Executive Secretary  
Michigan Public Service Commission  
P.O. Box 30221  
Lansing, MI 48909

Dear Ms. Kunkle,

Please apply the attached comments towards the Consumers Energy Company - Alternatives Analysis MPSC Case No. U-15996.

If you have any questions feel free to contact me at the below number.

Thank you,

Tiffany Hartung  
Sierra Club Associate Regional Representative  
1723 West Fourteen Mile Rd., Royal Oak, MI 48073  
Office: (248) 549-6213 Fax: (248) 549-6357

Regarding: Consumers Energy Company - Alternatives Analysis (PTI No. 341-07) & MPSC Case No. U-15996

Dear Executive Secretary Kunkle and Mr. Feighner:

The draft permit for the proposed Consumers Energy Coal Plant must be denied and the Alternatives Analysis must be rejected as inadequate. Based on the analysis submitted by Consumers Energy, the information provided does not establish the need for the plant or the lack of alternatives to the plant.

First, there is no need for this, or any, new coal-fired power plant in the State of Michigan. The filing makes unsubstantiated claims that the state's energy needs will grow and underestimates the ability of more cost-effective clean energy alternatives to meet energy needs in the future. Consumers own recent projections show a decline in current and future energy demand. Projections for electric demand in the state show there is no need for any new plant and that electric demand in the State of Michigan is in fact level or even decreasing.

Second, there are cleaner alternatives. Even when demand starts growing again, increased demand can easily be met with cleaner alternatives. Cleaner alternatives such as clean, renewable energy and energy efficiency can meet the need while creating clean energy jobs for the state.

**David Abbey**  
**Saint Joseph, MI 49085-9339**

I live a little south of the city. A couple of years ago we were told that our air was polluted. After a better study, it was pointed out that since we have few factories here anymore, the pollution was brought by the westerly winds from Chicago and Gary. With these winds, we will probably never, or seldom, be affected by the junk in the air from any coal plants east of us. But, others will. I am worried enough about the 2 nuclear plants within 30 miles of us. Don't make it worse!

---

**David Aho**  
**Rudyard, MI 49780-0212**

We need to move forward with supporting our energy needs, but we all know that coal is not the answer. There are many other better options, which I presume you are familiar with. If not, find someone who is, and do the right thing. Coal is NOT the answer! There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very

difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Douglas Aikenhead**  
**Ann Arbor, MI 48103-4177**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Building new coal-fired power plants is also contrary to the environmental recommendations of countless experts. It is imperative that we reduce greenhouse gases, beginning immediately. Building new coal-fired plants would be a giant and costly step backward.

---

**Kim Alexander**  
**Kalamazoo, MI 49004-0162**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Chuck Altman**  
**Royal Oak, MI 48067-2275**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kenneth Altman**  
**Saugatuck, MI 49453-9634**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Camron Amin**  
**Berkley, MI 48072-3059**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I'm counting on both energy companies and state government officials to take the long-term public interest into account when making these decisions. Put the effort into a new and clean energy economy. Forget about coal and forget about nuclear (until you have a real answer for nuclear waste and proliferation risks).

---

**James Andersen**  
**Ann Arbor, MI 48103-9117**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Brenda Anderson**  
**Ann Arbor, MI 48103-4362**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Please reject these new coal-fired plants!

---

**Robert Anderson**  
**Rapid City, MI 49676-9706**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Suzanne Anderson**  
**Berrien Springs, MI 49103-9574**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Mike Anderson**  
**Clarkston, MI 48346-3700**

As a lifetime resident of Michigan I believe it is time to consider our environment first before building any new energy systems. With that said "OUR" GREAT LAKES deserve the right to stop being a dumping ground for our "CLEAN COAL " emissions. Make no mistake any new coal fired plants in Michigan will result in more "MERCURY" in our GREAT LAKES PERIOD. Thank you for reading my concerns. Michael W. Anderson

---

**T Reid Anderson**  
**Big Rapids, MI 49307-9755**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Fred And Lois Andres**  
**Chelsea, MI 48118-1120**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Pat Andring**  
**Pinckney, MI 48169-9123**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Cindy Archibald**  
**Fenton, MI 48430-1906**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Anne-Marie Armstrong**  
**Trenton, MI 48183-2755**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I have seen mountain tops that were destroyed to bring us so-called "cheap" coal. This is immoral. Other states will move way ahead of us by using wind. Don't give in to these narrow thinkers. Don't allow corporate greed to continue destroying the environment.

---

**Reid Arnott**  
**Grand Rapids, MI 49508-3776**

I am a concerned citizen and an active outdoorsman. Recently I have been looking to move from Grand Rapids to the Holland area. However if there is a coal plant I will not be moving to that city. Keep in mind that not only is this a danger on the environment but it will lower the amount of people that want to live in the area. Don't destroy such a beautiful area and my hopes of having a house in a clean area!!! There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Yael Aronoff**  
**Mason, MI 48854-9497**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Barbara Arzola**  
**Mt Pleasant, MI 48858-4728**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Steven Ashmead**  
**Grand Rapids, MI 49506-3367**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jack Ashton**  
**Canton, MI 48188-1554**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Annemarie Askwith**  
**Sault S Marie, MI 49783-2628**

Climate change is the most serious consequence Earth has experienced in 65 million years. As Earth is diminished, humans are diminished as we are now experiencing. I am amazed that we would even consider continuing with our past energy sources. We are thinking too small to not face the pollution consequences of our times or in not thinking we must and can begin to find better and even more powerful sources. After all, the entire planet ran on non-polluting sources before we came along and produced a florescence of resources. Sorry, I am copying Earth and putting all my chips with energies that are non-polluting.

---

**Jan Aufder-Heide**  
**Kalamazoo, MI 49008-1630**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Mark Axelrod**  
**East Lansing, MI 48823-3230**

**Bloomfield, MI 48301-2825**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Please put efforts into renewable resources to meet our future energy needs.

---

**Pamela Baker**  
**East Lansing, MI 48823-2319**

Michigan's natural resources are one of our greatest resources, and the pollution from coal-fired power plants diminishes this resource. This is not only morally wrong, it also negatively impacts our economically important tourism industry. The wonderful "Pure Michigan" campaign highlights how this state can profit from keeping our air and water clean and healthy for wildlife. Fishing alone is a huge industry in Michigan, and the pollution from coal-fired plants is a leading cause of mercury in our fish, leading many people to limit their consumption.

---

**Barbara Baker**  
**Bloomfield, MI 48301-2825**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Let's put our efforts into renewables.

---

**Katherine Bemish**  
**Ann Arbor, MI 48105-1226**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Ilene Beninson**  
**Berkley, MI 48072-1133**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Dorothy Bennoune**  
**Berkley, MI 48072-1165**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Patricia Benson**  
**Plymouth, MI 48170-3153**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Marion Berger**  
**Grosse Pointe Farms, MI 48236-3237**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I am only 15 years old, and even I can recognize the harmful effects these coal-fired powerplants will have on our beautiful state. I believe that Michigan has the power (no pun intended) to become the leading state on clean energy and environmental issues, seeing as how much beauty and water we have to protect. Please, make my future a clean one; do not allow these dirty coal plants to ruin my future.

---

**Diane Bergman**  
**Munith, MI 49259-9763**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Please consider GREEN alternatives. The financial cost may be higher, but saving our Planet for our and most other species is a higher priority.

---

**Robert Bernat**  
**Mount Clemens, MI 48043-2416**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Mark Berry**  
**Troy, MI 48098-5425**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Suzanne Bess**  
**Detroit, MI 48228-3950**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Suzanne Bess**  
**Detroit, MI 48228-3950**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Christina Bhandari**  
**Northville, MI 48168-2364**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Diana Bielak**  
**Sterling Heights, MI 48314-1024**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I totally agree, no dirty coal plants for Michigan! Go Green!

---

**Tom Billings**  
**Northville, MI 48167-1735**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Cynthia Bily**  
**Adrian, MI 49221-2512**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Pat Biroth**  
**Warren, MI 48092-3058**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kristine Bishop**  
**Ann Arbor, MI 48103-9405**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Please! No coal plants!

