indemnitor's obligations or liabilities hereunder.

(b) Indemnitor shall cause the renewal or replacement of the Security at least thirty (30) days before its expiration or termination. If the Security has not been renewed or replaced and less than thirty (30) days remain before its expiration or termination, then Indemnitee may draw the full undrawn amount of the Security.

(c) Indemnitor grants to Indemnitee a first priority continuing security interest, lien, and right and setoff in, to and against all Security posted with Indemnitee to secure Indemnitor's full, faithful and timely payment and performance of all of Indemnitor's obligations under this Agreement. Without limiting Indemnitee's other rights hereunder, upon a breach or default under this Agreement, Indemnitee may exercise the rights and remedies of Indemnitee as a secured party, exercise its rights of

setoff, and draw on any outstanding Security free from any claim or right of any nature whatsoever of Indemnitor or any person claiming through Indemnitor.

9. **Assignment**.

(a) Neither Indemnitor nor any Subsidiary may assign, in whole or in part, any of its obligations or liabilities under this Agreement without the prior written consent of Indemnitee, such consent not to be unreasonably withheld or delayed; provided, however, that (i) Indemnitor may assign this Agreement to an Affiliate to whom Indemnitor has assigned the Power Purchase Agreement pursuant to and in accordance with Section 16.1 of the Power Purchase Agreement, provided that such Affiliate assignee expressly assumes in writing all of Indemnitor's obligations hereunder in a form reasonably acceptable to Indemnitee and (ii) any Subsidiary may assign this Agreement to an Affiliate who is acquiring from such Subsidiary its Project, provided that (A) such Affiliate assignee expressly assumes in writing all of Subsidiary's obligations hereunder in a form reasonably acceptable to Indemnitee and (B) assignment by such Subsidiary is in accordance with Section 16.3 of the Power Purchase Agreement.

(b) Notwithstanding the foregoing, a Subsidiary may not assign all or substantially all of the assets constituting a Project, other than to a Person who expressly assumes in writing all of such Subsidiary's obligations hereunder in a form reasonably acceptable to Indemnitee.

10. **Subsidiary Joint and Several Liability**. Notwithstanding any provisions to the contrary contained in this Agreement, each Subsidiary that is a signatory to this Agreement shall be jointly and severally liable with Indemnitor, for all of Indemnitor's indemnity and payment obligations set forth in this Agreement. Each Subsidiary's execution of this Agreement shall be deemed to constitute its agreement to the terms of this Section 10 and those provisions expressly applicable to the Subsidiaries, including Sections 6 and 9. Nothing in this Section 10 shall limit or restrict in any respect the liability of Indemnitor under this Agreement, including in the event of failure of any Subsidiary to perform its obligations in accordance with this Section 10.

11. **Enforcement**. The Indemnified Parties may enforce the obligations of Indemnitor without first resorting to, or exhausting any other remedy; *provided*, *however*, that nothing herein shall prevent, limit or otherwise restrict Indemnitee from suing on the PSA or exercising any other rights and remedies thereunder. It is not necessary for Indemnitee to bring a claim or take any action under the PSA in order for Indemnitee or any of the other Indemnified Parties to exercise their rights pursuant to this Agreement. Indemnitor is fully liable for all obligations and liabilities under this Agreement and such liability is not subject to, restricted by or otherwise limited in any respect by the PSA, including by any limitations on liability set forth in the PSA.

12. **Set Off**.

(a) After exhausting the Security, including any timely replenishment of such Security as set forth in Section 8(a), Indemnitee shall have the right to setoff amounts due to Indemnitee or any other Indemnified Party under this Agreement against any and all amounts now or hereafter owed by Indemnitee to Indemnitor or any of the Subsidiaries (or any of their respective Affiliates), including any and all amounts or other compensation due and owing by Indemnitee under the Power Purchase Agreement, provided, however, that Indemnitee may only setoff amounts or other compensation due under the Power Purchase Agreement if such amount is a Recoverable Amount for which Indemnitee has provided reasonable detail to Indemnitor; provided further, that the limitation on Indemnitee's ability to set-off amounts or other compensation due under the Power Purchase Agreement only if such is a Recoverable Amount in no way limits Indemnitor's obligations or liabilities hereunder.

(b) If any dispute arises under this Section 12 which is not resolved in the ordinary course of business, the Party raising such dispute shall notify, in writing, the other Party of the dispute, which notification must include a written explanation of the dispute and the material details of the notifying Party's position as to the dispute (the "Dispute Notification"). Upon issuance of the Dispute Notification set forth in this Section 12:

(i) the Administrative Committee (as defined in the Power Purchase Agreement) shall meet within ten (10) Business Days of issuance of such Dispute Notification and in good faith attempt to resolve the dispute within ten (10) Business Days thereafter, and to produce written terms of settlement for the dispute (a "**Settlement Agreement**"). If the Administrative Committee is unable to resolve a dispute pursuant to this Section 12(b)(i), and produce a Settlement Agreement within thirty (30) Days after the date of their first meeting, or if no meeting of the Administrative Committee has taken place within fifteen (15) Days; then

(ii) each Party shall nominate a senior executive with authority to decide or resolve the matter in dispute and provide notice thereof to the other Party within five (5) Days after delivery of such notice; *provided*, *however*, that such senior executives shall not be involved in the day-to-day management of the transaction contemplated hereunder. Such senior executives shall meet within ten (10) Business Days of issuance of such dispute notification and in good faith attempt to resolve the dispute within ten (10) Business Days thereafter, and to produce a Settlement Agreement. If the senior executives are unable to resolve a dispute pursuant to this Section 12(b)(ii), and to produce a Settlement Agreement within thirty (30) Days after the date of their first meeting, or if no meeting of senior executives has taken place within fifteen (15) Days after both senior executives were nominated; then

(iii) either Party shall have the right to seek any remedies in law or in equity, subject to any applicable limitations of remedies or damages under this Agreement.

13. **Survival**. The obligations, agreements, covenants and liabilities of Indemnitor and the Subsidiaries under this Agreement shall fully survive indefinitely.

14. **Recitals**. The recitals are incorporated herein by reference.

15. **Interest**. Any amounts payable to Indemnitee or any other Indemnified Party under this Agreement shall become immediately due and payable on demand and, if not paid within thirty (30) days of such demand, shall bear interest at the lesser of (a) the "Federal Funds Rate" as determined by, and published on the public website of, the Federal Reserve Bank of New York on the date that such interest begins to accrue, or (b) the maximum legal rate which Indemnitor may by Law pay or the Indemnified Parties may charge and collect, from the date payment was due until but not including the date of payment.

16. **Waivers**. To the maximum extent permitted by applicable Law, Indemnitor relinquishes all rights and remedies accorded by applicable Law to indemnitors or guarantors, except any rights of subrogation which Indemnitor may have, *provided* that the indemnity provided for hereunder shall neither be contingent upon the existence of any such rights of subrogation nor subject to any claims or defenses whatsoever which may be asserted in connection with the enforcement or attempted enforcement of such subrogation rights, including: (a) any claim that such subrogation rights were abrogated by any acts of Indemnitee or of any other Indemnified Party; (b) the right to assert a counterclaim, other than a mandatory or compulsory counterclaim, in any action or proceeding brought against or by any Indemnified Party; (c) notice of acceptance hereof and of any action taken or omitted in reliance hereon; (d) presentment for payment, demand of payment, protest or notice of nonpayment or failure to perform or observe, or other

proof, or notice or demand; and (e) all homestead exemption rights against the obligations hereunder and the benefits of any statutes of limitations or repose.

17. **Subrogation**. Indemnitor shall take any and all reasonable actions, including institution of Action against third parties, necessary or appropriate to obtain reimbursement, payment or compensation from such Persons responsible for the presence of any Hazardous Materials at, in, on, under or near the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property or otherwise obligated by Law to bear the cost. In the event of a default of Indemnitor's obligations hereunder, the Indemnified Parties shall be and hereby are subrogated to all of Indemnitor's rights now or hereafter in such claims.

18. **Representations and Warranties**. Indemnitor and each Subsidiary represents and warrants that:

(a) it is a limited liability company duly formed, validly existing and in good standing under the Laws of the State of Delaware, and it has all requisite limited liability company power and authority to carry on its business as it is currently conducted;

(b) it has the full limited liability company authority to execute and deliver this Agreement and to perform its obligations hereunder;

(c) its execution and delivery of, and compliance with, this Agreement is in the ordinary course of business and the execution and delivery, and performance of its obligations under, this Agreement, does not and the consummation of the transactions contemplated hereby will not:

(i) conflict with or result in a breach of, or constitute a default under (or constitute an event that, with notice or lapse of time or both, would constitute a default under), its organizational documents;

(ii) conflict with, or result in a breach of, or constitute a default under (or constitute an event that, with notice or lapse of time or both, would constitute a default under) or give rise to a right of termination, cancellation, modification or acceleration of any obligation, to any put or call or similar rights, or to loss of a benefit, in each case, under any material Contract or material Permit to which it is a party or by which its assets are bound; or

(iii) conflict with, or result in a violation or breach, in each case, in any material respect of any applicable Law;

(d) there is no Action outstanding or pending or threatened, in each case, by it or against it, in each case (or in the aggregate), (i) relating to this Agreement; (ii) which would reasonably be expected to result in the issuance of an Order restraining, enjoining or otherwise prohibiting or making illegal the performance of its obligations hereunder; or (iii) would reasonably be expected to have a material adverse effect on its ability to carry on its business substantially as now conducted or to perform its obligations, agreements and covenants hereunder;

(e) it has obtained or made all consents, approvals, authorizations, waivers, licenses, registrations, declarations, qualifications, filings or notices of or to Persons, including Governmental Authorities, that are required in connection with the execution and delivery by it of this Agreement and the performance of its obligations, agreements and covenants hereunder;

(f) this Agreement has been duly executed and delivered by it and constitutes its valid, legal and binding obligations, enforceable against it in accordance with its terms, except as such enforceability may be limited by applicable bankruptcy, insolvency, moratorium, reorganization or other similar laws affecting the enforcement of creditors' rights and subject to general equitable principles; and

(g) no petition or notice has been presented, no order has been made and no resolution has been passed for its bankruptcy, liquidation, winding-up or dissolution; no receiver, trustee, custodian or similar fiduciary has been appointed over the whole or any part of its assets or its income; and it has no plan or intention of, nor has it received any written notice that any other Person has any plan or intention of, filing, making or obtaining any such petition, notice, order or resolution or of seeking the appointment of a receiver, trustee, custodian or similar fiduciary.

19. **No Waiver.** No delay by Indemnitee or any other Indemnified Party in exercising any right, power or privilege under this Agreement shall operate as a waiver of any such right, power or privilege.

20. **Notices**. All notices or other communications required or provided to be sent by any party hereto shall be in writing and shall be sent by: (a) any nationally known overnight delivery service for next-day delivery; (b) delivered in person; or (c) by e-mail. A notice sent by delivery service shall be deemed received on the date noted as delivered on the receipt. A notice delivered in person shall be deemed effective on the date when received. A notice sent by email shall be effective if receipt is acknowledged by the intended recipient. All notices shall be addressed to the parties hereto at the addresses below:

Attn: Brian Kelly
Email: bkelly@mcguirewoods.com

Any address or name specified above may be changed by notice given to the addressee by the other party hereto in accordance with this Section 20. The inability to deliver notice because of a changed address of which no notice was given as provided above, or because of rejection or other refusal to accept any notice, shall be deemed to be the receipt of the notice as of the date of such inability to deliver or rejection or refusal to accept. Any notice to be given by any party hereto may be given by the counsel for such party.

21. **Duplicate Originals; Counterparts**. This Agreement may be executed in any number of duplicate originals and each duplicate original shall be deemed to be an original. This Agreement may be executed in several counterparts, each of which counterparts shall be deemed an original instrument and all of which together shall constitute a single agreement. The failure of any party hereto to execute this Agreement, or any counterpart hereof, shall not relieve the other signatories from their obligations hereunder.

22. **No Oral Change**. This Agreement, and any provisions hereof, may not be modified, amended, waived, extended, changed, discharged or terminated orally or by any act or failure to act on the part of Indemnitee or any other Indemnified Party, but only by an agreement in writing signed by Indemnitee and Indemnitor against whom enforcement of any modification, amendment, waiver, extension, change, discharge or termination is sought.

23. **Headings, Etc**. The headings and captions of various Sections of this Agreement are for convenience of reference only and are not to be construed as defining or limiting, in any way, the scope or intent of the provisions hereof.

24. **Successors and Assigns**. Subject to Section 9, this Agreement shall be binding upon and insure to the benefit of the parties hereto and their respective permitted successors and assigns.

25. **No Jury Trial; Venue**.

(a) Each party hereto agrees that any suit, action, or proceeding, whether claim or counterclaim, brought or instituted by Indemnitee or any other Indemnified Party on or with respect to this Agreement or which in any way relates, directly or indirectly, to this Agreement or any event or occurrence arising out of or in any way connected with this Agreement shall be tried only by a court and not by a jury. **TO THE FULLEST EXTENT PERMITTED BY LAW, EACH PARTY HERETO HEREBY EXPRESSLY WAIVES ANY RIGHT TO A TRIAL BY JURY IN ANY SUCH SUIT, ACTION, OR PROCEEDING DIRECTLY OR INDIRECTLY ARISING OUT OF, UNDER OR IN CONNECTION WITH THIS AGREEMENT. EACH PARTY HERETO FURTHER WAIVES ANY RIGHT TO CONSOLIDATE ANY ACTION IN WHICH A JURY TRIAL HAS BEEN WAIVED WITH ANY OTHER ACTION IN WHICH A JURY TRIAL CANNOT BE OR HAS NOT BEEN WAIVED.**

(b) Each party hereto: (i) agrees that any Action arising out of or based upon this Agreement or the subject matter hereof shall be brought only in the courts of the State of Michigan or the United States District Court for the Eastern District of Michigan; (ii) irrevocably submits itself to the exclusive jurisdiction of the such courts for the purpose of any Action arising out of or based upon this Agreement or the subject matter hereof; (iii) waives, and agrees not to assert, by way of motion, as a defense

or otherwise, in any such Action, any claim that it is not subject personally to the jurisdiction of the above named courts, that its property is exempt or immune from attachment or execution, that the action is brought in an inconvenient forum, that the venue of such Action is improper or that this Agreement or the subject matter hereof may not be enforced in or by such court; (iv) consents to the transfer of any Action filed in another court to an applicable court identified in clause (i) above; and (v) consents to service of process by registered mail at the address to which notices are to be given if personal service is not, with the exercise of commercially reasonable efforts, possible.

26. **Rights Cumulative**. The rights and remedies herein provided are cumulative and not exclusive of any rights or remedies which Indemnitee or any other Indemnified Party has under any Contract or at law or in equity.

27. **Inapplicable Provisions**. If any term, condition or covenant of this Agreement shall be held to be invalid, illegal or unenforceable in any respect, this Agreement shall be construed without such provision.

28. **Governing Law**. THIS AGREEMENT SHALL BE GOVERNED AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF MICHIGAN WITHOUT REGARD TO THE PRINCIPLES OF CHOICE OF LAW OR CONFLICTS OF LAW.

Memorandum of Environmental Indemnity Agreement

MEMORANDUM OF ENVIRONMENTAL INDEMNITY AGREEMENT

THE STATE OF MICHIGAN §
COUNTY OF _____ §

KNOW ALL PERSONS BY THESE PRESENTS: §

THIS MEMORANDUM OF ENVIRONMENTAL INDEMNITY AGREEMENT (this "**Memorandum**"), is made, dated and effective as of _____, 20___ (the "**Effective Date**"), by **CONFLUENCE HYDRO, LLC**, a Delaware limited liability company of _____ ("**Indemnitor**"), and each of the entities who have executed the Agreement (as defined below) pursuant to Section 10 of the Agreement (each, a "**Subsidiary**" and, collectively, the "**Subsidiaries**"), and **CONSUMERS ENERGY COMPANY**, a Michigan corporation, of _____ ("**Indemnitee**"), and the other Indemnified Parties (as defined in the Agreement) (each a "**Party**" and, collectively, the "**Parties**"), with regards to the following:

1. PSA. Indemnitor and Indemnitee are parties to that certain Purchase and Sale Agreement, dated as of September 3, 2025 (the "**PSA**"), pursuant to which Indemnitee will sell and transfer, and Indemnitor will purchase and acquire, the Project Assets, on the terms and subject to the conditions provided therein.

2. Environmental Indemnity Agreement. Indemnitor, Subsidiaries, and Indemnitee are parties to that certain Environmental Indemnity Agreement dated as of even date herewith (the "**Agreement**"), pursuant to which Indemnitor agreed to provide certain indemnifications, covenants, agreements, representations, and warranties described in the Agreement for the benefit of Indemnitee and the other Indemnified Parties in connection with the Project Assets including certain real property described on Exhibit A attached hereto and by reference made a part hereof. All terms not defined in this Memorandum shall have the meaning ascribed to such terms in the Agreement.

3. Environmental Claim Covenants. Indemnitor has covenanted and agreed that to the extent Indemnitor receives notice from Indemnitee, or otherwise becomes aware, of an Environmental Claim, Indemnitor shall, at its sole cost and expense:

(a) promptly, but in no event later than the Environmental Claim Notice Date, inform Indemnitee in writing of the existence, nature, and circumstances of the Environmental Claim, which notice shall include a copy of any written communication received by Indemnitor providing notice of or otherwise asserting the Environmental Claim;

(b) promptly, but in no event later than the Environmental Claim Notice Date, confirm in writing Indemnitor's commitment and obligation to indemnify, defend and hold harmless Indemnitee and the other Indemnified Parties from and against such Environmental Claim pursuant to the terms of the Agreement;

(c) promptly, but in no event later than ten (10) Business Days after the Environmental Claim Notice Date, inform Indemnitee how Indemnitor will respond to and defend against such Environmental Claim;

(d) on a quarterly basis, and as otherwise reasonably requested by Indemnitee, provide a progress report of such Environmental Claim to Indemnitee and share with Indemnitee any third-party reports and other results (but excluding any privileged attorney-client communications) associated with such Environmental Claim or Indemnitor's response to such Environmental Claim; and

(e) promptly after received or issued by Indemnitor provide to Indemnitee copies of any written notices or other written communications received or issued by or on behalf of Indemnitor from the Person making such Environmental Claim.

4. Indemnified Rights/Cooperation and Access.

(a) Indemnitor shall cooperate with and, promptly upon written request by Indemnitee and at no cost to Indemnitee or any of the other Indemnified Parties, provide or cause to be provided to Indemnitee and any Person(s) designated by Indemnitee, including Environmental Consultants, access to the Project Assets, including access to the Projects, the Project Assets and the Calkins Bridge Project Easement Reservation Real Property, as applicable, subject to all third party rights that affect the access, use and operations of the Projects, the Project Assets or the Calkins Bridge Project Easement Reservation Real Property, for purposes of assessing any Environmental Claim that Indemnitee becomes aware of, including after Indemnitee is provided written notice as provided in the Agreement; provided, however, that any assessment of any Environmental Claim performed by Indemnitee or its Environmental Consultant pursuant to Section 3(a) of the Agreement, when the conditions in Section 30(i) or Section 30(ii) of the Agreement are not outstanding, shall be performed at the sole cost and expense of Indemnitee.

(b) If (i) Indemnitor denies its obligation or fails to indemnify, defend and hold harmless Indemnitee and the other Indemnified Parties against Environmental Losses in respect of an Environmental Claim pursuant to the Agreement, or (ii) if Indemnitor otherwise has a Material Indemnification Default, and Indemnitor fails to cure such Material Indemnification Default within thirty (30) Business Days after written notice thereof, then Indemnitee and any Environmental Consultant shall have the right, but not the obligation, (i) to communicate with the Person making the Environmental Claims, (ii) to enter upon the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property, at all reasonable times, subject to all third party rights that affect the access, use and operations of the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property, and (iii) to assess any and all aspects of such Environmental Claim and Environmental Losses, including the right to conduct any Environmental assessments and/or audit (the scope of which shall be limited to the designated Environmental Claims and Environmental Losses), take samples of soil, sediment, groundwater or other air, water or building materials, and reasonably conduct such other invasive tests as Indemnitee or its Environmental Consultants deem necessary or appropriate; provided, however, that Indemnitee and its Environmental Consultants shall use good faith efforts to prudently assess Environmental Claims and Environmental Losses in accordance with all Environmental Laws under Section 3(b) of the Agreement. Once Indemnitee exercises its rights to manage an Environmental Claim or an Environmental Loss as set forth in the Agreement, Indemnitor shall no longer manage such Environmental

Claim or Environmental Loss, until such time as Indemnitee may, upon notice to Indemnitor, relinquish its rights to manage such Environmental Claim or Environmental Loss; provided, however, that the obligations of Indemnitor under the Agreement shall not be negated or otherwise affected by the election of Indemnitee. For avoidance of doubt, the provisions of Section 3(b) of the Agreement in no way limit Indemnitor's indemnification obligations under Section 4(a) of the Agreement. Upon written demand, Indemnitor shall pay or, in the sole and absolute discretion of Indemnitee, reimburse, Indemnitee for the payment of all reasonable fees and disbursements made to Environmental Consultants in connection with the exercise by Indemnitee of its rights set forth in the Agreement.

(c) Indemnitee acknowledges that Indemnitor shall have sole control over the means by which Indemnitor complies with the obligation set forth in the Agreement, so long as Indemnitor: (i) has timely and affirmatively confirmed the Environmental Claim is subject to indemnification by Indemnitor pursuant to the Agreement; (ii) has materially complied with and continues to materially comply with, and is not in material breach or default of, its obligations under the Agreement; (iii) without limiting Indemnitor's right to assert defenses to, or pursue a claim under insurance policies respecting, the Environmental Claim, has timely responded and continues to timely respond to any demand, notice, pleading, and the like in connection with any proceeding regarding an Environmental Claim; and (iv) conducts and performs such activities in material compliance with the terms of the Agreement; *provided*, *however*, in no event shall Indemnitor waive or purport to waive on behalf of Indemnitee or any other Indemnified Party any defense to any Environmental Claim allegedly resulting from the acts and/or omissions of Indemnitee or any other Indemnified Party or assert that Indemnitee or any other Indemnified Party is a potentially responsible party or liable for such Environmental Claim without Indemnitee's prior written consent. Indemnitor agrees that it shall consult with Indemnitee in advance on any response to an Environmental Claim that reasonably may cause Indemnitee's or any other Indemnified Party's liabilities, obligations and operations and/or defenses to same to be adversely affected.

(d) Indemnitor may condition access by Environmental Consultants, Indemnitee, or any Indemnified Party to the Project Assets on (i) avoiding unreasonable interference with Subsidiaries' operations, (ii) delivery of one or more certificates confirming that commercially reasonable insurance coverage in favor of one or more Subsidiaries is in place, and/or (iii) indemnification respecting Losses arising out of such access (other than Losses from the mere discovery of conditions existing as of the time of access).

5. Indemnification.

(a) Indemnitor covenants and agrees, at its sole cost and expense, to defend, indemnify, reimburse and hold harmless each Indemnified Party from and against any and all Environmental Losses incurred or suffered by any Indemnified Party and against any Environmental Claims arising from, related to or suffered as a result of any Assumed Environmental Liabilities (whether sounding in contract, tort, statute, or whether at Law or in equity, or otherwise), including any and all Environmental Losses imposed upon, incurred or suffered by, or Environmental Claim asserted against, any Indemnified Parties in any way, directly or indirectly, arising out of, related to or suffered as a result of:

(i) any presence, Release or threatened Release of any Hazardous Materials in, on, above, onto, under, or emanating or migrating from the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property;

(ii) any actual or proposed Remediation of any Hazardous Substances at any time located in, on, above, onto, under, or emanating or migrating from the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property, whether or not such Remediation is voluntary (provided that such voluntary Remediation is undertaken to comply with Environmental Law) or pursuant to court or administrative order, including any removal, remedial or corrective action;

(iii) any past, present, or future non-compliance or violations of any Environmental Law or Environmental Permit in connection with the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property, or operations thereon, including any failure by Indemnitor or any Indemnitor Parties to comply with any Environmental Law or Environmental Permit;

(iv) any act or omission of any Indemnitor Party in accepting any Hazardous Substances for transport to disposal or treatment facilities, incineration vessels or sites selected by an Indemnitor Party;

(v) any act or omission of any Indemnitor Party in arranging for disposal or treatment, or arranging with a transporter for transport, disposal or treatment, of Hazardous Substances relating to the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property;

(vi) any personal injury, wrongful death, property or other damage arising under any statutory or common law or tort law theory by reason of the wrongful acts or omissions of an Indemnitor Party with respect to Environmental matters, including damages assessed for private or public nuisance or for the conducting of an abnormally dangerous activity on or near the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation Real Property;

(vii) the imposition, recording or filing or the threatened imposition, recording or filing of any Lien resulting from an Environmental Claim encumbering the Reserved Easements or the Temporary Substation Easement which would interfere with Indemnitee's rights under the Reserved Easement or the Temporary Substation Easement and/or Indemnitee's personal property, fixtures, and equipment; or

(viii) any administrative processes or proceedings or judicial proceedings in any way connected with any matter indemnified in the Agreement.

(b) If any Environmental Claim for which Indemnitee or an Indemnified Party might seek indemnification from Indemnitor under Section 4(a) of the Agreement is threatened or asserted against Indemnitee or an Indemnified Party, then Indemnitee will give Indemnitor written notice thereof and thereafter Indemnitor shall defend, indemnify, reimburse and hold harmless Indemnitee and each other Indemnified Party from and against any and all Environmental Claims and associated Environmental Losses in accordance with Section 4(a) of the Agreement; *provided* that the failure to so notify Indemnitor shall not relieve Indemnitor of its obligations thereunder.

6. Unimpaired Liability. The obligations and liability of Indemnitor and the Subsidiaries under the Agreement shall in no way be limited or impaired in any respect by any subsequent sale, directly or indirectly, of any or all of the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation or any or all of the ownership interest in any Person owning any or all of the Projects, the

Project Assets, or the Calkins Bridge Project Easement Reservation who succeeds Indemnitor or any Subsidiary as owner of any or all of the Projects, the Project Assets, or the Calkins Bridge Project Easement Reservation.

7. Pollution Legal Liability Insurance. Indemnitor shall deliver to Indemnitee, and thereafter maintain during the term of the Agreement, the PLLI.

8. Security. Indemnitor shall deliver to Indemnitee and thereafter maintain and replace, as applicable, the Security pursuant to the terms and conditions of Section 8 of the Agreement. Indemnitee shall be entitled to draw upon the Security pursuant to the terms and conditions of Section 8 of the Agreement. Indemnitee shall have a first priority continuing security interest, lien, and right and setoff in, to and against all Security posted with Indemnitee pursuant to the terms and conditions of Section 8 of the Agreement.

9. Assignment. Neither Indemnitor nor any Subsidiary may assign, in whole or in part, any of its obligations or liabilities under the Agreement without the prior written consent of Indemnitee, such consent not to be unreasonably withheld or delayed; provided, however, that (i) Indemnitor may assign the Agreement to an Affiliate pursuant to the requirements set forth in the Agreement and (ii) any Subsidiary may assign this Agreement to an Affiliate who is acquiring from such Subsidiary its Project pursuant to the requirements set forth in the Agreement.

10. Subsidiary Joint and Several Liability. Pursuant to the terms and provisions of the Agreement, each Subsidiary that is a signatory to the Agreement shall be jointly and severally liable with Indemnitor, for all of Indemnitor's indemnity and payment obligations set forth in this Agreement.

11. Set Off. Indemnitee shall have certain rights of setoff with respect to amounts due to Indemnitee or any other Indemnified Party, as set forth in Section 11 of the Agreement.

12. Subrogation. Indemnitor shall take any and all reasonable actions, including institution of Action against third parties, necessary or appropriate to obtain reimbursement, payment or compensation from such Persons responsible for the presence of any Hazardous Materials at, in, on, under or near the Fee Simple Real Property or the Calkins Bridge Project Easement Reservation Real Property or otherwise obligated by Law to bear the cost. In the event of a default of Indemnitor's obligations under the Agreement, the Indemnified Parties shall be and hereby are subrogated to all of Indemnitor's rights now or hereafter in such claims.

13. Conflicts. This Memorandum is subject to the terms, conditions and provisions of the Agreement, which is incorporated herein by reference as though set out here in full. The Agreement shall control in the event of any conflict with this Memorandum.

14. Counterparts. This Memorandum may be executed in counterparts, each of which shall be deemed an original and all of which when taken together shall constitute one and the same document.

Alcona Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas

The centerlines of an existing electric facilities easement areas located in Sections 14,15, and 16, Town 25 North, Range 05 East, Curtis W. Township, Alcona County, Michigan, said centerlines being described as follows:

LVD1

Commencing at the East one-quarter corner of said Section 15; thence North 89°18'13" West, 1330.69 feet, along the East and West one-quarter line of said Section 15, to a point on the East one-eighth line of said Section 15; thence North 00°44'57" West, 31.67 feet, along the East one-eighth line of said Section 15, to the POINT OF BEGINNING; thence South 89°30'25" East, 493.14 feet; thence North 75°40'59" East, 1,058.42 feet, to Reference Point "A"; thence North 06°27'35" East, 342.49 feet; thence South 87°55'01" East, 275.07 feet; thence North 54°34'27" East, 144.29 feet; thence South 66°37'06" East, 71.28 feet; thence South 68°37'01" East, 99.72 feet, to Reference Point "B"; thence North 13°14'11" East, 106.76 feet, to Reference Point "C"; thence South 75°35'17" East, 115.58 feet; thence South 75°51'18" East, 186.19 feet; thence North 68°12'52" East, 935.10 feet; thence North 81°39'32" East, 880.81 feet; thence North 74°18'53" East, 214.13 feet, to Reference Point "F"; thence continuing North 74°18'53" East, 223.54 feet; thence North 83°34'35" East, 455.17 feet, to Reference Point "E"; thence continuing North 83°34'35" East, 53.65 feet, more or less, to a point on the centerline of Bamfield Road, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "A"; thence North 75°40'59" East, 140.16 feet; thence South 29°26'10" East, 78.82 feet, to a point on the centerline of Bamfield Road, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "B"; thence South 68°55'26" East, 83.13 feet, to a point on the Westerly Alcona Substation fence line, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence South 46°53'10" East, 105.56 feet, to a point on the Westerly Alcona Substation fence line, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence North 75°27'33" West, 48.28 feet, to Reference Point "D"; thence South 87°20'25" West, 73.32 feet; thence South 87°58'51" West, 46.20 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "D"; thence South 12°44'44" East, 20.37 feet; thence North 86°33'11" West, 13.60 feet; thence North 84°49'53" West, 32.68 feet; to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "E"; thence South 01°39'24" East, 64.20 feet, more or less, to a point on the centerline of Bamfield Road, and to the POINT OF ENDING.

LVD2
Commencing at the East one-quarter corner of said Section 16; thence North 00°13'38" West, 66.32 feet, along the East line of said Section 16, to the POINT OF BEGINNING; thence South 89°35'22" West, 2,622.77 feet, to a point on the North and South one-quarter line of said Section 16, and to the POINT OF ENDING.

Legal Description: Centerlines for existing underground Electric Facilities Areas

The centerlines of existing underground electric facilities easement areas located in Sections 9,10,11, and 14, Town 25 North, Range 05 East, Curtis W. Township, Alcona County, Michigan, said centerlines being described as follows:

UG Elec.1
BEGINNING at previously stated Reference Point "F"; thence South 62°05'27" East, 18.17 feet; thence North 63°14'10" East, 51.35 feet; thence Northeasterly, 908.30 feet, along the arc of a 562.00 foot radius curve to the left, the central angle of which is 92°36'02", and the long chord of which bears North 16°56'09" East, 812.62 feet; thence North 29°21'52" West, 92.83 feet, more or less, to a point on the North line of the South one-half of the Northwest one-quarter of the Northeast one-quarter, and to the POINT OF ENDING.

UG Elec.2
Commencing at the South one-quarter corner of said Section 11; thence North 01°41'09" West, 1997.72 feet, along the North and South one-quarter line of said Section 11, to the POINT OF BEGINNING; thence Northwesterly, 376.77 feet, along the arc of a 764.28 feet radius curve to the right, the central angle of which is 28°14'44", and the long chord of which bears North 83°28'26" West, 372.97 feet; thence North 69°21'04" West, 110.78 feet; thence North 52°26'14" West, 40.96 feet; thence North 37°29'11" West, 20.29 feet; thence North 45°33'53" West, 69.87 feet; thence North 41°41'25" West, 208.02 feet; thence North 39°39'56" West, 376.67 feet, more or less, to a point on the East and West one-quarter line of said Section 11, and to Reference Point "I", and the POINT OF ENDING.

UG Elec.3
Commencing at previously stated Reference Point "I"; thence North 39°41'41" West, 609.23 feet, to a point on the West one-eighth line of said Section 11, to the POINT OF BEGINNING; thence North 39°57'17" West, 65.16 feet; thence North 32°54'21" West, 175.68 feet, to Reference Point "G"; thence North 39°39'22" West, 429.32 feet; thence North 39°32'33" West, 375.06 feet; thence North 38°42'00" West, 200.95 feet; thence North 09°19'51" West, 30.55 feet; thence North 42°41'32" East, 104.08 feet; thence North 52°27'09" West, 431.16 feet; thence North 49°22'42" West, 143.16 feet; thence North 41°22'33" West, 288.33 feet; thence North 39°13'26" West, 327.49 feet; thence North 39°33'47" West, 244.79 feet, more or less, to a point on the North line of said Section 10, and to Reference Point "H", and the POINT OF ENDING.

And also Commencing at previously stated Reference Point "G"; thence South 24°15'51" West, 203.61 feet; thence South 18°50'14" West, 70.46 feet; thence South 08°35'41" West, 78.74 feet; thence South 29°33'03" East, 60.27 feet; thence South 39°26'12" East, 55.61 feet; thence South 21°44'21" East, 80.41 feet; thence South 26°23'59" East, 76.78 feet; thence South 26°59'44" West, 80.66 feet; thence South 05°34'28" East,

77.57 feet; thence South 05°50'40" West, 93.14 feet; thence South 10°49'24" West, 86.09 feet; thence South 25°49'30" West, 87.86 feet; thence South 52°13'30" East, 85.79 feet, to the POINT OF ENDING.

And also Commencing at previously stated Reference Point "G"; thence South 58°57'40" West, 73.44 feet, to the POINT OF ENDING.

UG Elec.4
Commencing at previously stated Reference Point "H"; thence South 89°32'57" West, 256.60 feet, along the North line of said Section 10, to the POINT OF BEGINNING; thence South 36°14'39" West, 265.60 feet; thence South 30°39'29" West, 262.63 feet; thence South 08°40'47" West, 56.90 feet; thence South 30°08'20" West, 219.12 feet; thence South 62°15'00" West, 220.70 feet; thence South 48°55'52" West, 77.48 feet; thence South 30°03'19" West, 219.76 feet; thence South 37°37'40" West, 200.32 feet; thence South 36°00'44" East, 55.26 feet; thence South 83°48'25" West, 79.77 feet; thence South 36°27'03" West, 103.97 feet; thence South 30°13'14" West, 170.91 feet; thence South 33°08'43" West, 200.01 feet; thence South 59°36'26" West, 71.43 feet; thence South 84°11'38" West, 64.70 feet; thence North 75°56'53" West, 176.07 feet; thence North 80°20'44" West, 80.15 feet; thence North 89°49'37" West, 80.68 feet; thence North 89°53'59" West, 81.33 feet; thence North 79°36'02" West, 109.43 feet; thence North 20°34'48" West, 29.42 feet, to the POINT OF ENDING.

UG Elec.5
Commencing at the North one-quarter corner of said Section 9; thence South 01°12'57" East, 425.25 feet, along the North and South one-quarter line of said Section 9; thence North 88°47'03" East, 1276.49 feet, to a point on the East one-eighth line of said Section 9, and to the POINT OF BEGINNING; thence North 73°20'18" East, 194.85 feet; thence North 80°09'08" East, 13.68 feet; thence South 74°50'25" East, 13.42 feet; thence South 51°59'59" East, 56.14 feet, to the POINT OF ENDING.

Legal Description: Alcona Substation Easement
A substation easement located in Section 14, Town 25 North, Range 5 East, Curtis W. Township, Alcona County, Michigan, more fully described as follows:
Commencing at the West one-quarter corner of said Section 14; thence North 88°13'06" East, 995.64 feet, along the East and West one-quarter line of said Section 14; thence North 01°46'54" West, 475.17 feet; to the POINT OF BEGINNING; thence North 68°29'55" West, 180.00 feet; thence North 21°11'02" East, 180.00 feet; thence South 68°29'55" East, 180.00 feet; thence South 21°11'02" West, 180.00 feet, to the POINT OF BEGINNING.

