CASE  
To Whom It May Concern: Re: # 21291

My name is Deborah D. McLaughlin, I am writing this letter in protest to DTE requesting a gas rate increase that may cost each household almost \$956.00 more. I don't know if this is true I saw news this past fall. I have started trying to use less electricity and gas to keep my bills lower this summer and now fall and winter. At home trying to use my electric heaters between 3p-7pm M-Fri and lowering my thermostat to 42 degrees which now that it is getting colder I literally has to put on my jacket and my face masks to try to keep warm in a house that has no installation either in the Walls or my attic. I have an older home built in 1952 it has the original windows. I can't afford to update these. The cost of living is hitting seniors like me I am 70 yrs young but we will do the best we can

over

I just saw on TV the past week re: DTE is pushing the MPSC to fast track this project Case # 21990 by DTE for this data center in saline Township the county of Washtenaw. With technology moving so fast now why are they rushing to get this Mega Data Center without investing the harm it could do to our cities near that location for air pollution whether heat, water, ground/soil etc. and on the news DTE said it will not increase their customers rates I don't believe this. I am against this and if DTE rushes this and the business that is coming to mich is not held account-able if they do not comply to MI laws guess what DTE will be held accountable.

Thank you for at least giving the residents of Michigan their say. If this is fast tracked through without our say

yours truly  
Richard D. McLaughlin