---

**Carla Bloom**  
**Traverse City, MI 49684-9067**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Joanne Blum**  
**Macomb, MI 48044-6324**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Courtney Boeck**  
**Gaylord, MI 49735-7406**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Mary Boehm**  
**Grandville, MI 49418-2054**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. WE NEED GREEN JOBS AND SUSTAINABLE ENERGY SOURCES, NOT A CONTINUING DEPENDENCE ON COAL. PLEASE USE THIS OPPORTUNITY TO MAKE A BREAK FROM COAL AND SET MICHIGAN ON THE ROAD TO ENERGY INDEPENDENCE. OUR CHILDREN ARE COUNTING ON YOU!

---

**Frank Boggio**  
**Three Rivers, MI 49093-8113**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Janet Bogus**  
**Cedar, MI 49621-0255**

There is no need to erect any new dirty coal-fired power plants, now or in the foreseeable future. This will be an added expense to the people of Michigan, adding more to their already increasing electric costs, in addition to causing pollution to our beautiful clean state. Michigan needs to focus on green technology and green jobs. We do not mind the added expense if it is for green energy which produces jobs for our workers. Please do not let the corporations have their way, by pushing in 2 more dirty coal fired plants. We ask your help in preserving Michigans fresh clean air and jobs for our workers. Thank you,

---

**Mary Bonhage-Freund**  
**Alma, MI 48801-2147**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I urge you to invest in wind power as an alternative, and to work toward making green energy affordable for us all.

---

**Gayla Bonner**  
**Clawson, MI 48017-1642**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Richard Booth**  
**Grosse Ile, MI 48138-1601**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Judy Borisen**  
**Sterling Heights, MI 48310-3337**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Matthew Boruta**  
**Dearborn, MI 48128-2211**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Matthew Boruta**  
**Dearborn, MI 48128-2211**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our

citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan

---

**Shonda Bottke**  
**Ann Arbor, MI 48104-6559**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Cindy Boughner**  
**Southfield, MI 48034-1174**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. This move is a giant step backward in a time when it is vitally important to move forward with renewable energy technology.

---

**Donna Bowen**  
**Midland, MI 48640-8572**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

---

**Clair Branch**  
**Portage, MI 49024-4529**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Carole Brata**  
**Dearborn, MI 48124-3752**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. WE ARE SMART ENOUGH TO FIND BETTER WAY, OTHER THAN GRED BASED, THAT DESTROYS THE LAND & MAKES OUR GRT. LAKES IN THE END LOOK LIKE A TOILET BOWL. WHAT ARE THE COMPANY DOING FOR SUCH HIGHT PAY ANYWAY?? LEAVE SOMETHING FOR THE NEXT GENERATION.... NOT DIRT TO CLEAN UP--.LETS US NOT LEAVE THIS LAND DIRTIER THAN WE FOUND IT.... THIS NEEDED TO BE ADDRESSED EARLIER, & IS PUSHED ASIDE...LETS DO START TO FIX THIS NOW! ARE WE GOING TO NOT LISTEN, LIKE UNEDUCATED 3 WORLD PEOPLE.? UNEDUCATED IS CHANCE FOR CHANAGE..... KNOWING THE WRONG & DOING NOTHING IS STUPID. CB... TURN IT OFF, RE-USE IT, PLANT NEW, PICK UP, USE IT TWICE (WATER FR. WASHING MACHINE FOR ONE) CARE FOR IT, MAKE IT LAST, DISIPLINE SELF FOR LESS...WALK TO, FIND A SECOND USE....DO IT WITH SMILE:)

---

**Diana Brehob**  
**Dearborn, MI 48120-1038**

Let's do the right thing and stop the dependence on coal. It might be painful, but like going on a diet, it is something we will be happy that we did. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Chris Brewczak**  
**Clinton Twp, MI 48035-1895**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Ann Breznai**  
**Lambertville, MI 48144-9646**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Ruth & Stanley Briggs**  
**Trenton, MI 48183-1712**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Ryan Bright**  
**Grand Rapids, MI 49506-1634**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Mary Brooks**  
**Flat Rock, MI 48134-6007**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Judith Brow**  
**Lake Leelanau, MI 49653-9599**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I am a former resident of Bay City and care very much about the future of that region of Michigan. I cannot see how building a coal plant will contribute to its people or its environment's long term welfare. Coal is an energy of the past. Stop supporting the pollution of our atmosphere and the destruction of the lands from which our "cheap" coal must be extracted.

---

**Graham Brown**  
**Dearborn Heights, MI 48125-2809**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Matthew & Mia Brown**  
**Ann Arbor, MI 48105-3409**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Protecting our children's children's world is more important than money and, besides, there is money to be made in alternative energy and this money would feel better because it would lay the groundwork for a cleaner, prosperous and sustainable world. Let's be the trendsetters, Michiganders!

---

**Sylvia Brown**  
**Grass Lake, MI 49240-9315**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Colleen Brown**  
**Rochester Hills, MI 48309-2613**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our

Feighner: There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. The draft permit for the proposed Consumers Energy Coal Plant must be denied and the Alternatives Analysis must be rejected as inadequate. Based on the analysis submitted by Consumers Energy, the information provided does not establish the need for the plant or the lack of alternatives to the plant. First, there is no need for this, or any, new coal-fired power plant in the State of Michigan. The filing makes unsubstantiated claims that the state's energy needs will grow and underestimates the ability of more cost-effective clean energy alternatives to meet energy needs in the future. Consumers own recent projections show a decline in current and future energy demand. Projections for electric demand in the state show there is no need for any new plant and that electric demand in the State of Michigan is in fact level or even decreasing. Second, there are cleaner alternatives. Even when demand starts growing again, increased demand can easily be met with cleaner alternatives. Cleaner alternatives such as clean, renewable energy and energy efficiency can meet the need while creating clean energy jobs for the state.

---

**C Jill Crader**  
**Ann Arbor, MI 48103-4839**

There is no need for new coal-fired power plants in our foreseeable future. The burning of coal raises toxic chemical levels in the Great Lakes, one of Michigan's greatest natural resources, including for energy. The permits for these coal plants are being sought, not to provide energy for Michigan residents. They are being sought as one of the last states allowing new plants to be built, and to sell the power "on the grid". This is not in the best long term interest of Michigan residents. Please stop these permits from being issued.

---

**Connie Crew**  
**Lansing, MI 48912-3918**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

**Dean Cutler**  
**Grand Rapids, MI 49525-1520**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. If you are going to add the coal-fired power plants they at be the clean coal type. And please think about the renewable energy type, even if it cost us 33% more it is a better deal. THANK YOU for the previous power.

---

**Louis Daher**  
**Ann Arbor, MI 48103-4002**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Coal is a technology which is fading it's a waste of long term resources to invest in these power plants.

---

**Anne Dalecke**  
**West Olive, MI 49460-9210**

Currently in Michigan, there is no need for new coal-fired power plants in our foreseeable future. Efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate

immediate and long-term economic health across Michigan. Please start focusing on new energy methods for the future rather than continuing harmful ones. Thank you for your time.

---

**James Dalla Santa**  
**Wyandotte, MI 48192-6322**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. "Why not natural gas instead of coal?" We have an abundant supply of natural gas and it's much cleaner. Solar, wind, and nuclear could supplement the energy needed to power the utility companies. Natural gas prices are quite low right now and can compete with coal financially. The Cap and Trade laws on carbon emissions will further even out the price disparity. Natural gas is cheaper to transport via pipe lines. Coal is transported by rail which is more costly. Natural gas facilities are cheaper to construct and operate than coal plants. Natural gas plants would be more efficient and produce 50% less carbon destroying our ozone layer, contributing to global warming, and causing people to suffer from melanoma, Like me! For more information read Monday, June 15 article in the Wall Street Journal, page A4, "Price Drop Helps Gas Gain on Coal as Power Source." Also, Natural Gas is something we produce hear in Michigan, we do not produce much if any coal. Keep Michigan Money in Michigan!

---

**Joanne Dalla Santa**  
**Bitely, MI 49309-9699**

Consumers Energy, There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Why not utilize our abundant supply of natural gas to supply our energy needs? Why not wind and solar? Even nuclear is cleaner than coal! Save our planet! Thank you,

---

**Joanne Dalla Santa**  
**Bitely, MI 49309-9699**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Coal is dirty and emits lots of carbon. Why not natural gas instead of coal? We have an abundant supply of natural gas and it's much cleaner. Natural gas prices are quite low right now and can compete with coal financially. The Cap and Trade laws on carbon emissions will further even out the price disparity. Natural gas is cheaper to transport via pipe lines. Coal is transported by rail which is more costly. Natural gas facilities are cheaper to construct and operate than coal plants. Natural gas plants would be more efficient and produce 50% less carbon destroying our ozone layer, contributing to global warming, and causing people to suffer from melanoma. My son now has it! For more information read Monday, June 15 article in the Wall Street Journal, page A4, "Price Drop Helps Gas Gain on Coal as Power Source."

