Cell (248) 991-5701

Dear Michigan Public Service Commissioners:

I am writing to submit my comments on the State's draft Integrated Resource Plan (IRP) parameters (Case No. U-18418). Based on our new energy legislation (PA 341), you have the opportunity to shape Michigan's energy future.

I urge you to develop a planning process that makes our state stronger, healthier and cleaner. As you shape our future, it is critical to require utilities to include the following elements in their integrated resource planning (IRP) that will make an important difference both now and for generations to come: Move beyond coal and develop a plan for a quick transition from coal-generated energy by setting retirement dates for all coal-fired plants, while also requiring an equitable transition for employees and the communities where plants are located. Increase investments in renewable energy and energy efficiency to reduce pollution, develop new jobs and protect our health.

As a state with the highest utility rates in the Midwest, Michigan should require utility companies to maximize energy efficiency and renewable energy to reduce electricity costs. Evaluate significant increases in investment in distributed generation, such as community solar, to ensure that the benefits of clean energy reaches all communities. Protect the health of Michiganders by prioritizing clean air and water while reducing dire public health consequences, such as asthma, lung and heart disease, birth defects and other health conditions caused by fossil fuels.

Fossil fuel plants create substantial amounts of pollution that is harmful to public health, our climate, air quality and water quality. Engage in an open and accessible process with public involvement and direct engagement. In addition, utilities should engage environmental justice communities in their IRP process and seek to minimize any disproportionate impacts on those communities.

We urge you to take these critical elements into account as you finalize the IRP process parameters.

Thank you!

| Paul        | Parks     | rocksandtrees@gmail.com | 248 Alewa Dr NW       | Grand Rapids | MI    | 49504       | "Pure Michigan" will mean nothing if we don't do effective things to clean and protect our environment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| David       | Devlin    | myth1144@comcast.net    | 2951 Woodridge Cir NE | Grand Rapids | MI    | 49525       | A majority of the new energy that came on line nationally last year was from wind and solar. My city, Grand Rapids, has been a leader in moving toward a greener and cleaner environment, and is prospering partially because of that commitment. That same commitment should be made state wide.<br>Also, you should consider the amount of money shipped out of our state for the purchase and transportation of coal and natural gas to run fossil fuel energy plants here in Michigan. Converting to wind and solar energy will allow all those dollars currently going out of state for fuel, to be spent here in Michigan supporting our economy. Money spent in Michigan will boost our economy, while it also reduces our health care costs from better air and water quality.. |
| Glen & Jane | Hampton   | gjhampton81@gmail.com   | N1683 Hampton Rd      | Saint Ignace | MI    | 49781       | Although many claim moving to clean, renewable energy will cost jobs, employment will increase substantially as we transition to a new energy infrastructure related to solar, wind, and geothermal.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Kevin       | Crupi     | kcrupi@aol.com          | 146 Midway Dr         | Negaunee     | MI    | 49866       | And could we please stop the monopoly Consumers Energy seems to have in this state. They are getting away with over charging customers because their smart meters read wrong constantly.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Julianna    | Evans     | julievans997@gmail.com  | 14235 Shiawassee Dr   | Grand Haven  | MI    | 49417       | As a country the US should be leading the way in renewable energy, not lagging behind. It time for us to move into the future and stop cling to the past!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Howard      | Holmes    | chip.holmes@yahoo.com   | 503 Academy St        | Ferndale     | MI    | 48220       | As a home owner with solar panels on my house, I send power back to the grid, particularly during the midday peak demand hours. This is a net benefit to the utilities, and should be accounted for in their grid usage fees.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Nancy       | Shiffler  | nshiffler@comcast.net   | 2877 Sorrento Ave     | Ann Arbor    | MI    | 48104       | As a major corporation you need to do what's right for environment and our country. The facts are in about coal. I have children do you need to have a clean earth when I get older.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Jennifer | Verhelst | jverhelst@charter.net     | 14338 Quincy St       | Holland         | MI | 49424 | As a MI resident living along the shores of Lake MI, I urge Consumers Energy to set an end date in my lifetime to finalize your coal-burning days at the Port Sheldon plant and replace with renewable wind energy. Return the quality of water and air to pre-coal-burning days and help restore our pristine Lake MI and surrounding communities to be healthy places to live and raise families. It is within your power to positively impact climate change for future generations by getting rid of the use of fossil fuels. Please do so today! Thank you! |
| Anne     | Horn     | aj2horn@sbcglobal.net     | 3626 E Arbutus Dr     | Okemos          | MI | 48864 | As a mother and grandmother, I urge you to propel Michigan into a clean energy future as fast as possible. My 20-year-old son and his friends are seriously worried about the environment they are inheriting. As the weather gets weirder and we watch birds, butterflies, and bees disappearing, they have good reason to worry. Please drop coal as a fuel source and focus on clean renewable energy, energy efficiency, and renewable energy jobs. Thank you!                                                                                               |
| David    | Chaney   | dcdircon683@gmail.com     | 408 W Haight St       | Ludington       | MI | 49431 | As a retired Consumers Energy employee that has already signed up for Consumers green energy program. I believe our countries future is green for the sake of our children and grandchildren.                                                                                                                                                                                                                                                                                                                                                                    |
| Athena   | Findlay  | athenafindlay@gmail.com   | 15602 160th Ave       | Grand Haven     | MI | 49417 | As a teacher, mother, and resident of the wonderful state of Michigan, I support this opportunity for clean air and energy.                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Jacob    | Eberly   | jakelorelle@sbcglobal.net | 16565 Greenly St      | Holland         | MI | 49424 | As citizens as well as parents and grandparents of Michiganders, we urge you to protect the current and future citizens of Michigan by making wise decisions now.. Thank you.                                                                                                                                                                                                                                                                                                                                                                                    |
| Kathleen | Criger   | kathycriger@yahoo.com     | 4345 Crooks Rd Apt 36 | Royal Oak       | MI | 48073 | As someone who suffers from lung disease, in spite of never having smoked, I can't express how important clean air is to me. Also, I love my state and would like Michigan to be known for its sparkling air and water, as well as its scenic beauty.                                                                                                                                                                                                                                                                                                            |