Legal Description: Access Easement
A strip of land twenty (20) feet in width being ten (10) feet on each side of the following described centerline located in the
Northwest one-quarter of Section 14, Town 25 North, Range 5 East, Curtis W. Township, Alcona County, Michigan, said centerline described as:

Commencing at the West one-quarter corner of said Section 14; thence North 88°13'06" East, 1005.52 feet, along the East and West one-quarter line of said Section 14; thence North 01°46'54" West, 600.49 feet, to a point on the Easterly Alcona substation fenceline, and to the POINT OF BEGINNING; thence South

69°51'23" East, 47.37 feet; thence South 60°53'09" East, 31.95 feet; thence South 63°18'29" East, 70.97 feet; thence South 68°42'57" East, 166.07 feet; thence South 65°17'24" East, 69.30 feet; thence South 61°45'47" East, 171.20 feet; thence South 56°24'06" East, 27.14 feet, more or less, to a point on the centerline of Bamfield Road, and to the POINT OF ENDING.

The sidelines of said 20.00 foot wide easement centerline, are to be extended or shortened to meet at angle points beginning at points opposite of and perpendicular to the POINT OF BEGINNING, and ending on the centerline of Bamfield Road.

Calkins Project

Legal Description: Centerline for Existing LVD Line 1 Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the Northwest 1/4 of Section 15, Township 2 North, Range 14 West, Valley Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the Northwest Corner of said Section 15; thence South 88° 07' 00" East 533.36 feet along the North Line of said Section 15; thence South 01° 53' 13" West 212.07 feet; thence South 85° 41' 17" East 15.49 feet, more or less, to the FERC Project Boundary and the Point of Beginning; thence South 85° 41' 17" East 115.56 feet to Reference Point 'A'; thence South 02° 12' 45" East 163.09 feet; thence North 63° 21' 13" East 512.89 feet to Reference Point 'B'; thence South 65° 17' 56" East 478.15 feet; thence South 74° 11' 45" East 313.53 feet, more or less, to the Point of Ending.

AND

Beginning at Reference Point 'B'; thence North 87° 42' 31" West 163.02 feet to the Point of Ending.

AND

A Proposed LVD line Commencing at Reference Point 'A', thence South 24° 08' 03" West 146.15 feet to Reference Point 'C'; thence South 65° 51' 57" East 72.38 feet to the Point of Ending.

AND

A Proposed LVD line Commencing at Reference Point 'C'; thence North 65° 51' 57" West 76.83 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Legal Description: Centerline for Existing LVD Line 2 Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the Northeast 1/4 of Section 13, Township 2 North, Range 14 West, Valley Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the East 1/4 Corner of said Section 13; thence South 00° 32' 23" East 8.24 feet along the East Line of said Section 13; thence North 79° 50' 15" West 90.48 feet, more or less, to the FERC Project Boundary and the Point of Beginning; thence North 79° 50' 15" West 423.57 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Legal Description: Centerline for Existing 46 kV Facilities Easement Area Line 22W

The centerline of an existing electric facilities easement area located in the Northeast 1/4 of Section 19, and the Northwest 1/4 of Section 20, both Sections being in Township 2 North, Range 13 West, Allegan Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the Northeast Corner of said Section 19; thence South 00° 39' 19" East, along the East Line of Said Section 19, 1476.27 feet, more or less, to the FERC Project Boundary; thence South 62° 14'

27” West, along said FERC Project Boundary, 78.93 feet to the Point of Beginning; thence South 20° 29’ 51” East 484.45 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Legal Description: Centerline for Existing LVD Line 3 Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the Northwest 1/4 of Section 28, Township 2 North, Range 13 West, Allegan Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the Northwest Corner of said Section 28; thence South 89° 50’ 37” East 128.04 feet along the North Line of said Section 28; thence South 76° 41’ 55” East 88.23 feet, more or less, to the FERC Project Boundary and the Point of Beginning; thence South 76° 41’ 55” East 285.28 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Legal Description: Centerline for Existing LVD Line 4 Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the North 1/2 of Section 28, Township 2 North, Range 13 West, Allegan Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the West 1/4 Corner of said Section 28; thence North 00° 50’ 42” West 463.94 feet along the West Line of said Section 28; thence North 89° 09’ 18” East 2675.89 feet; thence North 06° 55’ 28” West 361.19 feet; thence North 54° 33’ 05” East 33.52 feet, more or less, to the FERC Project Boundary and the Point of Beginning; thence North 54° 33’ 05” East 127.14 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Legal Description: Centerline for Existing LVD Line 5 Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the North 1/2 of Section 28, Township 2 North, Range 13 West, Allegan Township, Allegan County, Michigan, said centerline described as follows:

Commencing at the West 1/4 Corner of said Section 28; thence North 00° 50’ 42” West 463.94 feet along the West Line of said Section 28; thence North 89° 09’ 18” East 2675.89 feet; thence South 52° 13’ 12” East 95.92 feet, more or less, to the FERC Project Boundary and the Point of Beginning; thence South 52° 13’ 12” East 270.59 feet, more or less, to the FERC Project Boundary and the Point of Ending.

Cooke Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas

The centerlines of existing electric facilities easement areas located in Sections 15, 21, and 29, Town 24 North, Range 07 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

LVD1

Commencing at the South one-quarter corner of said Section 15, thence South 89°43'53" East, 134.46 feet, along the South line of said Section 15; thence North 00°16'11" East, 1003.77 feet; thence South 89°43'49" East, 383.27 feet, to the POINT OF BEGINNING; thence North 01°14'58" West, 276.13 feet; thence North 50°33'57" West, 48.89 feet, to Reference Point "D"; thence North 51°12'46" West, 194.61 feet; thence North 68°08'42" West, 173.94 feet; thence South 62°40'53" West, 492.54 feet; thence South 26°59'48" East, 141.38 feet; thence South 62°01'37" West, 1260.23 feet, to Reference Point "G"; thence continuing

South 62°01'37" West, 10.31 feet, more or less, to a point on the West one-eighth line of said Section 15, and to the POINT OF ENDING.
And also BEGINNING at previously stated Reference Point "G"; thence South 00°27'56" East, 541.29 feet, more or less, to a point on the South line of said Section 15, and to the POINT OF ENDING.
And also BEGINNING at previously stated Reference Point "D"; thence South 85°32'18" West, 7.60 feet; thence South 54°58'50" West, 213.43 feet, to the POINT OF ENDING.

LVD2
BEGINNING at previously stated Reference Point "D"; thence North 12°24'45" East, 390.56 feet, to Reference Point "E"; thence North 65°36'53" East, 172.21 feet; thence North 11°28'51" East, 851.61 feet, to Reference Point "K"; thence North 02°01'58" West, 637.79 feet, more or less, to the North line of the South one-half of the Southwest one-quarter of the Northeast one-quarter, an the POINT OF ENDING.
And also BEGINNING at previously stated Reference Point "E"; thence South 79°49'32" West, 30.80 feet, to a point on the Easterly Cooke Dam substation fence line, and to the POINT OF ENDING.
And also BEGINNING at previously stated Reference Point "K"; thence North 79°20'58" East, 286.64 feet; thence North 54°57'12" East, 177.18 feet, more or less, to a point on the East one-eighth line of said Section 15, and the POINT OF ENDING.

LVD3
Commencing at the Northwest corner of said Section 21; thence South 00°30'48" West, 1231.39 feet, along the West line of said Section 21; thence South 89°29'12" East, 50.65 feet, to a point on the East line of the Plat of Cooke Basin Subdivision No. 1, and to the POINT OF BEGINNING; thence North 88°30'38" East, 36.00 feet, to Reference Point "H"; thence North 73°30'37" East, 118.55 feet, more or less, to a point on a line being described as lying parallel with and 200.00 feet East of the West line of said Section 21, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "H"; thence North 01°09'56" West, 353.17 feet; thence North 02°32'03" West, 121.57 feet; thence North 01°15'43" West, 170.13 feet: thence North 02°13'26" West, 173.28 feet, to Reference Point "I"; thence North 01°17'14" West, 172.13 feet, to Reference Point "J": thence North 01°36'59" West, 242.62 feet, more or less, to a point on the North line of said Section 21, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "I"; thence South 88°01'53" West, 35.23 feet, more or less, to a point on the easterly line of the Plat of Cooke Basin Subdivision No. 1, and the POINT OF ENDING.

And also Beginning at previously stated Reference Point "J"; thence South 11°43'09" East, 703.88 feet, more or less, to a point on a line being described as lying parallel with and 200.00 feet East of the West line of said Section 21, and to the POINT OF ENDING.

LVD4
Commencing at the Northwest corner of said Section 21; thence South 00°30'48" West, 5046.02 feet, along the West line of said Section 21; thence South 00°11'59" East, 1238.73 feet, along the East line of said Section 29; thence South 89°57'28" West, 1258.91 feet, to a point on the East one-eighth line of said Section 29, and to the POINT OF BEGINNING; thence South 44°13'10" West, 84.13 feet; thence South 35°37'28"

West, 43.04 feet, more or less, to a point on the North one-eighth line of said Section 29, and to the POINT OF ENDING.

Legal Description: Monument Substation Easement at Cooke Dam
An easement in part of the Southeast one-quarter of Section 15, Township 24 North, Range 7 East, Oscoda Township, Iosco County, Michigan, more particularly described as follows:
Commencing at the Southeast corner of said Section 15; thence North 89° 43'53" West, 1900.11 feet, along the South line of said Section 15; thence North 00°16'07" East, 804.18 feet, to the POINT OF BEGINNING; thence North 89°59'58" West, 350.00 feet; thence North 00°00'02" East, 350.00 feet; thence South 89°59'58" East, 350.00 feet; thence South 00°00'02" West, 350.00 feet, to the POINT OF BEGINNING.

Legal Description: Access Easement
A strip of land twenty (20) feet in width being ten (10) feet on each side of the following described centerline located in Northwest one-quarter of the Southeast one quarter of said Section 15; Township 24 North, Range 7 East, Oscoda Township, Iosco County, Michigan, more particularly described as follows:
Commencing at the South one-quarter corner of said Section 15; thence South 89°43'53" East, 134.46 feet, along the South line of said Section 15; thence North 00°16'11" East, 1442.82 feet, to the POINT OF BEGINNING; thence along the centerline of the said 20 foot wide access easement centerline the following three (3) courses; North 64°06'29" East, 101.77 feet; thence South 46°09'11" East, 132.25 feet; thence South 26°42'20" East, 273.53 feet; to the POINT OF ENDING.

Legal Description: Centerline for existing underground Electric Facilities Area
The centerline of an existing underground electric facilities easement area located in the Southwest one-quarter of said Section 15, Township 24 North, Range 7 East, Oscoda Township, Iosco County, Michigan, more particularly described as follows:

BEGINNING at previously stated Reference Point "G"; thence North 08°08'14" West, 54.32 feet; thence North 05°01'13" East, 14.18 feet; thence North 28°45'42" East, 27.93 feet; thence North 28°02'40" West, 22.79 feet; thence North 40°26'21" West, 9.30 feet, more or less, to a point on the West one-eighth line of said Section 15, and to the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Section 15, and 29, Town 24 North, Range 07 East, Oscoda Township, Iosco County, Michigan, more particularly described as follows:
46kV Line 29T (Segment 1)

Commencing at the South one-quarter corner of said Section 15; thence South 89°43'53" East, 490.92 feet, along the South line of said Section 15, to the POINT OF BEGINNING; thence North 01°23'51" West, 918.27 feet, to Reference Point "A"; thence North 01°28'47" East, 618.22 feet, to Reference Point "B"; thence North 01°44'26" East, 129.01 feet, to a point on the Southerly fence line of the Cooke Dam Substation, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "B"; thence South 76°00'12" West, 211.16 feet; thence South 61°58'19" West, 1823.91 feet, more or less, to a point on the West one-eighth line of said Section 15, and to the POINT OF ENDING.

46kV Line 29AI

BEGINNING at previously stated Reference Point "A"; thence North 88°45'18" East, 55.41 feet; thence North 02°00'24" West, 33.76 feet, to a point on the Monument Substation Southerly fence line, and to the POINT OF ENDING.

46kV Line 29T (Segment 2)
Commencing at the Northwest corner of said Section 21; thence South 00°30'48" West, 5046.02 feet, along the West line of said Section 21; thence South 00°11'59" East, 1147.55 feet, along the East line of said Section 29; thence South 89°57'28" West, 1259.09 feet, to a point on the East one-eighth line of said Section 29, and to the POINT OF BEGINNING; thence South 44°09'52" West, 266.12 feet, more or less, to a point on the North one-eighth line of said Section 29, and to the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Section 26, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:
46 kV line 29T (segment 3)

Commencing at the North one-quarter corner of said Section 26; thence South 00°39'07" East, 374.03 feet, along the North and South one-quarter line of said Section 26, to the POINT OF BEGINNING; thence South 67°55'34" East, 105.45 feet; thence South 08°28'14" West, 613.43 feet, more or less, to a point on the North and South one-quarter line of said Section 26, and the POINT OF ENDING.

Croton Project
Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 7 and 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, said centerlines being described as follows:

LVD1
Commencing at the South one-quarter corner of said Section 7; thence North 00°51'24" East, 196.77 feet, along the North and South one-quarter line of said Section 07, to the POINT OF BEGINNING; thence North 89°32'23" East, 30.45 feet, to Reference Point "X"; thence continuing North 89°32'23" East, 6.35 feet; thence North 88°52'20" East, 1076.68 feet, to Reference point "A"; thence continuing North 88°52'20" East, 241.98 feet; thence South 32°30'42" East, 207.59 feet, to Reference point "B"; thence North 88°43'49" East, 131.24 feet; thence South 63°51'13" East, 172.77 feet; thence South 32°18'07" East, 393.19 feet; thence South 05°18'46" East, 166.08 feet, to Reference Point "D"; thence South 25°44'23" West, 47.18 feet; thence South 16°57'13" East, 47.47 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "X"; thence North 00°47'15" East, 1268.37 feet, to Reference Point "Y"; thence North 00°53'27" East, 1188.96 feet, more or less, to a point on the East and West one-quarter line of said Section 7, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "Y"; thence South 87°46'05" West, 28.96 feet, to a point on the North and South one-quarter line of said Section 7, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "A"; thence South 14°38'40" West, 150.42 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "B"; thence South 17°21'27" West, 319.07 feet; thence South 00°39'42" West, 48.18 feet, to Reference Point "E"; thence continuing South 00°39'42" West, 784.64 feet, to Reference point "C"; thence South 00°39'42" West, 390.33 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence South 59°09'27" West, 59.54 feet, more or less, to the Western line of Government Lot 1 of said Section 18, and the POINT OF ENDING.

Legal Description: Centerlines for existing underground Electric Facilities Areas
The centerlines of existing underground electric facilities easement areas located in Section 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, said centerlines being described as follows:

UG Elec1
Commencing at previously stated Reference Point "D"; thence South 74°54'18" West, 41.70 feet, to a point on the Easterly Croton Substation fence, and the POINT OF BEGINNING; thence South 82°53'39" East, 17.31 feet; thence South 04°59'07" East, 14.62 feet; thence South 00°34'07" West, 129.28 feet; thence South 76°56'21" East, 34.71 feet; thence South 79°41'48" East, 24.07 feet; thence South 63°49'49" East, 20.46 feet; thence South 36°31'29" East, 15.10 feet; thence South 74°31'59" East, 5.58 feet; thence South 78°47'35" East, 235.51 feet, to Reference Point "F", and the POINT OF ENDING.

UG Elec2
Commencing at previously stated Reference Point "F"; thence South 73°18'54" East, 167.44 feet, to the POINT OF BEGINNING; thence North 87°09'19" East, 32.07 feet; thence South 78°33'35" East, 24.18 feet; thence South 80°46'01" East, 24.26 feet; thence South 76°07'37" East, 27.04 feet, to Reference Point "G", and the POINT OF ENDING.

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 4, 8, 17, and 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, said centerlines being described as follows:

LVD2
Commencing at previously stated Reference Point "G"; thence North 61°51'45" West, 22.12 feet, to the POINT OF BEGINNING; thence South 61°51'45" East, 22.12 feet; thence South 71°55'08" East, 175.85 feet, to Reference Point "H"; thence South 06°56'20" West, 168.01 feet, to Reference Point "I", thence South 07°01'38" West, 435.07 feet; thence South 01°02'48" West, 932.92 feet, to Reference Point "J"; thence North 88°21'06" West, 187.10 feet, to Reference Point "M"; thence South 60°25'51" West, 49.87 feet, to a point on the Easterly fence of Conklin Park Substation and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "I"; thence North 84°31'23" East, 137.55 feet, more or less, to the Westerly right of way of S. Croton Hardy Dr, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "J"; thence South 56°08'57" West, 45.67 feet, to Reference Point "L"; thence South 82°46'30" West, 154.36 feet; thence North 80°17'07" West, 40.38 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "L"; thence South 35°07'57" West, 103.10 feet; thence South 25°40'29" West, 75.67 feet, more or less, to the East and West one-quarter line of said Section 18, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "M"; thence North 88°11'59" West, 189.62 feet; thence South 01°56'13" West, 26.28 feet; thence North 88°10'55" West, 333.46 feet; thence South 88°27'45" West, 592.76 feet, more or less, to a point on the East one-eighth line of said Section 18, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "H"; thence North 14°29'08" East, 109.62 feet; thence North 14°25'02" East, 101.58 feet; thence North 10°45'26" East, 148.65 feet; thence North 01°39'49" East, 413.36 feet; thence North 44°52'04" East, 194.53 feet, more or less, to a point on the Easterly line of Lot 1, Block 9 of the Original Plat of the Village of Croton, and the POINT OF ENDING.

LVD3
Commencing at the North one-quarter corner of said Section 07; thence South 88°23'49" East, 2616.90 feet, along the North line of said Section 07; thence South 89°28'21" East, 2679.45 feet, along the North line of said Section 08, to Reference Point "N"; thence South 00°36'09" West, 1570.82 feet, along the North and South one-quarter line of said Section 08; thence South 89°23'51" East, 1347.14 feet, to the East one-eighth line of said Section 8, and the POINT OF BEGINNING; thence North 69°52'05" East, 126.88 feet; thence North 53°45'00" East, 1514.56 feet, more or less, to the East line of said Section 8, and the POINT OF ENDING.

LVD4
Commencing at previously stated Reference Point "N"; thence South 89°28'21" East, 2679.45 feet, along the North line of said Section 8; thence North 00°44'25" East, 3152.55 feet, along the West line of said Section 4; thence South 89°15'35" East, 848.27 feet, to a point on the centerline of Croton Dam Pond, and the West line of parcel located in Liber 160, Page, 510, Newaygo County Records, and the POINT OF BEGINNING; thence South 85°44'27" East, 451.55 feet, more or less, to a point on the Easterly FERC Project Boundary, and the East line of parcel located in Liber 160, Page 510, Newaygo County Records, and the POINT OF ENDING.

Legal Description: Croton Substation Easement
A substation easement located in Section 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, more particularly described as follows:

BEGINNING at previously stated Reference Point "E"; thence South 89°21'12" East, 589.79 feet; thence South 00°38'48" West, 374.71 feet; thence North 89°21'12" West, 12.16 feet; thence South 00°38'48" West, 23.10 feet, to Reference Point "AA"; thence North 89°21'12" West, 606.81 feet; thence North 00°09'37" West, 397.86 feet; thence South 89°21'12" East, 34.79 feet, to the POINT OF BEGINNING.

Legal Description: Conklin Park Substation
A substation easement located in Section 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, more particularly described as follows:

Commencing at the East one-quarter corner of said Section 18; thence South 88°37'59" West, 131.24 feet, along the East and West one-quarter line of said Section 18; thence North 01°22'01" West, 45.53 feet, to a point on the centerline of East 68th Street, and the POINT OF BEGINNING; thence North 88°54'26" West, 300.00 feet, along said centerline; thence North 01°05'34" East, 261.37 feet; thence South 88°54'26" East, 300.00 feet; thence South 01°05'34"" West, 261.37 feet, to the POINT OF BEGINNING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 07, and 18, Town 12 North, Range 11 West, Croton Township, Newaygo County, Michigan, more particularly described as follows:

46kV Line 19D
Commencing at previously stated Reference Point "AA"; thence North 18°22'10" West, 23.90 feet, to a point on the Southerly Croton Substation fence; thence along said Southerly fenceline the following five (5) courses; thence North 89°18'38" West, 47.11 feet, to Reference Point "W"; thence continuing North 89°18'38" West, 27.29 feet, to Reference Point "Q"; thence continuing North 89°18'38" West, 23.43 feet, to Reference Point "R"; thence continuing North 89°18'38" West, 22.82 feet, to Reference Point "S"; thence continuing North 89°18'38" West, 90.10 feet, to Reference Point "T", and the POINT OF BEGINNING; thence South 04°13'15" West, 229.15 feet; thence South 18°40'42" West, 398.09 feet; thence North 75°52'14" West, 161.75 feet; thence South 05°02'11" West, 431.42 feet; thence South 04°23'51" West, 876.17 feet; thence South 23°23'06" West, 6.81 feet, more or less, to a point on the East one-eighth line of said section 18, and the POINT OF ENDING.

46kV Line 95A
BEGINNING at previously stated Reference Point "S"; thence South 08°19'11" West, 235.23 feet; thence South 17°38'57" West, 307.61 feet; thence South 05°54'27" West, 103.56 feet; thence South 04°33'06" West, 893.32 feet; thence South 37°01'37" West, 442.61 feet; thence South 26°22'28" West, 52.87 feet, more or less, to a point on the East one-eighth line of said section 18, and the POINT OF ENDING.

46kV Line 20A
BEGINNING at previously stated Reference Point "R"; thence South 08°20'40" West, 639.03 feet; thence South 04°30'09" West, 830.27 feet; thence South 33°55'15" East, 370.08 feet; thence South 87°56'15" East, 551.08 feet; thence South 88°38'17" East, 182.43 feet, more or less, to a point on the East line of said Section 18, and the POINT OF ENDING.

46kV Line 112A
BEGINNING at previously stated Reference Point "Q"; thence South 07°27'41" West, 639.86 feet; thence South 04°54'48" West, 797.55 feet; thence South 34°00'27" East, 356.26 feet; thence South 87°45'34" East, 332.37 feet; thence South 88°14'25" East, 379.02 feet, more or less, to a point on the East line of said Section 18, and the POINT OF ENDING.

46kV Line 19C
BEGINNING at previously stated Reference Point "W"; thence South 00°29'23" West, 54.23 feet; thence North 77°21'38" East, 65.96 feet; thence North 00°55'11" East, 365.47 feet; thence North 49°39'14" West, 299.13 feet; thence North 34°17'32" West, 1885.46 feet; thence North 28°21'34" West, 1333.86 feet, to a point on the North and South one-quarter line of said Section 7, and the POINT OF ENDING.

Five Channels Project
Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 22 and 23, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

LVD1
Commencing at the South one-quarter corner of said Section 23; thence South 87°54'00" West, 73.40 feet, along the South line of said Section 23 to the POINT OF BEGINNING and REFERENCE POINT "A"; thence North 60°59'16" East, 99.59 feet; thence North 33°36'50" West, 135.67 feet; thence North 36°54'18" East, 487.72 feet, to REFERENCE POINT "B"; thence South 44°58'00" East, 289.19 feet; thence North 48°12'01" East, 455.75 feet, to REFERENCE POINT "C"; thence North 51°06'30" West, 166.50 feet; thence North 15°41'29" East, 588.08 feet, more or less, to a point on the South one-eighth line of said Section 23, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "B"; thence North 40°15'39" West, 171.72 feet, to the REFERENCE POINT "E"; thence North 39°55'53" West, 92.61 feet; thence North 60°19'52" West, 23.11 feet, to a point on the Easterly Five Channels Dam Substation fence, and the POINT OF ENDING.
And also, BEGINNING at previously stated REFERENCE POINT "E"; thence North 21°54'16" West, 117.70 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated REFERENCE POINT "C"; thence South 67°13'05" East, 227.66 feet; thence South 70°20'20" East, 342.62 feet, to REFERENCE POINT "D"; thence South 00°37'00" East, 245.44 feet; thence South 79°22'41" East, 4.67 feet, more or less, to a point on the East one-eighth line of said Section 23, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "D"; thence South 77°22'25" East, 4.28 feet, more or less, to a point on the East one-eighth line of said Section 23, and the POINT OF ENDING.

LVD1a
Commencing at previously stated REFERENCE POINT "A"; thence South 87°54'00" West, 641.22 feet, along the South line of said Section 23, to the POINT OF BEGINNING, and REFERENCE POINT "F"; thence North 74°30'06" West, 294.09 feet; thence North 76°26'22" West, 507.56 feet; thence South 17°41'35" West, 100.79 feet; thence North 73°07'16" West, 2155.47 feet; thence North 73°18'55" West, 1686.41 feet, to REFERENCE POINT "G"; thence North 00°44'36" West, 1044.33 feet; thence South 87°41'38" West, 73.22 feet, more or less, to a point the North and South one-quarter line of said Section 22, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE PONT "G"; thence South 78°52'15" West, 79.53 feet, more or less, to a point on the North and South one-quarter line of said Section 22, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "G"; thence South 00°52'31" East, 748.67 feet; thence North 63°08'48" West, 93.94 feet, more or less, to a point on the North and South one-quarter line of said Section 22, and the POINT OF ENDING.

Legal Description: Centerlines for Existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 21 and 22, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

LVD2
Commencing at the Southwest corner of said Section 22; thence North 00°32'23" West, 2631.40 feet, along the West line of said Section 22, to the West one-quarter corner of said Section 22; thence North 88°00'54" East, 28.49 feet, along the East and West one-quarter line of said Section 22, to the POINT OF BEGINNING and REFERENCE POINT "I"; thence North 04°38'58" East, 29.96 feet; thence North 66°13'50" West, 922.68 feet, to REFERENCE POINT "J"; thence North 41°24'07" West, 570.59 feet; thence North 10°44'13" West, 328.89 feet; thence North 16°04'07" West, 244.17 feet; thence North 72°28'30" West, 404.85 feet; thence South 87°43'04" West, 477.29 feet; thence South 71°02'36" West, 421.17 feet; thence South 50°53'53" West, 39.65 feet, more or less, to the Easterly property line, of non-Consumers Energy property, as recorded in Liber 1162, Page 679, Iosco County Records, and the POINT OF ENDING and REFERENCE POINT "K".

And also, BEGINNING at previously stated REFERENCE POINT "J"; thence South 26°25'47" West, 388.61 feet; thence South 57°51'22" East, 166.53 feet, more or less, to a point on the East and West one-quarter line of said Section 21, and the POINT OF ENDING.

LVD2a
Commencing at previously stated REFERENCE POINT "K"; thence South 50°53'53" West, 459.95 feet, to the POINT OF BEGINNING; thence South 50°53'53" West, 187.69 feet; thence South 76°02'36" West, 175.78 feet, to the Westerly FERC Project Boundary line, and the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 22 and 23, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

46 kV line 29U
Commencing at previously stated REFERENCE POINT "A"; thence South 87°54'00" West, 105.05 feet, along the South line of said Section 23, to the POINT OF BEGINNING; thence North 35°18'33" East, 202.36 feet; thence North 34°58'55" East, 510.44 feet; thence North 23°40'10" West, 112.00 feet, to REFERENCE POINT "L"; thence continuing North 23°40'10" West, 29.92 feet thence North 28°46'40"

West, 164.29 feet; thence South 43°24'35" West, 68.85 feet, to a point on the Five Channels Substation fence, and the POINT OF ENDING.

46 kV line 29T (segment 1)
Commencing at previously stated REFERENCE POINT "F"; thence South 87°54'00" West, 168.73 feet, along the South line of said section 23, to the POINT OF BEGINNING; thence North 69°34'58" West, 27.48 feet; thence North 76°30'21" West, 566.42 feet; thence North 73°10'35" West, 2205.37 feet; thence North 73°13'19" West, 1784.08 feet, more or less, to a point on the North and South one-quarter line of said Section 22, and the POINT OF ENDING.

Legal Description: Centerline for Existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 22, and 23, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

46 kV line 29T (segment 2)
Commencing at previously stated REFERENCE POINT "I"; thence North 88°00'54" East, 71.80 feet, along the East and West one-quarter line of said Section 22, to the POINT OF BEGINNING; thence North 51°14'11" West, 113.74 feet; thence North 66°21'03" West, 882.00 feet; thence North 41°05'39" West, 401.09 feet; thence North 24°15'19" West, 464.11 feet; thence North 25°08'25" West, 243.79 feet; thence North 74°35'15" West, 372.03 feet; thence South 87°52'55" West, 461.51 feet; thence South 69°00'45" West, 464.52 feet; thence South 49°42'06" West, 457.60 feet; thence South 57°14'41 West, 390.10 feet; to a point on the Westerly FERC Project Boundary line, and the POINT OF ENDING.

Proposed 46 kV line
BEGINNING at previously stated REFERENCE POINT "L"; thence South 83°39'53" East, 30.00 feet, to a point on the West line of the Proposed Largo Substation Easement, and the POINT OF ENDING.

Legal Description: Access Easement
A strip of land twenty (20) feet in width being ten (10) feet each side of the following described centerline located in the Southeast one-quarter of Section 23, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerline described as:

Commencing at the South one-quarter corner of said Section 23; thence North 00°41'18" West, 696.21 feet, along the North and South one-quarter line of said Section 23; thence North 89°18'42" East, 709.27 feet, to a point on the centerline of Old M-65, and POINT OF BEGINNING; thence Northwesterly, 107.50 feet, along the arc of a 450.00 foot radius curve to the left, the central angle of which is 13°41'13", and the long chord of which bears North 76°54'15" West, 107.24 feet; thence North 83°44'51" West, 346.20 feet; thence Westerly, 56.27 feet, along the arc of a 500.00 foot radius curve to the right, the central angle of which is 06°26'52", and the long chord of which bears North 80°31'25" West, 56.24 feet; thence North 77°17'59" West, 22.55 feet; thence Northwesterly, 96.06 feet, along the arc of a 150.00 foot radius curve to the right, the central angle of which is 36°41'28", and the long chord of which bears North 58°57'15" West, 94.42 feet; thence along a line non-tangent to said curve, South 42°22'40" West, a distance of 32.36 feet, to the POINT OF ENDING and REFERENCE POINT "H". The sidelines of said strip are to be extended or

shorted to meet at angle points and to begin at the centerline of Old M-65 and to terminate at the Five Channels Dam Substation easement.

Legal Description: Largo Substation Easement
Substation easement located in Section 23, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, being described as follows:

Commencing at the Southwest corner of said Section 23; thence North 87°54'00" East, 2621.56 feet, along the South line of said Section 23, to the South one-quarter corner of said Section 23; thence North 47°29'46" East, 541.36 feet, to a point on the Easterly right of way of Old M 65 Trail; and the POINT OF BEGINNING of said easement; thence North 44°45'49" West, 277.68 feet; thence North 06°20'07" East, 219.00 feet, to a point on the North edge of Five Channels Road; thence along the North edge of Five Channels Road the following three (3) courses: South 83°32'31" East, 373.25 feet; thence South 79°44'36" East, 73.84 feet; thence South 73°05'02" East, 80.63 feet, to a point on the Easterly right of way of Old M 65 Trail; thence along the Easterly right of way of Old M-65 Trail the following four (4) courses: South 41°00'01" West, 113.29 feet; thence South 44°35'54" West, 74.86 feet; thence South 47°22'04" West, 69.96 feet; thence South 48°43'38" West, 227.45 feet, to the POINT OF BEGINNING of said easement.

Foote Project
Legal Description: Centerlines for existing HVD Electric Facilities Easement Area
The centerlines of existing electric facilities easement areas located Sections 28, 29, 33, 34 and 35, Town 24 North, Range 08 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

46 kV line 29J (segment 1)
Commencing at the West one-quarter corner of said Section 29; thence North 89°22'25" East, 2331.67 feet, along the East and West one-quarter line of said Section 29; thence South 01°12'46" East, 479.97 feet, along the West line of the East 300 feet of the North one-half of the Southwest one-quarter of said Section 29, to the POINT OF BEGINNING, and REFERENCE POINT "A"; thence South 76°37'35" East, 1305.71 feet; thence South 76°43'03" East, 891.69 feet; thence South 76°43'12" East, 446.71 feet; thence South 76°50'49" East, 445.39 feet; thence South 47°19'59" East, 452.72 feet; thence South 47°31'49" East, 1353.08 feet; thence South 38°55'24" East, 487.88 feet; thence South 60°25'09" East, 482.14 feet; thence South 68°59'03" East, 453.26 feet; thence South 69°00'10" East, 3141.41 feet; thence South 59°37'54" East, 3371.74 feet; thence South 59°53'24" East, 414.17 feet; thence North 87°43'27" East, 459.30 feet; thence North 54°45'24" East, 1910.60 feet; thence North 32°58'34" East, 306.11 feet, to REFERENCE POINT "C"; thence North 32°01'59" East, 313.58 feet; thence North 10°41'19" West, 285.66 feet, to a point on the Southerly Foote Dam Substation fence, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "C"; thence South 59°22'17" East, 54.69 feet, to the POINT OF ENDING.

46 kV line 29J (segment 2)
Commencing at the East one-quarter corner of said Section 30; thence South 87°59'57" West, 2709.41 feet, along the East and West one-quarter line of said Section 30, to a point on the North and South one quarter

line of said Section 30; thence North 00°07'06" West, 81.25 feet, along the North and South one-quarter line to REFERENCE POINT "S"; thence continuing North 00°07'06" West, 46.63 feet, along the North and South one-quarter line, to the POINT OF BEGINNING, and REFERENCE POINT "T"; thence South 87°38'47" West, 857.65 feet; thence South 87°24'22" West, 427.03 feet; thence South 86°22'51" West, 176.82 feet; thence South 00°19'37" East, 113.16 feet, more or less, to a point on the East and West one-quarter line of said Section 30, and the POINT OF ENDING.

46 kV line 29L (segment 1)
Commencing at previously stated REFERENCE POINT "A"; thence South 01°12'46" East, 49.79 feet, to the POINT OF BEGINNING; thence South 76°40'09" East, 3072.61 feet; thence South 47°41'01" East, 1778.53 feet; thence South 39°35'35" East, 543.60 feet; thence South 61°43'32" East, 531.95 feet; thence South 69°04'05" East, 3504.20 feet; thence South 59°41'21" East, 3452.82 feet, to REFERENCE POINT "D"; thence South 59°50'36" East, 343.48 feet; thence North 88°00'00" East, 489.51 feet; thence North 55°25'22" East, 1927.06 feet; thence North 31°18'38" East, 331.32 feet; thence North 31°41'17" East, 697.43 feet; thence North 44°50'46" East, 300.09 feet; thence North 40°55'35" East, 590.96 feet; thence North 24°06'50" East, 326.04 feet; thence North 40°10'12" East, 203.49 feet; thence North 40°18'11" East, 949.11 feet, more or less, to the North Line of said Section 35, and the POINT OF ENDING.

46 kV line 29L (segment 2)
BEGINNING at previously stated REFERENCE POINT "S"; thence South 87°35'28" West, 1167.14 feet; thence South 87°23'44" West, 107.58 feet; thence South 85°49'06" West, 155.55 feet; thence South 01°01'25" East, 65.85 feet, more or less, to a point on the East and West one-quarter line of said Section 30, and the POINT OF ENDING.

46 kV line 29M
BEGINNING at previously stated REFERENCE POINT "D"; thence South 30°55'14" East, 424.12 feet, more or less, to the South one-eighth of said Section 34, and the POINT OF ENDING.

46 kV line 29T
Commencing at the East one-quarter corner of said Section 30; thence South 87°59'57" West, 4588.16 feet, along the East and West one-quarter line of said Section 30, to the POINT OF BEGINNING; thence North 02°42'35" West, 114.22 feet; thence North 89°46'57" West, 98.68 feet; thence North 30°28'01" West, 207.00 feet, more or less, to a point on a line 300 feet North of and parallel to the East and West one-quarter line of said Section 30, and the POINT of ENDING.

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 28, 29, 33, 34 and 35, Town 24 North, Range 08 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

LVD1
BEGINNING at previously stated REFERENCE POINT "A"; thence South 76°37'35" East, 857.15 feet, to REFERENCE POINT "E"; thence continuing South 76°37'35" East, 448.56 feet, to REFERENCE POINT "F"; thence South 76°43'03" East, 891.69 feet, to REFERENCE POINT "G"; thence South 76°43'12" East,

446.71 feet; thence South 76°35'29" East, 445.16 feet, to REFERENCE POINT "H"; thence South 47°34'02" East, 451.95 feet, to REFERENCE POINT "I"; thence South 47°31'49" East, 1353.08 feet; thence South 38°55'24" East, 487.88 feet; thence South 60°25'09" East, 482.14 feet, to REFERENCE POINT "J"; thence South 68°59'03" East, 453.26 feet, to REFERENCE POINT "K"; thence South 69°00'10" East, 3141.41 feet, to REFERENCE POINT "L"; thence South 59°37'54" East, 3371.74 feet; thence South 59°27'50" East, 416.84 feet, to REFERENCE POINT "M"; thence South 63°46'20" East, 210.74 feet; thence South 88°08'59" East, 179.57 feet; thence South 66°17'20" East, 313.73 feet, more or less, to the South one-eighth line of said Section 34, and POINT OF ENDING, and REFERENCE POINT "N".