---

**Gordon DeClercq**  
**Lake Orion, MI 48360-1732**

In 2008, the Michigan legislature passed a package of energy bills that started Michigan down a path of cleaner, more sustainable energy sources. This year, the Sierra Club is playing a lead role in the ReEnergize Michigan Campaign, that advocates progressive clean energy policies to create jobs and strengthen our economy. The solution is renewable energy. It is infinite, free, and despite the avalanche of misinformation that's constantly spewed from naysayers and mainstream media It can actually generate enough power to satisfy all of our energy needs.

---

**Mark-Juli Dejonghe**  
**Clinton, MI 49236-9528**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Elizabeth Dover**  
**Detroit, MI 48219-4019**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I have put my money where my mouth is by choosing to pay extra on my energy bill to support the creation of wind and solar energy production facilities in Michigan. It is a matter of health and a matter survival. It is time we lead by example and use our ingenuity to demonstrate to the world that a clean energy future is not only feasible, it will make all our lives better and more productive by improving our health

and reducing health care costs. Let's finally get rid of the filthy coal and put the worst side-effects of the industrial age behind us.

---

**Sheila Downing**  
**Lambertville, MI 48144-9619**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Daniel Drake**  
**Troy, MI 48085-5024**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**William Drescher**  
**Lansing, MI 48933-1185**

It seems ludicrous that at the dawn of the 21st century we are still planning 19th century "solutions" to energy needs. A fresh approach using renewable energy sources would create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Frank Driscoll**  
**Waterford, MI 48329-2990**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Karen Drum**  
**Roseville, MI 48066-2755**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Thank you for your time.

---

**Willie Dubas**  
**South Haven, MI 49090-9197**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Mary Duenow**  
**Lake Orion, MI 48362-2974**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**david Duenow**  
**Lake Orion, MI 48362-2974**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jeff Duflo**  
**Rockford, MI 49341-8613**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. We are in a race, a race against time, and to other countries that are already establishing cleaner energy sources. If we continue with the same old technology of yesteryears, we will literally

choke ourselves of polluted air and diluted vision. The future is here, we change or lose all the golden opportunities that await us. The President is right to say the time is now, we are at a defining moment in history. This is our generation's revolution, from the American Revolution to the Industrial Revolution, comes the Green Revolution. Say yes to a clean environment and the creation of thousands of jobs!

---

**Kate Durda**  
**Charlotte, MI 48813-8636**

The ONLY HOPE for us and the economy is GREEN! NO MORE COAL PLANTS.....!!! There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Emily Duthinh**  
**Clarkston, MI 48346-1990**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**H L Dyer**  
**Troy, MI 48083-1869**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

---

**Cassidy Edwards**  
**Glen Arbor, MI 49636**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan

---

**Lois Ege**  
**Pentwater, MI 49449-8401**

With the numbers of people leaving Michigan because of unemployment, there is no need for new coal-fired power plants in our foreseeable future. Efficiency measures can meet our energy demands for decades, and save our citizens' precious energy dollars in these very difficult times

---

**Kim Eggers**  
**Grand Haven, MI 49417-8636**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jen Eldred**  
**Belleville, MI 48111-2981**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kimberly Elsifor**  
**Ann Arbor, MI 48108-3079**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. It is time to stop strip mining the earth and look to solar energy. If that's not enough how about all scientists do something seriously profound, build a giant bike and start pedal-powering.

Rediculous you say? Maybe, but when you dig everything out of the earth and replace with sludge or ugly holes I think that's also rediculous.

---

**Andrea Elwood**  
**Commerce Twp, MI 48382-1469**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

**Lori Franson**  
**Midland, MI 48640-5703**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. It is unconscionable that a well documented unneeded coal plant that will adversely affect our Great Lake state and our residents economically, environmentally and public health is even being considered. The EPA is raising efficiency standards for practically all lighting, appliances, A/C, heating, industrial motors, vending machines and other. Three hundred million dollars of Federal funds will be spent on energy efficiency and weatherization in Michigan over the next three years. Weatherization will reduce peak air conditioning and winter heating electric demand. Furthermore, proposed Federal energy legislation calls for even more efficient appliances, buildings, commercial and industrial improvements, investment in a smart grid, improved transmission infrastructure and efficiency research. The MCAC and the MGA recommend a 2% annual energy efficiency improvement as a policy goal and report many EE actions to be taken by State government. The MPSC, DEQ and Michigan utilities were well represented in both groups. The EPRI report, referenced by Consumers, was written before the current wave of EE actions and assumes only EE mandates in place in 2008. The EPRI report states; "There are several factors that could have a significant impact on the potential for

energy efficiency savings. These factors include higher electricity prices, regulatory incentives to encourage greater investment in energy efficiency, carbon policy, the future level of codes and standards, and accelerated R&D and commercialization of advanced efficient technologies which have already begun to be implemented. EPRI's estimate for annual electric savings is 8% not 0.5%. EPRI's estimate for summer peak demand reduction is 14% to 20%. According to EPRI, "EPRI estimates that the combination of demand response and energy efficiency programs has the potential to reduce non-coincident summer peak demand by 157 GW to 218 GW. This represents a range of achievable potential reduction in summer peak demand in 2030 of 14% to 20%."

<http://mydocs.epri.com/docs/public/000000000001018363.pdf> Consumer's analysis is woefully inadequate as evidenced by A National Assessment of Demand Response Potential, which indicates Michigan has a demand response potential of 14.4% by 2019. This would equate to approximately 1,400 MW for Consumers or about 1,000 MW higher than they forecast in Fig 2. <http://www.ferc.gov/legal/staff-reports/06-09-demand-response.pdf> Electric generation in Michigan dropped a substantial 15% in the first quarter of 2009 vs. 2008.

[http://www.eia.doe.gov/cneaf/electricity/epm/table1\\_6\\_b.html](http://www.eia.doe.gov/cneaf/electricity/epm/table1_6_b.html) (March decline was 21% ) . The Census of Michigan has declined along with Gross Domestic Product. This negates the need for the proposed coal plant further. Additionally, EIA's has lowered their Low Macroeconomic Growth Case forecast for the "East North Central" (MI, WI, IL, IN and OH) to a growth rate of .3% from 2007 thru 2030 which has not been considered in Consumers evaluation.

[http://www.eia.doe.gov/oiaf/aeo/supplement/lm/excel/sup\\_elec.xls](http://www.eia.doe.gov/oiaf/aeo/supplement/lm/excel/sup_elec.xls) You have a duty to reject Consumers analysis of need, as it is not supported via existing factual evidence.

**Gregory Fuller**  
**Bloomfield, MI 48302-2252**

The amount of carbon dioxide in the air has already risen to a dangerous level. The pre-industrial carbon dioxide amount was 280 parts per million (ppm). Humans, by burning coal, oil and gas, have increased this to 385 ppm; it continues to grow by about 2 ppm per year. Earth, with its four-kilometre-deep oceans, responds only slowly to changes of carbon dioxide. So the climate will continue to change, even if we make maximum effort to slow the growth of carbon dioxide. Arctic sea ice will melt away in the summer season within the next few decades. Mountain glaciers, providing

fresh water for rivers that supply hundreds of millions of people, will disappear - practically all of the glaciers could be gone within 50 years - if carbon dioxide continues to increase at current rates. Coral reefs, harbouring a quarter of ocean species, are threatened. The greatest danger hanging over our children and grandchildren is initiation of changes that will be irreversible on any time scale that humans can imagine. If coastal ice shelves buttressing the west Antarctic ice sheet continue to disintegrate, the sheet could discharge into the ocean, raising sea levels by several metres in a century. Such rates of sea level change have occurred many times in Earth's history in response to global warming rates no higher than those of the past 30 years. Almost half of the world's great cities are located on coastlines. The most threatening change, from my perspective, is extermination of species. Several times in Earth's history, rapid global warming occurred, apparently spurred by amplifying feedbacks. In each case, more than half of plant and animal species became extinct. New species came into being over tens and hundreds of thousands of years. But these are time scales and generations that we cannot imagine. If we drive our fellow species to extinction, we will leave a far more desolate planet for our descendants than the world we inherited from our elders. Clearly, if we burn all fossil fuels, we will destroy the planet we know. Carbon dioxide would increase to 500 ppm or more. We would set the planet on a course to the ice-free state, with sea level 75 metres higher. Climatic disasters would occur continually. The tragedy of the situation, if we do not wake up in time, is that the changes that must be made to stabilise the atmosphere and climate make sense for other reasons. They would produce a healthier atmosphere, improved agricultural productivity, clean water and an ocean providing fish that are safe to eat. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Please don't build these dirty plants - we can do better

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I believe we have a responsibility to future generations to have as small a global warming footprint as possible on this world. We should not even be considering more coal-fired power plants in Michigan.