| Edward           | Morin    | camille.orso@gmail.com    | 2112 Brockman Blvd    | Ann Arbor       | MI | 48104 | <p>Clean, renewable energy is good for health, good for the environment, good for communities now impacted by toxic waste and other byproducts of fossil fuel use, and good for the economy because it will provide many good paying jobs. Please consider these benefits as you deliberate on the details of the Integrated Resource Plan.</p> <p>Clean, sustainable energy sources are important to Michigan's diverse agricultural businesses as well as other businesses and individuals. Please take this opportunity to make Michigan a better business climate and a healthier place to live.</p> <p>Coal is not the future!</p> <p>Coal is so 18th &amp; 19th century. We are now living in the 21st century and need to protect our environment, as well as our health!</p> |

| Suzanne          | Antisdel | suzart23@gmail.com        | 15 E Kirby St Apt 518 | Detroit         | MI | 48202 | <p>Dear Comissioners, Michigan should support the generation of energy through wind and solar. Gradual retirement of coal-burning plants is one path. I think also that a well-publicized program reducing the loss of energy in homes and businesses would help.</p> <p>Citizens often intend to turn off their lights or put in insulation, but do not get around to it. Maybe the utilities can be given more incentives to reach out to citizens on this score. Thank you.</p> <p>Despite all your City cultural support, we know you are still Clinging to coal &amp; you're still fracking. You must change!</p>                                                                                                                                                               |

