Re: The Detroit Edison Company; Customer Owned Distributed Generation

Dear Ms. Kunkle:

Pursuant to the requirement contained in Section 10r(8) of 2008 Public Act No. 286, MCL 460.10r(8), The Detroit Edison Company is filing its Detroit Edison Distributed Generation Report. Included as Attachment 1 is a detailed description of the provisions of the Company's plan. This report is being submitted electronically.

Please contact me if you have any questions.

Very truly yours,

Bruce R. Maters  
Assistant General Counsel  
The Detroit Edison Company

## **Detroit Edison Distributed Generation Report**

Public Act No. 286 (PA 286 of 2008), signed into law by Governor Granholm on October 6, 2008, includes a provision requiring all electric utilities to file plans for utilizing dispatchable customer-owned distributed generation.

Specifically PA 286 Section 10r (8) states: *Within 270 days of the effective date of the amendatory act that added this subsection, each electric utility regulated by the commission shall file with the commission a plan for utilizing dispatchable customer-owned distributed generation within the context of its integrated resource planning process. Included in the utility's filing shall be proposals for enrolling and compensating customers for the utility's right to dispatch at-will the distributed generation assets owned by those customers and provisions requiring the customer to maintain these assets in a dispatchable condition. If an electric utility already has programs addressing the subject of the filing required under this subsection, the utility may refer to and take credit for those existing programs in its proposed plan.*

Detroit Edison (Edison) proposes to offer customers with on-site generation a seasonal agreement, effective annually from June through August, under which Edison will compensate customers to allow Edison to dispatch the customer's generator under certain conditions. The customer's generator would be dispatched during a NERC Emergency Energy Alert 2 or for distribution system support. The proposed offer is called the Market Based Capacity Option (MBCO).

Under the MBCO, customers with on-site generation will be compensated for Edison's right to dispatch the customer's generator. The customer's compensation is tied to current market prices. Edison will pay the MBCO customer 3 monthly capacity payments based on the average price from Edison's summer capacity procurement. In addition, Edison will pay the customer an energy payment based on measured generator output for the dispatch period. The energy payment will be based on the published MISO Real Time Locational Marginal Price (LMP) at the commercial node DECO.NEC.

Edison's integrated resource planning process currently includes a short-term seasonal (June-August) capacity component. Edison will utilize MBCO as an additional option to balance short-term capacity requirements.

MBCO customers will be required to operate generation upon notice from Edison. The customer shall be provided a minimum of 1 hour notice in advance of such probable requests as well as an estimated duration of the request. A non-performance adjustment will be applied if the customer's generation fails to operate in an amount equal to the output committed when requested by Edison. The non-performance adjustment will consist of both a non-performance capacity and energy adjustment. The non-performance capacity adjustment will be a credit applied against the customer's monthly capacity payment and will be equal to the product of the

amount of output below the amount committed and the capacity price. The non-performance energy adjustment will also be a credit applied against the customer's monthly capacity payment and will be the product of the amount of output below the amount committed and the energy price (MISO Real Time LMP at DECO.NEC). The sum of the non-performance capacity adjustments and the non-performance energy adjustments for a given month shall not exceed the total capacity payment for the month.

Edison proposes to limit the amount of MBCO participation to 25% of its expected short-term capacity requirements.

Edison believes the MBCO meets the requirements set forth in PA 286 for dispatchable customer-owned distributed generation.

THE DETROIT EDISON COMPANY

## **MARKET BASED CAPACITY OPTION**

**AVAILABILITY OF SERVICE:** Available to customers with on-site generation who desire to enter into a seasonal (June through August) agreement with the Company to allow the Company to dispatch the customer's generator(s) during a NERC Energy Emergency Alert 2 (EEA2) or for distribution system support. The customer must have on-site generation of at least 1000 kW capacity at a single location. This option is limited to 25% of short-term capacity requirements.

**TERMS OF SERVICE:** Customers will be required to operate generation upon notice from the Company. The customer shall be provided a minimum of 1 hour notice in advance of such probable requests and estimated duration of the request. Such requests are at the discretion of the Company.

The Company will notify potential customers approximately 2 to 4 weeks prior to the Company's capacity procurement. Customers can formally commit to participate in the Market Based Capacity program by declaring a minimum capacity payment that they are willing to accept. After the Company has completed its capacity procurement, the Company will notify those customers of their program status based on the results of the Company's capacity procurement. After a customer commits to the Market Based Capacity program they will be required to perform a test of their generator to demonstrate the capacity volume that will be committed to the program.

**PAYMENT TERMS:** The Company will pay the customer 3 monthly capacity payments based on the average price paid in the Company's capacity procurement. In addition, the Company will pay the customer an energy payment based on measured generator output for the dispatch period. The energy price when generators are dispatched will be based on the published MISO Real Time Locational Marginal Price (LMP) at the commercial node DECO.NEC. Payments will be made at the end of each program month.

No payment will be made for load reduction required by Emergency Electrical Procedures as defined under Section C3.