---

**Joellen Gilchrist**  
**Beverly Hills, MI 48025-2946**

Michigan and its declining use of energy does not need another coal-fired plant. Why would we consider building one, in light of the severity of our CO2 emission rate of 387 parts per million, which if not reduced, will end life

as we know it? the great majority of biologist agree if we continue our way of unsustainable living, 50% of species will be extinct by the end of this century. That's a prediction which renders all our other problems moot. No new coal plants in Michigan. Let's start shutting down existing ones instead. P.S. Do not publish my street address on any paper which might be published online.

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Ladislav Hanka**  
**Kalamazoo, MI 49008-1202**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Dorothy Hannum**  
**Troy, MI 48085-3784**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Art Hanson**  
**Lansing, MI 48917-1773**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Art Hanson**  
**Lansing, MI 48917-1773**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Charles Hanson**  
**Grosse Pointe Farms, MI 48236-3229**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Erik Hanson**  
**Lansing, MI 48917-1773**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Natalie Hanson**  
**Lansing, MI 48917-1773**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Natalie Hanson**  
**Lansing, MI 48917-1773**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Maryhelen Harper**  
**East Lansing, MI 48823-2725**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Thomas Harrington**  
**Northville, MI 48167-9769**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Sheila Harris**  
**Dearborn Heights, MI 48127-2850**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Lynn Hartung**  
**Waterford, MI 48328-4303**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. There is no such thing as clean coal ... our land, our lakes and our air already polluted with too much mercury from dirt power plants!

---

**Kristen Harvey**  
**Spring Lake, MI 49456-8906**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Please stop ruining our resources and jeopardizing our health. We don't need nor do we want a coal-fired power plant. Do the mirror test, is this really something you could live with?

---

**Roxanne Haslem**  
**Grand Rapids, MI 49504-5464**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Karma Hassell**  
**Kalamazoo, MI 49048-9221**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

**Jeannine Hayden**  
**Ann Arbor, MI 48105-2835**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**James Hayes**  
**Millersburg, MI 49759-9388**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jim Head**  
**Oak Park, MI 48237-1237**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jim Head**  
**Oak Park, MI 48237-1237**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Diane Hebert**  
**Midland, MI 48640-4284**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Elizabeth Hebron**  
**Westland, MI 48186-4323**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**James Heckman**  
**Union City, MI 49094-1113**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Lee Hegstrand**  
**Grand Rapids, MI 49506-3566**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jinny Heick**  
**Boyne City, MI 49712-9742**

We do NOT want any more coal plants.

---

**Mohammad Heidari**  
**Holt, MI 48842-9428**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**clarissa heil**  
**Midland, MI 48640-3327**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Enough coal! Invest in wind and solar.

---

**Gabriel Heiss**  
**Ypsilanti, MI 48197-2859**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Roxanne Helder**  
**Holland, MI 49423-7109**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. As we come to realize what the alternative will be, all of us hopefully will be ready to make the sacrifices necessary to bring a healthier and safer world into reality for the United States. Our economy and lifestyle were built on an unreality and if we need to lose coal in order to survive, then that will be acceptable to a majority of us.

---

**Sarah Helms**  
**Saint Joseph, MI 49085-9729**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Robert Henderson**  
**Mason, MI 48854-9352**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jill & Jim Henke**  
**Holland, MI 49424-1384**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. In addition to the need issue of new energy, we do not need the additional public health problems that arise with coal fired plants to our air, water, and ground. We implore you to deny the permitting of this coal plant.

---

**Tracey Hennigar**  
**Midland, MI 48640-3117**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Sandy Jimenez**  
**Jackson, MI 49203-4209**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I have asthma and my 1 yr. old granddaughter has had serious asthma since she was born. No, asthma is not hereditary. There are many triggers, such as second-hand smoke, but we

do not need more. The air quality in Michigan is important to everyone. If the decision is made to allow new coal-fired plants the air quality in Michigan the future of all our grandchildren will be affected. The cumulative effects of toxins in the environment will not be reversed, if we do not act responsibly, now. There is not now, and never was any such thing, such as "clean coal" When I was a child, black smoke curled out of every chimney in town. My parents did not know the toxic effects of coal-burning furnaces. The ash was visible, but the invisible toxins were probably what contributed to illnesses such as "croup". When we all stopped burning coal in those furnaces in homes and industry, the "croup" ceased being a topic of mothers with sick children. My comments may not sound very scientific to you, but even scientists need to breathe and can have common sense.

---

**Bob Johns**  
**Saint Johns, MI 48879-8408**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Burke Johnson**  
**Ann Arbor, MI 48105-9396**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Christina Johnson**  
**Detroit, MI 48205-2676**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Philip Johnson**  
**Rochester, MI 48306-1114**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Mary Johnson-Hamburger**  
**Birmingham, MI 48009-4813**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Andrew Jones**  
**Gladstone, MI 49837-8812**

My own birthplace, Escanaba, still has a coal-fired plant, but is looking for a way to replace it with something cleaner. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Eleanor Jones**  
**Plymouth, MI 48170-2519**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Please use energy that does not pollute our environment. There are other choices besides coal. Eleanor Jones

---

**Joan Jones**  
**Milan, MI 48160-9729**

We already have pollution in the air we breathe from coal, and fumes from gasoline in our air, and we have oil in our water from oil spills, It is time to move forward away from polluting energy plants and their byproducts, and toward every green energy as quickly as possible. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can

meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Virginia Jones**  
**Kalamazoo, MI 49004-6645**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Beth Jorgensen**  
**Sanford, MI 48657-9311**

Clean coal technology does not exist. Even if carbon sequestration is successful, which is doubtful, removal of mountaintops to harvest coal despoils ecosystems and fouls waters far downstream. Moreover, transportation of coal from the harvest site to the burn site requires vast amounts of fuel, increasing carbon emissions. Research at Michigan State University has shown that many areas of Michigan are prime spots for wind energy, which can meet Michigan's demand for power far into the future and create local jobs. Thank you.

---

**Julian Joseph**  
**Grand Rapids, MI 49506-4815**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Carol Judkins**  
**Boyer City, MI 49712-8903**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Michigan has so many unique problems,

with the car industry in crisis and we are custodians of the Great Lakes, too. It would really be a good thing if we can keep our air and land as clean as possible. Please look into anything but coal-fired plants in our state for our energy needs.

---

**Kyla Juett**  
**West Bloomfield, MI 48324-3515**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times (especially in Michigan), and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Larry Junck**  
**Ann Arbor, MI 48103-2363**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. BURNING COAL TO MAKE ELECTRICITY IS 20th CENTURY TECHNOLOGY, BAD FOR OUR ENVIRONMENT AND BAD FOR OUR ECONOMY.

---

**Deborah Juriga**  
**Belleville, MI 48111-2761**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. We are at a crossroads in determining the future for our children and grandchildren. Decisions about clean energy have never, ever been more important than they are now. Please be those persons who future generations will look back on and thank for your foresight. Thank you.

---

**Shirley Kallio**  
**Rockford, MI 49341-9027**

An investment at this time in a coal-fired power plant is unconscionable, worse than a waste of money! Now is an unprecedented opportunity, a time

of declining demand and rapidly emerging technologies in use of renewables, to clean up our energy sector and prepare for future economic growth and responsible earth stewardship. Please, do not allow Consumers Energy to move forward with this plant. A commitment to alternatives will serve, long-term, both the community and the state far better than the "bird-in-the-hand" coal plant proposal.