| Janet      | Scarrow   | janscarrow@gmail.com            | 1034 Essex Circle          | Kalamazoo           | MI | 49008 | I am glad that the plan retains continuing renewable energy goals, but I hope the goals (which are relatively modest in light of the rate of progress in costs of this kind of energy) will be increased. If brief periods of moderate subsidization by the State of Michigan is required, so be it. Michigan needs to get serious about reducing our major reliance for energy on non-renewable sources! With the present regime in Washington, it is more important than ever for states, local governments, and enlightened utilities and energy suppliers to take action now! |
| Diane      | Mcpharlin | diane.mcpharlin@yahoo.com       | 869 Wickfield Ct           | Ann Arbor           | MI | 48105 | I am now using 40% wind power and would welcome adding solar... renewable energy is the best resource we have. Cut out coal and oil and nuclear asap!                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Cindy      | Cramer    | cindylu@wcomco.net              | 10371 Hartley Rd           | Waldron             | MI | 49288 | I am proud to be an American and proud to be a Michiganiaan. I would like to see my state lead the way in clean, renewable energy resources and building a healthy environment for future generations.                                                                                                                                                                                                                                                                                                                                                                            |

| James                   | Tierney   | j.tierney7@gmail.com     | 1790 Pinetree Dr      | Trenton             | MI | 48183 | <p>I did not write most of this message, but it accurately expresses my thoughts and sentiments on the direction we need to take in shaping Michigan's energy future. Decentralized regenerative energy production ensures a future that is healthy and prosperous for all of us.</p> <p>I don't want nuclear energy to be our source of energy.</p> <p>I have been a stockholder in your company for many years, and wish to raise my voice to plead for your determination in switching to renewable energy sources. Think about future generations, not just about earning money.</p>                                                                                                                                             |

| Charles                 | Tazzia    | charles.tazzia@basf.com  | 359 Chalfonte Ave     | Grosse Pointe Farms | MI | 48236 | <p>I have personally committed to renewable energy by signing up with Arcadia Power to purchase REC's with my electricity payments. I hope that Michigan will follow suit, and move our state on a path to a sustainable future for my children and grandchildren. I love that your having utilities go clean!!</p> <p>I object to having my DTE bill support these fossil fuel industries. You need to spend much more on renewable wind and solar energy.</p> <p>I strong agree with the Sierra Club's position on clean energy! R E Durrance</p> <p>I strongly agree with the above stated message. It is way pass time that the state of Michigan stars to move forward away from the use of coal to a clean energy program.</p> |

| Rosemary     | Dressler | rosemary.dressler@gmail.com  | 3151 Poplar Creek Dr SE Unit 304 | Kentwood     | MI | 49512 | In a recent trip through western States it became obvious that most other States are making great steps forward with clean energy.                                                                                                                                                                                                                                                                                                                                                           |
| Keith        | Sopp     | krsopp@gmail.com             | 25877 W State Highway M64        | Ontonagon    | MI | 49953 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Jackie       | Smith    | jcustom32@yahoo.com          | PO Box 2461                      | Detroit      | MI | 48202 | In addition to renewable clean energy, the residents of Detroit are in dire need of designated green spaces to offset poor air quality especially in residential/industrial neighborhoods. Also, before building new structures within a neighborhood the existing tenants should be made aware of the development and have input in the process to remain comfortable at home. Please contact me if you have additional thoughts on the subject 313 283-8905 or jcustom32@yahoo.com thanks! |
| Croger       | Lampkin  | house3130@gmail.com          | 544 Melbourne St                 | Detroit      | MI | 48202 | It is a no brainer we must go to renewals,after setup cost they start paying from day one back to the owners. The community should the owner each house should the owner of the system.                                                                                                                                                                                                                                                                                                      |

It will still cause black lung disease and early death from it and when there are weak areas in the mine and the crush the workers. It is important to not only take in the consideration of life, but of the cost of the environment and all who live in it. The clean energy of solar and wind are up and running and are excellent sources for Michigan, the USA, and the world! Let's get clean! Thank you<br>It?s time.<br>Its really a shame to see all of the renewable wind energy out west and yet, here in MI, we are falling behind the times.<br>It's the 21st Century people. Let's get going.<br>It's the future and the future is now. Clean energy for Michigan. |