And also, BEGINNING at previously stated REFERENCE POINT "H"; thence North 47°14'38" West, 149.58 feet; thence North 25°33'06" East, 490.20 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "J"; thence South 00°02'51" West, 863.24 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "L"; thence North 41°20'46" East, 338.40 feet; thence North 43°12'24" East, 93.54 feet, to REFERENCE POINT "Q"; thence North 41°18'12" East, 299.67 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "Q"; thence North 60°07'38" West, 781.09 feet; thence North 26°22'32" West, 205.72 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "M"; thence North 37°16'27" West, 208.93 feet; thence North 53°13'55" West, 178.96 feet; thence North 49°41'57" West, 338.83 feet; thence North 45°21'14" West, 171.68 feet; thence North 48°14'01" West, 200.40 feet; thence North 46°35'55" West, 142.00 feet, to the POINT OF ENDING.

LVD2
Commencing at previously stated REFERENCE POINT "N"; thence North 89°31'09" East, 488.42 feet, along the South one-eighth line of said Section 34, to the POINT OF BEGINNING; thence North 29°36'48" West, 119.40 feet; thence North 20°11'58" East, 457.24 feet; thence North 51°39'12" East, 1031.23 feet; thence North 25°51'25" East, 305.41 feet; thence North 28°15'55" East, 234.69 feet; thence North 33°04'56" East, 299.44 feet; thence North 28°13'52" West, 155.37 feet; thence North 09°36'13" East, 232.50 feet, to REFERENCE POINT "O"; thence South 87°56'15" West, 103.97 feet, to a point on the Easterly Foote Dam Substation fence and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "O"; thence North 83°02'56" East, 207.55 feet; thence North 64°46'21" East, 198.26 feet; thence North 39°00'12" East, 49.26 feet; thence North 40°35'45" East, 539.76 feet; thence North 19°12'28" East, 237.71 feet; thence North 40°31'30" East, 246.11 feet; thence North 40°07'38" East, 369.70 feet, to REFERENCE POINT "P"; thence North 40°41'23" East, 240.88 feet; thence North 40°17'47" East, 391.28 feet, to a point on the North Line of said Section 35, and the POINT OF ENDING.

LVD3

Commencing at the Northwest corner of said Section 35; thence North 89°07'26" East, 141.40 feet, along the North line of said Section 35, to the POINT OF BEGINNING; thence South 01°22'45" East, 17.12 feet; thence South 89°10'51" West, 1247.05 feet, to the POINT OF ENDING.

LVD4
BEGINNING at Previously stated REFERENCE POINT "T'"; thence South 87°38'47" West, 857.65 feet; thence South 87°24'22" West, 427.03 feet; thence South 86°22'51" West, 176.82 feet; thence South 87°53'22" West, 197.37 feet, to REFERENCE POINT "U"; thence South 88°22'26" West, 225.61 feet; thence North 89°46'57" West, 98.68 feet, to the POINT OF ENDING and REFERENCE POINT "V".

And also, BEGINNING at previously stated REFERENCE POINT "U"; thence South 03°44'36" East, 112.79 feet, more or less to the East and West one-quarter line of said Section 30, and the POINT OF ENDING.

Legal Description: Centerlines for existing U/G Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 28, 29, 30, 33, 34 and 35, Town 24 North, Range 08 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

U/G Elec.1
BEGINNING at previously stated REFERENCE POINT "E"; thence South 18°55'10" West, 19.25 feet; thence South 39°11'20" West, 19.46 feet; thence South 48°50'21" West, 24.29 feet; thence South 41°15'07" West, 24.60 feet; thence South 20°16'48" West, 24.92 feet thence South 08°15'48" West, 22.80 feet; thence South 08°59'59" East, 30.76 feet; thence South 16°01'28" East, 74.53 feet; thence South 10°43'04" East, 50.60 feet, to the POINT OF ENDING.

U/G Elec.2
BEGINNING at previously stated REFERENCE POINT "F"; thence South 86°11'41" East, 15.79 feet; thence North 82°10'27" East, 15.75 feet; thence North 70°50'20" East, 27.13 feet; thence North 51°21'51" East, 24.85 feet; thence North 32°16'32" East, 60.43 feet, to REFERENCE POINT "R"; thence North 29°45'49" East, 23.92 feet; thence North 18°37'39" East, 103.03 feet; thence North 28°17'23" East, 110.90 feet; thence North 60°47'59" East, 16.03 feet; thence South 81°28'37" East, 20.89 feet; thence South 71°48'27" East, 17.14 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "R"; thence South 77°27'30" West, 5.16 feet; thence North 64°47'16" West, 65.00 feet; thence North 76°12'56" West, 99.30 feet; thence North 76°52'05" West, 70.01 feet; thence North 79°41'18" West, 74.61 feet; thence North 66°52'15" West, 33.80 feet; thence North 59°37'43" West, 33.24 feet; thence North 07°23'27" East, 42.98 feet; thence North 06°08'21" West, 28.50 feet, to the POINT OF ENDING.

U/G Elec.3
BEGINNING at previously stated REFERENCE POINT "G"; thence North 54°24'56" East, 12.83 feet; thence North 30°25'08" East, 50.43 feet; thence North 37°11'41" East, 43.40 feet; thence North 52°14'11" East, 36.29 feet; thence North 39°11'03" East, 40.91 feet; thence North 09°55'50" East, 94.45 feet; thence

North 24°22'48" East, 77.58 feet; thence North 19°06'20" East, 90.52 feet; thence North 24°21'06" East, 29.72 feet; thence North 63°48'47" East, 12.57 feet; thence South 86°01'32" East, 27.98 feet; thence South 23°43'33" East, 2.15 feet, to the POINT OF ENDING.

U/G Elec.4
BEGINNING at previously stated REFERENCE POINT "I"; thence South 64°06'31" East, 38.99 feet; thence South 68°58'49" East, 22.77 feet; thence South 76°26'35" East, 26.44 feet; thence North 77°05'59" East, 49.30 feet; thence North 72°44'04" East, 23.34 feet; thence North 68°38'12" East, 82.28 feet; thence North 64°19'09" East, 76.04 feet, to the POINT OF ENDING.

U/G Elec.5
BEGINNING at previously stated REFERENCE POINT "K"; thence South 81°56'47" East, 29.28 feet; thence North 89°21'53" East, 38.94 feet; thence North 76°23'55" East, 40.26 feet; thence Northeasterly, 79.72 feet, along the arc of a 68.00 foot radius curve to the left, the central angle of which is 67°10'03", and the long chord of which bears North 28°27'03" East, 75.23 feet, to the POINT OF ENDING.

U/G Elec.6
BEGINNING at previously stated REFERENCE POINT "P"; thence North 78°15'09" East, 5.32 feet; thence South 71°16'46" East, 20.51 feet; thence South 39°01'53" East, 15.51 feet; thence South 14°07'56" East, 115.40 feet; thence South 09°45'28" East, 43.97 feet; thence South 02°09'47" East, 101.00 feet; thence South 06°53'30" East, 43.25 feet; thence South 14°04'40" East, 88.10 feet; thence South 19°25'12" East, 88.00 feet; thence South 20°44'08" East, 88.57 feet; thence South 25°05'43" East, 32.79 feet; thence South 30°52'57" East, 39.34 feet; thence South 21°32'37" East, 18.42 feet, to the POINT OF ENDING.

U/G Elec.7
Beginning at previously stated REFERENCE POINT "V"; thence South 06°03'37" East, 4.60 feet; thence South 52°07'25" West, 8.99 feet; thence South 69°46'33" West, 11.72 feet; thence South 53°48'37" West, 12.98 feet; thence South 60°16'16" West, 24.78 feet; thence South 72°33'37" West, 27.49 feet; thence South 79°24'40" West, 30.36 feet; thence South 82°14'27" West, 31.66 feet; thence South 84°12'46" West, 90.93 feet; thence North 76°46'04" West, 15.48 feet; thence North 71°17'07" West, 14.95 feet; thence North 58°53'58" West, 18.75 feet; thence North 44°57'32" West, 29.10 feet; thence North 41°31'45" West, 252.11 feet, more or less, to a point on a line 300 feet North of and parallel to the East and West one-quarter line of said Section 30, and the POINT of ENDING.

Legal Description: Rea Road Substation Easement
Substation easement located in the Northwest one-quarter of Section 35, Town 24 North, Range 08 East, Oscoda Township, Iosco County, Michigan, being described as follows:

Commencing at the Northwest corner of said Section 35; thence South 01°06'32" East, 2113.65 feet, along the West line of said Section 35; thence North 88°53'28" East, 286.17 feet, to the POINT OF BEGINNING; thence North 28°20'22" East, 214.00 feet; thence South 57°10'43" East, 242.00 feet to a point on the centerline of Rea Road; thence Southwesterly along the centerline of Rea Road, 218.68 feet, along the arc of a 832.00 foot radius curve to the left, the central angle of which is 15°03'33", and the long chord of which

bears South 41°04'23" West, 218.05 feet; thence North 56°27'23" West, 194.00 feet to the POINT OF BEGINNING.

Hardy Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas

The centerlines of existing electric facilities easement areas located in Sections 13, 14, 15, 21, 22, 23, 27, 28, 29, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan, said centerlines being described as follows:

LVD1

Commencing at the Southeast corner of said Section 28; thence North 89°14'36" West, 1012.05 feet, along the South line of said Section 28; thence North 00°45'24" East, 45.52 feet, more or less, to a point on the centerline of South Croton Hardy Drive, and to the POINT OF BEGINNING; thence North 88°55'21" West, 89.34 feet, to Reference Point "F"; thence continuing North 88°55'21" West, 815.41 feet, to Reference Point "A"; thence North 43°46'28" West, 505.39 feet; thence North 46°38'28" West, 496.60 feet, more or less, to the North-South one-quarter line of said Section 28, to Reference Point "B", and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "A"; thence North 88°55'21" West, 715.20 feet, more or less, to a point on the North and South one-quarter line of said Section 28, and to the POINT OF ENDING.

LVD1a

Commencing at previously stated Reference Point "B"; thence North 48°43'38" West, 146.85 feet, to the POINT OF BEGINNING; thence continuing North 48°43'38" West, 772.80 feet; thence North 51°31'14" West, 308.82 feet; thence North 50°51'00" West, 114.63 feet, to Reference Point "C"; thence North 72°46'59" West, 92.78 feet; thence North 52°57'37" West, 621.02 feet; thence North 03°31'50" West, 246.80 feet; thence North 66°41'55" West, 96.02 feet, to Reference Point "D"; thence continuing North 66°41'55" West, 305.43 feet; thence North 78°05'28" West, 667.18 feet; thence North 02°59'04" East, 113.27 feet, to Reference Point "I"; thence North 00°08'25" East, 332.44 feet; thence North 00°00'58" West, 1002.45 feet, to Reference Point "P"; thence South 88°37'11" East, 1090.58 feet; to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence North 85°01'26" East, 369.89 feet; thence North 83°11'12" East, 711.99 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "I"; thence North 89°25'47" West, 33.98 feet, more or less, to a point on the West line of said Section 28, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "P"; thence North 00°15'00" East, 18.18 feet, more or less, to a point on the North one-eighth line of said Section 28, and to the POINT OF ENDING.

LVD2

Commencing at the Southwest corner of said Section 27; thence South 89°32'48" East, 1181.07 feet, along the South line of said Section 27; thence North 00°27'12" East, 1330.27 feet, to a point on the South one-

eighth line of said Section 27; thence North 42°02'14" East, 47.15 feet, to the POINT OF BEGINNING; thence North 49°03'47" West, 1173.91 feet; to the POINT OF ENDING.

LVD3
Commencing at the center one-quarter corner of said Section 27; thence North 89°13'16" West, 28.38 feet, along the East and West one-quarter line of said Section 27, to the POINT OF BEGINNING; thence North 02°18'47" East, 349.05 feet; thence North 00°52'02" East, 834.38 feet, to the POINT OF ENDING.

LVD4
Commencing at the Southeast corner of said Section 22; thence North 88°45'02" West, 42.81 feet, along the South line of said Section 22, to the POINT OF BEGINNING; thence North 01°43'14" West, 879.00 feet; thence North 16°10'38" West, 1009.12 feet; thence North 33°32'27" West, 991.22 feet, to Reference Point "G"; thence North 86°44'03" West, 333.66 feet; thence South 35°56'08" West, 318.03 feet; thence South 78°38'18" West, 309.35 feet; thence South 58°57'38" West, 239.37 feet, to Reference Point "H", and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "G"; thence South 87°22'01" East, 714.97 feet; thence North 86°28'12" East, 214.54 feet, more or less, to a point on the East line of said Section 22, and to the POINT OF ENDING.

LVD5
Commencing at the West one-quarter corner of said Section 23; thence North 00°33'59" East, 391.09 feet, along the East line of said Section 22; thence South 89°26'01" East, 1324.71 feet, to the POINT OF BEGINNING; thence North 01°29'13" East, 249.17 feet; to the POINT OF ENDING.

LVD6
Commencing at the Southwest corner of said Section 21, thence South 89°29'14" East, 2691.80 feet along the South line of said Section 21, thence North 00°37'49" East, 1391.35 feet, along the North-South one quarter line of said Section 21, to the POINT OF BEGINNING; thence South 89°05'11" East, 163.60 feet; thence South 81°58'21" East, 283.15 feet; thence South 26°55'23" East, 343.98 feet, to Reference Point "K", and the POINT OF ENDING.

LVD7
Commencing at the East one-quarter corner of said Section 22; thence North 00°33'59" East, 994.02 feet, along the East line of said Section 22; thence North 59°16'08" West, 667.11 feet, to a point on the North one-eighth line of said Section 22, and to the POINT OF BEGINNING; thence continuing North 59°16'08" West, 1033.36 feet, to Reference Point "L"; thence North 59°28'12" West, 353.53 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated Reference Point "L"; thence North 11°56'12" East, 353.66 feet, to the POINT OF ENDING.

LVD8

Commencing at the East one-quarter corner of said Section 14; thence North 89°00'00" West, 29.23 feet, along the East and West one-quarter line of said Section 14, to the POINT OF BEGINNING; thence South 00°41'11" West, 1,324.51 feet, to a point on the South one-eighth line of said Section 14; thence continuing South 00°41'11" West, 1,121.49 feet; thence North 74°06'02" East, 373.33 feet; thence North 67°17'31" East, 354.53 feet; thence North 08°33'44" East, 303.53 feet; to the POINT OF ENDING.

LVD9
Commencing at the East one-quarter corner of said Section 14; thence North 89°00'00" West, 29.23 feet, along the East and West one-quarter line of said Section 14, to the POINT OF BEGINNING; thence North 00°45'31" East, 1,444.22 feet; thence North 00°26'33" West, 284.68 feet; thence North 89°52'11" East, 97.83 feet, to the POINT OF ENDING.

LVD10
Commencing at the North one-quarter corner of said Section 14; thence South 00°29'00" West, 1342.45 feet, along the North and South one-quarter line of said Section 14; thence North 89°20'55" West, 2666.53 feet, along the North one-eighth line of said Section 14, to a point on the East line of said Section 15; thence North 00°33'49" East, 7.75 feet, along the East line of said Section 15, to the POINT OF BEGINNING; thence South 86°15'29" West, 1026.75 feet, to the POINT OF ENDING.

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 15, 22, 31, 32, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said centerlines being described as follows:

LVD11
Commencing at the East one-quarter corner of said Section 32; thence North 89°05'19" West, 21.73 feet, along the East and West one-quarter line of said Section 32, to the POINT OF BEGINNING; thence North 46°18'05" West, 231.69 feet; thence North 88°38'30" West, 281.15 feet; thence North 89°39'33" West, 1714.72 feet, to Reference Point "N"; thence North 89°39'23" West, 2747.11 feet; thence South 76°10'32" West, 284.31 feet; thence North 89°00'37" West, 727.25 feet; thence South 86°37'53" West, 377.74 feet; thence North 88°44'39" West, 351.75 feet, to Reference Point "O"; thence South 13°19'18" West, 690.47 feet; thence South 52°51'38" West, 521.89 feet; thence North 55°25'47" West, 227.87 feet; thence North 04°19'41" West, 460.39 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated Reference Point "N"; thence South 21°53'47" West, 154.02 feet, to a point on the East and West one-quarter line of said Section 32, and to the POINT OF ENDING.

And also, BEGINNING at previously stated Reference Point "O"; thence South 86°10'14" West, 264.49 feet, to the POINT OF ENDING.

LVD12
Commencing at the West one-quarter corner of said Section 22; thence North 00°41'29" East, 507.63 feet, along the West line of said Section 22; thence North 49°36'03" East, 759.41 feet, to a point on the Southeasterly property line of a Consumers Energy parcel described in Liber 143, Page 92, and to the

POINT OF BEGINNING; thence North 49°38'48" East, 403.97 feet; thence North 34°57'01" East, 141.45 feet, to Reference Point "U", thence North 34°57'01" East, 47.31 feet, more or less, to a point on a line being descried as the East line of the Northwest one-quarter of the Northwest one-quarter except the East 10 acres thereof of said Section 22, and to the POINT OF ENDING.

And also, BEGINNING at previously stated Reference Point "U", thence South 78°12'00" East, 27.14 feet, more or less, to a point on a line being descried as the East line of the Northwest one-quarter of the Northwest one-quarter except the East 10 acres thereof of said Section 22, and to the POINT OF ENDING.

LVD13
Commencing at the East one-quarter corner of said Section15; thence North 00°08'36" East, 18.78 feet, along the East line of said Section 15, and the Easterly FERC Project Boundary, to the POINT OF BEGINNING; thence North 88°51'51" West, 1112.33 feet, to REFERENCE POINT "X"; thence North 89°09'27" West, 388.71 feet; thence South 80°50'06" West, 199.26 feet, to the East and West one-quarter line of said Section 15, the POINT OF ENDING.

And also, BEGINNING at Reference Point "X"; thence South 00°27'22" West, 31.13 feet, to the East and West one-quarter line of said Section15, and the POINT OF ENDING.
Legal Description: Centerlines for existing underground Electric Facilities Areas
The centerlines of existing underground electric facilities easement areas located in Sections 13, 21, 22, 28, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan, said centerlines being described as follows:

UG Elec1
BEGINNING at previously stated Reference Point "F"; thence North 22°56'28" West, 15.75 feet; thence North 73°06'00" East, 113.63 feet; thence North 62°51'11" East, 81.97 feet; thence North 31°22'03" East, 57.23 feet; thence North 02°56'17" East, 51.81 feet; thence North 43°30'03" East 28.62 feet; thence North 31°26'53" East, 37.97 feet, to the POINT OF ENDING.

UG Elec2
BEGINNING at previously stated Reference Point "D"; thence North 37°38'45" East, 265.09 feet; thence North 35°40'36" East, 542.04 feet, to the POINT OF ENDING.

UG Elec 3
Commencing at the Northwest corner of said Section 28; thence South 89°29'14" East, 2691.80 feet, along the North line of said Section 28, to a point on the North and South one-quarter line of said Section 28; thence South 00°22'48" West, 158.87 feet, along the North and South one-quarter line of said Section 28; thence South 89°37'12" East, 245.40 feet, to the POINT OF BEGINNING; thence North 26°30'35" East, 43.60 feet; thence North 35°38'16" East, 216.23 feet; thence North 39°44'45" East, 229.73 feet; thence North 23°15'26" East, 147.72 feet, to Reference Point "J"; thence North 30°07'58" East, 141.95 feet; thence North 20°04'16" East, 83.73 feet; thence North 01°34'17" East, 58.43 feet; thence North 25°59'21" West, 83.11 feet; thence North 34°05'49" West, 113.94 feet; thence North 16°57'28" West, 49.88 feet; thence North 02°48'39" East, 74.50 feet; thence North 06°32'18" East, 55.37 feet; thence North 18°27'35" East, 73.58 feet, to Reference Point "K", and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "J"; thence South 65°16'57" West, 102.57 feet, to the POINT OF ENDING.

UG Elec4
BEGINNING at previously stated Reference Point "H"; thence North 17°30'09" East, 17.02 feet; thence North 75°48'09" East, 17.14 feet; thence North 00°28'08" East, 63.35 feet; thence North 14°27'52" West, 42.16 feet; thence North 09°19'09" West, 43.99 feet; thence North 03°11'29" East, 46.05 feet; thence North 56°12'37" East, 9.95 feet, to the POINT OF ENDING.

UG Elec 5
Commencing at the West one quarter corner of said Section 13; thence North 00°07'53" East, 6.57 feet, along the West line of Section 13, to the POINT OF BEGINNING; thence South 85°30'36" East, 126.13 feet; thence South 86°45'39" East, 133.19 feet; thence South 88°41'27" East, 124.13 feet; thence South 89°35'04" East, 200.95 feet; thence South 88°58'24" East, 81.80 feet; thence South 84°52'56" East, 61.14 feet; thence South 80°43'35" East, 186.09 feet; thence South 80°03'20" East, 77.25 feet; thence South 84°21'13" East, 125.49 feet; thence South 87°53'49" East, 74.01 feet; thence North 86°34'20" East, 101.77 feet; thence North 89°40'11" East, 92.20 feet; thence South 78°51'25" East, 22.02 feet; thence South 52°53'32" East, 35.30 feet, to the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 13, 23, 24, 27, 28, 29, Town 13 North, Range 11 West, Big Prairie Township, Newaygo County, Michigan, and in Section 18, Town 13 North, Range 10 West, Aetna Township, Mecosta County, Michigan, said centerlines being described as follows:

46kV Line 19C (Segment 1)
Commencing at the Southeast corner of said Section 28; thence North 89°14'36" West, 910.40 feet, along the South line of said Section 28; thence North 00°45'24" East, 95.91 feet, to a point on the centerline of South Croton Hardy Drive, and to the POINT OF BEGINNING; thence North 88°47'40" West, 996.06 feet; thence North 44°09'23" West, 851.82 feet; thence North 44°06'11" West, 1223.09 feet; thence South 83°55'04" West, 1429.25 feet; thence South 79°19'39" West, 603.41 feet; thence South 75°08'43" West, 1290.70 feet, more or less, to a point on the East one-eighth line of said Section 29, and to the POINT OF ENDING.

46kV Line 19C (Segment 2)
Commencing at the Southwest corner of said Section 27; thence South 89°32'48" East, 1,181.07 feet, along the South line of said Section 27; thence North 00°27'12" East, 1330.27 feet, to a point on the South one-eighth line of said Section 27, and to the POINT OF BEGINNING; thence North 42°02'14" East, 237.56 feet, more or less, to a point on the West one-eighth line of said Section 27, and to the POINT OF ENDING.

46kV Line 19C (Segment 3)
Commencing at the Center one-quarter corner of said Section 27; thence North 89°13'16" West, 326.68 feet, along the East and West one-quarter line of said Section 27, to the POINT OF BEGINNING; thence

North 42°10'52" East, 497.13 feet, more or less, to a point on the North and South one-quarter line of said Section 27, and to the POINT OF ENDING.

46kV Line 19C (Segment 4)
Commencing at the Center one-quarter corner of said Section 27; thence South 89°14'05" East, 1188.67 feet, along the East and West one-quarter line of said Section 27; thence North 00°45'55" East, 1,318.33 feet, to a point on the North one-eighth line of said Section 27, and to the POINT OF BEGINNING; thence North 66°44'20" East, 167.73 feet, more or less, to a point on the East one-eighth line of said Section 27, and to the POINT OF ENDING.

46kV Line 19C (Segment 5)
Commencing at the South one-quarter corner of said Section 23; thence North 88°56'27" West, 1238.21 feet, along the South line of said Section 23, to the POINT OF BEGINNING; thence North 64°48'28" East, 3240.33 feet; thence North 72°47'12" East, 6512.10 feet; thence North 02°06'07" East, 1023.18 feet; thence North 01°54'23" East, 772.49 feet; thence North 00°13'40" East, 1245.62 feet; thence North 33°50'14" East, 704.15 feet; thence North 17°37'49" East, 1942.90 feet; thence North 17°41'39" East, 246.37 feet, more or less, to a point on the North one-eighth line of said Section 18, and to the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 28, and 32, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said centerlines being described as follows:

46kV Line 19C (Segment 6)
Commencing at the East one-quarter corner of said Section 32; thence North 89°05'19" West, 323.71 feet, along the East and West one-quarter line of said Section 32, to the POINT OF BEGINNING; thence North 40°54'45" East, 492.12 feet, to a point on the East line of said Section 32, and to the POINT OF ENDING.

46kV Line 19C (Segment 7)
Commencing at the South one-quarter corner of said Section 28; thence North 89°41'32" West, 698.86 feet, along the South line of said Section 28, to the POINT OF BEGINNING; thence North 41°03'10" East, 1089.73 feet, to a point on the North and South one-quarter line of said Section 28, and to the POINT OF ENDING.

Hodenpyl Project
Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Sections 24 and 25, Town 23 North, Range 13 West, Marilla Township, Manistee County, Michigan, and in Sections 1, 2, 10, 11, 16, 17, 19, 20, 21and 30, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan, and in Sections 35 and 36, Town 24 North, Range 12 West, Wexford Township, Wexford County, Michigan, said centerlines being described as follows:

LVD1

BEGINNING at the East one-quarter corner of said Section 25; thence North 10°47'33" West, 236.94 feet, to Reference Point "M"; thence North 10°20'54" West, 589.89 feet; thence North 21°13'36" West, 235.90 feet, to Reference Point "A"; thence North 04°00'55" East, 112.18 feet; thence North 34°47'27" East, 594.18 feet, to Reference Point "B"; thence North 34°47'27" East, 155.90 feet; thence South 23°33'00" East, 123.17 feet; thence South 19°48'32" East, 105.76 feet; thence South 02°36'17" East, 165.43 feet; thence South 05°41'17" East, 17.16 feet; thence South 14°40'08" East, 18.18 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "M"; thence South 89°08'10" East, 37.95 feet, more or less, to a point on the Easterly right of way line of Hodenpyl Dam Road, and to the POINT OF ENDING.

LVD1A
And also BEGINNING at previously stated Reference Point "A"; thence South 30°30'00" West, 82.13 feet; thence South 61°15'13" West, 174.95 feet, to the POINT OF ENDING.

LVD2
BEGINNING at previously stated Reference Point "B"; thence North 25°15'20" West, 2762.04 feet; thence North 12°16'52" East, 490.81 feet; thence North 51°30'13" East, 357.80 feet, to Reference Point "Z"; thence North 52°57'21" East, 209.59 feet; thence North 63°11'53" East, 229.74 feet, to Reference Point "C"; thence North 52°19'31" East, 283.15 feet, more or less, to a point on the East and West one-quarter line of said Section 24, and the POINT OF ENDING.

And also commencing at previously stated Reference Point "Z"; thence North 51°49'21" West, 277.81 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence North 03°15'52" East, 182.30 feet, more or less, to a point on the East and West one-quarter line of said Section 24, and the POINT OF ENDING.

LVD3
Commencing at the West one-quarter corner of said Section 17; thence South 00°26'35" West, 2656.00 feet, along the West line of said Section 17; thence South 00°56'10" West, 1250.07 feet, along the East line of said Section 19; thence North 88°48'31" West, 2602.98 feet, along the North one-eighth line of said Section 19; thence North 88°37'04" West, 549.69 feet, along the North one-eighth line of said Section 19, to the POINT OF BEGINNING; thence South 69°30'14" West, 272.38 feet, to Reference Point "N"; thence continuing South 69°30'14" West, 1487.56 feet; thence South 48°42'26" West, 313.74 feet; thence South 48°34'48" West, 297.02 feet; thence South 52°22'53" West, 129.33 feet, more or less, to a point on the East line of said Section 24, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "N"; thence North 14°57'45" West, 105.78 feet, more or less, to a point on the North one-eighth line of said Section 19, and to the POINT OF ENDING.

LVD4

Commencing at the West one quarter corner of said Section 17; thence South 89°06'47" East, 2625.45 feet, along the East and West one-quarter line of said Section 17; thence South 01°10'31" West, 2656.11 feet, along the North and South one-quarter line of said Section 17; thence North 89°06'34" West, 3.05 feet, along the North line of said Section 20, to the POINT OF BEGINNING; thence South 01°48'32" East, 588.96 feet, to the POINT OF ENDING.

LVD5
Commencing at the West one-quarter corner of said Section 17; thence South 89°06'47" East, 2625.45 feet, along the East and West one-quarter line of said Section 17; thence South 01°10'31" West, 1624.48 feet, along the North and South one-quarter line of said Section 17, to the POINT OF BEGINNING; thence North 69°24'27" East, 809.47 feet, more or less, to a point on the South one-eighth line of said Section 17, and to the POINT OF ENDING.

LVD6
Commencing at the East one-quarter corner of said Section 17; thence South 02°30'10" West, 1328.65 feet, along the East line of said Section 17; thence North 89°06'41" West, 148.74 feet, along the South one-eighth line of said Section 17, to the POINT OF BEGINNING; thence South 11°25'49" East, 90.14 feet, to Reference Point "Q'"; thence continuing South 11°25'49" East, 434.78 feet; thence South 10°56'59" West, 301.55 feet, to Reference Point "O", thence continuing South 10°56'59" West, 290.07 feet; to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "Q"; thence South 71°07'57" West, 758.03 feet; thence South 44°10'56" West, 652.40 feet; thence South 68°35'50" West, 374.46 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "O"; thence South 77°42'52" West, 185.24 feet; to the POINT OF BEGINNING; thence North 77°42'52" East, 185.24 feet; thence North 75°31'48" East, 793.63 feet, to Reference Point "P"; thence continuing North 75°31'48" East, 393.69 feet; thence North 49°22'52" East, 456.76 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "P"; thence South 23°52'36" West, 398.51 feet, to the POINT OF ENDING.

LVD7
Commencing at the East one-quarter corner of said Section 17; thence South 02°30'10" West, 595.52 feet, along the East Line of said Section 17, to the POINT OF BEGINNING; thence North 69°29'39" East, 2383.47 feet; thence North 48°09'57" East, 4602.89 feet, to Reference Point "R"; thence continuing North 48°09'57" East, 886.78 feet, more or less, to a point on the South one-eighth line of said Section 10, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "R", thence North 51°52'30" West, 262.90 feet; thence North 16°06'32" West, 455.64 feet, more or less to a point on the South one-eighth line of said Section 9, and to the POINT OF ENDING.

LVD8
Commencing at the Southeast corner of said Section 16; thence South 89°19'22" West, 500.77 feet; along the South line of said Section 16; thence South 00°40'38" East, 20.17 feet, to the POINT OF BEGINNING; thence South 89°52'06" West, 732.04 feet; thence North 34°50'29" West, 215.03 feet; thence North 25°35'50" West, 295.64 feet; thence North 63°30'24" East, 337.09 feet; thence North 13°35'54" West, 118.36 feet, to the POINT OF ENDING.

LVD9
Commencing at previously stated Reference Point "R"; thence North 48°09'57" East, 1419.84 feet, more or less, to a point on the West one-eighth line of said Section 10, and to the POINT OF BEGINNING; thence North 48°16'19" East, 416.13 feet, to Reference Point "T"; thence continuing North 48°16'19" East, 1016.60 feet, more or less, to a point on the East and West one-quarter line of said Section 10, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "T" thence North 46°40'56" West, 63.95 feet, more or less, to a point on the South Easterly right of way line of North Hodenpyl Dam Road, and the POINT OF ENDING.

LVD10
Commencing at the Northeast corner of said Section 10; thence North 89°51'46" West, 1359.13 feet, along the North line of said Section 10; thence South 02°22'02" West, 1442.28 feet, along the East one-eighth line of said Section 10, to the POINT OF BEGINNING; thence North 89°29'30" West, 392.65 feet; thence South 48°12'39" West, 1325.65 feet; to Reference Point "AB"; thence South 00°56'10" East, 380.00 feet, to POINT OF ENDING.

And also, BEGINNING at previously stated Reference Point "AB"; thence South 48°12'39" West, 9.27 feet, more or less, to a point on the North and South one-quarter line of said Section 10, and to the POINT OF ENDING.

LVD11
Commencing at the Northwest corner of said Section 11; thence South 02°33'38" West, 1447.61 feet, along the West line of said Section 11, to the POINT OF BEGINNING; thence South 89°38'24" East, 149.58 feet, to Reference PT "U"; thence continuing South 89°38'24" East, 355.81 feet, to Reference PT "FF"; thence continuing South 89°38'24" East, 1452.75 feet; thence South 84°24'15" East, 649.70 feet, more or less, to a point on the North and South one-quarter line of said Section 11, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference PT "U"; thence North 19°31'14" West, 71.83 feet, more or less, to a point on the Southerly right of way line of M-115, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference PT "FF"; thence North 00°52'28" West, 67.58 feet, more or less, to a point on the Southerly right of way line of M-115, and to the POINT OF ENDING.

LVD12

Commencing at the West one-quarter corner of said Section 2; thence North 89°06'45" East, 3931.38 feet, along the East and West one-quarter line of said Section 2, thence North 02°50'27" East, 2605.94 feet, along the East one-eighth line of said Section 2; thence South 89°46'01" East, 542.14 feet, along the North line of said Section 2, to the POINT OF BEGINNING; thence South 08°25'36" West, 69.89 feet, to Reference PT "V"; thence continuing South 08°25'36" West, 139.52 feet, to a point on a line being described as being 14 rods South of the North line of said Section 2, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference PT "V"; thence South 87°53'04" East, 138.83 feet, to the POINT OF ENDING.

LVD13
Commencing at the West one-quarter corner of said Section 2; thence North 89°06'45" East, 5240.81 feet, along the East and West one-quarter line of said Section 2; thence North 03°02'46" East, 2580.74 feet, along the East line of said Section 2; thence South 89°13'16" East, 1314.85 feet, along the North line of said Section 1; thence North 02°22'05" East, 83.38 feet, along the West one-eighth line of said Section 36, to the POINT OF BEGINNING to Reference Point "D"; thence South 84°02'15" East, 1316.61 feet, more or less, to a point on the North and South one-quarter line of said Section 1, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "D"; thence North 84°02'15" West, 302.19 feet; thence North 02°21'17" East, 1198.24 feet; thence South 89°11'02" East, 655.97 feet; thence South 88°58'26" East, 698.97 feet; thence North 15°22'59" East, 0.50 feet; to a point on the South one-eighth line of said Section 36, and the POINT OF ENDING.

LVD14
Commencing at the East one-quarter corner of said Section 11; thence North 89°03'47" West, 1901.27 feet, along the East-West one-quarter line of said Section 11; thence North 00°'56'13" East, 20.15 feet, to the POINT OF BEGINNING; thence South 83°56'29" West, 116.72 feet, to the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas
The centerlines of an existing electric facilities easement areas located in Sections 24 and 25, Town 23 North, Range 13 West, Marilla Township, Manistee County, Michigan, and in Sections 10, 11, 19 and 30, Town 23 North, Range 12 West, Springville Township, Wexford County, Michigan, said centerlines being described as follows:

46kV Line 120E (Segment 1)
Commencing at the Northwest corner of said Section 11; thence South 02°33'38" West, 977.62 feet, along the West line of said Section 11; thence South 89°40'53" East, 494.47 feet, to a point on a line lying 30 rods East of the West line of said Section11, and the POINT OF BEGINNING; thence continuing South 89°40'53" East, 2109.42 feet, more or less, to a point on the North and South one-quarter line of said Section 11, and to the POINT OF ENDING.

46kV Line 120E (Segment 2)
Commencing at the Northeast corner of said Section 10; thence North 89°51'46" West, 1,359.13 feet, along the North line of said Section 10; thence South 02°22'02" West, 970.60 feet, along the East one-eighth line

of said Section 10, to the POINT OF BEGINNING; thence North 89°34'28" West, 1355.60 feet, more or less, to a point on the North and South one-quarter line of said Section 10, and to the POINT OF ENDING.

46kV Line 13J
BEGINNING at the East one-quarter corner of said Section 25; thence North 10°47'33" West, 236.94 feet; thence North 10°20'54" West, 589.89 feet; thence North 10°38'19" West, 212.99 feet; thence North 35°12'22" East, 587.89 feet, to a point on the Westerly fence line of Hodenpyl Substation, and the POINT OF ENDING.

And also, BEGINNING at the East one-quarter corner of said Section 25; thence South 39°27'53" East, 1695.78 feet, to a point on the South one-eighth line of said Section 30, and the POINT OF ENDING.