---

**Lisa Kamil**  
**Bloomfield Hills, MI 48301-2833**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. NO MORE COAL. WE NEED MORE CLEAN ENERGY AND MORE NEW JOBS FROM CLEAN ENERGY IN THIS STATE. IT IS TIME FOR NEW THINKING AND NOT MORE OF THE SAME OLD SAME OLD. NO MORE FILTHY COAL.....

---

**Margaret Kaminski**  
**Saint Clair Shores, MI 48080-1411**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Henry Kanui**  
**East Lansing, MI 48823-4622**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Stephen Kaplan**  
**Ann Arbor, MI 48104-3922**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. We are fortunate indeed to have such exciting alternatives to business as usual.

---

**Stan Kaplowitz**  
**East Lansing, MI 48823-3278**

There is no need for new coal-fired power plants in our foreseeable future. Instead efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times. In addition renewable energy can create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Randy Karcher**  
**Mason, MI 48854-9739**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Joseph Kelsey**  
**Muskegon, MI 49442-4048**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Johnie Kemp**  
**Hillman, MI 49746-8473**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Sara Kennedy**  
**Ann Arbor, MI 48105-1406**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Sara Kennedy**  
**Ann Arbor, MI 48105-1406**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jennifer Kennedy**  
**Ypsilanti, MI 48198-6219**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Daniel Kerby**  
**Thompsonville, MI 49683-9107**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Renee Kermeen**  
**Middleville, MI 49333-8966**

There is no need for new coal-fired power plants!! We need to create new green jobs to stimulate immediate and long-term economic health across Michigan!! We need to take care of Michigan!!

---

**Jessica Kettler**  
**Rochester Hills, MI 48307-4639**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Coal produces more greenhouse gas in the US than all the automobile traffic! And it is still a fossil fuel, a resource that will eventually run out. We need to concentrate our efforts on renewable energy, because THOSE are the jobs and the energy of the future. Putting people to work in green technology factors is better for the economic state of Michigan, the health of the workers themselves, and the health and well-being of the entire country. It's a win-win-win situation to pursue renewable and green technology as opposed to a dirty, dangerous pollution source. Please keep our state green and clean.

---

**Joan Khaled**  
**Kalamazoo, MI 49006-2823**

Please keep the water and air and ground of Michigan clean. Coal ruins landscapes, water, air and communities. There are many other clean energy sources we can explore, like wind.

---

**Catharine & Nabih Houry**  
**Detroit, MI 48203-4595**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. It makes so much more sense to begin the change that is indicated to conserve coal and invest in renewable energy. If an energy crisis occurs renewable energy will be much more helpful than more coal plants.

---

**Catharine & Nabih Houry**  
**Detroit, MI 48203-4595**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kathy Kibbie**  
**Pinckney, MI 48169-9313**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Joseph Kiefer**  
**Commerce Twp, MI 48382-1132**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**G Kendall Kiel**  
**Rockford, MI 49341-9236**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Richard Kiligian**  
**Lapeer, MI 48446-8717**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Since it was proven that we don't need more coal-fired plants in Michigan why are you considering creating them? Is it because lobbyists for coal producers are concerned about less need for coal? Two more coal burners will become millstones around your and my neck; please consider sun and wind power.

---

**Gabrielle King**  
**New Baltimore, MI 48047-1051**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Shawn Kinkema**  
**Essexville, MI 48732-9422**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Sincerely, Shawn Kinkema 799 Knodt Rd. Essexville, MI 48732

---

**Mark Kinney**  
**Presque Isle, MI 49777-0087**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our

citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. In addition, allowing the building of this plant will saddle the rate payers with exorbitant costs when they are required to shut down prior to their life cycle life span because at that time we realize it is not possible to continue on with producing power this way either because of environmental concerns or because new technology produces power much less expensively. This is not the time to build!!!

---

**Christina Kionka**  
**Iron Mountain, MI 49801-4029**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kristin Klass**  
**Bridgman, MI 49106-0549**

---

**Marian Laughlin**  
**Ann Arbor, MI 48103-9428**

Finally, each coal-fired plant emits some level of mercury as well as other pollutants. Any increase in mercury emissions will only contribute further to the toxic amounts of mercury in our lake fish, keeping them inedible for future generations. Carbon dioxide also contributes to the greenhouse effect, resulting in higher temperatures in Michigan and across the globe. While current proposals in the US congress may not be stringent enough to cost power companies money, eventually the public will realize the true cost of cheap coal power: a polluted environment, global warming, and higher levels of asthma.

---

**Timothy Lauxmann**  
**Leslie, MI 49251-2556**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Stephen Lavender**  
**Ann Arbor, MI 48104-6338**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. For the long term viability of our families and our planet, it is vitally important that we step back and reexamine our energy generation policy. We can no longer default to the "...let's put up another coal fired energy generation plant" process whenever our utilities

claim the need for more production capability. Both the short and long term detrimental effects of these plants far outweigh any benefit they might provide. I urge you to deny the draft permit for the proposed Consumers Energy Coal Plant and reject the Alternatives Analysis and wholly inadequate.

I encourage you to look for innovative solutions to Michigan's energy needs. Thank you for your consideration  
Patrica Litwiller

---

**James Livingston**  
**Skandia, MI 49885-9601**

Do we really want to pass the costs of producing energy now on to our descendants? That merely guarantees that their options will be limited, and that they will have to make do in a more polluted climate than the one we grew up in. I suppose that's a good strategy, if we really want our children to curse us, with just cause. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**James Lommel**  
**Dexter, MI 48130-9596**

While there is a desperate need for more generating capacity in this country, it is beyond stupidity to even consider building more coal fired power plants. Even if we weren't facing an already disastrous changing of the climate, coal fired plants kill thousands, if not tens of thousands, of people every year due to the realease in the atmosphere of tons and tons of carcinogens and other deadly toxins. We need an all out program to get safe, clean nuclear power plants on-line and on-line rapidly. And I don't mean the grossly unsafe, expensive designs that are currently the only designs currently approved by the NRC. We certainly don't need another TMI occurrence. There are many nuclear power plant designs that are inherently safe and substantially less costly to build and we need to get one or more of these designs through the approval process as rapidly as possible. Therefore, the licensing process must be drastically improved so that it only takes a few months or years to complete and not the decades that the process currently takes. Further, how can we possibly take the moral high ground and urge China and other countries to stop building coal fired plants if we ourselves are guilty of the same thing?

---

**Allene Long**  
**Big Rapids, MI 49307-8946**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Marti MacArthur**  
**Hopkins, MI 49328-9602**

If we truly want energy independence from the countries of the Middle East and if we would like to have leverage as to how much energy will cost, then continuing to burn coal and do what has always been done will not get us there.. It is very hard to understand why Michigan, which is losing population daily, needs more old fashioned, filthy, carbon producing coal plants. It leads one to think that profit over the welfare of the citizens is the motive behind this decision. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult

times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Gordon Macdonald**  
**Detroit, MI 48223**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Nathan Martin**  
**Ann Arbor, MI 48103-5566**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Ronald and Joyce Mason**  
**Farmington Hills, MI 48334-1280**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**L Michael Mastela**  
**Livonia, MI 48154-3143**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jim Matherly**  
**Bay City, MI 48708-6350**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Please do not allow the industrial complex of coal mines, railroads, and the energy producers take advantage of Michigan's need for jobs to lock the State into another 50 years of dependence on ancient, polluting and unhealthy technology by building these power plants that will vastly exceed the needs of Michigan. Instead let us work to create a new energy industry that is environmentally friendly, grows the fledgling industry already developing, provides more jobs than coal-fired plants and leaves all of us a healthier world.

---

**Christine Mathews**  
**Fenton, MI 48430-9047**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. It is time to move into the future. We have the knowledge and technology to make this an amazing world but we can't seem to do this, mostly from very childish thought processes. And it becomes more apparent everyday that our greed and lust for power are destroying us. Everyday I look around and see the breath-taking beauty all around us and also appreciate that it doesn't need us to survive and has the ability to eliminate us, no matter how much money we have.