| Elena    | Past     | elenapast@wayne.edu       | 307 Kayser Ave           | Royal Oak | MI | 48067 | Making an investment in clean energy makes sense economically, not just environmentally. It also projects the kind of forward-thinking politics that makes young, energetic people want to move to a state like Michigan. People increasingly want to live in places where clean, renewable, affordable energy make our air clean, protect our landscapes, and safeguard our future and that of our children. We have an opportunity to make our state better: it's time to take it!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Charles  | Wright   | moneybags48525@yahoo.com  | 330 Chidester St Apt 203 | Ypsilanti | MI | 48197 | many people know clean energy doesn't = creating jobs, it's a scam so the 1% can benefit from more tax breaks                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|          |          |                           |                          |           |    |       | Michigan businesses have benefited over the years from "business friendly" advantages. This has meant that environmental responsibility was seldom a priority, or a requirement, to do business in Michigan. It's now time for Michigan government, business, and citizen groups to lead the country in a new enterprise...that of ensuring clean, renewable, and affordable energy. Please do anything and everything to use sun, wind, and natural gas, (instead of coal if necessary) as our primary sources of energy to generate electrical power for the State. This is even more important given the fact that Michigan is the primary steward for so much of fresh water in the world...the Great Lakes. Thank You....please make this a priority. All species of Michigan and the World deserve best efforts and practices in this matter. Michigan has the greatest fresh water supply in the United States and it has to be protected for the millions of people who depend on it. Clean renewable energy has to be our main priority |

| Jessica    | Gerdau     | jessicagerdau@yahoo.com   | 31043 Pierce St             | Garden City | MI | 48135 | <p>Michiganders deserve this. Full on.</p> <p>Michiganians need to know that the true cost of energy includes disaster relief, earthquake and flood remediation, etc. When Federal and State governments allow energy corporations to extract product without requiring them to also consider the environmental damage (like the destruction of Louisiana Bayou and salt marshes which would make the area more resilient to hurricanes, for example), all Americans pay. Maybe not in our utility bill but in rising taxes for FEMA, national flood insurance, and environmental cleanup projects that corporations should have included in their cost of doing business. Decision makers regulating Michigan's Utilities must seek to move Michigan from reliance on forms of energy that seem inexpensive in the short run but cost us all mightily in the long run. Thank you. My company's 40 kw net metered solar system provides the power to heat and air conditioning our building year round, saving us money with a six year payback! This technology is here, affordable and practical!</p> |