**NON-PERFORMANCE:** A Non-performance adjustment will be applied if the customer's generation fails to operate in an amount equal to the generation output committed when requested by the Company. The non-performance adjustment will consist of a capacity adjustment plus an energy adjustment. The non-performance capacity adjustment will be a credit applied against the customer's monthly capacity payment and will be equal to the product of the amount of output below the amount committed and the capacity price. The non-performance energy adjustment will also be a credit applied against the customer's monthly capacity payment and will be the product of the amount of output below the amount committed and the energy price (MISO Real Time LMP at DECO.NEC). The sum of the non-performance capacity adjustments and the non-performance energy adjustments for a given month shall not exceed the total capacity payment for the month.

Non-performance may be deemed reason for future exclusion from the Market Based Capacity program at the sole discretion of the Company.

No payment will be made for load reduction required by Emergency Electrical Procedures as defined under Section C3.

**SPECIAL TERMS AND CONDITIONS:** Generator output metering is at the expense of the customer. The customer is required to provide the Company with notification methods to be used and provide the Company with current customer personnel responsible for such notification of dispatch requests. Optionally, at customer's expense, the Company's DR-SOC is available to satisfy the measurement of customer's generator output. Additionally, the DR-SOC can remotely start and stop units and provide energy monitoring for customer's facility and generation equipment.

Customers desiring to operate generators in parallel with the Company's system must comply with the requirements of the Company's Interconnection Guidelines.

_____	)	

At the August 11, 2009 meeting of the Michigan Public Service Commission in Lansing, Michigan.

PRESENT: Hon. Orjiakor N. Isiogu, Chairman  
Hon. Monica Martinez, Commissioner  
Hon. Steven A. Transeth, Commissioner

**NOTICE OF OPPORTUNITY TO COMMENT**

On October 6, 2008, Governor Jennifer M. Granholm signed into law 2008 PA 286 (Act 286), an amendment to Public Act 3 of 1939. Section 10r(8) of Act 286, MCL 460.10r(8), provides:

Within 270 days of the effective date of the amendatory act that added this subsection, each electric utility regulated by the commission shall file with the commission a plan for utilizing dispatchable customer-owned distributed generation within the context of its integrated resource planning process. Included in the utility's filing shall be proposals for enrolling and compensating customers for the utility's right to dispatch at-will the distributed generation assets owned by those customers and provisions requiring the customer to maintain these assets in a dispatchable condition. If an electric utility already has programs addressing the subject of the filing required under this subsection, the utility may refer to and take credit for those existing programs in its proposed plan.

Consumers Energy Company (Consumers) filed its Section 10r(8) plan in Case No. U-16013. The Detroit Edison Company (Detroit Edison) filed its plan in Case No. U-16014.

The Commission is persuaded that interested persons should be afforded an opportunity to submit comments on the plans submitted by Consumers and Detroit Edison for utilizing dispatchable customer-owned distributed generation. Toward that end, the Commission directs that Consumers and Detroit Edison shall each serve a copy of its Section 10r(8) plan on all parties to its currently pending general rate case and on all of its customers known to have an existing dispatchable generator within 14 days of the date of this order. Proofs of service shall be filed in the appropriate dockets by each of the utilities.

The Commission Staff is directed to publicize this notice of opportunity to comment on the Commission's website and in a press release.

Any person may submit written or electronic comments regarding the plans filed by Consumers<sup>1</sup> and/or Detroit Edison.<sup>2</sup> Comments filed regarding Consumers' plan shall be filed in Case No. U-16013. Comments filed regarding Detroit Edison's plan shall be filed in Case No. U-16014. Comments must be received no later than 5:00 p.m. on October 1, 2009. Written comments should be sent to: Executive Secretary, Michigan Public Service Commission, P.O. Box 30221, Lansing, MI 48909. Electronic comments may be e-mailed to [mpscdockets@michigan.gov](mailto:mpscdockets@michigan.gov). Only Consumers and Detroit Edison shall have the opportunity to submit reply comments, which must be filed no later than 5:00 p.m. on October 15, 2009. All information submitted to the Commission in this matter will become public information available on the Commission's website and subject to disclosure.

---

<sup>1</sup>Consumers' plan is at <http://efile.mpsc.state.mi.us/efile/docs/16013/0001.pdf>.

<sup>2</sup>Detroit Edison's plan is at <http://efile.mpsc.state.mi.us/efile/docs/16014/0001.pdf>.

THEREFORE, IT IS ORDERED that:

A. Consumers Energy Company shall serve a copy of its Section 10r(8) plan on all parties to its currently pending general rate case and on all of its customers known to have an existing dispatchable generator within 14 days of the date of this order.

B. The Detroit Edison Company shall serve a copy of its Section 10r(8) plan on all parties to its currently pending general rate case and on all of its customers known to have an existing dispatchable generator within 14 days of the date of this order.

C. The Commission Staff shall publicize on the Commission's website and in a press release that interested persons may submit written or electronic comments regarding the plans filed by Consumers Energy Company and/or The Detroit Edison Company.

D. Interested persons shall have until 5:00 p.m. on October 1, 2009 to file comments. Comments filed regarding Consumers Energy Company's Section 10r(8) plan shall be filed in Case No. U-16013. Comments filed regarding The Detroit Edison Company's Section 10r(8) plan shall be filed in Case No. U-16014.

E. The Commission Staff shall file comments in Case Nos. U-16013 and U-16014 by 5 p.m. on October 1, 2009.

F. Consumers Energy Company and The Detroit Edison Company shall have until October 15, 2009 to file replies.

The Commission reserves jurisdiction and may issue further orders as necessary.