**Carol Mcgeehan**  
**Holland, MI 49423-7218**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Carol McGeehan**  
**Holland, MI 49423-7218**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kitty McIlroy**  
**Grass Lake, MI 49240-9234**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kitty McIlroy**  
**Grass Lake, MI 49240-9234**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Sharon McIntosh**  
**Westland, MI 48185-1768**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**James McIntosh**  
**Ann Arbor, MI 48105-3046**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kevin McKaig**  
**Reed City, MI 49677**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Ronald Mckee**  
**Grand Rapids, MI 49504-4770**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. There is not such a thing a "clean coal" in spite of the coal industries' efforts to convince the American public and politic that it exists. NO TO COAL IN THE GREAT LAKES STATES!

---

**Michell McKee**  
**Detroit, MI 48205**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Diane Mckeel**

**Holland, MI 49423-5176**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Shannon Mckenzie  
Harper Woods, MI 48225-1757**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Sue McMahon  
Whitmore Lake, MI 48189-8269**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Vincent Mcnicholl  
Presque Isle, MI 49777-8708**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jessica McQuarter  
Linwood, MI 48634-9200**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Thank you.

---

**S Mcqueen**  
**Clarkston, MI 48346-3670**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. It is time that Michigan become an example of what economic growth can be accomplished by using alternative fuels. You can help!

---

**Roger Meade**  
**Ishpeming, MI 49849-1636**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. If you have been anywhere near Bay City or Saginaw Bay you have seen the plume of dirty, sulfur laden smoke that stretches across the sky for miles and miles every day. We need to eliminate this, not create a new plume! We need to be investing in conservation efforts and incentives for user point renewable energy infrastructure. Let's not waste any more money on obsolete technology. There is no such thing as "clean coal". It is time for Michigan's elected and appointed leaders to come in to the 21st century on energy policy.

---

**Owen Medd**  
**Ann Arbor, MI 48103-4005**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. With the current economic climate in Michigan, creating new jobs must be the focus of our resources, not wasting resources on unneeded projects that do nothing for the greater good.

---

**Carolyn Medland**  
**Lapeer, MI 48446-3002**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Patricia Meinert**  
**Marshall, MI 49068-1263**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. WE NEED CLEAN ENERGY AND NOT POLLUTION!!!!!! RIGHT NOW

---

**Ken Meinhardt**  
**Fort Gratiot, MI 48059-4097**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Ken Meinhardt**  
**Fort Gratiot, MI 48059-4097**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Sharon Mello**  
**Shelby Township, MI 48316-1800**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Marion Melody**  
**Riverview, MI 48193-7735**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Mark Messing**  
**Traverse City, MI 49684-2409**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Mark Messing**  
**Traverse City, MI 49684-2409**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Chuck Metcalfe**  
**Belleville, MI 48111-2981**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Reuben Metreger**  
**Pinckney, MI 48169-9212**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Elizabeth Meyers**  
**Detroit, MI 48214-2960**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. The spewing of pollution needs to end!

---

**Suzanne Michael**  
**Clio, MI 48420-8231**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jerry Micham**  
**West Bloomfield, MI 48324-3229**

This is very short term thinking. There is no need for new coal-fired power plants. .

---

**Monica Middleditch**  
**Gaylord, MI 49735-8996**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Norman Mika**  
**Crystal Falls, MI 49920-8948**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. In my opinion, Michigan can capitalize on its above-average environmental status over surrounding states, if, and only if, we have the courage to maintain that advantage. Thank you.

---

**Glen Miller**  
**Howell, MI 48843-9652**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Heather Miller**  
**Alden, MI 49612-9780**

I don't want my grandchildren growing up to have health problems related to unclear air. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kathleen Miller**  
**Rochester Hills, MI 48306-1475**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Please think of Michigan's environmental health, as well. There is no "clean coal" burning. Please consider GREEN alternatives...

---

**Linda Miller**  
**Grand Jct, MI 49056-0064**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Michigan could lead the US in solar and

wind energy, not only power for electricity but produce automobiles that do not use oil. PERIOD.

---

**Diana Miller**  
**Eastpointe, MI 48021-2604**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Michele Millhouse**  
**Midland, MI 48640-6707**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Deborah Mills**  
**Harper Woods, MI 48225-2123**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Theresa Milne**  
**Monroe, MI 48162-7909**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Robert Missirlian**  
**Royal Oak, MI 48073-2493**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. We the Missirlian Family, say enough is enough, of making our air and streams foul. Please stop and think of the future generations that are to follow and what you are doing of their inheritance. I hope that is not over your head to contemplate. We were ordained as stewards of this land---- please be it.

---

**Howard Mitchell**  
**Sanford, MI 48657-9100**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Tracey Mitchell**  
**Farmington Hills, MI 48334-3503**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Chrysteen Moelter-Gray**  
**Grand Haven, MI 49417-1354**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Linda Mohler**  
**Farmington, MI 48336-4462**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kristina Monroe**  
**Gaylord, MI 49735-7406**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Candida Montalvo**  
**ADA, MI 49301-9191**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Polly Moore**  
**Concord, MI 49237-9706**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Nicole Moore**  
**Detroit, MI 48235-3430**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Elliot Morrison**  
**Traverse City, MI 49686-8329**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**A Moser**  
**Holland, MI 49422-8524**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Elizabeth Mostrom**  
**Grand Rapids, MI 49506-2434**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**James Motiff**  
**Fennville, MI 49408-9751**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Get with alternative energy! Support alternative energy development, create new jobs in this sector, get ready for future needs now.

---

**Nicholas Mouzourakis**  
**Dearborn, MI 48124-2506**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

**William M. O'Donnell**  
**Roscommon, MI 48653-9601**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. And there is no excuse for not putting all this money into clean, renewable energy. We DO NOT need more power plants at this time or in the near-term projected future, ANYWAY.

---

**Michael & Denise Ogden**  
**Berkley, MI 48072-1668**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Chad OKulich**  
**Troy, MI 48084-1543**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Protect us!!!

---

**Chad OKulich**  
**Troy, MI 48084-1543**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kat Oliver**  
**Riverview, MI 48193-8055**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Joyce Olmsted**  
**Allendale, MI 49401-8900**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Joyce Olmsted**  
**Allendale, MI 49401-8900**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**John L Olson**  
**Dearborn, MI 48121-0242**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. To tie Michigan energy users ever closer to the future, inflated, price of coal when sunlight and windpower are free is unbridled idiocy. Moreover, the quality of our air is deteriorating so rapidly that expensive new coal powered plants will require costly modifications, perhaps even before they produced a single kilowatt of power.

---

**Daniel Ontiveros**

**Saginaw, MI 48601-5745**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Curtis Paul**  
**Taylor, MI 48180-3124**

I don't want any more coal plants in Michigan....period! You can't talk me out of this position. INVEST IN ALTERNATIVE ENERGY ONLY!!! If you can't do it the new way, then YOUR NOT GOING TO DO IT! If you build the coal plant, we will take over the government and shut your asses down! On more then one level this is a VERY BAD INVESTMENT! Not only are you threatening the Michigan natural environment, you are also contributing to mountain top removal. I'm serious, we will come after you guys if you build coal plants. Now, if you build wind turbines, solar arrays, or hydro power, we and my fellow Michiganders will support you, and even lobby for serious tax breaks to allow you to do it. ....and no, you can't update your existing coal plants either...we want to see you guys find a way to shut them down as well. Come on, your a Michigan company, you can do better then this!!!! Apparently Consumers is just full of lazy people who are uncreative.....wouldn't the people of Michigan and the country want to know about how you guys are contradicting your "Green" projects?

---

**Michael Paul**  
**Traverse City, MI 49686-9427**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Amy Pauquette**  
**Bay City, MI 48706-5189**

No more coal! Coal is yesterday's technology. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan

---

**Leo Paveglio**  
**Lapeer, MI 48446-4303**

It is inexcusable that we even consider a coal-fired plant when there are "green" alternatives that are cost effective. The true costs of a coal-fired plant are far greater than those that currently show in the accountants sheets. It is reasonable to assume that there will soon be legislation that will impose some sort of tax or cost on carbon emissions. The Consumers Energy Coal Plant will be saddled with exorbitant costs for the life of the plant. The permit must be denied since there are numerous alternatives, including conservation to meet the future needs. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**David Pavelka**  
**Livonia, MI 48152-3522**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I really can't believe you're even considering this. What we use for energy will change as the decades go by. Let's make sure the largest supply of fresh water in the world remains in our Great Lakes. Don't let the ruination of the Great Lakes become your legacy.

