Dear DTE Energy CEO Gerry M. Anderson:  
Cc: Michigan Public Service Commission

As a Michigan resident and utility customer, I'm writing to express my thoughts on DTE Energy's long-term energy plan.

Your plan is unambitious and non-committal and doesn't do nearly enough to grow solar, wind, and energy efficiency throughout the state. And I'm especially disappointed to hear that DTE Energy is still interested in building new fracked gas power plants within the state as they build an 1,100 MW gas plant.

Moving forward with this plan would keep our state dependent on the dirty fuels of the past and leave Michigan families like mine stuck paying for your bad decision for decades -- with our electricity bills and our families' health.

Michigan deserves a clean energy future that will benefit our health, environment, and economy. Solar, wind, and energy efficiency can power our grid, create thousands of jobs, and result in lower bills.

So please leave these fossil fuel plants in the past and instead prioritize solar, wind, and energy efficiency to power Michigan's clean energy future.

Thank you so much for your time.
