Re; Smart Meter Installation at 2351 Cheswick Dr Troy, Michigan 48084

11/8/2011

**NOTICE OF NO CONSENT TO TRESPASS AND SURVEILLANCE, NOTICE OF LIABILITY**

Dear DTE and all agents, officers, employees, contractors and interested parties:

I have attempted to resolve this issue through DTE and the MPSC and have filed an informal complaint. The complaint was closed on November 02, 2011, without fully addressing my concerns relating to the health, safety and privacy issues surrounding these smart meters. In fact, a telephone conversation on 11/07/2011 with the MPSC person in charge of the complaint yielded no direct answers to my specific complaint relating to the issues at hand. Moreover, I was informed that DTE can disconnect my power if I do not allow them to install these illegal Smart Meter devices that pose health and safety risk to the occupants at the above address. The person in charge was simply told by his supervisor to "just close it".

Therefore, if you intend to install a "Smart Meter" or any activity monitoring device at the above address, you and all other parties are hereby denied consent for installation and use of all such device on the above property and installation and use of any activity monitoring device is hereby refused and prohibited. Informed consent is legally required for installation of any surveillance device and any device that will collect and transmit private and personal data to undisclosed and unauthorized parties for undisclosed and unauthorized purposes. Authorization for sharing of personal and private information may only be given by the originator and subject of that information. That authorization is hereby denied and refused with regard to the above property and all its occupants.

"Smart Meters" violate the law and cause endangerment to residents by the following factors:

1. They individually identify electrical devices inside the home and record when they are operated causing invasion of privacy.
2. They monitor household activity and occupancy in violation of rights and domestic security.
3. They transmit wireless signals which may be intercepted by unauthorized and unknown parties. Those signals can be used to monitor behavior and occupancy and they can be used by criminals to aid criminal activity against the occupants.
4. Data about occupant's daily habits and activities are collected, recorded and stored in permanent databases which are accessed by parties not authorized or invited to know and share that private data.

5. Those with access to the smart meter databases can review a permanent history of household activities complete with calendar and time-of-day metrics to gain a highly invasive and detailed view of the lives of the occupants.
6. Those databases may be shared with, or fall into the hands of criminals, blackmailers, law enforcement, private hackers of wireless transmissions, power company employees, and other unidentified parties who may act against the interests of the occupants under metered surveillance.
7. "Smart Meters" are, by definition, surveillance devices which violate Federal and State wiretapping laws by recording and storing databases of private and personal activities and behaviors without the consent or knowledge of those people who are monitored.
8. It is possible for example, with analysis of certain "Smart Meter" data, for unauthorized and distant parties to determine medical conditions, sexual activities, and physical locations of persons within the home, vacancy patterns and personal information and habits of the occupants.
9. Your company has not adequately disclosed the particular recording and transmission capabilities of the smart meter, or the extent of the data that will be recorded, stored and shared, or the purposes to which the data will and will not be put.

I forbid, refuse and deny consent of any installation and use of any monitoring, eavesdropping, and surveillance devices on my property, my place of residence and my place of occupancy. That applies to and includes "Smart Meters" and activity monitoring devices of any and all kinds. Any attempt to install any such device directed at me, other inhabitants, guests, my property or residence will constitute trespass, stalking, wiretapping and unlawful surveillance, all prohibited and punishable by law through criminal and civil complaints. All persons, government agencies and private organizations responsible for installing or operating monitoring devices directed at or recording my activities, which I have not specifically authorized in writing, will be fully liable for any violations, intrusions, harm or negative consequences caused or made possible by those devices whether those negative consequences are justified by "law" or not..

Lastly, DTE explains on its web site these meters are being installed at no cost to the consumer. This is categorically false. This is a tax bill. "Ratepayers" are actually taxpayers. This is a new TAX forcing the public to finance SMART METERS/GRID at the rate of 100% of costs plus a profit margin written into it. We are being forced to finance a system sold as energy conservation, efficiency, carbon reduction, and at the same time being subjected to unwarranted surveillance, data mining, and extreme health hazards not to mention the invasion of our homes and businesses. Taxes for this system are applied to our energy bill under several categories and not one part of this bill or the SMART GRID system will reduce consumption or make energy sources more secure or efficient.

This is legal notice. After this delivery the liabilities listed above may not be denied or avoided by parties named and implied in this notice. Notice to principal is notice to agent and notice to agent is notice to principal. All rights reserved.

Regards,

Thomas J. Moran