---

**David Pavelka**  
**Livonia, MI 48152-3522**

**Donald Proud**  
**Ann Arbor, MI 48108-8619**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Donald Proud**  
**Ann Arbor, MI 48108-8619**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. The day that we, as a nation, turn our focus away from King Coal and its horrible, devastating effects, toward the bright future of "green" energy production, has been a long time coming. And it has finally arrived. Well over half of the population is in agreement with this sentiment, and this majority is growing steadily. There has never been a better time than now to put a halt to the production of any more coal plants. Please take advantage of this opportunity that is now before you.

---

**Huguette Rairigh**  
**Farmington Hills, MI 48334-1249**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Phil Rairigh**  
**Adrian, MI 49221**

When did large corporations who put their wealth in the hands of the few, trump the concerns of the many citizens? I find it disturbing that the "economy" always seems infinitely more important than future generations. Start thinking like long-term investors for a change, instead of only pursuing that which will expedite the political agendas of power brokers. Whichever direction the energy demand flows, the fact is that we draw more energy than we should be. Stop finding clever ways to destroy the planet, and start using our combined intellect to reduce and eliminate our energy needs.

---

**Steve Rall**  
**Lansing, MI 48915-1271**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Dennis Raz**  
**Manistee, MI 49660-1416**

Hard to change old ways of thinking I know, for I am 76. Yet I know that if we continue to build polluting plants (there is no such thing as clean coal) our children are in danger and our grandchildren are doomed. We have to start alternative energy in a big way, but by the same token we must stop the activities that brought us to these disasterous times.

---

**Bridget Reaume**  
**Troy, MI 48085-4763**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**James Reaume**  
**Ewen, MI 49925-9061**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term

economic health across Michigan. Why in the world are we not spending a smaller amount of money to improve the vastly substandard insulation in most older Michigan homes instead of rushing to build more coal plants to heat the outdoors?

---

**James Reaume**  
**Ewen, MI 49925-9061**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Gale Reber**  
**Royal Oak, MI 48073-3225**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. We, the people of Michigan, do not need any energy source that polutes our air and water. PLEASE DO NOT ALLOW ANY COAL-FIRED POWER PLANTS IN MICHIGAN. Thanks for thinking for yourselves and protecting Michigan,

---

**John Rebers**  
**Marquette, MI 49855-3724**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Steven Richardson**  
**Ann Arbor, MI 48103-9626**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. This is finally me adding my own voice to the canned message provided for me. What we have to deal with is the fact that the people advising & informing Pres. Carter back in the 1970s, after the "Energy Crisis", were correct: there is a limited supply of oil (and other fossil fuels) on the Earth. Just a few years ago, different oil industry analysts on a PBS show agreed that the peak of world oil production would be around 2010 - 2020, and it was just reported that the peak coal production of one US state would be around 2020.... After that, we can expect prices to continue to rise in a way which will make all energy derived from these sources be unfeasible for all but the richest of us, and that is no way to make a public energy policy. Right now, you have a golden opportunity to help align Michigan with SOME of the things we ought to; we've chosen to align ourselves with the auto industry far too much, and we are hurting now because of that, but renewable, sustainable, "green" energy will always be needed, and using & aligning ourselves with THAT makes a lot of sense. It is

not often that these chances come along; please take it, for our sakes, for our children's and grandchildren's sakes, and for the sake of Michigan's chance of surviving the current economic catastrophe. Thank you for your consideration of these ideas.

---

**Barbara Rider**

**Novi, MI 48377-1449**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Barbara Schlaud**  
**Battle Creek, MI 49015-7355**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. We have been contributing additional funds to Consumers Energy. We DO NOT want those funds going to coal-fired plants. Furthermore, we do not believe the myth of clean coal.

---

**Veronica Schlosser**  
**Saginaw, MI 48603-4001**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Let's remember that coal from start to finish is not a clean fuel. It damages precious environments from the moment they begin mining it, while it is burning in the power plant and then with its waste. Let's minimize coal's negative impact on Michigan's environment by saying no to all new coal facilities. We have other alternatives, let's use them.

---

**Jackie Schmitz**  
**Middleville, MI 49333-9713**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

Therefore, please reconsider your plans.

---

**Stephanie Schneiderman**  
**Ann Arbor, MI 48103-2640**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Marc Schoenberg**  
**Farmington Hills, MI 48336-6001**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Caryn Schulman**  
**West Bloomfield, MI 48323-2929**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. We do not need to have our air quality tampered with and the quality of our Great Lakes compromised. It is unfortunate that the Utility Companies are taking advantage of the People during this Depression and making record profits by increasing the costs of electricity and fuels (i.e.: Consumers Power and other gas and propane companies). We really need to focus on Upgrading our outdated Power grinds and channeling water and wind power generators. Unfortunately, here in Michigan, solar powered alternatives are not as effective due to our lack of extreme sunny days. However, there is still the possibility with new technologies to develop a solar powered system that would use smaller cells that can attract higher use of the UV rays. Entrepreneur's should look into the old Mother Earth New Magazines from the 60's & 70's for these projects.

---

---

**James Shepherd**  
**Rives Junction, MI 49277-9688**

Consumers often sends out a phamplet with my bill stating that you can pay extra for Wind energy. It's not that much but I suspect most people, like me, feel it will just go in Consumers pocket. Forget the choice. Just do it for our own good. Go to wind and explain the difference in costs. I believe that in the long run it will be cheaper and we might even live longer. There is no

need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Rhonda Shepherd**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**James Shepherd**  
**Rives Junction, MI 49277-9688**

I see lots of research being done but little in implementation of solar and wind. We should all have affordable solar on our roofs to run our homes and cars. And we should have wind generators backing it up with maybe some Nuclear backing that up. Can't we just do the right thing once in awhile? We need to break our forced addition to oil and coal. They are the drug dealers of the world. I believe they are even referred to as Cartels, Drugs, Oil and Coal Cartels. Oil and Coal want to keep us under their thumb and our elected leaders are taking the payoffs in various forms to allow them to keep us there. Make the move to wind in Michigan. Starting now. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

**Warren, MI 48092-2596**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Anne Spencer**  
**Plymouth, MI 48170-3435**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Barry Spencer**  
**South Rockwood, MI 48179-9300**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Elizabeth Speyer**  
**Dearborn, MI 48124-5029**

I keep hearing all this talk about how we are going to be more responsible and take major steps to improve our environmental impact, yet we continue to pursue things like coal plants instead of focusing on clean, renewable energy that will not only improve the planet, but create much-needed new jobs. Please, please take this step to get us moving in the right direction!

---

**Marvin Spohn**  
**Gowen, MI 49326-9708**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**June Sprague**  
**Flint, MI 48503-2540**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kerry Sprigg**  
**Harrietta, MI 49638-9749**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our

citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Teresa Springer**  
**Flint, MI 48505-5123**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kathrina Spyridakis**  
**Birmingham, MI 48009-4106**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Lynn Suits**  
**Ann Arbor, MI 48103-4506**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**John Sullivan**  
**Taylor, MI 48180-2619**

Dear Executive Secretary Kunkle and Mr. Feighner: The draft permit for the proposed Consumers Energy Coal Plant must be denied and the Alternatives Analysis must be rejected as inadequate. Based on the analysis submitted by Consumers Energy, the information provided does not establish the need for the plant or the lack of alternatives to the plant. First, there is no need for this, or any, new coal-fired power plant in the State of Michigan. The filing makes unsubstantiated claims that the state's energy needs will grow and underestimates the ability of more cost-effective clean energy alternatives to meet energy needs in the future. Consumers own recent projections show a decline in current and future energy demand. Projections for electric demand in the state show there is no need for any new plant and that electric demand in the State of Michigan is in fact level or even decreasing. Second, there are cleaner alternatives. Even when demand starts growing again, increased demand can easily be met with cleaner alternatives. Cleaner alternatives such as clean, renewable energy and energy efficiency can meet the need while creating clean energy jobs for the state.

