Subject: Case # U 20471 - Submission of Public Comment Signatories
Date: Tuesday, December 31, 2019 5:39:11 PM
Attachments: [Petition Signers.csv](#)

Dear Public Service Commissioners,

I am submitting the following list of 1959 residents of Detroit, Highland Park, Hamtramck, and surrounding areas to the docket for Case # U 20471 regarding DTE's integrated resource plan.

The attached signers, who were contacted by phone, believe that DTE's 15-year plan includes too much polluting methane gas and coal and not enough renewable solar energy. This is not only bad for our environment, but also for consumers- as the cost for these dirty energy sources is actually higher. DTE's plans are not safe for our communities. We are calling on the Public Service Commission to support the Work for Me DTE plan for more clean, safe, affordable solar and wind energy, and to follow the ALJ's recommendation to reject DTE's unsafe plan.

Thank you,

--

Jackson Koeppel
Executive Director @ [SouIardarity](#)

Subject: Case # U 20471
Date: Tuesday, December 31, 2019 11:49:45 AM

Dear Michigan Public Service Commissioners,

I am writing to urge you to reject DTE's Integrated Resource Plan proposal, and instead promote health, affordability, and democracy in our communities.

DTE has shown consistently that it creates UNSAFE plans and practices — from downed power lines left exposed in Detroit to raising costs for all residential customers, and especially low-income communities of color, DTE is looking out for it's money before any concern for people. That's why it's your job to hold them accountable.

You need to reject their plan because building gas plants will not make us safer, it will make money for DTE on their pipelines at the expense of the ecosystem, the people who live on the lands disrupted by gas pipelines and ultimately everyone affected by climate change. We need more rooftop solar that is controlled by the community and DTE is getting in the way of that. DTE needs to invest in green energy, which creates more jobs than a gas plant does, and also makes more sense economically because gas plants will be obsolete in a matter of years.

We need a plan that makes rooftop solar more affordable, that puts more affordable energy in the hands of the people and helps prevent shutoffs. We need a plan that uses less methane gas to help stop global warming. We need a plan that centers health, affordability, and democracy in our communities.

Thank you.

Yours sincerely,

Anthony Staley

Farmington Hills, Michigan, 48331, United States

Dear Michigan Public Service Commissioners,

Clean, efficient and renewable energy is now cheaper than coal and natural gas, and it is the future of affordable energy in Michigan.

Michiganders are being crippled with a never-ending series of electricity rate increases by DTE Energy. We pay the highest rates in the Midwest. In the past five years, DTE had the second-highest amount of rate increases in the country. DTE should work harder on guaranteeing access to clean and reliable energy, and less on its guaranteed monopoly profits.

DTE's long-range Integrated Resource Plan will saddle our state for another generation with big, expensive fossil fuel plants, when clean, renewable energy is a feasible and cheaper alternative.

DTE's plan does not invest aggressively enough in solar, wind and energy efficiency. It doesn't do enough to lower electricity costs for Michigan families like mine.

DTE can do better. I urge you to reject DTE Energy's Integrated Resource Plan and ensure the utility company reduces electricity rates for us by investing in more affordable, clean energy sources.

Please help create a wonderful way of living that can ensure health and well being for at least the next 7 generations of children. We are hoping we can all become more responsible for a healthier world here on Mother Earth.

Sincerely,
Kyle Hadley

DTE's long-range Integrated Resource Plan will saddle our state for another generation with big, expensive fossil fuel plants, when clean, renewable energy is a feasible and cheaper alternative.

DTE's plan does not invest aggressively enough in solar, wind and energy efficiency. It doesn't do enough to lower electricity costs for Michigan families like mine.

DTE can do better. I urge you to reject DTE Energy's Integrated Resource Plan and ensure the utility company reduces electricity rates for us by investing in more affordable, clean energy sources.

Sincerely,
Gordon MacDonald

Dear Michigan Public Service Commissioners,

Clean, efficient and renewable energy is now cheaper than coal and natural gas, and it is the future of affordable energy in Michigan.

Michiganders are being crippled with a never-ending series of electricity rate increases by DTE Energy. We pay the highest rates in the Midwest. In the past five years, DTE had the second-highest amount of rate increases in the country. DTE should work harder on guaranteeing access to clean and reliable energy, and less on its guaranteed monopoly profits.

DTE's long-range Integrated Resource Plan will saddle our state for another generation with big, expensive fossil fuel plants, when clean, renewable energy is a feasible and cheaper alternative.

DTE's plan does not invest aggressively enough in solar, wind and energy efficiency. It doesn't do enough to lower electricity costs for Michigan families like mine.