| Sherryanna | Bellissimo | bellissimo828@gmail.com   | 3728 Roosevelt St           | Dearborn    | MI | 48124 | <p>My entire home is powered by clean wind energy for only for a few bucks more than dirty coal burning energy. Less carbon footprint, more fresh air, and the advantageous positive trickle effect it has on our environment. Plus there's money to be made in investing in our future. It just makes sense. My family is very interested in clean energy. We should take advantage of the wind, sun and waves that deliver themselves to the loading dock. Like that old joke "What do you call a solar spill (Vers an oil spill)? A beautiful day!</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Amy        | Hajec      | zoemom93@hotmail.com      | 34605 Spring Valley Dr # Sr | Westland    | MI | 48185 | <p>Natural gas is helping but I suspect that it is limited. Best to get ahead with renewable sources. The technology is here now.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Suzanne   | Spencer-Wood | spencerw@oakland.edu          | 2955 Heidelberg Ct  | Rochester Hills | MI | 48309 | <p>Natural gas is not a green fuel. It is a fossil fuel that uses toxic chemicals in drilling, which are polluting aquifers, while at the same time releasing methane, the most powerful greenhouse gas. Our energy needs to come from solar and wind that technology are lowering the costs of every day, coming close to coal. In addition wind and solar create more jobs than coal, so green energy is a needed stimulus to the economy. Please replace coal with solar and wind energy. No coal or fossil fuels... just healthy solar; wind and water... these are the power of our future.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Anthony   | King         | divinecuisineking@gmail.com   | 15734 Bentler St    | Detroit         | MI | 48223 | <p>No longer can we sit back and watch the destruction of our environment by fossil fuels, Now is the time to enact a lasting change for the future of our planet, our health and the future health and prosperity of our children. If there is a future human race to indeed look back on this period in time will they praise our intelligence in taking the stance to promote and institute clean energy practices or lament and damn our stupidity and arrogant lack of foresight to ensure a healthy viable planet and environment for all into perpetuity!</p> <p>Of course, Michigan's Integrated Resource Plan, while promoting green energy technologies like wind and solar should never include nuclear power in Michigan's energy future.</p> <p>Our energy impacts our health and the health of our children. Please consider how to create a clean and healthy future that also meets our energy needs. Thank you!</p> <p>Patricia Herring Jackson Trustee Meridian Charter Township</p> <p>Planet Earth is facing an environmental armageddon due primarily to the extraction and burning of fossil fuels. Let's lead the way in developing clean, sustainable energy.</p> |
| Marjorie  | Muhich       | markmuhich0@gmail.com         | 2466 Emmons Rd      | Jackson         | MI | 49201 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Julie<br>Jessica   | McDaniels<br>Johnson    | mcdaniej@yahoo.com<br>anahatashining@hotmail.com  | 4550 S Hollister Rd<br>24500 W McGillen Ave Apt A3 | Ovid<br>Mattawan      | MI<br>MI | 48866<br>49071 | Planet Earth is facing an environmental armageddon due primarily to the extraction and burning of fossil fuels. The energy industry must put its vast resources into developing clean, sustainable energy. I am glad to see that Consumers and DTE have started, but there's a long way to go.<br>Please                                                                                                                                                                                                    |
| Nancy<br>Catherine | Appel<br>Brock          | nancyappel7@gmail.com<br>brockcatherine@yahoo.com | 1626 Academy St<br>23765 Lawrence Ave Trlr 33C     | Kalamazoo<br>Warren   | MI<br>MI | 49006<br>48091 | Please consider using RENEWABLE ENERGY before going the way we always do!! It's so important for us to keep progressing into the future with Mother Earth in mind or we are going to lose our Earth Home!! Climate Change is already happening and we must acknowledge it and then move ahead with solar and wind power and create NEW jobs to help heal our Earth as well as preserve the resources we still have... THANK YOU for your consideration. For the Love of Mother Earth, Nancy Louise Appel??? |

| Dirk        | Van Putten   | dirkvanputten1@gmail.com | 2005 Driftwood Dr        | Holland       | MI | 49424 | Please take a look at the cities and states that have put clean energy into place. It's incredible how much less pollution is seeping into their environment. As mother and a grandmother I urge you to do the best possible job for the futures of this generation and those to follow. The time to act is now! We can greatly reduce our carbon footprint and stop making our people ill. Thank you for Being the change the world needs. For helping our beautiful state of Michigan be a happier healthier environment! Andrea Garko |

Michigan is situated to become one of the best locations in the USA because of the massive water resources we have. Let's also lead with solar and wind energy development and adaptation.<br>Please, do it for our people, our planet.                                                                                                                                                                                                                                                                                                                                                   |

| Barbara | Wood      | barb.wood51@gmail.com      | 1811 Independence Blvd Apt 19 | Ann Arbor     | MI | 48104 | The coal age has passed. We need to move forward with clean sustainable energy to add new jobs and provide a new and exciting industry for our economy<br>The companies that get in on the ground floor of renewable energy will be the companies that will be sustainable in the future. Everyone should be trying to lower/eliminate pollutants.<br><br>The future for all of our children is in your hands. Shifting to clean energy now will improve public health and will result in a healthier economy as well.<br>The future is now. Accept it and move out of the past. Go solar.<br><br>The percentage of clean energy needs to increase dramatically. The time is right and the sooner you act the better off we will all be. Thank you. |