---

**James Svensson**  
**Ann Arbor, MI 48104-6448**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Linda Swanson**  
**Troy, MI 48098-1814**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Angela Swarr**  
**Canton, MI 48188-1265**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Frank Swart**  
**Otisville, MI 48463-9493**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Patty Syrek**  
**Alto, MI 49302-9285**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Marianne Szalega**  
**Farmington Hills, MI 48336-6058**

Southeast Michigan already tops the list for toxic air quality. We NEED CLEAN energy. Michigan needs MORE JOBS, not more poison. I wonder why Consumers Energy is not investing in their future by changing over to a clean energy alternative (no such thing as clean coal no matter which way you shake the stick) instead of trying to keep a dinosaur alive. There is no need for new coal-fired power plants in our foreseeable future and efficiency

measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. And let's put our citizen's personal health environments as a priority in this issue. For heaven's sake do you really want to leave the children a world of cancers and an earth that is torn apart?

---

**Valarie Taffs**  
**Grand Rapids, MI 49546-1334**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Rodger Talbert**  
**Grand Rapids, MI 49506-1547**

It is critical that we assess the "real" cost of how we generate power. Coal is excessively expensive. The waste from mining, the cost of environmental damage, the reduction of our natural capital is too high a price to pay. Moreover, there is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Mary Tanoury**  
**Grosse Pointe, MI 48230-1682**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Johna Taormina**  
**Livonia, MI 48154**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Carl Taphouse**  
**Traverse City, MI 49684-3104**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Charlene Taraskiewicz**  
**Detroit, MI 48228-3215**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Charlene Taraskiewicz**  
**Detroit, MI 48228-3215**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jennifer Tava**  
**Saint Clair Shores, MI 48082-2507**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Imogen Taylor**  
**Ann Arbor, MI 48103-4759**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Kristina Taylor**  
**Ann Arbor, MI 48103-2221**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. The above paragraph summarizes my thoughts precisely! Please meet any new energy demands with "clean" renewable energy.

---

**Audrey Taylor**  
**Kalamazoo, MI 49006-2622**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Charles Tazzia**  
**Grosse Pointe Farms, MI 48236-2930**

Improved energy efficiency, and the use of wind and solar are the future of the state, the country, and the world. These are the smart, long-term choices for the people of Michigan and our children. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Daniel Teare**  
**East Tawas, MI 48730-9306**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our

citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I beg you to stop considering any new coal fired power plants., Thank you in advance for doing so.

---

**Ruby Teegarden**  
**Birmingham, MI 48009-5675**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Patricia Tenney**  
**Lansing, MI 48910-3305**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. We must think about the future of our planet not just financial considerations.

---

**Jake Terpstra**  
**Grand Rapids, MI 49546**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Elizabeth Tyler**  
**Traverse City, MI 49684-7916**

Building additional coal power plants is NOT the direction the people of our country or the state of Michigan wish to go. Voices were clear in the last election. We desire a clean environment and a green earth. I vehemently oppose this action and will raise my voice as loud as is needed to prevent this action. The constituency is powerful and we will not stand by quietly and allow this environmental rape to occur.

---

**Sia Uli**  
**Detroit, MI 48214-2681**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Lon Ullmann**  
**Troy, MI 48085-6104**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. The time has come to measure all the effects of coal burning-not just the "cheap" cost of energy. Environmental degradation from the combustion of coal is historic as are the effects on public health. Spewing sulfur,mercury and particulants into the atmosphere should be a part of our past not part of our future. I am 60 years old and have watched the air quality of Michigan deteriorate for decades. Under the guise of "permits" we have allowed utilities to pollute too often using cheaper rather than better technology. I like cheap energy as well as everyone else but not at the expense of our respiratory and general health. While our economy is in neutral it is time to plan for tomorrow and not look back to yesterday for tomorrow's energy needs. Tomorrows leaders will be clean energy innovators not dirty energy imitators. Please do not allow the building of power generators that will harm us and our environment. Do not permit coal burning but encourage alternatives. Prudent and viable alternatives exist,or better yet,design new ones.

---

**Kathleen Valdes**  
**Lansing, MI 48912-5002**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Sonia Van Bragt**  
**Grand Rapids, MI 49505-3716**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**William Van Dril**  
**Allegan, MI 49010-9489**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens

of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jan van Schaik**  
**Kalamazoo, MI 49009-5924**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Jacci Vanden Hout**  
**Walker, MI 49534-2273**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. We need new green jobs as we think ahead to future generations, and what is best for them. It is past time for things to change, and everything to be viewed "clean and green".

---

**David Vanfarowe**  
**Holland, MI 49423-4859**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Natasha Vassallo**  
**West Bloomfield, MI 48323-2419**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Natasha Vassallo**

**West Bloomfield, MI 48323-2419**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**David Vaughn  
Northville, MI 48167-1928**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. I believe that the states that will prosper in the future are those that can provide consumers with clean energy. The sooner we get started building this future, the better for Michigan.

---

**David Veenstra  
Lakeview, MI 48850-9572**

As a Consumers Energy customer who is enrolled in the Green Generation program, I am voting with my dollars for clean energy. While I'm happy to do my part, some of that cost should be born my others as well. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**John Veenstra  
Haslett, MI 48840-9725**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Karen Ven Roy  
West Olive, MI 49460-8607**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. You have in your bills to the consumer that we must all do our part to save the earth and yet you want to build coal plants ! When are you going to start taking your own advise ? We have a great state here and we do not need more pollution. You have great minds working for you and the ability to harness wind is the safest way to go. Why not harness the wind ? It will be clean energy and it will not cause deaths to the miners and the public. How many more miners must die before you wake up and start building CLEAN ENERGY? How many more families must have their husbands, sons, uncles, lie dead in a mine that no one can reach ? We want clean energy. There is no way you can build a coal mine and the miners will not get sick and die, will not be trapped in a mine when part of it falls and there is no way to get them out ? How much more damaged to this earth are you going to do. STOP this maddest and start thinking smart and use clean energy..our wind...If I had to money, I would put in wind power. PLEASE NO MORE COAL MINES,,,USE THE WIND.

---

**Shawn Verbrugghe**  
**Mount Clemens, MI 48043-1735**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Steven Verbrugghe**  
**Harrison Township, MI 48045-5516**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. If you have extra money to spend, please offer it as loans to you customers for them to install renewable energy on their homes or businesses, and sell some of it back to you. If you had 10,000 customers who did this you could make profits much higher than building and staffing and maintaining any type of production plants.

---

**Thomas Versalle**  
**Norton Shores, MI 49441-5853**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Trena Winans-Bagnall**  
**Midland, MI 48642-4754**

I am frustrated to hear that Michigan continues to consider adding more coal plants to Michigan. This is not a sustainable route to economic recovery, it is unnecessary, and it will only serve to move us further from the goals of being a major part of the new green economy. There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Please stop wasting time and resources looking to past methods of energy creation and start looking forward. Michiganians neither need nor want the pollution that is inherent in a coal-fired plant. We want to see investment and growth in clean energy that will help pull us out of our economic slump. Sincerely,  
Trena Winans-Bagnall 2809 Dawn Drive Midland, MI 48642

**Ionia, MI 48846-1909**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Sara Wyman**  
**Essexville, MI 48732-1672**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Andrew Yates**  
**Clarksville, MI 48815-9776**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Anita Yu**  
**Ann Arbor, MI 48105-2941**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**Stephen Zamarron**  
**Lowell, MI 49331-9725**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**corinne Zann**  
**Kalamazoo, MI 49008-2035**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Building more coal plants is looking backwards both environmentally and economically. Carpe Diem!!!

---

**Jan Zender-Romick**  
**Midland, MI 48640-9571**

No new coal plants. We need to start changing the way we use and create energy. It's time to encourage efficiency and reduced use, and renewable energy sources that don't create environmental damage. Coal plants affect the health of people, as well as the water downwind, not to mention the destruction caused by mining. We have other/better ways to create power!

---

**Wayne Zenker**  
**Southgate, MI 48195-3245**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan.

---

**William Zick**  
**Ann Arbor, MI 48103-5170**

There is no need for new coal-fired power plants in our foreseeable future and efficiency measures can meet our energy demands for decades, save our citizens' precious energy dollars in these very difficult times, and create tens of thousands of new green jobs to stimulate immediate and long-term economic health across Michigan. Bay City is located in Bay County. Crain's Detroit Business reports on June 1, 2009 that the wind energy potential in Bay, Huron, Saginaw, Sanilac and Tuscola Counties has been determined by the Michigan Wind Energy Resource Zone Board to be one of the top four regions of the State in terms of wind energy potential. In the past three years, commercial wind power installations have been going online in the "Thumb" of Michigan, adjacent to Bay City.