46kV Line 18C
Commencing at the East one-quarter corner of said Section 25; thence North 87°34'10" West, 662.47 feet, along the East and West one-quarter line of said Section 25; thence North 02°25'50" East, 740.69 feet, to the FERC boundary line, and the POINT OF BEGINNING; thence North 61°09'52" East, 227.90 feet; thence North 39°22'04" East, 334.59 feet; thence North 39°07'42" East, 554.30 feet, to Reference Point "X", thence continuing North 39°07'42" East, 96.03 feet; thence North 82°37'39" East, 57.80 feet, to the POINT OF ENDING.

46kV Line 120A
Commencing at the West one-quarter corner of said Section 17; thence South 00°26'35" West, 2656.00 feet, along the West line of said Section17; thence South 00°56'10" West, 1250.07 feet, along the East line of said Section 19; thence North 88°48'31" West, 2602.98 feet, along the North one-eighth line of said Section 19; thence North 88°37'04" West, 2580.80 feet, along the North one-eighth line of said Section 19, to the POINT OF BEGINNING; thence South 08°45'29" East, 911.97 feet; thence South 52°07'53" West, 272.77 feet; thence South 52°22'53" West, 129.33 feet, more or less, to a point on the West line of said Section 19, and to Reference Point "AA", and the POINT OF ENDING.

46kV Line 120A (Segment 2)
And also Commencing at previously stated Reference Point "AA" ; thence South 52°22'53" West, 232.40 feet, to a point on the East and West one-quarter line of said section 24, and to the POINT OF BEGINNING; thence South 52°19'31" West, 283.15 feet; thence South 53°00'19" West, 351.89 feet; thence South 14°42'30" East, 3311.84 feet; thence South 00°42'12" East, 67.24 feet, to a point on the Hodenpyl Dam Substation fence, and to the POINT OF ENDING.

46kV Line 18A
Commencing at the West one-quarter corner of said Section 17; thence South 00°26'35" West, 2656.00 feet, along the West line of said Section17; thence South 00°56'10" West, 1250.07 feet, along the East line of said Section 19; thence North 88°48'31" West, 2602.98 feet, along the North one-eighth line of said Section 19; thence North 88°37'04" West, 2,633.00 feet, along the North one-eighth line of said Section 19, to the POINT OF BEGINNING; thence South 09°10'57" East, 880.50 feet; thence South 52°32'22" West,

333.54 feet, to a point on the West line of said Section 19, and to Reference Point "CC", and to the POINT OF ENDING;

46kV Line 18A (Segment 2)
And also commencing at previously stated Reference Point "CC"; thence South 52°32'22" West, 157.93 feet; thence South 52°07'03" West, 193.56 feet, to a point on the East and West one-quarter line of said Section 24, and to the POINT OF BEGINNING; thence South 51°53'20" West, 215.22 feet; thence South 60°49'14" West, 608.17 feet; thence South 18°52'43" East, 2577.20 feet; thence South 15°34'51" East, 555.45 feet; thence South 83°02'50" East, 67.27 feet; thence South 06°10'12" East, 226.22 feet, to a point on the Hodenpyl Dam Substation fence, and the POINT OF ENDING.

Legal Description: Hodenpyl Dam Substation Easement
A substation easement in part of the Northeast one-quarter of Section 25, Township 23 North, Range 13 West, Marilla Township, Manistee County, Michigan, more fully described as follows:
Commencing at the Southeast corner of said Section 25; thence North 01°24'22" East, 2622.86 feet, along the East line of said Section 25 to the East 1/4 corner of said Section 25; thence North 02°43'29" West, 864.44 feet, to the POINT OF BEGINNING; thence South 48°20'41" West, 141.00 feet, to a point in the centerline of No. 1 Road; thence South 61°07'22" West, 227.00 feet, along the centerline of said No. 1 Road; thence South 62°52'07" West, 200.00 feet, along the centerline of said No. 1 Road; thence North 01°13'01" West, 330.00 feet; thence North 49°01'47" East, 355.00 feet; thence South 52°50'31" East, 167.00 feet; thence South 27°44'44" East, 189.00 feet, to the POINT OF BEGINNING.

Loud Project
Legal Description: Centerlines for Existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Section 21, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

LVD1
Commencing at the Southwest one-quarter of said Section 21; thence North 00°24'02" West, 2,575.33 feet, along the West line of said Section 21 to a point on the East and West one-quarter line of said Section 21; thence North 87°42'26" East, 531.22 feet, along the East and West one-quarter line of said Section 21, to the POINT OF BEGINNING, and REFERENCE POINT "A"; thence North 46°18'25" East, 713.13 feet; thence North 42°07'27" East, 309.95 feet; thence North 41°50'49" East, 412.83 feet, to REFERENCE POINT "B"; thence North 88°28'54" East, 311.59 feet; thence North 76°02'36" East, 120.58 feet, to a point on the Easterly FERC Project Boundary line, and the POINT OF ENDING, and REFERENCE POINT "C".

And also, BEGINNING at previously stated REFERENCE POINT "B"; thence North 40°04'15" East, 74.98 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated POINT "B"; thence South 89°35'29" West, 166.11 feet, to the POINT OF ENDING.

Legal Description: Centerline for Existing HVD Electric Facilities Easement Areas

The centerlines of existing electric facilities easement areas located in Sections 19 and 21, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerlines being described as follows:

46 kV line 29T
Commencing at Previously stated REFERENCE POINT "C"; thence South 00°02'55" East, 95.70 feet, along the Easterly FERC Project Boundary line to the POINT OF BEGINNING; thence South 57°14'41" West, 49.29 feet; thence South 78°34'52" West, 762.25 feet; thence North 01°11'14" West, 104.52 feet, to REFERENCE POINT "D"; thence North 01°11'14" West, 20.27 feet; to a point on the Southerly Loud Dam Substation fence, and the POINT OF ENDING.

46 kV line 66A (segment 1)
BEGINNING at previously stated REFERENCE POINT "A"; thence North 46°18'25" East, 713.13 feet; thence North 42°07'27" East, 309.95 feet; thence North 72°04'53" West, 180.51 feet; thence North 11°50'24" East, 113.84 feet; thence North 28°07'46" East, 40.27 feet, to a point on the Southerly Loud Dam Substation fence, and the POINT OF ENDING.

46 kV line 66A (segment 2)
Commencing at the Southwest corner of said Section 19; thence North 89°19'55" East, 17.38 feet, along the South line of said Section 19, to the POINT OF BEGINNING and REFERENCE POINT "E"; thence North 53°57'04" East, 229.63 feet; thence North 89°23'12" East, 3401.81 feet, more or less, to the East one-eighth line of said Section 19, and the POINT OF ENDING.

46 kV line 29A (segment 1)
Commencing at the Southwest one-quarter of said Section 21; thence North 00°24'02" West, 2,575.33 feet, along the West line of said Section 21 to a point on the East and West one-quarter line of said Section 21;thence North 87°42'26" East, 456.37 feet, along the East and West one-quarter line of said Section 21, to the POINT OF BEGINNING; thence North 46°18'37" East, 741.31 feet; thence North 13°28'54" East, 261.24 feet; thence North 13°53'40" East, 134.35 feet; thence North 26°36'35" East, 38.79 feet, to a point on the Southerly Loud Dam Substation fence, and the POINT OF ENDING.

46 kV line 29A (segment 2)
Commencing at REFERENCE POINT "E"; thence North 89°19'55" East, 79.88 feet, along the South line of said Section 19, to the POINT OF BEGINNING; thence North 53°45'35" East, 130.18 feet; thence North 88°28'52" East, 614.93 feet; thence North 89°26'25" East, 2787.39 feet, more or less, to a point on the East one-eighth line of said Section 19, and the POINT OF ENDING.

Legal Description: Access Easement
A strip of land twenty (20) feet in width being ten (feet) on each side of the following described centerline located in the Northwest one-quarter of Section 21, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, said centerline described as:

Commencing at the Southeast corner of said Section 21; thence North 00°32'23" West, 2631.40 feet, along the East line of said Section 21, to the East one-quarter corner of said Section 21; thence North 00°20'39" West, 891.25 feet, along the East line of said Section 21; thence South 89°39'41" West, 3712.88 feet, to a

point on the centerline of Loud Dam Road and the POINT OF BEGINNING; thence South 83°55'57" West, 62.17 feet; thence Southwesterly, 69.17 feet, along the arc of a 115.00 foot radius curve to the left, the central angle of which is 34°27'41", and the long chord of which bears South 66°42'06" West, 68.13 feet; thence South 49°28'16" West, 21.04 feet; thence Southwesterly, 92.68 feet, along the arc of a 300.00 foot radius curve to the left, the central angle of which is 17°42'02", and the long chord of which bears South 40°37'14" West, 92.31 feet; thence South 31°46'13" West, 38.52 feet; thence North 83°42'39" West, 20.43 feet, to the POINT OF ENDING. The sidelines of said easement are to be extended or shortened to begin perpendicular and adjacent to the POINT OF BEGINNING and ending on a line having a bearing of South 08° 14'17" West.

Legal Description: Loud Dam Substation Easement
Substation easement located in the Northwest one-quarter of Section 21, Town 24 North, Range 06 East, Oscoda Township, Iosco County, Michigan, being described as follows:

BEGINNING at REFERENCE POINT "D"; thence North 81°45'43" West, 95.54 feet; thence North 13°12'33" East, 184.78 feet; thence South 81°45'43" East, 193.08 feet; thence South 08°14'17" West, 184.09 feet; thence North 81°45'43" West, 113.55 feet, to the POINT OF BEGINNING.

Mio Project
Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located in Section 7, Town 26 North, Range 03 East, Mentor Township, Oscoda County, Michigan, and in Sections 2, 3, 5, 10, 11, and 12, Town 26 North, Range 02 East, Big Creek Township, Oscoda County, Michigan, said centerlines being described as follows:

LVD1
Commencing at the East one-quarter corner of said Section 12; thence North 00°21'07" West, 758.90 feet, along the East line of said Section 12, to Reference Point "A", and to the POINT OF BEGINNING; thence South 78°41'13" West, 178.48 feet, to Reference Point "K"; thence South 29°33'26" West, 371.10 feet; thence South 15°07'43" West, 944.60 feet, to Reference Point "B"; thence continuing South 15°07'43" West, 81.41 feet, to Reference Point "C"; thence South 80°59'59" West, 1797.75 feet, to Reference Point "D"; thence continuing South 80°59'59" West, 361.81 feet, to Reference Point "E"; thence continuing South 80°59'59" West, 746.00 feet, to Reference Point "F"; thence South 52°14'31" West, 2519.97 feet, thence South 00°03'31" West, 59.14 feet, to Reference Point "M"; thence continuing South 00°03'31" West, 19.82 feet, more or less, to a point on the South line of said Section 11, and to the POINT OF ENDING.

And also commencing at previously stated Reference Point "A"; thence North 78°41'13" East, 328.83 feet; thence North 87°17'54" East, 81.66 feet, to a point on the Westerly right of way line of State Highway M-33/M-72/South Mount Tom Road, and to the POINT OF ENDING.

And also commencing at previously stated Reference Point "B"; thence South 16°42'03" East, 844.77 feet, to Reference Point "N", and to a point on the South one-eighth line of said Section 12; thence North 58°49'05" East, 32.03 feet, to a point on the West line of Lot 12, Block 14, of the Amended Plat of part of

Blocks 5, 6, 14, vacated alley, vacated Deyarmond Street & 4th Street of the Map of the Village of Mio, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "C"; thence North 81°41'01" East, 43.40 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "D"; thence North 39°30'20" West, 322.24 feet; thence North 32°40'42" West, 225.88 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "E"; thence North 23°29'19" West, 176.87 feet, to the POINT OF ENDING.

And Also BEGINNING at previously stated Reference Point "F"; thence North 60°18'38" West, 294.48 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "M"; thence North 71°31'10" East, 84.88 feet; thence South 87°43'52" East, 192.58 feet; North 90°00'00" East, 134.80 feet; thence South 89°54'44", 366.24 feet; thence North 88°56' 48" East, 64.86 feet, more or less, to a point on the East line of the West one-half of the Southwest one-quarter of the Southwest one-quarter, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "K"; thence North 00°55'30" West, 120.75 feet; thence North 16°51'52" East, 274.83 feet; thence North 41°25'12" East, 182.67 feet, to Reference Point "G"; thence North 05°52'12" West, 23.54 feet, to Reference Point "H"; thence South 88°55'19" West, 320.48 feet; thence North 89°18'34" West, 554.97 feet, to Reference Point "I"; thence continuing North 89°18'34" West, 351.27 feet; thence North 01°07'25" West, 37.43 feet, more or less to a point on the North one-eighth line of said Section 12, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "G"; thence North 59°01'22" East, 143.37 feet, more or less, to a point on the North one-eighth line of said Section 7, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "H"; thence North 00°19'21" West, 49.63 feet, to a point on the North one-eighth line of said Section 7, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "I"; thence North 00°00'53" West, 43.76 feet, to a point on the North one-eighth line of said Section 12, and to the POINT OF ENDING.

LVD2
Commencing at the East one-quarter corner of said Section 12; thence South 00°20'56" East, 592.74 feet, along the East line of said Section 12, to a point on a line being described as the South line of the North 100 feet of the South 2143.68 feet of the East 360' feet of the Southeast one-quarter of said Section 12; thence South 89°40'57" West, 31.33 feet, along said South line, to the POINT OF BEGINNING; thence South 50°55'10" West, 23.63 feet; thence South 08°07'33" West, 288.01 feet; thence South 23°13'15" East, 119.38 feet, to a point on the North Line of the Amended Plat of part of Blocks 5, 6, 14, Vacated Alley, Vacated Deyarmond Street & 4th Street of the Map of the Village of Mio, and to the POINT OF ENDING.

LVD3
Commencing at the West one-quarter corner of said Section 3; thence North 89°55'58" East, 714.13 feet, along the East and West one-quarter line of said Section 3, to the POINT OF BEGINNING; thence South 07°59'25" West, 62.05 feet, to Reference Point "O", and to the POINT OF ENDING.

LVD4
Commencing at the Southwest corner of said Section 3; thence South 89°54'48" East, 1331.39 feet, along the South line of said Section 3, to the POINT OF BEGINNING; thence North 03°23'28" East, 658.44 feet; thence North 58°07'08" West, 216.27 feet, to the POINT OF ENDING.

LVD5
Commencing at the North one-quarter corner of said Section 5; thence South 89°47'30" East, 517.46 feet, along the North line of said Section 5, to the POINT OF BEGINNING; thence South 77°29'23" West, 527.89 feet, more or less, to a point on the North and South one-quarter line of said Section 5, and to the POINT OF ENDING.

LVD6
Commencing at the North one-quarter corner of said Section 5; thence South 01°01'54" East, 1346.05 feet, along the North and South one-quarter line of said Section 5, to the POINT OF BEGINNING; thence North 48°10'47" East, 232.17 feet, to the POINT OF ENDING.

LVD7
Commencing at the North one-quarter corner of said Section 5; thence South 01°01'54" East, 2629.42 feet, along the North and South one-quarter line of said Section 5, to the POINT OF BEGINNING; thence North 89°05'34" East, 648.04 feet; thence South 64°42'35" East, 367.01 feet; thence South 53°07'06" East, 276.22 feet, to the POINT OF ENDING.

LVD8
Commencing at the East one-quarter corner of said Section 3; thence South 89°55'58" West, 2275.63 feet, along the East and West one-quarter line of said Section 3, to the POINT OF BEGINNING and Reference Point "S"; thence South 57°39'23" East, 122.61 feet; thence South 87°49'59" East, 698.33 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "S"; thence North 57°39'23" West, 124.39 feet; thence North 41°52'17" West, 252.41 feet; thence North 40°53'45" West, 161.61 feet, more or less, to a point on the North and South one-quarter line of said Section 3, and the POINT OF ENDING.

LVD9
Commencing at the West one-quarter corner of said Section 2; thence South 00°02'49" East, 1,325.63 feet, along the West line of said Section 2, to the Southwest corner of the Northwest one-quarter of the Southwest one-quarter of said Section 2; thence South 89°43'01" East, 316.23 feet, along the South one-eighth line of said Section 2; thence South 00°16'59" West, 16.11 feet, to the POINT OF BEGINNING; thence South

89°51'48" East, 212.40 feet; thence North 83°07'47" East, 125.04 feet, more or less, to a point on the South one-eighth line of said Section 2, to Reference Point "P", and to the POINT OF ENDING.

And also commencing at previously stated Reference Point "P"; thence South 89°43'01" East, 1258.33 feet, along the South one-eighth line of said Section 2, to the POINT OF BEGINNING; thence South 80°54'37" East, 294.00 feet; thence North 78°45'14" East, 312.42 feet, to Reference Point "Q"; thence South 84°32'12" East, 152.09 feet, to the North-South one-quarter line of said Section 2, and the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "Q"; thence South 00°20'49" East, 293.81 feet; thence South 30°28'28" East, 233.54 feet, to a point on the Westerly right of way of Maier Court, and to the POINT OF ENDING.

LVD10
Commencing at the Northwest corner of said Section 12; thence South 00°01'31" East, 8.22 feet, along the West line of said Section 12; thence South 89°50'12" West, 128.69 feet, to the POINT OF BEGINNING; thence North 89°50'12" East,556.89 feet; thence North 00°08'43" West, 5.00 feet, to a point on the North line of said Section 12, and to the POINT OF ENDING.

Legal Description: Centerlines for existing underground Electric Facility Area
The centerlines of existing underground electric facility easement areas located in Section 3 and12, Big Creek Township, Oscoda County, Michigan, said centerlines being described as follows;

U/G Elec.1
BEGINNING at previously stated Reference Point "N"; thence North 74°14'35" East, 15.07 feet; thence North 65°06'46" East, 14.27 feet, to a point on the West line of Lot 12, Block 14, of the Amended Plat of part of Blocks 5, 6, 14, vacated alley, vacated Deyarmond Street & 4th Street of the Map of the Village of Mio, and to the POINT OF ENDING.

U/G Elec.2
BEGINNING at previously stated Reference Point "O"; thence South 02°03'17" West, 109.22 feet; thence South 12°46'14" West, 103.71 feet; thence South 15°13'54" West, 29.97 feet; thence South 04°30'23" East, 24.28 feet; thence South 19°59'01" West, 32.46 feet; thence South 05°41'17" West, 133.32 feet; thence South 03°53'24" West, 118.94 feet; thence South 11°55'10" West, 77.74 feet; thence South 06°03'22" West, 154.91 feet; thence South 05°04'06" West, 158.71 feet; thence South 09°24'55" West, 194.85 feet; thence South 03°37'49" West, 39.19 feet; thence continuing South 03°37'49" West, 27.21 feet; thence South 30°53'54" East, 88.56 feet; thence South 20°27'43" East, 31.71 feet; thence South 34°07'32" East, 46.66 feet; thence South 32°31'07" East, 28.91 feet; thence South 12°03'33" East, 18.47 feet; thence South 34°52'32" East, 60.04 feet; thence South 42°39'12" East, 41.83 feet; thence South 49°25'57" East, 41.25 feet; thence South 50°43'36" East, 457.53 feet; thence South 54°54'17" East, 59.25 feet, to the POINT OF ENDING.

Proposed U/G Elec.1
Commencing at the Southwest corner of said Section 3; thence South 89°54'48" East, 524.88 feet, along the South line of said Section 3, to the POINT OF BEGINNING; thence Northeasterly, 54.84 feet, along

the arc of a 753.24 foot radius curve to the left, the central angle of which is 04°10'16", and the long chord of which bears North 50°27'38" East, 54.82 feet, to REFERENCE POINT "R"; thence Northeasterly, 110.47 feet, along the arc of a 753.24 foot radius curve to the left, the central angle of which is 08°24'10", and the long chord of which bears North 44°10'25" East, 110.37 feet; thence North 39°58'12" East, 531.29 feet; thence Northeasterly, 216.39 feet, along the arc of a 679.24 foot radius curve to the right, the central angle of which is 18°15'12", and the long chord of which bears North 49°05'39" East, 215.48 feet; thence South 43°40'25" East, a distance of 198.59 feet; thence North 46°19'35" East, 6.00 feet; thence North 43°40'25" West, 1680.22 feet; thence North 00°40'09" East, 851.62 feet; thence North 01°01'44" West, 50.59 feet, to a point on the East-West one quarter line of said Section 3, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "R"; thence South 26°38'41" East, 39.15' to a point on the South line of said Section 3, and the POINT OF ENDING.

Rogers Project

Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas.

The centerlines of existing electric facilities easement areas located in Sections 1,2,11, and 14 Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said centerlines being described as follows:

LVD1

Commencing at the West one-quarter corner of said Section 14; thence North 89°02'14" East, 33.77 feet, along the East and West one-quarter line of said Section 14, to the POINT OF BEGINNING; thence North 33°03'43" West, 24.73 feet; thence North 88°51'51" West, 20.24 feet, to a point on the West line of said Section 14, and the Westerly FERC Project Boundary line, and the POINT OF ENDING.

LVD2

Commencing at the Center one-quarter corner of said Section 14; thence North 00°53'28" East, 19.12 feet, along the North and South one-quarter line of said Section 14, to the POINT OF BEGINNING; thence South 88°16'11" West, 278.42 feet; thence South 89°53'46" West, 463.40 feet; thence North 65°49'51" West, 428.41 feet; thence North 78°12'22" West, 188.59 feet; thence North 85°06'28" West, 27.32 feet, more or less, to a point on the West one-eighth line of said Section 14, and the POINT OF ENDING, and REFERENCE POINT "A".

LVD3

Commencing at previously stated REFERENCE POINT "A"; thence North 00°29'51" East, 44.80 feet, along the West one-eighth line of said Section 14, to the POINT OF BEGINNING; thence North 49°42'38" East, 181.23 feet; thence North 40°22'57" East, 998.22 feet; thence North 05°59'49" West, 935.82 feet; thence North 29°10'22" West, 598.90 feet to REFERENCE POINT "B"; thence North 04°24'11" East, 62.41 feet, to REFERENCE POINT "C"; thence North 38°45'28" West, 129.12 feet; thence North 25°54'46" West, 113.73 feet; thence North 22°39'23" West, 128.72 feet, to the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "B"; thence North 69°46'39" East, 41.78 feet, to a point on the Stanwood Substation fence and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "C"; thence South 69°15'10" East, 36.13 feet, to a point on the Stanwood Substation fence and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "C"; thence South 62°34'08" West, 91.58 feet; thence South 86° 02'30 West, 740.99 feet; thence South 70°51'35" West, 74.89 feet to REFERENCE POINT "K"; thence North 26°33'40" West, 106.97 feet; thence South 69°13'24" West, 207.61 feet; thence North 26°17'28" West, 19.45 feet, more or less, to the boundary line of Consumers Energy parcel recorded in Liber 143, Page 92 and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "K"; thence South 08°51'25" West, 87.51 feet; thence South 18°44'29" East, 203.82 feet; thence North 83°27'52" East, 8.08 feet, more or less, to a point on the Easterly right of way line of Northland Drive, and the POINT OF ENDING.

LVD4
Commencing at the Southeast corner of said Section 2; thence North 89°27'49" West, 1242.54 feet, along the South line of said Section 2; thence North 00°32'11" East, 206.50 feet, to the POINT OF BEGINNING; thence South 89°15'36" West, 338.52 feet, more or less, to a point on the West line of Consumers Energy parcel recorded in Liber 144, Page 243, Mecosta County Records, and the POINT OF ENDING.

LVD5
Commencing at the Southeast corner of said Section 2; thence North 00°09'10" West, 2595.85 feet, along the East line of said Section 2, to REFERENCE POINT "M", and the POINT OF BEGINNING; thence North 49°05'15" West, 117.24 feet, to REFERENCE POINT "N"; thence South 36°26'52" West, 76.16 feet, more or less, to a point on the East and West one-quarter line of said Section 2, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "M"; thence South 47°11'37" East, 48.89 feet, more or less, to a point on the East line of Consumer Energy parcel recorded in Liber 177, Page 524, Mecosta County Records, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "N"; thence North 13°43'47" East, 164.93 feet, more or less, to a point on the Northerly line of parcel recorded in Liber 177, Page 524, Mecosta County Records, and the POINT OF ENDING.

Legal Description: Centerlines for existing HVD Electric Facilities Easement Areas.
The centerlines of existing electric facilities easement areas located in Sections 1,2,11 and 14, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said centerlines being described as follows:

46 kV line 19C
Commencing at previously stated REFERENCE POINT "A", thence North 00°29'51" East, 48.22 feet, along the West one-eighth line of said Section 14, to the POINT OF BEGINNING; thence North 48°59'26" East, 177.83 feet; thence North 40°28'46" East, 997.66 feet; thence North 05°59'52" West, 933.06 feet; thence North 29°31'47" West, 295.74 feet; thence North 28°54'20" West, 303.61 feet; thence North

43°24'54" West, 144.66 feet; thence North 43°25'15" West, 81.00 feet, to a point on the Rogers Dam Substation fence and the POINT OF ENDING.

46kV line 19W (segment 1)
Commencing at the North one-quarter corner of said Section 14; thence South 00°53'28" West, 35.96 feet, along the North and South one-quarter line of said Section 14, to the POINT OF BEGINNING, and REFERENCE POINT "L"; thence North 89°22'42" West, 661.96 feet to REFERENCE POINT "F"; thence South 89°04'33" West, 87.22 feet; thence North 61°50'23" West, 254.06 feet; thence North 63°04'39" West, 159.57 feet; thence South 34°36'58" West, 35.21 feet, to a point on the Rogers Dam Substation fence, and the POINT OF ENDING.

And also, BEGINNING at previously stated REFERENCE POINT "L"; thence South 89°22'42" East, 1100.15 feet, to the southerly extension of the East line of the West 40 acres of Government Lot 3 of said Section 11, and the POINT OF ENDING.

46kV line 19W (segment 2)
Commencing at the Southeast corner of said Section 2; thence North 00°09'10" West, 948.54 feet; along the East line of said Section 2; thence North 89°54'05" East, 31.05 feet, to the POINT OF BEGINNING; thence North 00°05'55" West, 93.43 feet, more or less, to the Easterly extension of the Northerly line of Consumers Energy property described in Liber 144, Page 243, and the POINT OF ENDING.

46kV line 19W (segment 3)
Commencing at the Southeast corner of said Section 2; thence North 00°09'10" West, 2528.64 feet, along the East line of said Section 2; thence North 41°59'05" West, 7.91 feet to the POINT OF BEGINNING; thence North 41°59'05" West, 62.97 feet; thence North 00°04'26" East, 251.47 feet, to a point on the Northerly line of parcel recorded in Liber 177, Page 524, and the POINT OF ENDING.

46kV line 19AR
BEGINNING at previously stated REFERENCE POINT "F"; thence South 64°36'50" West, 86.22 feet; thence South 88°48'11" West, 100.70 feet, to a point on the Easterly Stanwood Substation fence, and the POINT OF ENDING.

Legal Description: Access Easement Rogers Dam Substation and Access Easement Stanwood Substation.
A strip of land 20 feet in width being 10 feet on each side of the following described centerline located in the Southwest one-quarter of Section 11, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said centerline described as:

Commencing at the South one-quarter corner of said Section 11; thence South 88°48'01" West, 626.70 feet along the South line of said Section 11 to a point on the centerline of 10 Mile Road, and the POINT OF BEGINNING; thence Northwesterly 117.92 feet, along the arc of a 374.70 foot radius curve to the right, the central angle of which is 18°01'51" and the long chord of which bears North 53°38'19" West, 117.43 feet, to REFERENCE POINT "H"; thence North 41°43'11" West, 57.61 feet; thence Northwesterly 94.56 feet along the arc of a 400.00 foot radius curve to the Left, the central angle of which is 13°32'42" and the long chord of which bears North 48°29'32" West, 94.34 feet; thence North 55°15'53" West, 166.00 feet;

thence North 57°09'13" West, 134.27 feet; thence South 14°54'13" West, 26.70 feet; thence South 13°20'23" East, 80.27 feet; thence South 71°29'42" West, 57.76 feet; thence South 34°07'09" West, 46.91 feet, to the POINT OF ENDING, and REFERENCE POINT "I"

And also BEGINNING at previously established REFERENCE POINT "H"; thence South 55°00'43" West, 40.60, feet to the POINT OF ENDING, and REFERENCE POINT "J"

The sideline of said 20 foot side access easement are to be extended and shortened to meet at angle points beginning on the South line of said Section 11, and ending on the Stanwood Substation Easement and Rogers Dam Substation Easement.

Legal Description: Rogers Dam Substation Easement and Stanwood Substation Easement.
Substation easements located in the Southwest one-quarter of Section 11, Town 14 North, Range 10 West, Mecosta Township, Mecosta County, Michigan, said easement described as**:**

Rogers Dam Substation Easement
BEGINNING at previously established REFERENCE POINT "I"; thence South 52°55'16" East, 84.94 feet; thence South 37°04'44" West, 125.65 feet; thence North 52°55'16" West, 95.30 feet; thence North 37°04'44" East, 125.65 feet; thence South 52°55'16" East, 10.36 feet, to the POINT OF BEGINNING.

Stanwood Substation Easement
BEGINNING at previously established REFERENCE POINT "J"; thence South 01°05'08" East, 149.11 feet; thence South 88°54'52" West, 219.16 feet; thence North 01°05'08" West, 149.11 feet; thence North 88°54'52" East, 219.16 feet, to the POINT OF BEGINNING.

Tippy Project
Legal Description: Centerlines for existing LVD Electric Facilities Easement Areas
The centerlines of existing electric facilities easement areas located Section 31, Town 22 North, Range 13 West, Dickson Township, Manistee County, and Section 5 and 6, Town 21 North, Range 13 West, Norman Township, Manistee County, Michigan, said centerlines being described as follows:

LVD1
Commencing at the Southwest corner of said Section 31; thence South 87°12'16" East, 36.73 feet, along the South line of said Section 31; thence North 01°06'18" East, 184.00 feet, to a point on the line 184 feet North of the South line of said Section 31, and to the POINT OF BEGINNING; thence continuing, North 01°06'18" East, 790.80 feet; thence North 66°27'27" East, 286.20 feet, to Reference Point “A”; thence continuing North 66°27'27" East, 122.21 feet, to Reference Point “B”; thence continuing North 66°27'27" East, 222.11 feet; thence North 09°35'51" East, 199.73 feet; thence North 49°22'14" West, 121.64 feet; thence North 30°52'46" West, 235.44 feet, to Reference Point “C”; thence North 84°03'26" West, 219.48 feet; thence North 13°27'08" West, 209.12 feet; thence North 01°58'51" East, 724.74 feet; to Reference Point “D”; thence North 33°42'53" East, 205.88 feet; thence North 01°25'51" East, 202.17 feet, to Reference Point “F”, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point “A”; thence North 62°07'50” West, 311.34 feet, to a point on the West line of said Section 31, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point “B”; thence South 87°45'18” East, 199.27 feet, to a point on the Westerly Synder Substation fence line, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point “C”; thence North 14°56'43" East, 132.43 feet; thence North 42°19'26" East, 220.90 feet; thence North 07°05'02" East, 49.71 feet, to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point “D”; thence North 02°02'02” East, 75.15 feet, to Reference Point “E”, and to the POINT OF ENDING.

LVD2
Commencing at the Southwest corner of said Section 31; thence South 87°12'16" East, 1385.23 feet, along the South line of said Section 31; thence North 00°52'13" East, 28.80 feet, to the POINT OF BEGINNING; thence South 87°16'08" East, 69.32 feet; thence South 77°21'50" East, 169.05 feet, more or less, to a point on the South line of said Section 31, and to the POINT OF ENDING.

LVD3
Commencing at the West one-quarter corner of said Section 5; thence North 01°50'54" East, 2131.30 feet, along the West line of said Section 5, to the POINT OF BEGINNING and Reference Point "J"; thence North 87°27'04" East, 77.97 feet, to Reference Point “I”, and to the POINT OF ENDING.

And also BEGINNING at previously stated Reference Point "J"; thence South 87°26'34" West, 225.06 feet, more or less, to a point on the South line of parcel described in parcel number 10-006-100-00, and POINT OF ENDING.

Legal Description: Centerlines for existing underground Electric Facilities Areas
The centerlines of existing underground electric facilities easement areas located in Section 31, Town 22 North, Range 13 West, Dickson Township, Manistee County, and Section 5, Town 21 North, Range 13 West, Norman Township, Manistee County, Michigan, said centerline being described as follows:

U/G Elec.1
BEGINNING at previously stated Reference Point “E”; thence South 21°18'28" East, 13.67 feet; thence South 41°51'16" West, 12.61 feet; thence South 58°38'18" West, 44.83 feet; thence South 71°39'15" West, 19.89 feet; thence South 78°12'01" West, 87.74 feet; thence North 17°01'17" West, 38.52 feet, to the POINT OF ENDING.

U/G Elec.2
BEGINNING at previously stated Reference Point “F”; thence North 37°48'56" West, 10.11 feet; thence North 00°25'19" West, 68.22 feet; thence North 03°44'03" West, 137.79 feet, to the POINT OF ENDING.

U/G Elec.3

BEGINNING at previously stated Reference Point “I”; thence North 05°07'53" West, 104.52 feet, to the POINT OF ENDING.

and also BEGINNING at previously stated Reference Point "I"; thence South 83°12'14" East, 19.62 feet, to the POINT OF ENDING.

Legal Description: Access Easement
A strip of land thirty (30) feet in width being fifteen (15) feet on each side of the following described centerline located in the West one-half of Section 31, Town 22 North, Range 13 West, Dickson Township, Manistee County, Michigan, said centerline described as:

Commencing at the Southwest corner of said Section 31; thence North 00°47'15" East, 1009.77 feet, along the West line of said Section 31, to the POINT OF BEGINNING; thence South 89°12'45" East, 33.00 feet; thence North 74°38'38" East, 10.06 feet; thence Northeasterly, 63.67 feet, along the arc of a 400.00 foot radius curve to the left, the central angle of which is 09°07'14", and the long chord of which bears North 70°05'01" East, 63.61 feet; thence North 65°31'24" East, 248.62 feet; thence Northeasterly, 142.12 feet, along the arc of a 351.41 foot radius curve to the right, the central angle of which is 23°10'19", and the long chord of which bears North 77°06'34" East, 141.15 feet; thence North 88°41'44" East, 125.65 feet, to Reference Point “G”, and to the POINT OF ENDING of said ingress and egress easement centerline.

The sidelines of said easement centerline are to be extended or shortened to meet at angle points beginning on the West line of said Section 31, and ending on a line having a bearing of North 00°00'00" East.

Legal Description: Snyder Substation Easement
A substation easement located in the West one-half of Section 31, Town 22 North, Range 13 West, Dickson Township, Manistee County, Michigan, more particularly described as follows:

BEGINNING at previously stated Reference Point “G; thence North 00°00'00" East, 48.45 feet; thence North 90°00'00" East, 162.49 feet, to Reference Point "H", thence continuing North 90°00'00" East, 13.40 feet; thence South 00°00'00" East, 149.67 feet; thence North 90°00'00" West, 175.89 feet; thence North 00°00'00" East, 101.22 feet, to the POINT OF BEGINNING.

Legal Description: Centerline of 138kV Facilities Easement Area Line No. 1O
The centerline of an existing electric facilities easement area located in the West one-half of Section 31, Town 22 North, Range 13 West, Dickson Township, Manistee County, Michigan, said centerline being described as follows:

BEGINNING at previously stated Reference Point "H"; thence North 05°07'24" West, 41.62 feet, to a point on an existing 138kV Line No. 1B, and the POINT OF BEGINNING; thence South 05°07'24" East, 139.41 feet; thence South 89°11'31" West, 21.08 feet, to a point on the Easterly Synder Substation fence line, and the POINT OF ENDING.

Webber Project
Legal Description: Centerline for Existing LVD Electric Facilities Easement Area

The centerline of an existing electric facilities easement area located in the Northeast 1/4 of Section 33, Township 7 North, Range 5 West, Lyons Township, Ionia County, Michigan, said centerline described as follows:
Commencing at the North 1/4 Corner of said Section 33; thence South 00° 24' 47" West 1363.35 feet along the North-South 1/4 Line of said Section 33 to the Point of Beginning; thence South 79° 01' 47" East 374.63 feet to the Point of Ending.

Legal Description: Centerline for Existing 46 kV Facilities Easement Area Line 15B
The centerline of an existing electric facilities easement area located in the Northeast 1/4 of Section 33, Township 7 North, Range 5 West, Lyons Township, Ionia County, Michigan, said centerline described as follows:
Commencing at the North 1/4 Corner of said Section 33; thence South 89° 38' 54" East 243.09 feet along the North Line of Said Section 33; thence South 32° 06' 49" East 1108.60 feet, more or less, to the North property line of a Consumers Energy Parcel as described in a deed to Commonwealth Power Company dated April 7, 1906 and to the Point of Beginning; thence South 32° 06' 49" East 488.13 feet; thence South 24° 51' 19" East 866.38 feet to Reference Point 'A'; thence South 69° 14' 04" West 85.36 feet to the Easterly Line of Webber Dam Substation Easement and the Point of Ending.
AND
Beginning at Reference Point 'A'; thence South 45° 35' 40" East 39.61; thence South 81° 06' 40" West 100.05 feet to the Easterly Line of Webber Dam Substation Easement and the Point of Ending.
AND
Beginning at Reference Point 'A'; thence South 23° 56' 39" East 42.75 feet to the Point of Ending.
AND
Beginning at Reference Point 'A'; thence North 75° 50' 24" West 23.58 feet; thence South 22° 50' 40" East 57.01 feet to the Point of Ending.
AND
Beginning at Reference Point 'A'; thence North 75° 50' 24" West 23.58 feet; thence South 66° 36' 02" West 66.85 feet to the Easterly Line of Webber Dam Substation Easement and the Point of Ending.