| Marcia  | Curran   | curran_marcia@hotmail.com     | 940 E Crystal Downs Dr  | Frankfort     | MI | 49635 | The state and its utility companies should be transitioning to 100% renewable sources of energy. Incentives should be made available to cities and towns for EV plug in opportunities, because we are going to go all electric in the near future. Change is in the wind (and the sun) and the EV is big part of the new scene. Time to recognize the writing on the wall and embrace the future.                                                                                                                                         |
| Beth    | Mckee    | emckee1960@gmail.com          | 1275 Spicewood Dr       | Okemos        | MI | 48864 | The switch to clean energy is the way of the future. It would provide clean healthy jobs as well as clean healthy environment. Safer for everyone which means saving on healthcare too. Preserve the world for our children                                                                                                                                                                                                                                                                                                               |
| Tor     | Goodwin  | torspass@umich.edu            | 193 Plymouth St         | Jackson       | MI | 49201 | The time to make the change is NOW!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Donka   | Markus   | markusdd@umich.edu            | 1630 Leaird Dr          | Ann Arbor     | MI | 48105 | The US will soon look like a third world country compared to Europe, if we do not become serious about clean energy right away.                                                                                                                                                                                                                                                                                                                                                                                                           |
| Debra   | Loveall  | dlcwl@live.com                | 9791 Maple Grove Rd     | Nashville     | MI | 49073 | The way of the future is clean energy. We need to take a step forward with renewable clean energy and not step backwards.                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Peter   | Rogan    | progan01@yahoo.com            | 4062 W 13 Mile Rd Apt B | Royal Oak     | MI | 48073 | The world is going this way. Why shouldn't we?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Anne    | Dwyer    | ayndwyer@yahoo.com            | 1829 W Farnum Ave       | Royal Oak     | MI | 48067 | There are a growing number of choices in this market. Soon we can vote with our feet.                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Laura   | Podrasky | glassartbylaura@gmail.com     | 1100 Blue Heron Dr      | Highland      | MI | 48357 | There are so many proven clean energy inventions from revitalized water, energy that Nikolai Tesla invented 100 years ago, shauberger water, wind, solar, geothermal, acoustic propulsion, and yet we cling to dirty energy. It is time we advanced and leave the dark ages behind                                                                                                                                                                                                                                                        |
| Sue     | Martin   | smm4906@aol.com               | 4906 Shoreline Blvd     | Waterford     | MI | 48329 | There's an old commercial for auto oil changes - "you can pay me now, or you can pay me later". Our current reliance on coal definitely falls into the "pay me later" category. Yes, renewables seem more expensive at first, but not when you factor in the future costs of health care, waste disposal, climate change impact, and the damage to the environment caused by the physical extraction of fossil fuels. Please look at the big picture and the long term detrimental impacts of coal when making your decisions. Thank you! |
| Carol   | Avigne   | suecarol1951@gmail.com        | 17243 Higdon Dr         | Brownstown    | MI | 48193 | Think of our children and their children!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Phillip | Lundberg | philliplundberg@earthlink.net | 8737 Timbers Trl        | Traverse City | MI | 49685 | Think smart- - the future is now!                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Ann                       | Turner         | annturner212@gmail.com | 11668 Snowfield Ct            | Traverse City   | MI | 49686 | This is an opportunity to create good, clean energy jobs and be a leader in embracing renewable energy. Let's make Michigan a green state and preserve our air and water quality for future generations. This is home, our only home, please don't poop where you live. Only planet we have. This is probably the not important issue we can work on as a state. Will we be progressive and contribute to the solution for global warming or will we be part of the problem I believe yong people will make decisions on where to work and where to live based on the states position in energy. Let's lead and keep Michigan green! |
| Thomas                    | Reinbold       | tom@miappraisals.com   | 7497 Gratiot Rd               | Saginaw         | MI | 48609 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Karen                     | Okeefe         | kkokeefe1455@gmail.com | 1455 Penniman Ave             | Plymouth        | MI | 48170 | This is so very important. It's rare that an issue is so clear. We must move with all possible speed from polluting fossil fuels (all of them) to renewable resources. It is the only decision that serves the state an all living things within it. Please, please do the right thing.                                                                                                                                                                                                                                                                                                                                              |
| Marian                    | Volkman        | marian@tir.org         | 5145 Pontiac Trl              | Ann Arbor       | MI | 48105 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Leah                      | Hessler        | leah.hessler@gmail.com | 302 Dewey St                  | Royal Oak       | MI | 48067 | This is the most important issue facing our generation. Climate change is real. We have to transition to renewable energy as soon as possible. This will create jobs, not destroy them. Being in denial won't make climate change go away. Please help make Michigan a leader in clean energy! This issue is very important to me. Protection of the environment is my highest priority when I enter the voting booth.                                                                                                                                                                                                               |