Legal Description: Centerline for Existing 46 kV Facilities Easement Area Line 15R
The centerline of an existing electric facilities easement area located in the Northeast 1/4 of Section 33, Township 7 North, Range 5 West, Lyons Township, Ionia County, Michigan, said centerline described as follows:
Commencing at the East 1/4 Corner of said Section 33; thence North 00° 26' 50" East 45.56 feet along the East Line of said Section 33; thence North 89° 41' 48" West 360.44 feet; thence North 66° 40' 02" West 322.73 feet to the East Line of the West 1/2 of the East 1/2 of the Northeast Fractional 1/4 of said Section 33, as monumented, and to the Point of Beginning; thence North 66° 40' 02" West 528.88 feet; thence North 66° 37' 11" West 118.39 feet to the Southeasterly Line of Webber Dam Substation Easement and the Point of Ending.

Legal Description: Access Easement
A strip of land twenty (20) feet in width being ten (10) feet on each side of the following described centerline located in the Northeast 1/4 of Section 33, Township 7 North, Range 5 West, Lyons Township, Ionia County, Michigan, said centerline described as follows:

Commencing at the East 1/4 Corner of said Section 33; thence North 89° 56’ 04” West 1330.38 feet along the East-West 1/4 Line of said Section 33 to the Point of Beginning; thence 66.21 feet along a non-tangential curve to the right, said curve having a central angle of 66° 39' 58”, a radius of 56.91 feet, and a long chord distance of 62.54 feet bearing North 57° 23' 43” East; thence South 89° 16’ 18” East 171.29 feet; thence 109.45 feet along a curve to the left, said curve having a central angle of 70° 05’ 22”, a radius of 89.47 feet, and a long chord distance of 102.75 feet bearing North 55° 41’ 01” East; thence North 20° 38’ 20” East 16.30 feet to Reference Point ‘B’; thence North 20° 38’ 20” East 16.30 feet; thence 67.56 feet along a curve to the left, said curve having a central angle of 33° 15’ 56”, a radius of 116.36 feet, and a long chord distance of 66.61 feet bearing North 04° 00’ 22” East; thence North 12° 37’ 36” West 78.02 feet; thence 172.87 feet along a curve to the right, said curve having a central angle of 58° 47’ 26”, a radius of 168.47 feet, and a long chord distance of 165.38 feet bearing North 16° 46’ 08” East; thence North 23° 39’ 36” West 33.18 feet; thence 88.58 feet along a curve to the left, said curve having a radius of 82.06 feet; and a long chord distance of 84.34 feet bearing North 54° 34’ 56” West; thence North 85° 30’ 15” West 78.62 feet; thence South 78° 43’ 56” West 111.34 feet to the Easterly line of the Existing Webber Dam Substation Easement and the Point of Ending.

AND
Commencing at Reference Point ‘B’; thence South 70° 31’ 59” East 62.41 feet to the Point of Ending.

Legal Description: Webber Substation Easement Area
An easement in part of the Northeast one-quarter of Section 33, Township 7 North, Range 5 West, Lyons Township, Ionia County, Michigan, more particularly described as follows:

Commencing at the Center of said Section 33; thence East, along the East-West one-quarter line, 1980 feet (120 rods) more or less to the East line of the West half of the Southeast one-quarter of the Northeast one quarter of said section, as monumented, and to the Point of Beginning; thence North, along the East line of the West half of the Southeast one-quarter of the Northeast one-quarter of said Section, as monumented, 250 feet; thence West, parallel with the East-West one-quarter line of said Section, 300 feet; thence South, parallel with the East line of the West half of the Southeast one-quarter of the Northeast one-quarter of said Section, as monumented, 250 feet; thence East, along the East-West one-quarter line of said Section, 300 feet to the Point of Beginning.

TRANSITION SERVICES AGREEMENT

by and between

CONSUMERS ENERGY COMPANY

and

CONFLUENCE HYDRO, LLC

THIS DOCUMENT IS NOT INTENDED TO CREATE, NOR DOES IT CREATE, A LEGALLY BINDING OR ENFORCEABLE OFFER OR AGREEMENT OF ANY TYPE OR NATURE, UNLESS AND UNTIL AGREED TO AND EXECUTED BY THE PARTIES HERETO.

TRANSITION SERVICES AGREEMENT

THIS TRANSITION SERVICES AGREEMENT is made and entered into as of [●], [●] (the "Effective Date"), by and between CONSUMERS ENERGY COMPANY, a Michigan corporation ("Service Provider"), and CONFLUENCE HYDRO, LLC, a Delaware limited liability company, ("Service Recipient"). Service Provider and Service Recipient may be referred to herein individually, as a "Party" and together, as the "Parties." Capitalized terms used but not otherwise defined herein have the meanings set forth in the Purchase Agreement (as defined below).

Background

A. Pursuant to the Purchase and Sale Agreement, dated as of September 3, 2025 (the "Purchase Agreement"), by and between Service Provider and Service Recipient, Service Recipient will purchase and assume from Service Provider, and Service Provider will sell and assign to Service Recipient, the Project Assets.

B. Immediately after the consummation of the sale under the Purchase Agreement, Service Recipient intends to transfer the Project Assets to wholly owned subsidiaries (each a "Subsidiary", and collectively the "Subsidiaries").

C. Pursuant to Section 7.13 of the Purchase Agreement the Parties wish to enter into an agreement setting forth the terms pursuant to which Service Provider will, commencing on the Closing Date, provide (directly or through its Affiliates or one or more Third-Party Service Providers consistent with the terms hereof) certain services on an interim basis with respect to Service Recipient's operation of the Projects.

NOW THEREFORE, in consideration of the mutual covenants and undertakings contained herein, and on the terms and subject to the conditions set forth herein, the Parties hereby agree as follows:

Section 1. Definitions.

As used in this Agreement, the following terms shall have the meanings set forth or as referenced below:

"Agreement" means this Transition Services Agreement between the Parties hereto, as the same may be amended or supplemented from time to time in accordance with the terms hereof.

"Confidential Information" has the meaning set forth in Section 9.

"Consent" shall have the meaning set forth in Section 2(k).

"Damages" means the monetary compensation that one Party may be required to pay to another Party in accordance with this Agreement.

"Effective Date" has the meaning set forth in the Preamble.

"Fee Schedule" has the meaning set forth in Section 2(e).

"Force Majeure Event" has the meaning set forth in Section 8.

"IS Policies" has the meaning set forth in Section 2(j)(ii).

"Party" or "Parties" has the meaning set forth in the Preamble.

"Purchase Agreement" has the meaning set forth in the Recitals.

"Representatives" has the meaning set forth in Section 2(g).

"Service" or "Services" has the meaning set forth in Section 2(a).

"Service Provider" has the meaning set forth in the Preamble.

"Service Provider Indemnitees" has the meaning set forth in Section 7(a).

"Service Provider Indemnity Cap" has the meaning set forth in Section 5(a).

"Service Recipient" has the meaning set forth in the Preamble.

"Service Recipient Indemnitees" has the meaning set forth in Section 7(b).

"Subsidiary" or "Subsidiaries" has the meaning set forth in the Recitals.

"Term" has the meaning set forth in Section 4(a).

"Termination Date" means the date this Agreement is terminated pursuant to Section 4.

"Third-Party Service Provider" means a third party engaged by Service Provider to provide the applicable Service(s) in accordance with this Agreement.

Section 2. Services.

(a) Services. Subject to the terms and conditions herein, Service Provider shall provide, or at its option cause one or more of its Affiliates or Third-Party Service Providers to provide, to Service Recipient, and its Subsidiaries, all services identified in Exhibit 1 attached hereto (each a "Service", and collectively, the "Services") for the duration of the Term in a manner consistent with past practice during the Lookback Period. For the avoidance of doubt, no delegation of Service Provider's obligations under this Agreement to any Affiliate or Third-Party Service Provider shall in any way affect Service Recipient's rights or relieve Service Provider of its obligations under this Agreement. The Parties acknowledge and agree that the Services are provided to Service Recipient to enable Service Recipient to continue the operation of the Projects in the ordinary course consistent with past practice during the Lookback Period. The Services may be amended from time to time by written agreement by the Parties.

(b) Scope of Services. Notwithstanding anything to the contrary herein, neither Service Provider nor any of its Affiliates or Third-Party Service Providers will be required to perform or to cause to be performed any of the Services for the direct benefit of any third party or any Person other than Service Recipient, and its Subsidiaries, except as provided in Section 10(h).

(c) Certain Limits on Services. Service Provider shall not be the agent or representative of the Service Recipient, and shall have no authority to undertake any transaction or incur any expenditure for which Service Recipient would be independently liable. Neither Service Provider nor any of its Affiliates or Third-Party Service Providers shall be obligated to perform or to cause to be performed any Service in a volume or quantity or in a manner that materially differs from past practice with respect to such Service during the Lookback Period. Neither Service Provider nor any of its Affiliates shall have any obligation to

replace any Person who is employed or otherwise engaged by any of them to perform the Services upon the termination of such Person's employment with Service Provider or any Affiliate of Service Provider, as the case may be, for whatever reason.

(d) Standard of Performance; Standard of Care.

(i) Service Provider shall, and shall cause its Affiliates or Third-Party Service Providers to, perform the Services and its duties and responsibilities hereunder in good faith, consistent with past practice during the Lookback Period and Prudent Utility Practices. For the duration of the Term, neither Service Provider nor any Affiliate thereof or any Third-Party Service Provider shall take any action or fail to take any action that would reasonably be expected to cause a Lien on any assets or properties of Service Recipient or any of its Affiliates. Notwithstanding anything to the contrary herein, neither Service Provider nor any of its Affiliates, nor any Person acting on its, or any of their, behalf, including any Third-Party Service Provider, shall be liable or held accountable for Damages, any error of judgment or mistake of fact or law or anything that either Service Provider or any of its Affiliates or Third-Party Service Provider does or refrains from doing or any other act or omission, except as solely with respect to a material breach of this Agreement or due to its or their gross negligence, Fraud or willful misconduct in connection with its performance of the Services hereunder to the extent provided in this Agreement (and, without limiting and subject to, the Service Provider Indemnity Cap and the limitations set forth herein).

(ii) Nothing in this Agreement shall require Service Provider or its Affiliates to perform or cause to be performed the Services in a manner that would constitute a violation of applicable Law or violate any contract or the rights of any third party.

(iii) The performance of the Services by Service Provider or any of its Affiliates is contingent on the provision by Service Recipient, and its Subsidiaries, at Service Recipient's sole cost and expense, of information, materials, products and other like items and access rights to or otherwise making available the Project Assets consistent with requirements of this Agreement, including Section 2(h), including Section 2(h)(i), and Section 2(j)(iv).

(e) Prices for Services. Services provided pursuant to this Agreement shall be charged at the prices set forth on Exhibit 2 attached hereto (the "Fee Schedule") and as otherwise provided for in this Agreement without further mark-up of any kind.

(f) Transitional Nature of Services; Changes. Notwithstanding anything to the contrary herein, the Parties hereby acknowledge the transitional nature of the Services and that Service Provider or its Affiliates may make changes from time to time in the manner of performing the Services if (i) Service Provider or its Affiliates are making similar changes in performing similar services for their own Affiliates, and (ii) Service Provider or its Affiliates furnish to Service Recipient, and its Subsidiaries, substantially the same notice (in content and timing) as Service Provider or its Affiliates shall furnish to their own Affiliates respecting such changes.

(g) Representatives. On the Effective Date, Service Provider and Service Recipient each shall designate in writing to the other Party one or more representatives to act as a contact person with respect to all issues relating to the provision of the Services pursuant to this Agreement (the "Representatives").

(h) Cooperation. During the Term, Service Provider and Service Recipient, along with their respective Affiliates, and in the case of Service Recipient, its Subsidiaries, shall use commercially reasonable efforts to cooperate with each other in connection with the performance of the Services hereunder. Such cooperation shall include producing on a timely basis information that is reasonably requested by the other Party with respect to the performance of Services and the transition at the end of the

Term of this Agreement; provided, however, that such cooperation shall not unreasonably disrupt the normal operations of Service Provider, Service Recipient or its Subsidiaries; and provided, further, that if Service Recipient is the Party requesting cooperation, Service Recipient shall pay all reasonable out-of-pocket costs and expenses incurred by Service Provider or any of its Affiliates furnishing such cooperation, unless otherwise expressly provided in this Agreement.

(i) Service Recipient, and its Subsidiaries, shall use commercially reasonable efforts to (A) enable Service Provider, its Affiliates and its Third-Party Service Providers to provide the Services in accordance with this Agreement, (B) provide information, materials, products, documentation and other items sufficient for Service Provider to perform the Services, and (C) make available timely decisions, approvals and acceptances in order for Service Provider to perform its obligations under this Agreement in a timely manner. In the event that Service Recipient or its Subsidiaries fail to provide such information, materials, products or other items in accordance with the preceding sentence, the Representatives of the Parties shall discuss and work together in good faith to resolve any impact such failure may have to the provision of the Services. Any failure by Service Recipient or its Subsidiaries to provide information, materials, products or other items shall relieve Service Provider and its Affiliates of their obligation to provide a Service hereunder solely to the extent the provision of such Service is dependent or otherwise reliant on such information, materials, products and other items but only for so long as the failure to provide such information, materials, products and other items continues.

(ii) Service Provider, and its Affiliates, shall use commercially reasonable efforts to cooperate with Service Recipient and its Subsidiaries and with respect to preparations to operate the Projects at the end of the Term.

(iii) In the event that (A) there is nonperformance of any Service as a result of a Force Majeure Event, (B) the provision of a Service would violate applicable Law or violate any contract or the rights of any third party, or (C) subject to Section 2(k)(k), the provision of a Service requires Consent which has not been obtained, the Parties (1) hereby acknowledge that Service Provider may suspend performance of Service(s) so affected during such period solely to the extent so effected; (2) hereby acknowledge that Service Recipient shall not be obligated to pay any fees in connection with such suspended Services, beginning on the date of any such suspension; and (3) agree to timely work together in good faith (each at its own expense) to arrange for an alternative means by which Service Recipient may obtain the Services so affected, unless otherwise specified under this Agreement. Neither Service Provider nor any of Service Provider's Affiliates shall be required to pay any compensation, consideration or other amount in connection with the provision of Services or any such alternative arrangement, except to the extent that Service Provider's actions or inactions caused or contributed to such violation or the need for such Consent. For the avoidance of doubt, if the sole impediment to providing a Service is the payment of such compensation, consideration or reimbursement, Service Provider shall continue to provide such Service, provided that Service Recipient agrees to reimburse such amounts in Service Recipient's sole discretion.

(i) License to Use Project Assets. Service Recipient hereby grants to Service Provider and its Affiliates and any Third-Party Service Providers a limited, royalty-free, non-transferable, non-exclusive right and license (with no right to sublicense except as expressly provided herein) to use the Project Assets solely to perform the Services set forth on Exhibit 1 attached hereto. Service Provider may grant sublicenses of the foregoing for the benefit of Service Recipient to Service Provider's and Service Recipient's vendors, contractors and subcontractors solely to the extent reasonably necessary for such vendors, contractors and subcontractors to perform Services pursuant to this Agreement. The license set forth in this Section 2(i) and any sublicenses granted pursuant hereto shall terminate with respect to a Service upon the termination of the applicable Service.

(j) Access to Data, Systems, and the Projects.

(i) Notwithstanding anything to the contrary herein, Service Recipient, and its Subsidiaries, shall not, directly or indirectly, with respect to the Services, resell, transfer or assign any such Services to any Person.

(ii) While using any data processing or communications services of Service Provider or its Affiliates or its Third-Party Service Providers in connection with the provision of the Services, Service Recipient shall, and shall direct all of its Subsidiaries to, adhere in all respects to Service Provider's and its Affiliates' and its Third-Party Service Provider's corporate information policies and procedures (including polices with respect to the protection of proprietary information and other policies and procedures regarding the use of computing resources) (the "IS Policies"); provided, that copies of such policies have been provided to Service Recipient. If required by Service Provider or its Affiliates or its Third-Party Service Providers, prior to having access to any such Services, Service Recipient shall cause all of its and its Subsidiaries personnel who will be given such access to execute and deliver to Service Provider confirmation in writing of their agreement to comply with the IS Policies provided to Service Recipient.

(iii) Service Provider and its Affiliates and its Third-Party Service Providers shall have the right to temporarily shut down for maintenance purposes the operation of any computer hardware, software, database or network environment or other systems of Service Provider or its Affiliates or Third-Party Service Providers providing any Service, whenever in its judgment, reasonably exercised in good faith and in a non-discriminatory manner, such action is necessary or advisable for general maintenance or emergency purposes; provided that, Service Provider will use commercially reasonable efforts to schedule non-emergency maintenance after consulting with Service Recipient so as not to materially disrupt the operations of the Projects, including, at Service Recipient's cost and expense, scheduling and conducting such maintenance outside of normal business hours. To the extent practicable, Service Provider will give Service Recipient five (5) Business Days' written notice of any such shutdown.

(iv) Service Recipient and its Subsidiaries hereby grant Service Provider, its Affiliates and any Third-Party Service Provider, a non-exclusive right (which shall not constitute an easement or other restriction on the Projects and which shall be revocable at the end of the Term or upon termination of this Agreement) to enter on the premises on which each Project is located and to occupy and have free access to each Project, to the extent required to execute the Services. Such access shall be provided during normal business hours or at other mutually agreed-upon times, and shall include access to any equipment, systems, or areas required for the Service Provider to complete the Services. Service Recipient agrees to provide any necessary security clearances, passes, or permissions to facilitate such access. Service Provider and its Affiliates and Third-Party Service Providers shall comply with all applicable safety and security policies of the Service Recipient made available to them while accessing a Project.

(v) Each Party shall (and shall cause its Affiliates and each of their personnel receiving Services to): (A) not attempt to obtain access to, use or interfere with (1) any information technology systems of the other Party or its Affiliates (except to the extent access to or use of information technology systems is expressly contemplated as part of the receipt of Services), or (2) any confidential or competitively sensitive information owned, used or processed by the Service Recipient (except to the extent access to or use of confidential or competitively sensitive information is expressly contemplated as part of the receipt of Services and is made subject to customary obligations of confidentiality); (B) maintain reasonable security measures to protect the systems of each Party and its Affiliates to which any Party has access pursuant to this Agreement against access by unauthorized third parties; (C) not disable, damage or erase or disrupt or impair the normal operation of the information technology systems of the other Party or its Affiliates; and (D) promptly notify the other Party of any confirmed misuse, disclosure or loss of, or inability to account for, such Party's confidential or competitively sensitive information, and any confirmed unauthorized access to its or its Affiliates' facilities, systems or network reasonably likely to affect such

Party and will investigate such confirmed security incidents and reasonably cooperate with such Party's incident response team to mitigate and limit the impact of such a security incident.

(k) Third Party Consents. If the use or provision of all or a portion of the Services pursuant to this Agreement requires the approval, consent, permission, waiver or agreement (including any permit) (each a "Consent") of a third party, Service Provider shall use commercially reasonable efforts to obtain such Consents and Service Recipient shall reasonably cooperate and assist Service Provider in connection therewith. If any Consent is not or cannot be obtained, the Parties shall work together in good faith and use their respective commercially reasonable efforts to arrange for a reasonable workaround or alternative reasonable methods of delivering the affected Services in such a manner as to give to Service Recipient the full benefit of such Service to the greatest extent possible. Any costs, fees and expenses in connection with obtaining any Consents or arranging any such workaround or alternative methods of delivering Services shall be borne by Service Recipient.

(l) Additional Services. If, during the term of this Agreement, Service Recipient identifies a service not set forth on Exhibit 1 that is necessary to continue the operation of the Projects in the ordinary course consistent with past practice during the Lookback Period (each such service, an "Additional Service"), then Service Recipient may (at its option), by written notice to the Service Provider, request that the Service Provider provide such Additional Service. Thereafter the Parties shall use commercially reasonable efforts to negotiate an amendment to this Agreement to memorialize the terms for providing (or Service Provider's assistance in procuring the provision of) such Additional Services; provided, however, that in no event shall Service Provider be obligated to provide any Additional Services that would impose an unreasonable burden upon Service Provider or any of its Affiliates as determined in Service Provider's commercially reasonable discretion.

Section 3. Payments to Service Provider.

(a) Payments; Billing. Service Recipient shall pay to Service Provider the undisputed compensation and make reimbursements of all out-of-pocket expenses incurred by Service Provider, provided, that any such expense in excess of $5,000 must be approved in advance by Service Recipient. Invoices for the Services and approved out-of-pocket expenses incurred in connection therewith shall include reasonable detail as to one-time charges and costs in excess of the monthly fee set forth in Exhibit 2. Amounts payable pursuant to this Agreement shall be paid to Service Provider within thirty (30) days of receipt of an invoice from Service Provider.

(b) Late Payments; Disputed Payments. Undisputed amounts not paid within thirty (30) days shall accrue interest from the end of such thirty (30) day period until the date of such payment at a rate equal to five (5) percentage points above the secured overnight financing rate (SOFR), as published by the Wall Street Journal (or other equivalent, widely accepted source of published rates if it no longer publishes such rate), at 12:01 a.m. on the first day of each calendar quarter in which such payments are overdue. In the case of disputed amounts, if it is determined through Section 10 that such amounts are owed, interest shall accrue on the determined amount from the original due date until the date of such payment at the same rate specified above. Notwithstanding the foregoing, if any undisputed payment remains outstanding for more than thirty (30) days after such payment is due, Service Provider reserves the right to suspend performance of the Services until full payment, including accrued interest, is received. Service Provider shall not be liable for any Damages or losses incurred by Service Recipient, or its Subsidiaries, as a result of such suspension of Services.

(c) Tax. The Party receiving payments under this Agreement shall pay any and all Taxes levied on account of all payments it receives from the other Party. Either Party shall deduct or withhold from payments hereunder any Taxes that it is required by applicable Law to deduct or withhold.

Notwithstanding the foregoing, if either Party is entitled under any applicable Tax treaty to a reduction of rate of, or the elimination of, applicable withholding Tax, it may deliver to the other Party or the appropriate Governmental Authority (with the assistance of the other Party to the extent that this is reasonably required and is expressly requested in writing) the prescribed forms necessary to reduce the applicable rate of withholding or to relieve such Party of its obligation to withhold Tax, and such Party withholding shall apply the reduced rate of withholding, or dispense with withholding, as the case may be; provided, that such Party withholding has received evidence, in a form satisfactory to such Party withholding, of such other Party's delivery of all applicable forms (and, if necessary, its receipt of appropriate Governmental Approval) at least fifteen (15) days prior to the time that the payments are due. If, in accordance with the foregoing, the Party withholding withholds any amount, it shall pay to the other Party the balance when due, make timely payment to the proper taxing authority of the withheld amount, and send to such other Party proof of such payments within sixty (60) days following that payment. The Parties shall, and shall cause their respective Affiliates to reasonably cooperate with each other in good faith and provide any information, tax forms, tax certificates and/or documentation reasonably requested from time to time.

(d) Books and Records. Service Provider shall, and shall cause any applicable Affiliates to, preserve and maintain complete and accurate books of account and supporting documentation as necessary (including records, receipts, invoices and reports) to support calculations of the cost of Services for Services rendered by it or its Affiliates as a provider of Services for a period of three (3) years from the applicable Termination Date. Service Provider shall make such books and records reasonably available upon at least two (2) Business Days prior written notice, during ordinary business hours, to Service Recipient.

Section 4. Term and Termination.

(a) Term. The term of this Agreement shall commence on the Effective Date and shall continue for one hundred and twenty (120) days thereafter, unless otherwise terminated pursuant to the terms of this Agreement (the "Term"). This Agreement will terminate with respect to the Services at the close of business on the last day of the Term (unless, prior to such date, the Parties have agreed in writing to an extension of the Term), provided, that Service Recipient may, with thirty (30) days prior written notice, extend this Agreement for one (1) additional term of sixty (60) days and thereafter with the consent of the Service Provider.

(b) Termination for Convenience.

(i) Service Recipient shall have the right, in its sole discretion, to terminate this Agreement prior to the end of the Term upon at least fifteen (15) days' prior written notice. In the event of such a termination, Service Recipient shall pay Service Provider for all Services rendered by Service Provider or of any of its Affiliates prior to the Termination Date.

(ii) Except as otherwise provided in this Agreement, upon not less than five (5) days' prior written notice, Service Recipient shall be entitled to terminate one or more Services, in whole or in part, being rendered by Service Provider, its Affiliates, or any of its Third-Party Service Providers, for any reason or no reason at all.

(iii) Service Provider shall have no right to terminate this Agreement for convenience under this Section 4(b).

(c) Termination for Failure to Provide Services. In the event Service Provider fails to provide a Service as contemplated by this Agreement, and in the event such failure is not cured within fifteen (15) Business Days after receipt of written notice from Service Recipient, Service Recipient may (i) immediately terminate this Agreement in whole or solely with respect to such Service upon written notice to Service

Provider; (ii)(1) engage a third party person to provide Services previously handled by Service Provider at Service Provider's sole cost and expense, and (2) receive from Service Provider, payment of the positive difference, if any, between the cost of purchasing such substitute Service and the amount that would have been paid to Service Provider under the terms of this Agreement for such Service if no Service Provider default with respect to such Service had occurred for the remaining term for such Service.

(d) Partial Termination. Service Recipient may terminate, in whole or in part, the provision of any Service, or any part of such Service, by providing at least thirty (30) days prior written notice to Service Provider. For the avoidance of doubt, (i) Service Recipient shall not be obligated to pay the amounts set forth on Exhibit 2 with respect to any terminated services after such thirty (30) day period and (ii) if any Service is terminated in part, the applicable fee shall be reduced by the cost of such terminated Service.

Section 5. Limitations on Liability for Direct Claims; Service Provider Indemnity Cap; Exclusive Remedy.

(a) In no event shall Service Provider have any liability to Service Recipient or its Affiliates, or any of its or their respective officers, directors, employees, stockholders, agents or representatives, or any of the foregoing Person's respective successors, assigns or heirs of any of the foregoing, for or in connection with (i) any Services provided or to be provided pursuant to this Agreement, or (ii) any actions or inactions in connection with any such Services referred to in the immediately preceding clause (i), in each case, except to the extent that such Person suffers an actual Damage that results from Service Providers' (A) gross negligence, willful misconduct, or Fraud in connection with the Services or (B) breach of any material provision of this Agreement.

(b) Notwithstanding anything contained herein, in no event shall the total aggregate liability of Service Provider or of any of its Affiliates to Service Recipient or any of its Affiliates or to any other Service Recipient Indemnitee in connection with this Agreement exceed three times the aggregate amount of fees received by Service Provider for Services provided hereunder (except to the extent actual Damages arise out of Service Provider's, its Affiliates or any Third-Party Service Provider's Fraud in the performance of the Services) (the "Service Provider Indemnity Cap"). The indemnification provisions set forth in Section 7 and any remedies of Service Recipient pursuant to this Section 5 are further subject to the obligations and limitations set forth in this Agreement.

(c) NOTWITHSTANDING ANYTHING IN THIS AGREEMENT TO THE CONTRARY, THE PARTIES AGREE THAT NEITHER PARTY SHALL BE LIABLE FOR SPECIAL, PUNITIVE, CONSEQUENTIAL, INCIDENTAL OR INDIRECT DAMAGES (INCLUDING ANY DAMAGES ON ACCOUNT OF LOSS OF REVENUE, LOSS OF PRODUCTION OR OTHER DAMAGES ATTRIBUTABLE TO BUSINESS INTERRUPTION), WHETHER BASED ON CONTRACT, TORT, STRICT LIABILITY, OTHER LAW OR OTHERWISE AND WHETHER OR NOT ARISING FROM THE OTHER PARTY'S SOLE, JOINT OR CONCURRENT NEGLIGENCE, STRICT LIABILITY OR OTHER FAULT OR IN CONNECTION WITH PAYMENTS MADE TO A THIRD PARTY ARISING FROM A THIRD PARTY CLAIM, EXCEPT TO THE EXTENT THAT SUCH DAMAGES ARISE OUT OF SERVICE PROVIDER'S, ITS AFFILIATES, ANY OF THEIR RESPECTIVE REPRESENTATIVES', OR THIRD-PARTY SERVICE PROVIDERS' FRAUD IN THE PERFORMANCE OF THE SERVICES.

(d) Exclusive Remedy. Each Party acknowledges and agrees that, other than in the case of a Party's gross negligence, Fraud, or willful misconduct: (i) the indemnification provisions of Section 7, and (ii) any claims for breach of contract, shall be the sole and exclusive remedies of the Parties, as applicable, for any breach of this Agreement by any other Party or any failure by any other Party to perform or comply with any of its obligations contained in this Agreement.

Section 6. Disclaimer of Warranties. EXCEPT THAT SERVICE PROVIDER SHALL PROVIDE THE SERVICES IN CONFORMITY WITH, AND AS EXPRESSLY SET FORTH IN, THIS AGREEMENT, THE SERVICES PROVIDED HEREUNDER ARE BEING PROVIDED ON AN "AS IS" AND "WITH ALL FAULTS" BASIS WITHOUT ANY GUARANTY, REPRESENTATION OR WARRANTY OF ANY KIND, WHETHER EXPRESS OR IMPLIED (ORAL OR WRITTEN), INCLUDING ANY REPRESENTATION OR WARRANTY IN REGARD TO QUALITY, PERFORMANCE, NON-INFRINGEMENT, COMMERCIAL UTILITY, MERCHANTABILITY OR FITNESS OF THE SERVICES FOR A PARTICULAR PURPOSE, AND SERVICE PROVIDER (ON BEHALF OF ITSELF AND ITS AFFILIATES) HEREBY EXPRESSLY DISCLAIMS ALL SUCH GUARANTIES, REPRESENTATIONS AND WARRANTIES HEREUNDER WITH RESPECT TO THE SERVICES.

Section 7. Indemnity.

(a) Service Recipient shall indemnify, defend and hold harmless Service Provider, each Affiliate of Service Provider and each Third-Party Service Provider, and each of their respective officers, directors, employees, stockholders, agents and representatives, and each of the successors, assigns or heirs of any of the foregoing (collectively, the "Service Provider Indemnitees"), from and against any third party claims relating to, arising out of or resulting from any gross negligence, willful misconduct or Fraud on the part of Service Recipient or its Affiliates in performing its obligations under this Agreement.

(b) Service Provider shall indemnify, defend and hold harmless Service Recipient, each Affiliate of Service Recipient and each of their respective officers, directors, employees, stockholders, agents and representatives, and each of the successors, assigns or heirs of any of the foregoing (collectively, the "Service Recipient Indemnitees") from and against any third party claims relating to, arising out of or resulting from any gross negligence, willful misconduct or Fraud on the part of Service Provider or its Affiliates or Third-Party Service Providers in performing the Services.

(c) The indemnification procedures applicable to this Agreement shall be the same indemnification procedures set forth in Section 9.7 of the Purchase Agreement, *mutatis mutandis*.

Section 8. Force Majeure Event. If the performance of any obligation under this Agreement by either Party is prevented, restricted, interfered with or delayed by reason of any cause beyond the reasonable control of the Party unable to perform, not due to such Party's breach of this Agreement and that could not, with the exercise of due diligence, have been avoided (including without limitation, as a result of acts of God, civil disorders or commotions, acts of aggression, fire, explosions, floods, drought, war, sabotage, embargo, utility failures, material shortages, national labor disturbances, riot, delay or errors by shipping companies, a change in Law, epidemic, pandemic or other similar outbreak or mutation or variant thereof, a national health emergency, or appropriations of property) (any such event, a "Force Majeure Event"), then the Party so affected shall not be excused from such performance, but shall merely suspend such performance during the continuation of such Force Majeure Event; provided, however, that if such performance has been suspended for a period in the aggregate exceeding twelve (12) months, either Party may terminate this Agreement with respect to the affected Services upon written notice to the other Party. The Party prevented from performing its obligations or duties because of the Force Majeure Event shall promptly notify the other Party hereto of the occurrence and particulars of such event and shall provide the other Party, from time to time, with its best estimate of the duration of such Force Majeure Event and with notice of the termination thereof. The affected Party shall provide the other Party, from time to time and upon request, updates regarding the Force Majeure Event and details regarding efforts and steps being taken to resolve the Force Majeure Event. The affected Party shall use its commercially reasonable efforts to avoid or remove such causes of nonperformance and to ameliorate the effects of such nonperformance as promptly as practicable thereafter and upon termination of all applicable Force Majeure Events, the

performance of any suspended obligation or duty shall promptly recommence. When a Force Majeure Event arises, the Parties shall discuss what, if any, modification of this Agreement may be required in order to arrive at an equitable solution. In addition to the general exclusion of certain Damages in Section 5, neither Party shall be liable to the other Party for any direct or other Damages arising out of or relating to the suspension or termination of any of its obligations or duties under this Agreement by reason of the occurrence of a Force Majeure Event. Notwithstanding anything to the contrary contained in this Agreement, this Section 8 shall not apply to Service Recipient's payment obligations under this Agreement.

Section 9. Confidentiality. From and after the Closing Date, the Parties shall maintain as confidential and shall not disclose (except for those Representatives, employees, attorneys, accountants and other advisors of the recipient and its Affiliates, including, in the case of the Service Recipient, any future provider of services at the Projects, who need to know such information in connection with the recipient's performance of its obligations under this Agreement or future provision of services at the Projects, as applicable, and have in turn been advised of the confidentiality obligation hereunder), copy or use for purposes other than the performance of this Agreement, any information that relates to the other Party's business affairs, trade secrets, technology, research and development, or this Agreement or any information disclosed to it for the purpose of carrying out this Agreement or otherwise accessible to it during the performance of its obligations hereunder ("Confidential Information"). Confidential Information includes not only written or other tangible information, but also information transferred orally, visually, electronically or by other means, as well as all information relating to the Service Recipient or its business generated by Service Provider through delivery of the Services and shall be treated as information disclosed by the Service Recipient to Service Provider for purposes of this Section 9. In the event that such disclosure, availability, release or filing of Confidential Information is required by law, to the extent permissible, each Party shall (i) in advance of any such disclosure, notify the other Party of the information it proposes to disclose, it being understood that only that information which is required to be disclosed in order to comply with applicable law shall be disclosed, and (ii) use its commercially reasonable efforts (a) to obtain "confidential treatment" or similar treatment of this Agreement, and (b) to redact such terms of this Agreement that the other Party shall reasonably request.

Section 10. Miscellaneous.

(a) Disputes. In the event that a dispute shall arise between the Parties relating to the interpretation or operation of this Agreement, prior to instituting any action, senior officers of each Party shall meet promptly and shall act in good faith to attempt to resolve such dispute. If such senior officers cannot resolve the dispute within five (5) Business Days, either Party may institute any other remedy available at law or in equity, unless limited by Section 5 or Section 6.

(b) Survival. The provisions of Section 4¸ Section 9 and Section 10 shall survive the expiration or termination of this Agreement.

(c) No Third Party Beneficiaries. Except as provided in Section 7, the provisions of this Agreement are solely for the benefit of the Parties hereto and their successors and permitted assigns. Nothing in this Agreement, express or implied, shall give or be construed to give any Person, including the Subsidiaries, any rights or remedies of any nature whatsoever under or by reason of this Agreement, except the Parties hereto and such successors and assigns, any rights or remedies hereunder.

(d) No Agency. Service Provider and Service Recipient each acknowledge that the Parties are separate entities, each of which has entered into this Agreement for independent business reasons. The relationships of Service Provider and its Affiliates, on the one hand, to Service Recipient and its Affiliates, on the other hand, hereunder are those of independent contractors and nothing contained herein shall be deemed to create a joint venture, partnership, employment, agency or any other relationship. In its provision

of the Services, Service Provider shall act under this Agreement solely as an independent contractor and not as an agent, employee or partner of Service Recipient.

(e) Interpretation.

(i) Terms defined in the singular shall have a comparable meaning when used in the plural, and vice versa. Whenever the context may require, any noun or pronoun shall be deemed to include (a) the plural as well as the singular and (b) any corresponding masculine, feminine and neuter forms.

(ii) As used in this Agreement, (a) the words "hereof", "herein", "hereto" and "hereunder" and words of similar import shall refer to this Agreement as a whole and not to any particular provision of this Agreement, (b) the word "including", and words of similar import, shall mean "including, but not limited to" and "including, without limitation", (c) the terms "dollars" and "$" shall mean United States Dollars, the lawful currency of the United States of America, (d) the word "will" shall be construed to have the same meaning and effect as the word "shall", (e) the word "or" is not exclusive, (f) the word "extent" in the phrase "to the extent" shall mean the degree to which a subject or other thing extends, and such phrase shall not mean simply "if," (g) the words "asset" and "property" shall be construed to have the same meaning and effect and (h) references to a Person are also to its permitted successors and assigns.

(iii) References to "Sections" or "Exhibits" shall mean the Sections of, or the Exhibits to, this Agreement, as the case may be, except as may be otherwise specified. All terms defined in this Agreement shall have their defined meanings when used in any Exhibit to this Agreement or any certificate or other document made or delivered pursuant hereto, unless otherwise defined therein.

(iv) Except as otherwise specifically provided in this Agreement, any agreement, instrument or statute defined or referred to herein means such agreement, instrument or statute as from time to time amended, supplemented or modified, including (a) (in the case of agreements or instruments) by waiver or consent and (in the case of statutes) by succession of comparable successor statutes and (b) all attachments thereto and instruments incorporated therein.

(v) Any reference to any federal, state, local or foreign Law shall be deemed also to refer to all rules and regulations promulgated thereunder, unless the context requires otherwise.

(vi) Any accounting term set forth herein and not otherwise defined shall have the meaning accorded it under GAAP as applied on a consistent basis by Service Provider. For the avoidance of doubt, in the event of any discrepancy between GAAP and the provisions of this Agreement, the provisions of this Agreement shall control.

(vii) The Parties hereto have participated jointly in the negotiation and drafting of this Agreement. In the event an ambiguity or question of intent or interpretation arises, this Agreement shall be construed as if drafted jointly by the Parties and no presumption or burden of proof shall arise favoring or disfavoring any Party by virtue of the authorship of any of the provisions of this Agreement.

(f) Amendments. This Agreement may not be amended except by an instrument in writing signed on behalf of each of the Parties hereto. By an instrument in writing, Service Recipient, on the one hand, or Service Provider, on the other hand, may waive compliance by the other with any term or provision of this Agreement that such other Party was or is obligated to comply with or perform. Any such waiver shall only be effective in the specific instance and for the specific and limited purpose for which it was given and shall not be deemed a waiver of any other provision of this Agreement or of the same breach or default upon any recurrence thereof. No failure on the part of any Party to exercise and no delay in

exercising any right hereunder shall operate as a waiver thereof nor shall any single or partial exercise of any right hereunder preclude any other or further exercise thereof or the exercise of any other right.

(g) Notices. All notices and other communications given or made pursuant hereto shall be in writing and shall be deemed to have been duly given or made (i) as of the date received, if delivered personally, (ii) as of the date noted as delivered on the receipt, if delivered through any nationally known overnight delivery service for next Day delivery, or (iii) upon acknowledgement by the intended recipient, if emailed, to the Parties at the following addresses (or at such other address for a Party as shall be specified in a notice given in accordance with this Section 10(g)):

(h) Assignment. This Agreement and the rights and obligations hereunder shall not be assignable or otherwise transferable by Service Recipient or Service Provider (including by operation of Law in connection with a merger, consolidation or sale of all or substantially all the assets of Service Recipient or Service Provider) without the prior written consent of the other Party hereto; provided, that a Party may, with notice to the other Party, assign its rights and obligations hereunder to any Affiliate of either Party without the consent of the other Party; provided, that no such assignment to an Affiliate shall release such Party from any obligation or liability and such assigning Party shall remain primarily liable and responsible for all of its obligations under this Agreement. Any attempted assignment in violation of this Section 10(h) shall be null and void.

(i) Entire Agreement. This Agreement (including the Exhibits attached hereto), and the Purchase Agreement comprise the entire agreement between the Parties hereto with respect to the subject matter hereof and supersedes all prior agreements and understandings, oral or written, with respect to such matters, which will remain in full force and effect for the term provided for therein and any other written agreement of the Parties that expressly provides that it is not superseded by this Agreement.

(j) Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, and all of which shall constitute one and the same agreement. Delivery of an executed counterpart of a signature page of this Agreement by facsimile or other electronic means (including DocuSign) shall be effective as delivery of a manually executed counterpart of this Agreement.

(k) Severability. The provisions of this Agreement shall be deemed severable and the invalidity or unenforceability of any provision shall not affect the validity or enforceability of the other provisions hereof. If any provision of this Agreement, or the application thereof to any Person or any circumstance, is invalid or unenforceable, (i) a suitable and equitable provision shall be substituted therefor in order to carry out, so far as may be valid and enforceable, the intent and purpose of such invalid or unenforceable provision, and (ii) the remainder of this Agreement and the application of such provision to other Persons or circumstances shall not be affected by such invalidity or unenforceability, nor shall such invalidity or unenforceability affect the validity or enforceability of such provision, or the application thereof in any other jurisdiction.

(l) Governing Law; Jurisdiction, Waiver of Jury Trial. The governing law, jurisdiction, and waiver of jury trial provisions applicable to this Agreement shall be the same governing law, jurisdiction and waiver of jury trial provisions set forth in Section 13.5 of the Purchase Agreement, *mutatis mutandis*.

(m) Non-Recourse. No past, present or future director, officer, employee, incorporator, member, partner, stockholder, Affiliate, agent, attorney or Representative of either Party or its Affiliates shall have any liability for any obligations or liabilities of such Party under this Agreement, for any claim made under this Agreement, or in connection with the Services provided hereunder.

(n) Actions to be Taken by Affiliates. Each Party shall cause each of its Affiliates or Subsidiaries (as applicable) to take all actions required or contemplated to be taken pursuant to this Agreement.

Mio

7-B27-4, 9-B27-6, 10-B27-7, Line 318A A strip of land 150 feet in width being 75 feet on each side of the centerline of an existing electric transmission line located in the Southwest 1/4 of Section 3, T26N, R2E, the centerline of said strip being more particularly described as follows: To find the point of beginning, commence at the Southwest corner of said Section 3, thence South 89°54'48" East along the South line of said Section 3, a distance of 1336.43 feet to the West 1/8th line of said Section 3, thence North 00°27'02" East along the said West 1/8th line, a distance of 507.15 feet to the centerline of an existing electric transmission line and the point of beginning of this centerline description; thence along said centerline the following three courses: North 43° 40'25" West 1717.32 feet, thence North 00°40'09" East 841.80 feet, thence North 01°01'44" West 50.55 feet to the East & West 1/4 line of said Section 3 for a point of ending of this centerline description. The sidelines of said 150 foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin on the West 1/8th line of said Section 3 and to terminate at the East & West 1/4 line of said Section 3.

5-B27-5, 6-B27-6, 7-B27-4, 19-B27-3, 25-B27-7, 26-B27-1, 32-B27-2, 33-B27 – 2 Line 85B A strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in the Southeast 1/4 of Section 3, T26N, R2E, and the Southwest 1/4 of Section 2, T26N, R2E, the centerline of said strip being more particularly described as follows: To find the point of beginning, commence at the East 1/4 corner of Section 3, thence South 89°55'58" West along the East & West 1/4 line of said Section 3, a distance of 1390.64 feet to the centerline of an existing electric transmission line and the point of beginning of this centerline description; thence along said centerline the following five courses: South 00°26'08" East 1685.69 feet, thence North 89°58'35" East 1101.94 feet, thence North 83°19'54" East 2070.59 feet, thence North 89° 52'24" East 544.68 feet, thence South 31°54'29" East 452.10 feet to the point of ending of this centerline description. The sidelines of said 72 foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin on the East & West 1/4 line of said Section 3 and to terminate at a line, said line being described as follows: To find the place of beginning, commence at the center of Section 2, T26N, R2E; thence S 00° 13' 01" E, 1811.00 feet, along the North and South 1/4 line of said section to the place of beginning of said line; thence S 89° 43' 03" E, to the Easterly bank of the Mio Pond on the AuSable River.

Also, a strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in the Northeast 1/4 of Section 11, T26N, R2E, and the Northwest 1/4 of Section 12, T26N, R2E, the centerline of said strip being more particularly described as follows: To find the point of beginning, commence at the Northeast 1/4 corner of said Section 11; thence North 89°49'54" West along North line of said Section 11, a distance of 2246.33 feet to the centerline of an existing electric transmission line and the Point of Beginning of this centerline description; thence along said centerline the following four courses: South 31°54'29" East 584.93 feet, thence North 89°00'16" East 1937.65 feet to a point on the East line of said Section 11 which is South 00°01'31" East along the Section line 456.29 feet of the Northeast 1/4 corner of said Section 11; thence North 89°00'16" East 1156.82 feet, thence South 69°26'41" East 1595.41 feet, to the North & South 1/4 line of said Section 12 for a point of ending of this centerline description. The sidelines of said 72 foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin on the North line of said Section 11 and to terminate at the North & South 1/4 line of said Section 12.

Also, a strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in the Northeast 1/4 of Section 12, T26N, R2E, the centerline of said strip being more particularly described as follows: To find the Point of Beginning, commence at the Northeast corner to Section 12 T26N, R2E, thence South 00°21'07" East along the East line of said Section 12, a distance 1317.52 feet to the North 1/8th line of said Section 12, thence South 89°39'31" West a distance of 1804.57 feet to the centerline of an existing electric transmission line and the Point of Beginning of this centerline description; thence along said centerline the following two courses: South 69°26'41" East 451.55 feet, thence South 82° 44'07" East 1060.81 feet to the perimeter of the Mio parcel described below (being tract 32-B27-2, Mio Parcel) for a point of ending of this centerline description. The sidelines of said 72 foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin on the North 1/8th line of said Section 12 and to terminate at the perimeter of the aforesaid Mio Parcel.

Parcels: 001-303-011-00, 001-302-072-00, 001-311-001-00, 001-312-021-00, 001-312-019-00

Alcona

9-B3-1 Line 5A A strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in the Northeast 1/4 of Section 4, T25N, R5E, Curtis Township, Alcona County, Michigan, the centerline of said strip being more particularly described as follows: To find the Point of Beginning, commence at the Northeast corner of said Section 4, thence South 89°46'00" West along the north line of said Section 4, a distance of 526.61 feet to the centerline of an existing electric transmission line and the Point of Beginning of this centerline description; thence along said centerline: South 51°54'53" E 383.58 feet to the centerline of the AuSable River for a Point of Ending of this centerline description. The sidelines of said 72 foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin on the North line of said Section 4 and to terminate at the centerline of the AuSable River.

38-B3-7, 39-B3-3 Lines 5A/5B A strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in Northwest 1/4 of Section 14, T25N, R5E, Curtis Township, Alcona County, said strip being more particularly described as follows: To find the Point of Beginning, commence at the West 1/4 corner of said Section 14, thence N 55° 09' 41" E, a distance of 1013.99 feet; thence N 86° 26' 55" E a distance of 117.88 feet to the centerline of an existing electric transmission line at the center of a substation rack and the Point of Beginning of this centerline description; thence along said centerline the following three courses: S 68° 52' 32" E 164.65 feet and N 86° 25' 36" E 424.32 feet and N 86° 08' 00" E 191.09 feet to the centerline of Bamfield Road and the Point of Ending of the centerline description. The sidelines of said 72-foot wide strip of land are to be extended or shortened to meet at the angle points, said sidelines to begin at the perimeter of the substation rack and to terminate at the centerline of Bamfield Road.

Note: It is understood that a portion of the above-described strip of land lies within the fenced premises of Consumers' Alcona Substation, in the NW1/4 of Section 14, T25N, R5E. It is also understood that an electric line, which is part of METC's Transmission Facilities covered by this Agreement and is located on said strip of land, presently connects to the substation within said fenced area; but that no part of the substation itself, or its associated structures and facilities, is part of METC's Transmission Facilities covered by this Agreement. With respect to that portion of the above-described strip of land that is within said substation fence (as now or hereafter existing), it is expressly understood, any other provision of this Agreement notwithstanding, that unless otherwise expressly approved in writing by Consumers, METC shall make no entry thereon and shall have no right to authorize others to enter thereon; and METC shall make separate arrangements and agreements with Consumers regarding the performance of any work on the portion of METC's Transmission Facilities located therein.

**12-B24-4 is located in Section 19, T24N/R6E, part of Loud Hydro System. Remaining Tracts are correct for this 138kV route

12-B24-4, 17-B16-1, 18-B16-2, 19-B16-3, 20-B16-4, Line 103E A strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in the Southwest 1/4 of Section 19 and the West 1/2 of Section 30, T24N, R8E, the centerline of said strip being more particularly described as follows: To find the point of beginning, commence at the West 1/4 Corner of said Section 19, thence South 00°41'00" West, along the West line of said Section, a distance of 178.62 feet to the centerline of an existing electric transmission line and the point of beginning of this centerline description; thence along said centerline the following five courses: South 27°01'00" East, 1927 feet; South 43°47'00" East, 1469 feet; South 13°13'00" West, 1803 feet; South 76°43'00" West, 494 feet; South 01°17'00" East, 422 feet to an existing substation rack (Iosco Sub) and the point of ending of this centerline description. Excepting therefrom that portion lying West of the West line of a 251 foot wide strip of land as described in a Warranty Deed recorded in Liber 347, Page 68, Iosco County Records and North of the North line of the South 300 feet of the Northwest 1/4 of said Section 30. The sidelines of said 72-foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin at the West line of said Section 19 and to terminate at the aforesaid substation rack.

Note: It is understood that a portion of the above-described strip of land lies within the fenced premises of Consumers' Iosco Substation, in the Southwest 1/4 of Section 30, T24N, R8E. It is also understood that an electric line, which is part of METC's Transmission Facilities covered by this Agreement and is located on said strip of land, presently connects to the substation within said fenced area; but that no part of the substation itself, or its associated structures and facilities, is part of METC's Transmission Facilities covered by this Agreement. With respect to that portion of the above-described strip of land that is within said substation fence (as now or hereafter existing), it is expressly understood, any other provision of this Agreement notwithstanding, that unless otherwise expressly approved in writing by Consumers, METC shall make no entry thereon and shall have no right to authorize others to enter thereon; and METC shall make separate arrangements and agreements with Consumers regarding the performance of any work on the portion of METC's Transmission Facilities located therein.

1-E57-3, 20-B16-4 A parcel of land in the NW 1/4 of the SW 1/4 and the SW 1/4 of the NW 1/4 of Section 30, T24N, R8E, Oscoda Township, described as follows: To find the Point of Beginning of this description, commence at the West 1/4 corner of said Section 30; thence East, along the E-W 1/4 line of said section, 1054.33 feet to a point which is 5.71 feet North of the existing Northerly fence line of the Iosco Substation and 5.00 feet West of a proposed new fence line, said point being the Point of Beginning of this description; thence N 00°28'09" E, parallel to and 5 feet exterior of said proposed new substation fence, 15.73 feet; thence S 89°31'51" E, parallel to and 5 feet exterior of said proposed new substation fence, 71.88 feet; thence S 00°10'05" W, parallel with and 5 feet exterior of said proposed new substation fence and the existing substation fence, 164.65 feet; thence N 89°37'42" W 72.75 feet; thence N 00°28'09" E 149.04 feet to the Point of Beginning. EXCEPTING THEREFROM any part thereof that may lie within "Exception Strip No. 2" as described in Item "A." above.

96-B20-7, 98-B20-1, 99-B20-1, Line 90A A strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in the South 1/2 of Section 24 and the Northwest 1/4 of the Northeast 1/4 of Section 25, all in T23N, R13W, the centerline of said strip being more particularly described as follows: To find the point of beginning, commence at the East 1/4 corner of said Section 25, thence North 87°34'07" West, along the East-West 1/4 line of said Section, 1307.38 feet to the East 1/8 line of said Section; thence North 01°40'15" East, along said East 1/8 line 1311.04 feet to the North 1/8 line of said Section; thence North 87°38'58" West along said North 1/8 line 486.06 feet to the center line of an existing electric transmission line and the point of beginning of this centerline description; thence along said centerline the following two courses: North 11°39'29" East, 3799.61 feet and North 26°06'11" East, 181.87 feet to the East-West 1/4 line of said Section 24 and the point of ending of this centerline description. The sidelines of said 72 foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin at the North 1/8 line of said Section 25 and to terminate at the East-West 1/4 line of said Section 24, except any part of said strip located in the Northwest 1/4 of the Southeast 1/4 of said Section 24.

100-B20-2, Line 1A
The Southeast 1/4 of the Northeast 1/4 of Section 25, Town 23 North, Range 13 West, Marilla Township, Manistee County, Michigan, EXCEPT the following described parcel of land: Commence at the East 1/4 post of said Section; thence North 01°56'20" West along the East line of said Section 272.7 feet to the place of beginning of this exception description; thence continuing North 01°56'20" West along said East line of said Section 252.54 feet; thence South 86°52'50" West, 54.09 feet; thence South 14°04'40" East, 257.17 feet to the place of beginning.

Parcels: 09-024-375-01, 09-025-100-01

91-B20-3, Line 1A
A strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric line, known as line segment 1A, as currently located and running in a Northeasterly and Southwesterly direction to the center of the Substation Rack, across a parcel of land described as: Land in the Township of Springville, County of Wexford and State of Michigan described as: The Northwest 1/4 of the Northwest 1/4 of Section 30, Town 23 North, Range 12 West.

ote: It is understood that a portion of the above-described strip of land lies within the fenced premises of Consumers Hodenpyl Substation, in the Northwest 1/4 of Section 30, Town 23 North, Range 12 West. It is also understood that an electric line, which is part of METC's Transmission Facilities covered by this Agreement and is located on said strip of land, presently connects o the substation within said fenced area; but that no part of the substation itself, or its associated structures and facilities is part of METC's Transmission Facilities covered by this Agreement. With respect to that potion of the above-described strip of land that is within said substation fence (as now or hereafter existing), it is expressly understood$_1$ any other provision of this Agreement notwithstanding, that unless otherwise expressly approved in writing by Consumers, METC shall make no entry thereon and shall have no right to authorize others to enter thereon; and METC shall make separate arrangements and agreements with Consumers regarding the performance of any work on the portion of METC's Transmission Facilities located therein.

90-B20-3, Line lA
A strip of land 72 feet in width being 36 feet on each side of the centerline of an ex:isting electric line, known as line segment lA, as currently located and running in a Northeasterly and Southwesterly direction to the center of the Substation Rack, across a parcel of land described as: Land in the Township of Springville, County of Wexford and State of Michigan described as: The South 1/2 of the Northwest l/4 of Section 30, Town 23 North, Range 12 west; Except a parcel of land in the Southwest 1/4 of the Northwest 1/4 of Section 30, Town 23 North, Range 12 West, described as follows; to find the place of beginning of this description commence at the West 1/4 post of said section, thence North 01°56'20" West along the West line of said section 55 feet; thence North 86°52'50" East, 192.4 feet to the place of beginning of this description; thence continuing North 86°52'50µ East parallel with the East and West 1/4 line of said section 170 feet; thence North 03°07'10" West, 316 feet to a point on a curve not being tangen·; thence on a bearing of North 76°57'10" West a distance of 177.05 feet, said course and distance being the chord bearing and distance of a 13°30' curve to the right, length along the curve being 178.35 feet, said curve bearing a radius of 425.58 feet; thence South 03°07'10n East, 365.21 feet to the place of beginning; ALSO EXCEPT a parcel of land in the Southwest 1/4 of the Northwest 1/4 of Section 30, Town 23 North, Range 12 West, Springville Township, Wex:ford County, described as follows; to find the place of beginning of this description commence at the West l/4 post of said section; thence North 01°56'20'' West along the West line of said section 55 feet; thence North 86°52'50" East pa allel with the East and Wes 1/4 line of said section 192.4 feet to the place of beginning of this description; thence North 03°07'10'' West 365.21 feet to a point on a curve not being tangent; thence on a bearing of North 53°44'30" West, a distance of 165.41 feet, said course and distance being the chord bearing and distance of 13°30'00llcurve to the right, length along the curve being 166.47 feet, said curve bearing a radius of 425.58 feet; thence South 86°52'50" West. 54.65 feet to the West lines of said section; thence South 01°56'20" East along the West line of said section 252.54 feet to a point which said point is 272.7 feet Northerly of the Wes 1/4 post of said section as measured along the West line of said section; thence South 14°04'40" East, 153.83 feet; thence South 46°21'40" East, 91.46 feet, thence North 86°52'50" Eas parallel with the East and West l/4 line of said section 96 feet to the place of beginning.

Note: It is understood that a portion of the above-described strip of land lies within the fenced premises of Consumers Hodenpyl Substation, in the Northwest 1/4 of Section 30, Town 23 North, Range 12 West. It is also understood that an electric line, which is part of METC's Transmission Facilities covered by this Agreement and is located on said strip of land, presently connects to the substation within said fenced area; but that no part of the substation itself, or its associated structures and facilities is part of METC's Transmission Facilities covered by this Agreement. With respect to that portion of the above-described strip of land that is within said substation fence (as now or hereafter existing), it is expressly understood, any other provision of this Agreement notwithstanding, that unless otherwise expressly approved in writing by Consumers, METC shall make no entry thereon and shall have no right to authorize others to enter thereon; and METC shall make separate arrangements and agreements with Consumers regarding the performance of any work on the portion of METC's Transmission Facilities located therein.

Tippy

89-B39-6 Line 1B A strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in part of the Southwest 1/4 of Section 5, T21N, R13W, the centerline of said strip being more particularly described as follows: To find the point of beginning, commence at the West 1/4 corner of said Section 5; thence South 88°17'25" East, along the East and West 1/4 line of said Section 5, 199.58 feet to the point of beginning of this centerline description; thence South 06°16'46" East, along an existing electrical transmission line, 2007.64 feet, more or less, to a point on the North line of the South 1/4 of said Southwest 1/4 of Section 5 and to the point of ending of this centerline description. The sidelines of said 72 foot wide strip of land are to be extended or shortened to begin at the East-West 1/4 line of said Section 5 and to terminate at said North line of the South 1/4 of Southwest 1/4 of Section 5.

89-B39-6, Line 1C A strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in part of the Southwest 1/4 of Section 5, T21N, R13W, the centerline of said strip being more particularly described as follows: To find the point of beginning, commence at the West 1/4 corner of said Section 5; thence South 88°17'25" East, along the East and West 1/4 line of said Section 5, 257.87 feet to the point of beginning of this centerline description; thence South 06°15'13" East, along an existing electrical transmission line, 2007.44 feet, more or less, to a point on the North line of the South 1/4 of said Southwest 1/4 of Section 5 and to the point of ending of said easement centerline. The sidelines of said 72 foot wide strip of land are to be extended or shortened to begin at the East-West 1/4 line of said Section 5 and to terminate at said North line of the South 1/4 of Southwest 1/4 of Section 5.

Parcel: 10-005-325-00

48-B39-1, 50-B39-2: A strip of land 72 feet in width, being 36 feet on each side of the centerline of an existing electric transmission line located in part of the Northwest 1/4 of the Southwest 1/4, and in part of the Northwest 1/4, of Section 31, T22N, R13W, the centerline of said strip being more particularly described as follows: To find the Point of Beginning, commence at the Southwest corner of said Section 31; thence North 00°53'34" East (previously recorded as North 00°12'38" West) along the West line of said Section 31, 1330.39 feet; thence North 53°45'33" East, 147.91 feet to a point which is 5.00 feet exterior of and perpendicular to the North and West sides of an existing electrical substation fence; thence South 88°06'51" East, 40.04 feet, 5.00 feet exterior of and parallel with the North line of an existing electrical substation fence, to the Point of Beginning of this centerline description; thence along an existing electric transmission line the following six courses: North 06°48'37" East, 235.14 feet; North 02°22'49" East, 243.28 feet; North 01°57'57" East, 1058.46 feet; North 00°07'33" West, 911.75 feet; North 44°44'58" East, 921.43 feet; and North 88°49'58" East, 1944.83 feet, more or less, to a point on the North-South 1/4 line of said Section 31 and the Point of Ending of this centerline description. The sidelines of said 72 foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin at a point which is 5.00 feet exterior of and perpendicular to said substation fence and to terminate at said North-South 1/4 line.

1-E179-3, 50-B39-2, A parcel of land located in part of the Southwest 1/4 of Section 31, T22N, R13W, said parcel of land being more particularly described as follows: To find the Point of Beginning, commence at the Southwest corner of said Section 31; thence North 00°53'34" East, (previously recorded as North 00°12'38" West) along the West line of said Section 31, 1330.39 feet; thence North 53°45'33" East, 147.91 feet to the point of beginning; thence running 5.00 feet from, parallel with, and outside of an existing electric substation fence the following four courses: South 88°06'51" East, 224.85 feet; South 01°28'17" West, 182.42 feet; North 88°13'20" West, 226.04 feet; North 01°50'41" East, along the West line of said substation fence, 182.84 feet to the point of beginning.

Also, an easement for ingress and egress located in part of the Southwest 1/4 of Section 31, T22N, R13W, said easement being more particularly described as follows: To find the Point of Beginning, commence at the Southwest corner of said Section 31;thence North 00°53'34" East, (previously recorded as North 00°12'38" West) along the West line of said Section 31, 1330.39 feet; thence North 53°45'33" East, 147.91 feet, thence South 88°06'51" East, 16.95 feet, 5.00 feet from, parallel with, and outside of an existing electrical substation fence, to a point on the Southerly right-of-way line of an existing County Road known as Tippy Dam Road and the point of beginning of this easement description; thence continuing South 88°06'51" East, 5.00 feet exterior of and parallel with said substation fence, 8.05 feet; thence North 01°50'14" East, 1.81 feet to a point on said Southerly right-of-way line; thence South 79°10'51" West, along said Southerly right-of-way line, 8.25 feet to the point of beginning.

1-E179-3, 51-B39-2, A strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in part of the Southwest 1/4 and in part of the Southeast 1/4 of Section 31, T22N, R13W, the centerline of said strip being more particularly described as follows: To find the Point of Beginning, commence at the Southwest corner of said Section 31; thence North 00°53'34" East, (previously recorded as North 00°12'38" West) along the West line of said Section 31, 1330.39 feet; thence North 53°45'33" East, 147.91 feet; thence 5.00 feet exterior of and parallel with an existing electrical substation fence the following two courses: South 88°06'51" East, 224.85 feet; South 01°28'17" West, 113.80 feet to the centerline of an existing electric transmission line and the point of beginning of this centerline description; thence, along said centerline the following three courses: South 81°48'20" East, 229.73 feet; South 89°16'38" East, 683.35 feet; and South 60°43'07" East, 2940.84 feet, more or less, to a point on the South line of said Section 31 and the point of ending of this centerline description. The sidelines of said 72 foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin at a point which is 5.00 feet exterior of and perpendicular to said existing electrical substation fence and to terminate at said South line of Section 31.

1-E179-3, 50-B39-2, 51-B39-2 A strip of land 72 feet in width being 36 feet on each side of the centerline of an existing electric transmission line located in part of the Southwest 1/4 and in part of the Southeast 1/4 of Section 31, T22N., R13W, the centerline of said strip being more particularly described as follows: To find the point of beginning, commence at the Southwest corner of said Section 31; thence North 00°53'34" East, (previously recorded as North 00°12'38" West) along the West line of said Section 31, 1330.39 feet; thence North 53°45'33" East, 147.91 feet, thence 5.00 feet exterior of and parallel with an existing electrical substation fence the following two courses: South 88°06'51" East, 224.85 feet; South 01°28'17" West, 74.77 feet to the centerline of an existing electric transmission line and the point of beginning of this centerline description; thence, along an existing electrical transmission line, the following three courses: South 87°54'17" East, 217.08 feet; South 88°12'24" East, 720.51 feet; and South 60°43'34" East, 3055.29 feet, more or less, to a point on the South line of said Section 31 and the Point of Ending of this centerline description. The sidelines of said 72 foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin at a point which is 5.00 feet exterior of and perpendicular to said electrical substation fence and to terminate at said South line of Section 31.

66-B14-l'", Croton Substation Site That part of the NE 1/4 of Section 18, Tl2N, Rl 1W, Croton Township,. Newaygo County, Michigan, being more particu1arly described as follows: To find the point of beginning, commence at the North 1/4 ,comer of said Seclion 18; thence N 88°33'06" E 1308.95 feet along the North line of said Section l8i thence *S* 01'°01t 13;'E 575.88,feet along the West line of Govemment Lot I of said Section 18; thence N 88°58'47" E 128.43 fee1to the point of beginning of this descdption; thence **N** 00° 18;'41" W 231.95 feet; thence N 89°52'03" E 35.02 feet; thence *S* 00°07'57" E 20.00 feet: thence N 89°52'03" E 141.00 feet: thence N 00°07'57" W 20.00 feet: thence N 89°52'03" E 70.00 feet: thence S 00°07'.57" E 20.00 feet: thence N 89°52•03" E 260.49 feet: thence S 00°11'27" E 337.54 feet: thence S 89°48'44" W, 259.91 feet; thence N 00° 17' 19" W, 96.22 feet; thence N 89° 42' 38" E, 46.64 feet along rhe face of an existing building; thence N 00° 17' 22" W 34.84 feet along said face; thence *S* 89°42'38" W 57.43 feet along said facej thence S 00° 17' 22" E,5.00 feet along said faoe; thence S 89° 49' 16" W, 235.03 feet to the point of beginning of said easement.

Together with an easement for ingress and egress over the fol1owing described strip of land: A strip ofla11d being 16 feet in width being 8 feet on each side of the centerline of an existing Gravel Access Drive located in the NE 114 of Section 181 Tl2N, RIIW, Croton Township,.Newaygo County, Michigan, the centerhne of said strip being more particularly described as follows: To find the point of beginning, commence at the North 1/4 corner of said Section 18; thence N 88<'.133'06"E 1308.95 feet along the Nodh line ofsaid Section 18: thence SOI°01'13"E 708.72 feet along the West line of Government Lot 1 of said Section 18 to the centerline of an existing 16.0' wide gravel drive and the point of beginning of mhis centerline description; thenc,e along said centerline the following 3 courses: N89°56'37"E !31.10 feet; N 89°35' 45" E, 241.49 feet and N 89° 48' 44"' E 254.90 feet.; to the Substation Site ,easement and the point of ending of this centerline description. The sidelines of said I6 foot wide stdp of land are to begin at the West line of Government Lot 1 of said Section 18 and to ferminat the r.roton Substation Site described above.

66-B14-1 (Croton Substation Site Addition) A parcel of land in the Northeast 1/4 of Section 18, T12N, R11W, Croton Township, said parcel of land lying N'ly of and directly adjoining the parcel of land described under the caption "Croton Substation Site" on Page 8 of the Newaygo County portion of Exhibit A-Part I to the Agreement (being Page A00000812 in the overall page numbering of said Exhibit A-Part I to the Agreement), and being more particularly described as follows: To find the point of beginning of this description, commence at the North 1/4 corner of said Section 18; thence N 88°33'06" E 1308.95 feet along the North line of said Section 18; thence S 01°01'13" E 575.88 feet along the West line of Government Lot 1 of said Section 18; thence N 88°58'47" E 128.43 feet; thence N 00°18'41" W 231.95 feet; thence N 89°52'03" E 35.02 feet; thence S 00°07'57" E 20.00 feet; thence N 89°52'03" E 141.00 feet; thence N 00°07'57" W 20.00 feet; thence N 89°52'03" E 60.00 feet to the Point of Beginning of this description; thence N 00°07'57" W 7.00 feet; thence N 89°52'03" E 130.00 feet; thence S 00°07'57" E 27.00 feet; thence S 89°52'03" W 120.00 feet; thence N 00°07'57" W 20.00 feet; thence S 89°52'03" W 10.00 feet back to the Point of Beginning. EXCEPTING THEREFROM that part of said parcel of land that lies within the following described strip of land:

"*Exception Strip*": A strip of land 72.0 feet in width, being 36 feet on each side of the centerline of an existing electric transmission line located in the Northeast 1/4 of Section 18 and the Southeast 1/4 of Section 7, all in T12N, R11W, Croton Township, the centerline of said strip of land being more particularly described as follows: To find the point of beginning, commence at the North 1/4 corner of said Section 18; thence N 88°33'06" E 1308.95 feet along the North line of said Section 18; thence S 01°01'13" E 368.22 feet along the West line of Government Lot 1 of said Section 18; thence N 88°58'47" E 406.87 feet to the centerline of an existing electric transmission line and the Point of Beginning of this centerline description; thence along said centerline the following 3 courses: N 00°34'56" W 178.97 feet, N 35°07'07" W 1882.42 feet, and N 28°52'36" W 1313 feet more or less, to the North-South 1/4 line of said Section 7 and the Point of Ending of this centerline description. The sidelines of said 72.0 foot wide strip of land are to be extended or shortened to meet at angle points, said sidelines to begin on the North line of the parcel of land that is described under the caption "Croton Substation Site" on Page 8 of the Newaygo County portion of Exhibit A-Part I to the Agreement (being Page A00000812 in the overall page numbering of said Exhibit A-Part I to the Agreement) and to terminate on the North-South 1/4 line of said Section 7.

It is understood that the "Exception Strip", described immediately hereinabove as an exception to the parcel description first set forth above (to the extent that it lies within said parcel), is itself already "Premises" covered by the Agreement, said "Exception Strip" being described under the caption "Line 2A" on Page 8 of the Newaygo County portion of Exhibit A-Part I to the Agreement (being Page A00000812 in the overall page numbering of said Exhibit A-Part I to the Agreement).

Form of Consumers Interconnection Agreement

[Attached.]

GENERATOR INTERCONNECTION & OPERATING AGREEMENT FOR PROJECTS WITH AGGREGATE GENERATOR OUTPUT OF GREATER THAN 550 KW OR UP TO 550 KW WITH NON-CERTIFIED EQUIPMENT BETWEEN CONSUMERS ENERGY COMPANY AND

GENERATOR INTERCONNECTION & OPERATING AGREEMENT (hereinafter, this Agreement), is made and entered into on _____, (hereinafter, the Effective Date), between CONSUMERS ENERGY COMPANY, a Michigan corporation, with offices located at One Energy Plaza, Jackson, MI 49201, herein termed "Utility", and _____ with offices located at _____, herein termed "Interconnection Customer." Utility and Interconnection Customer are hereinafter sometimes referred to individually as "Party" and collectively as "Parties" where appropriate.

WITNESSETH:

WHEREAS, Utility owns electric facilities and is engaged in the generation, purchase, distribution and sale of electric energy in the State of Michigan; and

WHEREAS, Interconnection Customer intends to construct and own a _____plant, known as the _____ Generating Plant, herein termed "Project", with a generator design capacity nameplate rating not to exceed _, and an export capacity limit of _____, located at _____,; and

WHEREAS, This Agreement does not address the sale of electricity to or from Utility; and

WHEREAS, The Parties desire to enter into this Agreement for the purposes, among others, of (a) describing (i) the facilities and associated appurtenances to interconnect the Project to Utility's distribution system, including defining the Point of Delivery and Interconnection Point, (ii) the facilities required for providing and regulating reactive power supply (kilovars) at the Project, and (iii) any modifications and additions necessary on Utility's distribution system as a result of the operation of the Project; (b) establishing the ownership interests of Utility and Interconnection Customer in such facilities; and (c) establishing the respective obligations and rights of the Parties with respect to the procurement, construction, installation, operation and maintenance of such facilities.

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein set forth, the Parties hereto agree as follows:

SECTION 1
INTERCONNECTION FACILITIES

1.1 General

The Parties shall provide, as specified in this Section 1, certain facilities and associated appurtenances required to interconnect the Project to Utility's distribution system, consistent with Consumers Energy Company Generator Interconnection Procedures and the Michigan Public Service Commission's Interconnection and Distributed Generation Standards. Such facilities and associated appurtenances include, but shall not be limited to, interconnection, transformation, switching, control, metering, telemetering, protective relaying equipment (such protective relaying equipment required by Utility or Interconnection Customer to protect Utility's distribution system, its customers, and the Project from electrical faults occurring at the Project or on Utility's distribution system or on the systems of others to which Utility's distribution system is directly or indirectly connected) and any necessary additions or reinforcements by Utility to Utility's distribution system required as a result of the interconnection of the Project to Utility's distribution system. The facilities and associated appurtenances described in Subsections 1.2, "Interconnection Customer's Interconnection Facilities," and 1.3, "Utility's Interconnection Facilities," are hereinafter sometimes referred to as the "Interconnection Facilities." Interconnection Customer shall be responsible for the cost of the Interconnection Facilities, unless otherwise specified in this Agreement.

The Project, configured as discussed in this Agreement and depicted in Exhibit 2 – Wiring Diagram can be connected to Utility's distribution system as described herein. In the future, if the Interconnection Customer desires to install additional generating units at this present location, the Interconnection Customer must submit a written application to Utility. Utility will evaluate its distribution system to determine, in its sole discretion, if conditions at that time will allow said system to support additional capacity.