| Patricia                  | Kerr Alexander | kerrcottages@aol.com   | PO Box 237                    | Glenn           | MI | 49416 | This letter was drafted by the Sierra Club, byt I have read it carefully and am proud to agree and sign my name. This should go without saying.... What do you want your grandchildren's lives to be like?? And their grandchildren?? Trying to add jobs in industries which are not good for our country and environment is not the way to go. E.g. coal is or should be a dying industry. Back clean environmental methods.                                                                                                                                                                                                        |

Instead of being a rare option, solar should become the norm and soon.                                                                                                                                                                                                      |
| Mary Ellen | Gondeck         | mgondeck@csjoseph.org       | 3301 Gull Rd. Apt. 514  | Kalamazoo      | MI | 49048 | We are very vulnerable here to the impact of fossil fuel on our water supply with the pipelines. Alternative sources are very important.                                                                                                                                                                                                                        |
| Anna       | Kornoelje       | akornoelje@naturecenter.org | 36 Mayfield Ave NE      | Grand Rapids   | MI | 49503 | We can do this! Let's make Michigan a leader in clean energy and take advantage of the market opportunities for clean jobs and a clean environment. Thank you very much for your consideration.                                                                                                                                                                 |
| Karin      | Lannon          | karinlannon@att.net         | 1145 San Jose Dr SE     | Grand Rapids   | MI | 49506 | We can no longer rely on the EPA to protect our environment, but I'm hoping that Michiganders can rely on our local companies to do the best thing for its citizens. Thank you for your attention.                                                                                                                                                              |
| Linda      | Hammond         | lksham@gmail.com            | 3453 Middle Rd          | Harbor Springs | MI | 49740 | We can show other states what a great and progressive state we have here by switching to clean energy! Let's move forward -fossil fuels are in the past. Truly, Linda Hammond                                                                                                                                                                                   |
| Audrey     | Flanders-Sundst | asundstr@gmail.com          | 2526 Summit Ridge Dr NE | Grand Rapids   | MI | 49505 | We do not inherit the earth from our ancestors, we borrow it from our children. We must do all we can to protect our environment and have clean energy sources.                                                                                                                                                                                                 |
| James      | Shepherd        | jimmshepherd@eaton.com      | 11375 Clinton Rd        | Rives Junction | MI | 49277 | We don't want Coal or Nuclear. Do what's right and move to Solar and Wind.                                                                                                                                                                                                                                                                                      |
| Sandra     | Ammons          | missmuffit1113@gmail.com    | 19470 Ingram St         | Livonia        | MI | 48152 | We have no time to lose! We're warming the Earth up so quickly that the last substantial snowstorm I can remember happened at least 15 years ago. When I was growing up in Livonia MI, we had a couple a year at least, drifts covering up to windows. Now there is rising sea levels & torrential storm down South. We need to act now, & we need to act fast. |