In the event future changes in (a) the design or operation of the Project, (b) Federal, State or local laws, regulations, ordinances or codes, (c) Interconnection Customer's requirements (such as additional generators located at the site location identified above) or (d) Utility's requirements necessitate additional facilities or modifications to the then existing Interconnection Facilities, the Parties shall undertake such additions or modifications as may be necessary. Before undertaking such future additions or modifications, the Parties shall consult, develop plans and coordinate schedules of activities so as to minimize disruption of the Interconnection Facilities and Utility's distribution system. The cost of such future additions or modifications to the Interconnection Facilities shall be borne by the Interconnection Customer, unless agreed upon otherwise at the time. The ownership, operation and maintenance responsibilities for any such future additions or modifications shall be made consistent with the responsibilities allocated in this Agreement.

1.2 Interconnection Customer's Interconnection Facilities

Interconnection Customer's Interconnection Facilities and associated appurtenances are described in Subsection 1.2 of Exhibit 1 – Scope of Facilities.

Interconnection Customer shall bear the cost of its Project unless otherwise specified in this Agreement. Interconnection Customer shall be solely responsible for all permits, zoning reviews, and other matters associated with obtaining rights from any governmental body or agency to construct its Project. Prior to Utility beginning construction of its Interconnection Facilities, Interconnection Customer shall provide a copy of all necessary documents granting the Interconnection Customer the right to construct its Project.

1.3 Utility's Interconnection Facilities

Utility Interconnection Facilities and associated appurtenances are described in Subsection 1.3 of Exhibit 1 – Scope of Facilities.

Interconnection Customer shall bear the cost of Utility's Interconnection Facilities unless otherwise specified in this Agreement. Utility shall be responsible for all permits, zoning reviews, and other matters associated with obtaining rights from any governmental body or agency to construct its Interconnection Facilities. Interconnection Customer shall reimburse Utility for all costs associated with the installation and connection of Utility's Interconnection Facilities. Interconnection Customer shall solely assume the risk that Utility may be unable to complete its Interconnection Facilities due to factors beyond its reasonable control.

Utility's Distribution Upgrades and associated appurtenances are described in Subsection 1.4 of Exhibit 1 – Scope of Facilities.

The Interconnection Customer shall bear the cost of Utility's Distribution Upgrades unless otherwise specified in this Agreement. Utility shall be responsible for all permits, zoning reviews, and other matters associated with obtaining rights from any governmental body or agency to construct its Distribution Upgrades. The Interconnection Customer shall reimburse Utility for all costs associated with the installation and connection of Utility's Distribution Upgrades. The Interconnection Customer shall solely assume the risk that Utility may be unable to complete its Distribution Upgrades due to factors beyond its reasonable control.

1.4 Easements and Permits

If necessary, prior to the installation of the Interconnection Facilities, Interconnection Customer is responsible to acquire required permits and necessary easements for the Interconnection Facilities in a form consistent with Utility's tariffs. These easements / permits may include, but shall not be limited to, rights of ingress and egress, rights to clear trees, and all necessary rights-of-way for installation and maintenance of Interconnection Facilities. The Interconnection Customer shall reimburse Utility for any costs and expenses Utility incurs to support Interconnection Customer in acquiring such easements / permits.

1.5 Relocation by Interconnection Customer

If at any time the Interconnection Customer requires Utility's Interconnection Facilities located on its premises to be relocated on such premises, Utility shall, at Interconnection Customer's expense and upon its request, relocate the same or give permission for Interconnection Customer to relocate the same. Interconnection Customer shall provide Utility with all necessary easement rights as required for the Interconnection Facilities located on Interconnection Customer's premises.

1.6 Payment by Interconnection Customer of Utility Costs and Expenses

1.6.1 Interconnection Customer shall reimburse Utility for its total cost and expenses incurred in providing the Interconnection Facilities required by Subsections 1.3 and 1.4. Interconnection Customer shall not be entitled to receive a refund of any portion of the total cost and expense incurred in providing the Interconnection Facilities required by Subsections 1.3 and 1.4 in the event that any Utility customers are later connected to such Interconnection Facilities.

1.6.2 Utility estimated conceptual cost (developed in accordance with "standard utility accounting practices") for providing and installing Utility Interconnection Facilities, including

easement rights and permits, is shown in Exhibit 3 – Payment Schedule. Utility estimates it will incur such cost and expense over a period of time. Interconnection Customer shall reimburse Utility for its estimated conceptual costs and expenses in accordance with invoices rendered by Utility. For all payments whose due date comes at least 15 days after the effective date of this Agreement, invoices will be rendered, and payments shall be due and payable such that Utility receives the payments by the dates indicated in Exhibit 3 – Payment Schedule. Payments shall be made in accordance with Subsections 1.6.3, 1.6.4 and 1.6.5.

1.6.3 When Utility has determined that all costs and expenses are accounted for on its books, Utility will issue a final invoice or credit to reconcile the estimated conceptual cost with the final work order estimate of the project. The final work order cost will be reviewed and reconciled to the estimated conceptual cost for each portion of the project covered under this Agreement. If Utility final work order cost is less than the payments received for the estimated conceptual cost provided in Exhibit 3 – Payment Schedule, Utility shall refund the incremental amount to Interconnection Customer. If Utility final work order cost is greater than the payments received for the estimated conceptual cost provided in Exhibit 3 – Payment Schedule, Utility shall issue a final invoice to Interconnection Customer for the incremental amount.

1.6.4 All payments to Utility shall be made payable to Consumers Energy Company and shall be sent to Consumers, Attention: Consumers Energy Company, P.O. Box 740309, Cincinnati, Ohio 45274-0309, or by wire transfer to a Consumers bank account or such other manner or at such place as Consumers shall, from time to time, designate by notice to Interconnection Customer. Payments made by wire transfer shall reference the appropriate invoice number for which payment is being made.

1.6.5 Any payment not made on or before the due date shall trigger a period of fifteen (15) days for Interconnection Customer to make such payment without additional charge. If payment is not made within such fifteen (15) day period, then Utility may cease work when all existing payments have been exhausted and shall not be required to resume work until Interconnection Customer makes all overdue payments.

SECTION 2
DESIGN AND CONSTRUCTION OF THE INTERCONNECTION FACILITIES

2.1 Authority for Construction

Except as provided in the following paragraph, Interconnection Customer will have sole authority to manage, design, supervise, construct, procure materials for, control and will take all steps which it deems necessary or appropriate for the installation of the Interconnection Facilities required pursuant to Subsection 1.2, "Interconnection Customer's Interconnection Facilities."

The design, specifications, installation and construction of the Interconnection Facilities required pursuant to Subsection 1.2 shall be in accordance with standards no less stringent than those used by Utility for its own distribution voltage level installations and shall be inspected and commented on by Utility prior to being placed into initial operation. However, Utility has no liability, obligation or responsibility with respect to such design, plans, specifications, installation or construction regardless of its inspection and comment thereon. Inspection of and comments by Utility shall not relieve Interconnection Customer of any of its obligations under this Agreement.

Utility shall exercise sole authority to manage, design, supervise, construct, procure materials for, control and take all steps which it deems necessary or appropriate for the installation and

connection of the Interconnection Facilities required pursuant to Subsection 1.3, "Utility's Interconnection Facilities".

2.2 Coordination of Construction Program

The Parties shall coordinate their respective construction programs essential to carrying out the installation by Interconnection Customer of its Interconnection Facilities required pursuant to Subsection 1.2 and the installation by Utility of its Interconnection Facilities required pursuant to Subsection 1.3 and will cooperate to ensure as closely as practicable the simultaneous completion of the installation of the Interconnection Facilities to be installed by Interconnection Customer and Utility, respectively.

2.3 Interconnection of the Project

Interconnection of the Project to Utility's distribution system shall be made after the following conditions have been satisfied:

2.3.1 Both Parties have declared their Interconnection Facilities ready for service;

2.3.2 Interconnection Customer has met the design, specifications, installation and construction requirements of the second paragraph of Subsection 2.1, Authority for Construction;

2.3.3 Interconnection Customer has provided adequate protective equipment to protect the equipment and service of Utility from damage or interruption from electrical faults occurring at the Project;

2.3.4 Utility has tested and accepted the billing meters and associated telemetry for the collection of the metered data required pursuant to Exhibit 1 – Scope of Facilities, Subsection 1.3;

2.3.5 Interconnection Customer and Utility have agreed to a procedure to describe the process (i) for switching and tagging the interconnection facilities for workers' protection during periods when such equipment must be removed from service and (ii) for returning the equipment to service. Both Parties agree to follow the procedure for disconnecting and re-connecting the interconnection as outlined in the then-current version of Appendix G of the appropriate Consumers Energy Company Generator Interconnection Procedures document (or its then-current equivalent);

2.3.6 Interconnection Customer has installed all signage as required by Utility for identification of equipment and protection of employees.

2.3.7 If the Interconnection Customer requires backup power from Utility, the Interconnection Customer shall be responsible for contracting with Utility for the delivery of said backup power. The Interconnection Customer shall provide Utility satisfactory evidence that it has purchased the resources to supply backup power pursuant to Subsection 6.6, Project Backup Power; and

2.3.8 Interconnection Customer has reimbursed Utility for all costs associated with the installation of Utility's Interconnection Facilities as identified in Subsections 1.3 and 1.4.

2.4 Parallel Operation of the Project With Utility's Distribution System

Parallel operation of the Project with Utility's distribution system shall only begin after the following conditions have been satisfied and confirmed in writing by Utility to Interconnection Customer:

2.4.1 Interconnection Customer has met all of the requirements of Subsection 2.3;

2.4.2 Interconnection Customer has obtained written approval by Utility of all protective equipment required pursuant to Exhibit 1 – Scope of Facilities, Subsection 1.2 and the direct transfer trip equipment required pursuant to Subsections 1.2 and 1.3 for the protection of Utility's distribution system. Approval will be granted after the required protective equipment is inspected and calibrated in accordance with the setting data issued by Utility. Inspection and calibration must be either performed or witnessed by Utility's personnel at Interconnection Customer's expense. Interconnection Customer must record the actual settings and inspection data on the setting document furnished by Utility and return such document to Utility for approval;

2.4.3 Interconnection Customer has developed operating and maintenance procedures, which Utility has accepted in writing, for those protective devices which directly connect to Utility's distribution system or interface with Utility's protective devices;

2.4.4 Utility has tested and accepted the telemetry / SCADA interface and concurs they meet the technical requirements as identified in the Telemetry, Disturbance and Power Quality Monitoring Requirements Section and the Communication Circuits Section of the Consumers Energy Company Generator Interconnection Procedures. Testing must be performed by Utility's personnel at Interconnection Customer's expense and acceptance will be communicated to Interconnection Customer in writing; and

2.4.5 Interconnection Customer has developed operating procedures to manually trip generation for system security pursuant to Subsection 6.4, System Security.

2.5 Subcontractors

Either Party may hire a subcontractor to perform its obligations under this Agreement and shall incorporate the obligations of this Agreement into its respective subcontracts, agreements and purchase orders. Each Party shall remain liable to the other Party for the performance of such subcontractor under this Agreement and shall fully defend, indemnify and hold the other Party harmless from all acts or omissions of its subcontractors.

SECTION 3
OPERATION AND MAINTENANCE

3.1 Operation and Maintenance By Utility

Utility shall have sole authority and responsibility to operate and maintain Utility's Interconnection Facilities required pursuant to Subsection 1.3, and in accordance with the applicable good utility practice standards of Utility. Utility may manually operate, when necessary, Utility's Interconnection Facilities and the isolation device provided by Interconnection Customer pursuant to Exhibit 1 – Scope of Facilities, Subsection 1.2, and may perform preventive or emergency maintenance, or make system modifications, when necessary, on Utility's Interconnection Facilities. Normal maintenance shall be scheduled on Utility's Interconnection Facilities taking into consideration Interconnection Customer's schedule of maintenance for the Project. Such authority and responsibility shall include removing the Interconnection Facilities from service, when necessary, as

determined by Utility. Utility shall not be required to deliver energy to the Project or provide a temporary connection to the Project when maintenance or system modifications require disconnecting Utility's Interconnection Facilities from Utility's distribution system. Distribution upgrades required pursuant to Exhibit 1 – Scope of Facilities, Subsection 1.4 are not subject to this Subsection 3.1.

3.1.1 Interconnection Customer shall reimburse Utility for all direct and indirect costs and expenses (including but not limited to, overtime pay, property taxes, insurance, equipment testing and inspections) incurred by Utility in owning, operating and maintaining Utility's Interconnection Facilities from the point in time in which Utility's Interconnection Facilities are ready for service. Such costs and expenses shall be determined by Utility in accordance with the standard practices and policies followed by Utility and in effect at the time such operation and maintenance are performed. As used in this Agreement, the term "maintenance" includes inspection, repair and replacement. Payment by Interconnection Customer of such costs and expenses shall be made in accordance with Subsection 3.1.4. In the event that Utility uses any part of Utility's Interconnection Facilities defined in Subsection 1.3 for the benefit of Utility's customers, then the allocation of the ongoing costs and expenses which are due to the ownership, operation and maintenance of Utility's Interconnection Facilities provided pursuant to Subsection 1.3, shall be re-determined with consideration for possible changes in: (a) Point of Delivery, (b) metering location, (c) operation and maintenance costs to Interconnection Customer to new Point of Delivery, if any, and (d) compensation to Utility for appropriate operating and maintenance costs from the new Point of Delivery, if any. Utility shall not be restricted in the use of Utility's Interconnection Facilities while such redetermination is being made.

3.1.2 If Utility performs the following tasks on the Interconnection Customer's behalf, the Interconnection Customer shall reimburse Utility for costs associated with (a) testing of metering and associated telemetry required pursuant to Subsection 2.3.4, (b) the relay setting information, inspection and calibration required pursuant to Subsection 2.4.2 and (c) the testing of the dispatching interface required pursuant to Subsection 2.4.4, which shall be separately billed by Utility.

3.1.3 The Utility shall be responsible for ordering and acquiring all equipment associated with the communication circuits pursuant to Exhibit 1 – Scope of Facilities, Subsection 1.2 as well as the proper safety equipment required for the proper installation of said communication circuits, with the cost of such equipment and all continuing operating expenses being at the expense of the Interconnection Customer. Additional operation and maintenance expenses associated with telemetry facilities are the responsibility of the Interconnection Customer pursuant to Subsection 5.4.

3.1.4 Payments by Interconnection Customer of the costs and expenses described in Subsections 3.1.1 and 3.1.2 are as follows:

3.1.4.1 As soon as practicable after the end of each month in which operation and maintenance costs and expenses were incurred by Utility pursuant to Subsection 3.1.1 and 3.1.2, Utility shall furnish Interconnection Customer a statement describing the work performed or expense incurred and showing the amount of the payment to be made therefore by Interconnection Customer.

3.1.4.2 Each statement shall be paid by Interconnection Customer so that Utility will receive the funds by the 30th day following the date of such statement, or the first business day thereafter if the payment date falls on a non-business day.

3.1.4.3 All payments shall be made payable to Consumers Energy Company and shall be sent to Consumers, Attention: Consumers Energy Company, P.O. Box 740309, Cincinnati, Ohio 45274-0309, orby wire transfer toa Consumers' bank account or such other manner or at such place as Consumers shall, from time to time, designate by written notice to Interconnection Customer. Payments made by wire transfer shall reference the appropriate invoice number for which payment is being made.

3.1.4.4 Any payment not made on or before the due date shall bear interest, from the date due until the date upon which payment is made.

3.2 Operation and Maintenance By Interconnection Customer

Except as provided in Subsections 2.3.2 and 3.1 and the provisions of this Subsection 3.2, Interconnection Customer shall have sole authority and responsibility to operate and maintain the Interconnection Customer's Interconnection Facilities required pursuant to Subsection 1.2 in accordance with prudent industry practices.

Relay settings, for protective devices required by Utility, may be revised and documents stating such revisions may be issued by Utility if it determines that it is necessary to do so. The settings for these devices may be revised only if Utility issues documents specifying such revisions. In such event, the protective relay equipment shall be recalibrated by Interconnection Customer in accordance with such revised relay settings within a reasonable period specified by Utility. The procedure for recalibration and approval shall be the same as stated for the initial calibration pursuant to Subsection 2.4.2.

The protective relay equipment shall be tested every four (4) years (unless an extension is agreed to by Utility) to verify the calibration indicated on the latest relay setting document issued by Utility. If the protective relay equipment is not calibrated in accordance with the latest relay-setting document, it shall be recalibrated in accordance with Subsection 2.4.2, to conform with such data. Tests shall be conducted or witnessed by Utility at Interconnection Customer's expense. The results of such tests shall be provided to Utility in writing for review and approval.

Utility may, at any time in addition to that specified in the preceding paragraph, at Utility's expense, inspect and test Interconnection Customer's Interconnection Facilities to verify that the required protective interconnection equipment is in service, properly maintained, and calibrated to provide the intended protection. If necessary, this inspection may also include a review of Interconnection Customer's pertinent records.

Inspection, testing and/or approval by Utility or the omission of any inspection, testing and/or approval by Utility pursuant to this Agreement shall not relieve Interconnection Customer of any obligations or responsibility assumed under this Agreement.

SECTION 4
ACCESS

Utility, its agents and employees, shall have full right and authority of ingress and egress at all reasonable times on and across the premises of Interconnection Customer for the purpose of installing, operating, maintaining, inspecting, replacing, repairing, and removing its Interconnection Facilities located on the premises. The right of ingress and egress, however, shall not unreasonably interfere with Interconnection Customer's use of its premises.

SECTION 5
INTERCONNECTION POINT; POINT OF DELIVERY; METERING; TELEMETERING

5.1 Interconnection Point

The Interconnection Point shall be where the Interconnection Customer's Interconnection Facilities connect to Utility's distribution system.

5.2 Point of Delivery

The Point of Delivery shall be the point at which the Interconnection Customer's Interconnection Facilities connect to Utility's existing distribution facilities serving other customers. It is described in greater detail in Exhibit 5.

5.3 Metering

Measurements of electric energy deliveries shall be made by standard types of electric meters installed and maintained by Utility pursuant to Exhibit 1 – Scope of Facilities, Subsection 1.3.

The standard electric meters shall be tested by Utility at least once every six (6) years. On request and at the expense of the Interconnection Customer, a special test may be performed. Representatives of Interconnection Customer shall be afforded the opportunity to be present at all routine or special tests and upon occasions when any readings, for purposes of settlements, are taken from meters not bearing an automatic record.

5.4 Telemetering

Certain telemetry facilities will be provided by Utility pursuant to Exhibit 1 – Scope of Facilities, Subsection 1.3 as a part of the Interconnection Facilities as being necessary for the proper and efficient collection of metering and control data. The cost and maintenance of such telemetry facilities and associated communication circuits shall be borne by Interconnection Customer.

SECTION 6
SERVICE CONDITIONS

6.1 Site Preparation

At its own expense, the Interconnection Customer shall make the proposed Project site available to Utility. Said site shall be free from hazard and shall be adequate for the operation and construction of distribution facilities necessary to interconnect the proposed Project.

6.2 Parallel Operation

It is understood that the Project will normally remain connected to and be operated in parallel with Utility's distribution system. The Interconnection Customer shall, at its expense, install and properly maintain protective equipment and devices and provide sufficiently trained personnel to protect its equipment and service, and the equipment and service of Utility from damage, injury or interruptions during the Project's parallel operation with Utility's distribution system, and, without limiting the indemnity provided in Subsection 7.1 herein, Interconnection Customer shall assume any loss, liability or damage to Interconnection Customer and Utility's distribution system and equipment caused by lack of or failure of such protection. Such protective equipment specifications and design shall be consistent with the Consumers Energy Company Generator Interconnection Procedures, and any successor and/or supplemental documents. Prior to the Project operating in

parallel with Utility's distribution system, the Interconnection Customer shall provide satisfactory evidence to Utility that it has met the Consumers Energy Company Generator Interconnection Procedures that are on file with the Michigan Public Service Commission and complied with all applicable laws, rules, regulations, guidelines, and safety standards.

6.3 Voltage and Frequency Control

Interconnection Customer shall cooperate with Utility to regulate the voltage level at the Point of Delivery by controlling its generators in accordance with Utility's instructions. Such instructions shall include, but not be limited to, (a) maintaining voltage or (b) delivering real and reactive power to the Point of Delivery at levels specified by Utility. Interconnection Customer shall cooperate with Utility to regulate the frequency by controlling its generators in accordance with Utility's instructions. Such instructions shall include, but not be limited to, frequency-droop curves. The instructions given by Utility shall be consistent with the normal practices adhered to by Utility with respect to its own generators located on its system.

6.4 System Security

Installation, inspection, and calibration of protective equipment to trip generation for under-or over-voltage and frequency operation shall be coordinated with Utility, pursuant to Subsection 2.4.2, so as not to degrade the security of Utility's distribution system. Operating practices developed by Interconnection Customer which call for manual tripping of generation for under-or over-voltage and frequency operation shall likewise be coordinated and be consistent with the voltage and frequency ride through provisions listed in the Consumer Energy Company Generator Interconnection Procedures during abnormal system voltage and frequency events, and any successor and/or supplemental documents, which are incorporated herein by reference.

6.5 Continuity of Service

Each Party shall exercise reasonable care to maintain continuity of service in the delivery and receipt of electric energy. If service becomes interrupted for any reason, the cause of such interruption shall be removed and normal operating conditions restored as soon as practicable.

6.6 Project Backup Power

If the Interconnection Customer requires backup power from Utility, the Interconnection Customer will contract with Utility for the delivery of power provided to the Project under one of Utility's established retail rates set forth in Utility's tariffs, which are incorporated herein by reference. The provisions of such contract shall be applied during periods when the Project is not delivering energy to Utility. The Interconnection Customer will contract with Utility for the purchase of energy or provide satisfactory evidence of the purchase of energy from an alternative energy supplier for the purpose of providing power to the Project during periods when the Project is not delivering energy to Utility's distribution system.

Interconnection Customer shall have sufficient voltage regulation at the Project to maintain an acceptable voltage level for Project equipment during such periods when the Project's generation is off line.

6.7 Utility's Obligation to Connect

Utility shall not be obligated to continue the electrical interconnection to the Project if it determines, in its sole discretion, that any one or more of the following conditions exist, including but not limited to: (a) those conditions listed in the Miscellaneous Operational Requirements section of the

Consumer Energy Company Generator Interconnection Procedures, (b) electrical characteristics of the Project are not compatible with the electrical characteristics of Utility's distribution system, (c) the Interconnection Customer is deficient in following either the voltage schedule or reactive power schedule established by Utility, (d) an emergency condition exists on Utility's distribution system, (e) Interconnection Customer's protective relay equipment fails, resulting in a lack of the level of protection required by prudent utility practice, (f) the Interconnection Customer's Project is determined to be disrupting Utility customers, (g) Utility requires disconnection of the Project in order to construct, install, maintain, repair, replace, remove, investigate, inspect or test any part of Utility's Interconnection Facilities or any other Utility equipment associated with the interconnection (also if a required component (example: communication circuit) or required modification to allow interconnection fails or becomes incapacitated and is not repaired in a timely manner), (h) by mutual consent, (i) Interconnection Customer commits a material breach of this agreement or (j) Interconnection Customer's failure to execute this agreement or upon cancellation or termination of this agreement. Utility shall electrically connect or reconnect its distribution system to the Project when, in Utility's sole opinion, the conditions named above cease to exist. Under any of the conditions listed above, Utility will follow the procedures for disconnecting and re-connecting the interconnection as outlined in Appendix G of the appropriate Consumers Energy Company Generator Interconnection Procedures document.

In the event future changes in either the (i) design or operation of the Project, (ii) federal, state or local laws, regulations or codes, (iii) Interconnection Customer's requirements, or (iv) Utility's requirements, necessitate additional facilities or modifications to the then existing Interconnection Facilities herein, the Parties shall undertake such additions or modifications as may be necessary. Before undertaking such future additions or modifications, the Parties shall consult, develop plans and coordinate schedules of activities to minimize disruptions to the Interconnection Facilities and minimize cost to the Interconnection Customer. The cost of such future additions or modifications to the Interconnection Facilities shall be borne by the Interconnection Customer unless agreed upon otherwise at the time, with payment due on a mutually agreed upon schedule. Such future additions or modifications shall be part of the Interconnection Facilities from the time they are placed in service. The ownership, operation and maintenance responsibilities for any such future additions or modifications shall be made consistent with the responsibilities allocated in this Agreement.

SECTION 7
INDEMNITY; INSURANCE

7.1 Indemnity

Except as set forth in Section 6.2 above, as between the Parties, unless caused by the sole negligence or intentional wrongdoing of the other Party, each Party to this Agreement shall at all times assume all liability for, any and all damages, losses, claims, demands, suits, recoveries, costs, legal fees, and expenses to the extent caused by its directors, officers, employees, and agents: (a) for injury to or death of any person or persons whomsoever occurring on its own system, and/or (b) for any loss, destruction of or damage to any property of third persons, firms, corporations or other entities occurring on its own system, including environmental harm or damage arising out of or resulting from, either directly or indirectly, the Interconnection Facilities or the DER, or arising out of or resulting from, either directly or indirectly, any electric energy furnished to it hereunder after such energy has been delivered to it by such other Party.

If this Agreement is one subject to the provisions of Michigan Act No. 165, PA 1966, as amended, then Interconnection Customer will not be liable under this section for damages arising out of injury or damage to persons or property directly caused or resulting from the sole negligence of Utility, or

any of its officers, agents or employees. The provisions of this Subsection 7.1 shall survive termination or expiration of this Agreement.

7.2 Insurance

Interconnection Customer shall obtain and continuously maintain throughout the term of this Agreement General Liability insurance written on an occurrence form, or other form acceptable to Utility, and covering bodily injury and property damage liability with a per occurrence amount of at least:

Interconnection Level	Minimum Limit
4	$2,000,000
5	$3,000,000

Such limit may be achieved through any combination of primary and excess or umbrella liability insurance policy. When requested in writing by Utility, said limit shall be increased each year that this Agreement is in force to a limit no greater than the amount arrived at by increasing the original limit by the same percentage change as the Consumer Price Index - All Urban Workers (CPI-U.S. Cities Average). Such policy shall include, but not be limited to, contractual liability for indemnification assumed by Interconnection Customer under this Agreement.

Consumers Energy Company, its Directors, Officers, and Employees are to be included as ADDITIONAL INSUREDS and such coverage shall be primary to any insurance maintained by Consumers Energy Company. Utility shall not be responsible for any unpaid premiums under Interconnection Customer policy.

Evidence of insurance coverage on a certificate of insurance shall be provided to Utility when requested by the Utility. Interconnection Customer shall immediately provide Utility written notice if the policy is cancelled or substantial changes are made that affect the additional insured. At Utility's request, Interconnection Customer shall provide a copy of the policy to Utility.

All certificates and notices shall be sent to:

CONSUMERS ENERGY COMPANY
Attn: Insurance Risk Management
One Energy Plaza
Jackson, MI 49201-2276
InsuranceCertificates@cmsenergy.com

SECTION 8
LIMITATION ON LIABILITY

Neither party shall in any event be liable to the other for any incidental or consequential damages such as, but not limited to, lost profits, revenue or good will, interest, loss by reason of shutdown or non-operation of equipment or machinery, increased expense of operation of equipment or machinery, cost of purchased or replacement power or services or claims by customers, whether such loss is based on contract, warranty, negligence, strict liability or otherwise, even if it has been advised of the possibility of such damages.

SECTION 9
FORCE MAJEURE

Neither Party shall be liable for failure to perform any of its obligations hereunder, to the extent due to events outside of its control, including, but not limited to events such as fire, flood, storm, other natural disaster, national emergency or war, epidemic or pandemic (referred to collectively as "Force Majeure"),

and not due to labor problems, inability to obtain financing, negligence or other similar condition of such Party, provided that either Party has given the other prompt notice of such occurrence. The Party affected shall exercise due diligence to remove such Force Majeure with reasonable dispatch but shall not be required to accede or agree to any provision not satisfactory to it in order to settle and terminate a strike or other labor disturbance.

A 'force majeure event' means an act of God; labor disturbance; act of the public enemy; war; insurrection; riot; fire, storm, or flood; explosion, breakage, or accident to machinery or equipment; an emergency order, regulation or restriction imposed by governmental, military, or lawfully established civilian authorities; or another cause beyond a party's control. A force majeure event does not include an act of negligence or intentional wrongdoing. Neither Party shall be liable for failure to perform any of its obligations hereunder to the extent due to a force majeure event, provided that either Party has given the other prompt notice of such occurrence. The Party affected shall exercise due diligence to remove such force majeure with reasonable dispatch but shall not be required to accede or agree to any provision not satisfactory to it in order to settle and terminate a strike or other labor disturbance.

SECTION 10
BREACH AND DEFAULT

A breach of this Agreement ("Breach") shall occur upon the failure of a Party to perform or observe any material term or condition of this Agreement, which includes, but is not limited to:

a. Failure to pay money when due;

b. Failure to comply with any material term or condition of this Agreement, including but not limited to any breach of any material representation, warranty or covenant made in this Agreement;

c. A Party: (i) becomes insolvent; (ii) files a voluntary petition in bankruptcy under any provision of any federal or state bankruptcy law or shall consent to the filing of any bankruptcy or reorganization petition against it under any similar law; (iii) makes a general assignment for the benefit of its creditors or (iv) consents to the appointment of a receiver, trustee or liquidator;

d. Assignment of this Agreement in a manner inconsistent with the terms of this Agreement;

e. Failure of either Party to provide information or data to the other Party as required under this Agreement, provided the Party entitled to the information or data under this Agreement requires such information or data to satisfy its obligations under this Agreement.

In the event of a Breach by either Party, the Parties shall continue to operate and maintain, as applicable, its Interconnection Facilities, protection and Metering Equipment, transformers, communication equipment, building facilities, software, documentation, structural components and other facilities and appurtenances that are reasonably necessary for Utility to operate and maintain Utility's distribution system and for the Interconnection Customer to operate and maintain its Project in a safe and reliable manner. Upon a Breach, the non-breaching Party shall give written notice of such Breach to the breaching Party. The breaching Party then has 30 days to cure the Breach. If a Breach is not cured within the period provided for herein or as agreed to by the Parties, the Party in Breach shall be deemed in default ("Default"). The non-defaulting Party shall have the right to terminate this Agreement and recover any damages and/or pursue any other remedies available under this Agreement, by law, or in equity. Termination is not the non-defaulting Party's exclusive remedy and is in addition to any other rights and remedies it may have under this Agreement or by law. Failure of non-defaulting Party to exercise any of its rights under this Section shall

not excuse defaulting Party from compliance with the provisions of this Agreement nor prejudice rights of Utility to recover damages for such default.

SECTION 11
SUCCESSORS AND ASSIGNS

This Agreement shall inure to the benefit of and be binding upon the successors and assigns of the respective Parties hereto. This Agreement shall not be assigned, transferred or otherwise alienated without the other Party's prior written consent, which consent shall not unreasonably be withheld. Any attempted assignment, transfer or alienation without such written consent shall be void.

SECTION 12
GOVERNING LAW

This Agreement shall be deemed to be a Michigan contract and shall be construed in accordance with and governed by the laws of Michigan, exclusive of its conflict of laws principles.

SECTION 13
EFFECTIVE DATE, TERM AND TERMINATION

The Effective Date of this Agreement shall be the date of execution and shall continue in effect until this Agreement is terminated as provided herein. The Agreement may be terminated at any time by mutual agreement of both Parties, or by either Party upon giving the other at least ninety (90) days written notice if one or more of the conditions exist as outlined in Subsection 6.7, Utility's Obligation to Connect.

SECTION 14
RETIREMENT

Upon termination of this Agreement pursuant to Section 13 or at such time after any of the Interconnection Facilities described herein are no longer required, the Parties shall mutually agree upon the retirement of said Interconnection Facilities which may include without limitation (i) dismantling, demolition, and removal of equipment, facilities, and structures, (ii) security, (iii) maintenance and (iv) disposing of debris. The cost of such removal shall be borne by the Interconnection Customer.

SECTION 15
ENTIRE AGREEMENT AND AMENDMENTS

This Agreement and the Consumers Energy Compan Generator Interconnection Procedures shall constitute the entire understanding between the Parties with respect to the subject matter hereof, supersedes any and all previous understandings between the Parties with respect to the subject matter hereof, and bind and insure to the benefit of the Parties, their successors, and permitted assigns. No amendments or changes to this Agreement shall be binding unless made in writing and duly executed by both Parties.

SECTION 16
NO PARTNERSHIP

This Agreement shall not be interpreted or construed to create an association, joint venture, agency relationship, or partnership between the Parties or to impose any partnership obligation or partnership liability upon either Party. Neither Party shall have any right, power or authority to enter into any agreement or undertaking for, or act on behalf of, or to act as or be an agent or representative of, or to otherwise bind, the other Party.

SECTION 17
SEVERABILITY

If any provision or portion of this Agreement shall for any reason be held or adjudged to be invalid or illegal or unenforceable by any court of competent jurisdiction or other Governmental Authority, (i) such portion or provision shall be deemed separate and independent, (ii) the Parties shall negotiate in good faith to restore insofar as practicable the benefits to each Party that were affected by such ruling, and (iii) the remainder of this Agreement shall remain in full force and effect.

SECTION 18
NOTICE TO PARTIES

Unless otherwise provided in this Agreement, any notice, consent or other communication required to be made under this Agreement, shall be in writing and (i) mailed postage prepaid, by certified or registered mail, return receipt requested; (ii) mailed via a nationally recognized overnight delivery service, (iii) delivered in person to the address as the receiving Party may designate in writing, or (iv) delivered via electronic mail to the address stated in Exhibit 4, which either Party may update by a notice to the other Party sent in accordance with this Section 18.

All notices shall be effective when received.

SECTION 19
NO THIRD PARTY BENEFICIARIES

This Agreement is intended for the benefit of the Parties hereto and does not grant any rights to any third parties unless otherwise specifically stated herein.

SECTION 20
SECTION HEADINGS

The various headings set forth in this Agreement are for convenience of reference only and shall in no way affect the construction or interpretation of this Agreement.

SECTION 21
COUNTERPARTS AND ELECTRONIC DOCUMENTS

This Agreement may be executed and delivered in counterparts, including by a facsimile or an electronic transmission thereof, each of which shall be deemed an original. Any document generated by the Parties with respect to this Agreement, including this Agreement, may be imaged and stored electronically and introduced as evidence in any proceeding as if original business records. Neither Party will object to the admissibility of such images as evidence in any proceeding on account of having been stored electronically.

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement.

Form of Regulatory Disallowance Agreement

[Attached.]

REGULATORY DISALLOWANCE AGREEMENT

THIS REGULATORY DISALLOWANCE AGREEMENT (this "**Agreement**") is entered into as of [ ], 20[__] (the "**Effective Date**") by and between Consumers Energy Company, a Michigan corporation (together with its successors and permitted assigns, "**Consumers**"), and Confluence Hydro, LLC, a Delaware limited liability company (together with its successors and permitted assigns, "**Owner**"). Consumers and Owner are sometimes referred to herein individually as a "**Party**" and collectively as the "**Parties**".

RECITALS:

WHEREAS, Consumers and Owner are parties to that certain Purchase and Sale Agreement, dated as of September 3, 2025 (the "**PSA**"), pursuant to which Consumers has agreed to sell and Owner has agreed to purchase the Project Assets (as defined in the PSA), including all Assumed Liabilities (as defined in the PSA) on the terms and subject to the conditions provided therein;

WHEREAS, Consumers and Owner are parties to that certain Renewable Energy Purchase Agreement, dated as of September 3, 2025 (the "**PPA**"), pursuant to which Owner has agreed to sell and Consumers has agreed to purchase the energy, power and capacity produced from the Projects (as defined in the PSA), on the terms and subject to the conditions provided therein;

WHEREAS, in the event of a Disallowance Order, Section 7.4 of the PPA gives Consumers the right to reduce the charges to be paid to Owner pursuant to the PPA to the amount that the Michigan Public Service Commission allows Consumers to recover from its customers and, in such event, the right of Owner to terminate the PPA in its entirety (a "**Regulatory Disallowance Termination Event**");

WHEREAS, in the event of a Regulatory Disallowance Termination Event, Consumers is willing to pay to Owner a Regulatory Disallowance Termination Payment (as defined below); and

WHEREAS, the Parties desire to memorialize the terms and conditions under which Consumers will pay to Owner the Regulatory Disallowance Termination Payment in the event of a Regulatory Disallowance Termination Event.

NOW THEREFORE, in consideration of the premises and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, each Party hereby represents, warrants, covenants, and agrees for the benefit of the other Party as follows:

AGREEMENT:

1. **Defined Terms**. All capitalized terms used herein but not otherwise defined in this Agreement shall have the meaning ascribed to such terms in the PPA.

2. **Regulatory Disallowance Termination Payment**.