| David     | Justin       | djustin@edzone.net       | 305 Hastings St      | Alma        | MI | 48801 | <p>We have recently built a new residence and have solar shingles on the home. Our experience has convinced me that solar energy has great potential to provide the energy that our home and others use. Our home is very energy efficient and we have produced more energy than we use. We need to improve our electrical infrastructure to manage our energy needs. Please consider solar energy in the future plans for Michigan.</p> <p>We must transition off of fossil fuels just as fast as possible! It's past time to go with green energy technology in a major way! It's time to provide significant funding to assist homeowners and landlords and businesses to install solar panels, LED lighting, and green roofs, for starters! We must think outside the box! Fossil-fuel electric energy rates here in the UP are among the nation's highest and that is appalling to me as a resident up here! Time for the state to go GREEN!</p> <p>We need clean air to breath.</p> <p>We need CLEAN ENERGY to save our earth and it's creatures. Please do this! Thank you!!!!</p> <p>We need more community generated energy that is not owned and operated by investor owned regulated monopolies. That means more development of micro grids and storage systems that use renewable energy resources.</p> <p>We need more community generated energy that is not owned and operated by investor owned regulated monopolies. That means more development of micro grids and storage systems that use renewable energy resources.</p> <p>We need to capitalize on Windpower, there is plenty of it here.</p> <p>We need to do this for all the future generations of Michiganders.</p> <p>We need to end our dependence on finite carbon based fuels. This independence would allow us to better control our destiny and reduce our reliance on others. This is a step in the right direction.</p> |

| James    | Deighton  | jfdeighton@gmail.com      | 8940 Nadine Ave       | Huntington Woods   | MI | 48070 | We need to have a plan to go to 100% renewable energy in the future. We also need to start investing in storage batteries of the future to make 100% renewable energy a possibility.                                                                                                                                                                                                                                                                                                                                                    |
| Valerie  | Munn      | valerieevansmun@gmail.com | 19295 Lamplighter Trl | Macomb             | MI | 48044 | We need to plan now for the future. Investing in renewables now is not only smart for the planet but financially as well. Invest now and save on the damaging effects of continuing to use fossil fuels! We owe it to our children, grandchildren and those beyond to be better stewards of our earth. This would be a big step in that direction.                                                                                                                                                                                      |
| Cherry   | Westerman | cwesterman@comcast.net    | 715 Granger Ave       | Ann Arbor          | MI | 48104 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Susan    | Starr     | biosusie@gmail.com        | 8315 C J Land         | Pinckney           | MI | 48169 | We went solar in 2011, and have never looked back, or paid another electric Bill! My plug-in solar-gas hybrid car has a 4+ year average of 90 miles per gallon. We are ready, the world is literally dying waiting for everyone else to catch up!                                                                                                                                                                                                                                                                                       |
| Jeanine  | Center    | beadacious18@yahoo.com    | 618 Northside Ave     | Ann Arbor          | MI | 48105 | We're facing an imminent climate change crisis. We may not suffer the greatest effects of the crisis, but unless we shake our addiction to fossil fuels and convert with all possible haste to clean, renewable sources of energy, we are certainly dooming future generations to an unlivable world.                                                                                                                                                                                                                                   |
| Savannah | Lorenz    | savannahlorenz@yahoo.com  | 17009 Adolph          | Fraser             | MI | 48026 | We're looking at a mass decline of natural resources within this lifetime. We cannot dig out more reserves without causing catastrophic and irreversible consequences for the planet, as it will lead to an increase of the average temperature of the planet (global warming). am looking forward to build my future in saving life on this planet. I won't even be given a chance if the environment is in ruins within the next few years. This problem cannot be laid upon the next generation, because there will be no time left. |
| Bart     | Shovein   | shoveinb@yahoo.com        | 22534 E 12 Mile Rd    | Saint Clair Shores | MI | 48081 | What Michigan has done over the last decade concerning renewable energy is a joke.Giving the job to the energy companies was like having the fox watch the chicken coop.The energy companies had to slow down the advancement so they didn't pass the single digit goal.Please stop putting special interests groups ahead of your citizens.                                                                                                                                                                                            |

Will be getting solar and batteries if changes are not made on utilities in Michigan.

With so many options that do not involve risk nor pollution, I think the future is clear before us. Old ways no longer make sense.

With you and all these other rich people on this earth your just sucking the life out of this earth!! I am praying for a change and praying an end to this foolishness!

Yes, our family would love to have renewable energy in northern MI. My son has asthma and allergies.

Please, Please be the forward thinking visionaries our state and our country and our world needs. Thank you, Eileen and John Thorp

You owe it to humanity