(a) If, prior to the end of the Term of the PPA, Owner terminates the PPA in its entirety pursuant to Section 7.4 of the PPA (the "**Termination**"), then upon written demand by Owner (the "**Demand**"), Consumers agrees to pay to Owner an amount (the "**Regulatory Disallowance Termination Payment**") equal to (i) the lesser of (A) the Economic Loss Payment (defined below) or (B) Two Hundred Fifty Million Dollars ($250,000,000.00) plus or minus, as the case may be, (ii) (A) the aggregate amount, if any, owed by Consumers to Owner under the PPA that has accrued and remains outstanding under the PPA for the period prior to the termination of the PPA less (B) the aggregate amount, if any, owed by

Owner to Consumers under the PPA that has accrued and remains outstanding under the PPA for the period prior to the termination of the PPA. The Demand shall include Owner's proposed calculation of the Regulatory Disallowance Termination Payment and the components thereof, together with reasonable supporting documentation.

(b) The "**Economic Loss Payment**" shall equal: (i) an amount equal to the present value of the economic losses incurred by Owner, if any, for the remainder of the Term as a result of the Termination (the "**Losses**"), minus (ii) an amount equal to the present value of the economic benefit to Owner, if any, for the remainder of the Term resulting from the Termination (the "**Gains**"). If Owner's Gains exceed its Losses, then the Economic Loss Payment shall be equal to zero dollars ($0). To the extent the Economic Loss Payment exceeds Two Hundred Fifty Million Dollars ($250,000,000.00), the Parties agrees that Owner has no duty mitigate or take any actions to reduce the payment of the Two Hundred Fifty Million Dollars ($250,000,000.00) by Consumers to Owner.

(c) Consumers shall have ten (10) Business Days after receipt of the Demand to review the Regulatory Disallowance Termination Payment and provide a written objection (if any) to all or any portion of the Regulatory Disallowance Termination Payment ("**Disputed Items**") in the Demand (an "**Objection Notice**"). Failure to provide an Objection Notice within ten (10) Business Days after receipt of the Demand shall irrevocably terminate Consumers' right to object to all or any portion of the Regulatory Disallowance Termination Payment in the Demand.

(d) If Consumers timely provides Owner with an Objection Notice, then Consumers and Owner will meet in person or electronically to discuss and attempt to resolve in good faith any Disputed Items within ten (10) Business Days after Owner's receipt of the Objection Notice. If Consumers and Owner are unable to resolve such Disputed Items and agree upon the Regulatory Disallowance Termination Payment within twenty (20) Business Days following Owner's receipt of the Objection Notice, or no such meeting has taken place within such ten (10) Business Days period, then either Party shall have the right to seek examination and final determination of the Regulatory Disallowance Termination Payment by a nationally recognized independent consultant or national recognized accounting firm mutually acceptable to Consumers and Owner (the "**Consultant**"). The objective of such examination and final determination by the Consultant shall be restricted to (i) the Disputed Items identified in the Objection Notice, and (ii) the accuracy, reasonableness and completeness of the supporting documentation provided by Owner in the Demand in respect of such Disputed Items. The costs associated with the Consultant's review and determination of the Disputed Items shall be borne equally by both Parties. Notwithstanding anything to the contrary in this Agreement, the final determination by the Consultant with respect to the Disputed Items will not prevent either Party from exercising their rights to pursue any remedies at law or equity to enforce the terms of this Agreement with respect to the final determination by the Consultant with respect to the Disputed Items.

(e) Within ten (10) Business Days after the later of a final determination of the Disputed Items (i) by the Consultant in accordance with Section 2(d) above or (ii) as result of the Parties exercising their rights to pursue any remedies at law or equity to enforce the terms of this Agreement pursuant to the last sentence of Section 2(d), Consumers shall pay the portion, if any, of the Regulatory Disallowance Termination Payment resolved pursuant to clause (i) or (ii) above to Owner by wire transfer of immediately available funds to the account specified in writing by Owner in its Demand delivered to Consumers pursuant to Section 2(a) above, or, if so requested in such Demand, by such alternative means of delivery of immediately available funds or other method of payment as is reasonably acceptable to Consumers.

(f) Within ten (10) Business Days after receipt of the Demand, Consumers shall pay the portion, if any, of the Regulatory Disallowance Termination Payment not subject to a timely submitted Objection Notice to Owner by wire transfer of immediately available funds to the account specified in

writing by Owner in its Demand delivered to Consumers pursuant to Section 2(a) above, or, if so requested in such Demand, by such alternative means of delivery of immediately available funds or other method of payment as is reasonably acceptable to Consumers.

(g) Interest shall accrue at the Late Payment Interest Rate (i) on the undisputed portion of the Demand commencing on the eleventh (11th) Business Day after Consumers receipt of the Demand and (ii) on the disputed portion of the Demand commencing on the twenty-first (21st) Day after Owner's receipt of the Objection Notice if and to the extent that the Parties mutually agree or it is determined pursuant to Section 2(e)above that such disputed portion of the Demand was due.

(h) Following the payment of the Regulatory Disallowance Termination Payment in full, including all applicable interest:

(i) Owner irrevocably waives on behalf of itself and its Affiliates (including the Subsidiaries) and their respective members, shareholders, managers, directors, officers or employees, any claims, rights or remedies, including for damages that it or they may have under this Agreement or the PPA or at law or in equity, against Consumers and its Affiliates and their respective members, shareholders, managers, directors, officers or employees, *provided, however* that any breach of the covenant in Section 7.4 of the PPA requiring Consumers to use commercially reasonable efforts to oppose any proposal to disallow costs included in the PPA shall be specifically excluded from the release set forth in this subsection (i), *provided further*, that any Regulatory Disallowance Termination Payment made under this Agreement shall offset against any Termination Payment payable by Consumers due to breach of Section 7.4 of the PPA and any Termination Payment made by Consumers due to breach of Section 7.4 of the PPA shall offset against any Regulatory Disallowance Termination Payment payable by Consumers hereunder; and

(ii) Consumers irrevocably waives on behalf of itself and its Affiliates and their respective members, shareholders, managers, directors, officers or employees, any claims, rights or remedies, including for damages, that it or they may have under this Agreement or the PPA or at law or in equity against Owner and its Affiliates (including the Subsidiaries) and their respective members, shareholders, managers, directors, officers or employees, *provided, however* that the release set forth in this subsection (ii) shall exclude any such claims, rights or remedies, including for damages, that it or they may have with respect to claim(s) that Owner or any of its Affiliates (including the Subsidiaries) may bring due to breach by Consumers of Section 7.4 of the PPA.

3. **Binding Effect; Assignment**. This Agreement shall be binding upon and inure to the benefit of the Parties and their respective successors and permitted assigns, and no other Person shall have any right, benefit, or obligation hereunder. Neither this Agreement nor any of the rights or obligations hereunder shall be assigned by either of the Parties, in whole or in part, without the prior written consent of the other Party, and any attempt to make any such assignment without such consent shall be null and void.

4. **Acknowledgement**. The Parties acknowledge and agree that the terms of this Agreement, including Consumers' obligation to pay the Regulatory Disallowance Termination Payment due under this Agreement, shall not in any way be subject to the Liability Cap (as defined in the PSA).

5. **Governing Law; Waiver of Jury Trial**.

(a) This Agreement shall be governed by and construed in accordance with the internal laws of the State of Michigan, without regard to principles of choice of law and conflicts of law.

(b) Each Party agrees that any suit, action, or proceeding, whether claim or counterclaim, brought or instituted by either Party on or with respect to this Agreement or which in any way relates,

directly or indirectly, to this Agreement, or any event or occurrence arising out of or in any way connected with this Agreement shall be tried only by a court and not by a jury. **TO THE FULLEST EXTENT PERMITTED BY LAW, EACH PARTY HERETO HEREBY EXPRESSLY WAIVES ANY RIGHT TO A TRIAL BY JURY IN ANY SUCH SUIT, ACTION, OR PROCEEDING DIRECTLY OR INDIRECTLY ARISING OUT OF, UNDER, OR IN CONNECTION WITH THIS AGREEMENT**. **EACH PARTY HERETO FURTHER WAIVES ANY RIGHT TO CONSOLIDATE ANY ACTION IN WHICH A JURY TRIAL HAS BEEN WAIVED WITH ANY OTHER ACTION IN WHICH A JURY TRIAL CANNOT BE OR HAS NOT BEEN WAIVED.**

6. **Entire Agreement; Amendments and Waivers**. This Agreement, together with the PPA, constitutes the entire agreement between the Parties pertaining to the subject matter hereof and supersedes all prior agreements, understandings, negotiations, and discussions, whether oral or written, of the Parties with respect to the subject matter hereof. No supplement, modification, or other amendment or waiver of this Agreement shall be binding on the Parties unless executed in writing by the Party to be bound thereby. No waiver of any of the provisions of this Agreement shall be deemed or shall constitute a waiver of any other provision hereof (whether similar or not), nor shall such waiver constitute a continuing waiver unless otherwise expressly provided.

7. **No Third-Party Beneficiaries**. Nothing expressed or referred to in this Agreement will be construed to give any Person, including any Affiliates of a Party, other than the Parties to this Agreement (and their successors and permitted assigns) any legal or equitable right, remedy, or claim under or with respect to this Agreement or any provision of this Agreement.

8. **No Strict Construction**. The Parties have participated jointly in the negotiation and drafting of this Agreement. In the event an ambiguity or question of intent or interpretation arises, this Agreement shall be construed as if drafted jointly by the Parties, and no presumption or burden of proof shall arise favoring or disfavoring any Party by virtue of the authorship of any of the provisions of this Agreement.

9. **Counterparts**. This Agreement may be executed in any number of duplicate originals and each duplicate original shall be deemed to be an original. This Agreement may be executed in several counterparts, each of which counterparts shall be deemed an original instrument and all of which together shall constitute a single agreement.

[*Signature Page to Follow*]

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the date first above written.

Thirteen and thirteen one hundredths (13 – 13/100) acres of land off from the East side of the following described land and lying below a level line, which level line is twenty-nine and one half (29 - 1/2) feet above the present normal surface of Wagar's Pond (Elevation 142.50 Commonwealth Power Company's datum). The point at which said surface is to be taken on Grand River is at Hunt's Ford on the North and South quarter line of Section 33, Township 7 North, Range 5 West, to wit: Commencing in the center of highway from Portland to Collins eight (8) chains and thirty-five (35) links North of South line of Section 18, Township 6 North, Range 5 West, thence East parallel with South line of said Section 18 and Section 17, Township 6 North, Range 5 West to Grand River, thence upstream to a point about 92 rods North of East and West quarter line of Section 20, Township 6 North, Range 5 West, thence West along North line of Edmund White's land to said highway, thence Northerly to the Place of Beginning.
AND
That certain One and 48/100 (1.48) acres of low land that would be overflowed by raising the water at or near the Shotwell bridge or the Old Ford in Section 33 in Lyons Township, off of the following described land: Beginning at the East quarter post of Section 19, thence North on Section line about 92 rods to the South line of land formerly owned by John Decker; thence East at right angles with the last described line to Grand River; thence up and along said river to the East and West quarter line of Section 20; thence West along said quarter line to the Place of Beginning, containing 16 acres of land, more or less and being on the South end of the West fraction of the Northwest quarter of Section 20 in Township 6 North of Range 5 West.

EXHIBIT W-1

Form of Memorandum of Understanding

MEMORANDUM OF UNDERSTANDING
WITH RESPECT TO THE
ASSUMPTION OF RESPONSIBILITIES UNDER THE COLLECTIVE BARGAINING AGREEMENT

Consumers Energy Company ("Consumers") and the Utility Workers Union of America (affiliated with the AFL-CIO) and its Michigan State Utility Workers Council ("Union") are parties to that certain Working Agreement effective as of October 1, 2020, by and between Consumers and Union, that certain Memorandum of Agreement effective as of April 1, 2025, by and between Consumers, and those addenda, settlement agreements, side agreements, and memoranda between Consumers and Union set forth in Attachment A hereto (together, the "Collective Bargaining Agreement"). Consumers and Confluence Hydro, LLC ("Confluence Hydro") have entered into a Purchase and Sale Agreement, dated as of September 3, 2025 (the "PSA"), pursuant to which Consumers will sell and Confluence Hydro will purchase thirteen (13) hydroelectric projects which are set forth in Attachment B attached hereto (each individually, a "Project", and collectively, the "Projects"), on the terms and subject to conditions provided therein. As a condition to the sale of the Projects, Confluence Hydro has agreed to be bound by the provisions of the Collective Bargaining Agreement that are applicable to the Projects and the employees working at the Projects, and to provide equivalent benefits set forth therein, and will assume such responsibilities from Consumers. Effective upon the consummation of the sale of the Projects pursuant to the PSA (the "Effective Date"), Consumers shall transfer all such applicable rights and obligations under the Collective Bargaining Agreement to Confluence Hydro.

To effect the transfer of the Collective Bargaining Agreement and the applicable Consumers' obligations thereunder, Consumers shall (i) contact the Union and inform them of the consummation of the sale of the Projects as soon as practicable, and (ii) inform the Union that Consumers and Confluence Hydro have agreed that Confluence Hydro shall be bound by the provisions of the Collective Bargaining Agreement applicable to the Projects and the employees working at the Projects, and assign those future obligations with respect to each Project to Confluence Hydro. After the Effective Date, Confluence Hydro shall inform the Union in writing of its willingness to become bound by the terms and conditions as set forth within the Collective Bargaining Agreement as applicable to each Project and employee working at such Project in its current form, subject to necessary changes to conform to Confluence Hydro benefit plans and business processes. *See* Attachment C, Notice of Transfer to the Union.

Beginning on the Effective Date and continuing through the term of the Collective Bargaining Agreement, the parties to the Collective Bargaining Agreement as to each Project shall be Confluence Hydro, LLC, and the Utility Workers Union of America (affiliated with the AFL-CIO) and its Michigan State Utility Workers Council. This Agreement does not otherwise affect or transfer Consumers' obligations to the Union under the Collective Bargaining Agreement beyond those Projects.

Signature Pages to Follow

IN WITNESS WHEREOF, Consumers and Confluence Hydro have executed this Agreement as of the Effective Date.

Form of Union Notice

[_____, ____]

[By First Class Mail and Email]

[*Insert Union Representative Information*]

RE: Consumers Energy Company Assumption of Certain Responsibilities under the Collective Bargaining Agreement to Confluence Hydro, LLC

Consistent with prior notice to representatives of Utility Workers Union of America (affiliated with the AFL-CIO) and its Michigan State Utility Workers Council ("Union") by Consumers Energy Company ("Consumers"), this letter is to inform you that Confluence Hydro, LLC ("Confluence Hydro") has purchased the assets associated with the thirteen (13) hydroelectric projects specified in Attachment B attached hereto (each individually a "Project", and collectively, the "Projects") owned by Consumers, effective as of [_____, ____]. By this letter, Confluence Hydro respectfully notifies the Union, that Confluence Hydro will step into the position of Consumers with respect to the Union employees working at such Projects, and shall be responsible for Consumers' future obligations thereunder applicable to such employees working at the Projects for the remainder of the terms of that certain Working Agreement effective as of October 1, 2020, by and between Consumers and Union, that certain Memorandum of Agreement effective as of April 1, 2025, by and between Consumers and Union, and those addenda, settlement agreements, side agreements and memoranda applicable to the Projects set forth in the Memorandum of Understanding (as defined below)(together, the "Collective Bargaining Agreement"), as amended, and Consumers' bargaining obligations thereunder, beginning on [_____, ____], subject to necessary changes to conform to Confluence Hydro's benefit plans and business process. *See* the Memorandum of Understanding with Respect to the Transfer of the Responsibilities Under the Collective Bargaining Agreement between Consumers and Confluence Hydro attached hereto as Attachment A ("Memorandum of Understanding").

Confluence Hydro looks forward to a good working relationship with the Union. We would appreciate the opportunity to introduce ourselves at your convenience. If you have any questions, please do not hesitate to contact me at [insert contact information].

Sincerely,

[insert bargaining representative]

Exhibit E

Energy Purchase Price Schedule

The Energy Purchase Price for Delivered Energy shall be the rate as determined in Tables 1 through 5, as set forth below.

The Parties acknowledge and agree that the spillway construction project at the Rogers Plant ("Alternative Rogers Spillway Project") shall solely consist of the following sub-projects: (a) alteration and repair of spillway slab; (b) replacement of right downstream retaining wall; (c) remediation of spillway gates four (4), five (5), and six (6); (d) filling of spillway chambers; (e) remediation of sand and stone boils in middle embankment reverse filter; (f) concrete remediation of log chute between spillway and powerhouse; (g) repair of concrete on right and left spillway walls; and/or (h) any other sub-project, including the purchase of any parcels of real property, required by FERC to pass the FERC-approved inflow design flood at the Rogers Plant.

The Parties further acknowledge and agree that Buyer may have certain liability incurred under the PSA for Material Casualty, Material Condemnation, PSA Indemnities, and Purchaser Title Objections. Should Buyer have any such liability, Buyer will provide written notice to Seller memorializing the applicable amount of such liability that the Parties have agreed to pursuant to the PSA and thereafter such amount shall be paid from Buyer to Seller starting in the Billing Month immediately subsequent to Buyer's notice and the Energy Purchase Price for Delivered Energy shall be the rate adjusted as set forth in Table 2 below.

The Parties further acknowledge and agree that through the acquisition of the Plants, Seller, and/or the Subsidiaries, may be eligible for a financial loan from the United States Army Corp of Engineers through the Corps Water Infrastructure Financing Program (the "ACoE Loan"). Should Seller, and/or the Subsidiaries, receive the ACoE Loan, Seller shall provide notice to Buyer within five (5) Days of such receipt. Subsequent to Seller's receipt of the ACoE Loan, the Energy Purchase Price for Delivered Energy shall be adjusted as set forth in Table 5 below.

Table 1	
Commencing on the Effective Date	Energy Purchase Price shall be $160.00/MWh for the first 12 Months after the Effective Date and increasing by 2.5% for each subsequent 12-Month period thereafter.

Table 2	
Commencing on the first Day of the Billing Month subsequent to Buyer's notice to Seller of, and the Parties mutual agreement pursuant to the PSA on, the amount to be recovered by Seller under this Agreement	Energy Purchase Price shall increase by $0.133/MWh times the total amount mutually agreed to by the Parties pursuant to the PSA which will be recovered by Seller under this Agreement (in millions of dollars). The amount of $0.133/MWh will apply for the first 12 Months after the Effective Date and increase by 2.5% for each subsequent 12-Month period thereafter.

Table 3	
Commencing if and when Seller incurs capital investment cost overruns during the Term of this Agreement at the Hardy Plant in excess of $216,500,000 solely under the scope(s) of work set forth in the Hardy EPC Agreement as in effect as of the Effective Date and for which Seller has provided Buyer reasonable supporting documentation and evidence of such capital investment cost overruns.	Energy Purchase Price shall increase by the product of (i) the total amount of capital investment cost overruns incurred by Seller during the Term of this Agreement at the Hardy Plant solely under the scope(s) of work set forth in the Hardy EPC Agreement as in effect as of the Effective Date (in millions of dollars), (ii) $0.133/MWh and (iii) 0.75, provided that, in no event shall the Energy Purchase Price increase as a result of adjustments pursuant to this Table 3 above $165.00 / MWh. The amount of $165/MWh will apply for the first 12 Months after the Effective Date and increase by 2.5% for each subsequent 12-Month period thereafter.

Table 4	
Commencing if and when Seller incurs capital investment cost overruns during the Term of this Agreement at the Rogers Plant in excess of $16,841,000 related solely to the Alternative Rogers Spillway Project and for which Seller has provided Buyer reasonable supporting documentation and	Energy Purchase Price shall increase by the product of (i) the total amount of capital investment cost overruns incurred by Seller during the Term of this Agreement at the Rogers Plant related solely to the Alternative Rogers Spillway Project (in millions of dollars), and (ii) $0.133/MWh, provided that, in no

evidence of such capital investment cost overruns.	event shall the Energy Purchase Price increase as a result of adjustments pursuant to this Table 4 above $165.00 / MWh. The amount of $165/MWh will apply for the first 12 Months after the Effective Date and increase by 2.5% for each subsequent 12-Month period thereafter.

Table 5	
Commencing on the first Day following the Billing Month subsequent to Seller's receipt of ACoE Loan	Energy Purchase Price shall decrease by the product of (i) the outstanding quantum of the ACoE Loan, (ii) 0.50, (iii) the Loan Index Rate and (iv) 1 / 480,000
Loan Index Rate	Prevailing BB Interest rate at close – interest rate of ACoE Loan

If any conditions become apparent that differ significantly from our understanding of conditions as presented in this report, we request that we be notified immediately to reassess the conclusions provided herein.

EXECUTIVE SUMMARY

Consumers Energy Company (Consumers) owns and operates 13 river hydro dam facilities located on the Muskegon, Manistee, Grand, Au Sable, and Kalamazoo Rivers. The average age of these assets is 106 years old and much of each site is original construction and equipment. Consumers would need to start relicensing 11 of the 13 projects with filings signaling their intentions no later than June 30, 2029, meaning a plan for the assets should be in place within the next few years to prepare for filing with Federal Energy Regulatory Commission (FERC). In addition, FERC has recently updated their Part 12 inspection requirements. The revised inspections put more emphasis on Potential Failure Mode Analysis, updated Probable Maximum Flood, and Semi-Quantitative Risk Analysis level 2 effort for each site. These enhanced regulations require subject matter experts and facilitators to complete portions of the work. Consumers also conducts routine inspections and commissioned studies investigating the overall conditions of the facilities. Although not comprehensive, the assessments indicate the assets are in 'fair' condition but recognizes the current operations as run-of-river is inconsistent with the original peaking designs conceding efficiency and potential generation revenue. The combination of aging assets, increasing regulatory requirements which have resulted in potentially costly upgrades to some of the Project's spillways, system operations, and expected spend on necessary maintenance to keep the plants operating has raised the question of how to extract the best value out of these assets.

To achieve this goal, Consumers hired WSP, a large, interdisciplinary engineering, environmental and advisory firm with robust experience with hydropower assets throughout North America, similar to Consumers' portfolio, to review Consumers' reports and analyze different outcome scenarios and characterize how to achieve them. Scenarios analyzed included two for relicensing, three for surrendering the license, and one to investigate divesting. Within this pursuit, an additional goal of developing an economic model as a tool to rank the potential outcomes was later added.

Our team reviewed the existing environmental and regulatory license conditions, Consumers' condition assessments, revenue, and strategic plan to establish a baseline understanding of the assets, their performance, and risks to help define the scenarios and issues the roadmap considers. In addition to developing the groundwork for the roadmap, we developed site summaries, risk matrices and economic model to help inform our opinion of the most appropriate outcome to pursue for each site. Our opinions are founded on the best available existing information and the timelines available to develop our model.

Scenarios evaluated include:

- Relicense – Upgrade units
- Relicense – Overhaul units
- Divest
- Surrender License: Non-Generation
- Surrender License: Partial Decommissioning
- Surrender License: Full Decommissioning

'Relicense – Maintain' was a scenario initially considered but later dismissed as unsustainable and ultimately would result in either of the relicensing options (upgrade or overhaul). The term 'Relicense – Maintain' may appear in the economic model as a relic to this earlier potential scenario.

Risks to Consumers were characterized qualitatively by evaluating five broad categories: Environment, Dam Safety, Economics, People, and Reputation. Qualitative metrics included red (most risk), orange, yellow, and green (least risk) for each of the 13 hydropower Projects. No weighting was considered for the risks nor was a quantitative score generated on behalf of Consumers. The risk matrix was developed to highlight differences in the scenarios.

In addition to characterizing risks, the roadmap utilized an economic model to quantify the potential costs, reported as a net present value (NPV), for each scenario. Assumptions for the model were based on our review of Consumers cost information, literature review and industry standards. Overall, the nature of the available information used in the model was planning level (high-level estimates) but implemented consistently across all sites. Results from the economic models showed that all scenarios generated a negative NPV. This outcome is largely a function of the costs to operate and maintain the assets in combination with the forecast revenue declining over the next 40 years. Implementing upgrades to the equipment or overhauling the equipment would improve efficiencies and generate more electricity; however, these increases typically result in larger negative NPV over the next 50 years due to the overall cost and inability to recover the investment costs due to the declining revenue. From strictly NPV perspective, favorable scenarios are ones that minimize investment such as the surrender – non-generating alternative; however, some sites still require large capital improvements to meet current dam safety regulations before the powerhouses can be disconnected and all sites would require ongoing maintenance of the dams without a revenue stream to offset these costs. Sensitivity analysis indicates that regular 1-4 percent annual increases in revenue results in many projects reaching situations where the NPV could be favorable.

Divesting is an alternative to relicensing and surrendering. One pathway to eliminate responsibility of relicensing and surrendering is to sell the assets. Large hydropower portfolios have exchanged hands over the last few years making headlines within the industry as appetites for renewable energy and environmental, social, and governance goals gain traction in the financial markets.
The deadline to file a notice of intent to relicense or surrender is still a few years away. This allows for investigating selling the hydropower portfolio providing a potentially viable option to minimize expenditures and risk with owning and operating a hydropower portfolio.

Our analysis considered the Project sites conditions, environmental requirements, forecast issues for a future license and the costs to implement them. So too were the risks of operating the dams. The roadmap is less a process of how to get to a preferred outcome and more of a set of decision tools to help Consumers make business decisions regarding which outcome to pursue. Overall, our opinion is informed without Consumers input on priorities, risk tolerances, revenue projections, or other business fundamentals that could be considered when making choices for which scenario or outcome provides the best value to Consumers. The lowest risk scenario is one in which Consumers doesn't own dams and the easiest way to achieve this is to divest the portfolio. Should negotiations fail to consummate a deal for the portfolio, we provide a summary of value outcomes for each site in Table ES-1. Our opinions balance risks and costs and are independent from Consumers without insights into their preferences for risk or knowledge of their preferred business outcomes.

Consumers Energy used the models produced by WSP to add overheads, update escalation and discount rates which matched those used by Consumers Energy, added in energy capacity value,

updated revenue rates to reflect assumptions used in their IRP for years beyond 2050, and added a general capital line for anticipated, yet undefined capital costs at each site based on more recent trends in capital project spend. The intent of Consumers Energy exercise was to see how the model results change when incorporating overheads and revenue for capacity, while also adding in some of the other known unknowns regarding overall hydro expenses. The results between WSP and Consumer Energy models show that all sites are negative NPV for all scenarios. However, with addition of some of these costs, the ordering of the scenarios based on NPV changed in many instances.

Table ES-1. Summary Outcomes

Site	WSP First Opinion
Rogers	Surrender – Full Decommission
Hardy	Surrender – Full Decommission
Croton	Divest or Surrender – Non-Power Generation Alternative
Hodenpyl	Divest or Surrender – Full Decommissioning
Tippy	Divest or Partial Decommissioning
Mio	Divest or Surrender – Full Decommissioning
Alcona	Divest or Surrender – Full Decommissioning
Loud	Divest or Surrender – Full Decommissioning
Five Channels	Divest or Surrender – Non-Power Generation Alternative
Cooke	Divest or Relicense Overhaul
Foote	Divest or Surrender – Non-Power Generation Alternative
Allegan/Calkins Bridge	Divest or Surrender – Non-Power Generation Alternative
Webber	Divest or Surrender – Full Decommissioning

1 ISSUE STATEMENT

Consumers Energy Company (Consumers) hydropower projects average over 100 years old, many of which utilize original equipment. The cost to maintain equipment of this age is trending upward as the facilities continue to age with equipment reliability and performance decreasing over time. Federal Energy Regulatory Commission (FERC) license limitations on operations have impacted how the projects have operated over time and have evolved from peaking to more run-of-river, meaning most of the power generating equipment in place is not optimized for the current operational needs, which limits efficiency. The regulatory environment continues to evolve, uncovering impacts associated with hydropower operation on the environment; and this trend looks to continue. Dam safety regulations are also continuing to evolve as risks are identified that may not have been as evident or well understood in the past. The facilities will require not only routine maintenance due to the aging infrastructure but new, larger spillways to accommodate the changing regulatory requirements. The revenue from the operations is forecasted to decrease over time as Consumers implements the Integrated Resource Plan (IRP), which includes the decommissioning of coal and the construction and adoption of gas, wind, and solar. Table 1 summarizes the historical and projected qualitative trends in costs and revenues facing the 13 river hydropower sites. Table 2 summarizes some of the benefits of hydropower that are considered in our overall assessment and opinion balanced with the reality of the benefit to Consumers.

Table 1. Projected Trends in Costs and Revenues Related to Hydropower Ownership and Operations

Cost Driver	Overall Cost Implication
Age and Condition of Equipment	↑
Environmental and Recreation Mitigation Measures	↑
Dam Safety Risk Mitigation	↑
Outages	↑
Labor, Insurance, Taxes, Supplies, Suppliers	↑
Reputational Related Commitments (donations, education, partnerships)	↑
Climate Risks (droughts, severe storms)	↑
Revenue Driver	**Overall Revenue implication**
Operational Run Time	↓
Efficiency of Units	↓
Revenue from Hydropower	↓

Table 2. Benefits of Hydropower to Consumers

Theoretical Benefit	Consumers Reality
Assets are paid for and fully depreciated (hydropower is affordable)	The assets are 100+ years old and require tremendous amounts of maintenance and capital expenses to maintain
Sites with peaking capabilities can capitalize on market conditions (agile and responsive)	Regulatory pressure is to operate in run-of-river with limited abilities to peak
Assets are designed for long duration runtimes as evidenced by running 100+ years (dependable)	Assets are using original equipment which is not optimized for the facilities and require significant labor-intensive maintenance due to lack of newer generating equipment and proper operations and maintenance strategy.
Ancillary services (secondary benefits)	With limited peaking comes limitations on ability to assist with variable energy integration and transmission grid support
Recreation benefits	Consumers is required by their FERC License to provide adequate and safe recreation to the lands and waters which is forecasted to be a growing expense for capital projects and maintenance
Local economic benefits (taxes, recreation, commercial businesses)	Commercial and residential developments exist at some reservoirs with businesses directly related to the recreation opportunities at the reservoirs. These stakeholders depend on the reservoirs which supports Consumers reputation in supporting economic development.
Drinking water, flood control, irrigation support	Reservoirs designed for full pool operations with run-of-river operations don't provide flood control. Reservoirs are not used for drinking water or irrigation
Hydropower is a clean, renewable, and domestic supply of energy	Hydropower is approximately 1% of Consumers energy output from the entire generating portfolio but likely requires more than 1% of Consumers annual expenses

2 INTRODUCTION

Consumers has requested that WSP provide an independent review of Consumers 13 river hydroelectric projects and assessment of possible scenarios as the sites approaching major planning milestones and regulatory requirements that can impact the business for the next 50 years. These sites are located throughout the Lower Peninsula of Michigan and range in age from approximately 88 to 115 years old. Eleven of the thirteen sites will enter FERC relicensing with internal preparations starting in the next four to five years.

WSP has prepared this report to assist Consumers in describing potential outcomes, potential considerations for each outcome, net present value (NPV) of each outcome, and potential risks. We reviewed three potential outcomes for the portfolio including relicense them and continue to operate them for another 50 years, surrender the licenses (and make surrender plans in consultation with stakeholders), or divest. Our opinion[1] is based on a review of the existing conditions (e.g., age of the developments, condition assessments), potential to increase efficiencies (and thereby revenues), environmental conditions and risks associated with each option (e.g., likely future license conditions and mitigation requirements), the communities and people that utilize the rivers and reservoirs where these developments are located, and the reputational risks that might be associated with each outcome. Consumers has contracted with another firm to investigate economic impacts to the communities around the reservoirs.

Several goals were developed by Consumers and WSP for the roadmap which became the basis of this deliverable.

- Identify highest and best value to Consumers for each hydro facility. Highest and best value identified through consultation with Consumers staff, WSP opinion of relicensing and surrendering outcomes and risks, and results of economic NPV costs/value modeling.
- Consumers is a regulated utility provider with a commitment via the Michigan Public Service Commission (MPSC) to deliver the best value in reliable, affordable, and clean electricity to its customers. Results from the economic modeling were used to support our opinions of outcomes for the 13 river developments.
- Identify potential outcomes for each site including relicense, surrender license, and divest (sub-outcomes for all 3 primary outcomes). Utilize the economic model to provide estimated NPV for each outcome/sub-outcome outlined.

[1] WSP provides an opinion based on review of available information at the time of writing and that the inclusion of costs or analysis of cost estimates should be considered high level or Class 5 or screening or feasibility level of detail. WSP did not prepare cost estimates for Consumers, but reviewed cost estimates prepared by or for Consumers and can confirm they are from reputable sources with reasonableness to be used in planning outcomes from this roadmap. Appendix A-1 provides perspective regarding the WSP independent review of costs.

3 FUTURE SCENARIOS

3.1 RELICENSE

FERC authorizes non-federal dams and issues licenses containing the conditions under which to operate hydroelectric projects. License terms are based on the amount of redevelopment, new construction, new capacity, or environmental mitigation, and other factors such as coordination of license terms for multiple projects in the river basin. Hydropower licenses contain terms and conditions (articles) that require environmental measures to protect, mitigate effects on, or enhance environmental resources; engineering measures to ensure safe construction and continued operation of the project; and certain administrative requirements (such as filing exhibit drawings, paying annual charges to FERC, establishing a project amortization reserve, and filing a Public Safety Plan). Mandatory terms and conditions may also be prescribed by certain state and federal agencies and become part of the license. Consumers currently holds FERC licenses for all their hydropower assets.

Scenarios considered under the relicense outcome include assumptions about the term of the license, current environmental conditions and new mitigation measures, the age and efficiency of the generating equipment as well as dam safety requirements. Some dam safety requirements need to be implemented under current license terms such as increased spillways and all proposed projects need approval from FERC. Scenarios evaluated under the relicensing of the hydropower facility include (1) upgrading the powerhouse equipment; or (2) overhauling the equipment. A potential third scenario, operate and maintain, was conceived as a potential option to investigate; however, this scenario was dismissed as unrealistic and unquantifiable for comparison with the other options because of the units age and condition and could require an upgrade or an overhaul as soon as the first year triggering the other options. Its possible the units could be operated and maintained in the short term but not as a realistic scenario for 50 years for the model purposes. More detailed descriptions of these alternatives are as follows:

1. Relicense - Upgrade: Upgrade the powerhouse units with new, more efficient equipment optimizing the generation at the site; or
2. Relicense – Overhaul: Overhaul the existing equipment with existing specifications and types of equipment; or

Both relicensing scenarios would include compliance with environmental and dam safety regulations in the current and future anticipated FERC license.

Figure 1 summarizes the decision tree.

3.2 SURRENDER

Scenarios evaluated under the consideration for the surrender of the hydropower facility include: (1) surrender license but disconnect generation equipment; (2) partial removal of the dam; and (3) full

removal of all dams, powerhouse, and structures to restore the river channel to its natural state. More detailed descriptions of these alternatives are as follows:

- Surrender– No-Power Generation: The no-power generation scenario evaluates surrender of the FERC license while not removing the dam structure. The powerhouse and spillway would be modified to maintain safe flows through the system while disconnecting generation equipment. The dam would remain in place and current reservoir levels would be maintained. Additional capital improvements would be required for long term compliance with dam safety regulations.
- Surrender and Decommission – Partial Removal: The partial removal scenario evaluates partial removal of the dam via reduction of the earthen dam structure with full removal of the powerhouse and generation facilities. This scenario evaluates the potential to leave some form of upstream reservoir system while developing a new weir control structure. This structure would be designed to fall under state regulations (Natural Resources and Environmental Protection Act (NREPA), Part 315, Dam Safety), not FERC regulations. Structures would be approximately six feet in height to be defined as the lowest hazard classification potential feasible by location while achieving the goal of maintaining some form of upstream reservoir and to prevent the proliferation of invasive species such as the sea lampreys.
- Surrender and Decommission - Full Removal: The full removal scenario evaluates the complete removal of the dam and reservoirs. The reservoirs would be drained, powerhouse/generation facilities and earthen dam structures fully removed, and the upstream channel and floodplain restored to pre-dam conditions.

3.3 DIVEST STRATEGY

Buying and selling hydropower assets are common transactions in the renewable energy business. Considerations for divesting out of the portfolio include providing a mix of assets in the sale, as the transaction shouldn't include just the best or worst performing assets. Hydropower portfolio transactions have been in renewable energy news platforms in the recent years as investors look for investments in renewable sources with Environmental, Social and Governance (ESG) growth opportunities. Consumers has a history of selling off dozens of small hydropower facilities. Given that relicensing or surrender decisions can be made a few years from now, putting the portfolio on the market in the near term could be the most favorable path forward for Consumers to transition away from costly hydropower generation into more cost-effective generation. Some of the first steps would be to prepare a data room for prospective buyers to review records and consult with a broker or bank experienced with energy portfolio sales.
